## I. INTRODUCTION

Southwest Pointe occupies 3,272 acres in the Southwest Truckee Meadows. This property is ideally suited for long-range master planning, which will aid in the protection of the environment, while at the same time facilitating the development of a planned community. The property stretches from the foothills behind the Gaspari Ranch at the north end to a short distance north of the Mt. Rose Highway at the south end, for a total distance of 4 miles. The easternmost portion of the site abuts Thomas Creek Estates, and the entire western boundary is shared with the U. S. Forest Service.

The purpose of this application package is to establish a definitive master plan for the development of Southwest Pointe. To that end, this submittal package includes the following requests:

- a. **Preliminary Development Agreement** based on Article 814 of the Washoe County Development Code.
- b. **Tentative Map for a Common Open Space Development** based on Article 408 of the Development Code.
- c. **Special Use Permits** for utility services (e.g., water storage tanks), a neighborhood commercial center, child care (either large-family daycare or child daycare), and commercial outdoor sports and recreation (i.e., golf courses, maintenance area, driving range, tennis courts, swimming pool, and club house).
- d. **Administrative Permit** for a commercial stable based on Article 304 of the Development Code.
- e. **Review as a Project of Regional Significance.**

## II. PROJECT DESCRIPTION

### Setting

Southwest Pointe is located on a prominent site overlooking the Truckee Meadows. Every portion of the property has unobstructed views, and the entire project has been laid out to maximize these views. Both Thomas and Dry Creeks cross the property, and the concept plan takes these two prominent features into account. There is some riparian vegetation along Thomas Creek but a majority of the site is covered with moderate to dense stands of bitterbrush and sagebrush and thinly scattered field grass and alfalfa.

As shown in Figure 2-1, the property is bounded by the Toiyabe National Forest to the west, Thomas Creek along the south, and the established neighborhoods of Thomas Creek Estates and Saddlehorn to the southeast and east. Elevations range from approximately 4,950 feet along the eastern portion of the site to 5,900 feet on the west. The property slopes in a southwest to northeast direction with slopes generally ranging from 5 to 15 percent. Moderately steep slopes, generally between 15 and 30 percent, are found at the northern end of the site.

The property is traversed by several unpaved, four-wheel drive roads that provide access to the Toiyabe National Forest and to the well and tank sites developed by the Washoe County Utility Division. There is also a 120 kilovolt transmission line that crosses through the middle of the property in a north-south direction. Additionally, the South Truckee Meadows General Improvement District has constructed two, 750,000 gallon water storage tanks and a well on a 2-acre site in the northwestern quarter of Section 26. Other than these improvements the property is vacant.

Figure 2-1  
Vicinity Map

## Concept Plan

Planning Approach and Analysis - The concept plan for Southwest Pointe is based on a planning approach that analyzes the constraints and opportunities of the property to identify the most appropriate development areas. Site characteristics, including topography, geology, flora and fauna, drainage, view sheds, access points, and easements were mapped and overlaid. In addition, surrounding land uses and jurisdictional regulations were considered.

The topography is steep and mountainous along the western boundary and in the "panhandle" to the north. Remaining portions of the site are characterized by gently and moderately sloping terrain with slopes ranging between 5 and 15 percent. These terrain features create panoramic views of downtown Reno and the Southeast Truckee Meadows from nearly every portion of the site.

A number of Holocene faults cross the property, generally running in a north-south direction. These faults define corridors within which development was planned.

Two major drainages traverse the property -- Thomas Creek along the southern and eastern edge and Dry Creek through the western and north central portions of the land. Some sections of the creeks are bordered by riparian wetlands and, therefore, setbacks for development are required. These riparian corridors are generally not visible from most portions of the property; however, these corridors are among the most scenic areas of the property.

The winter range for the Loyalton-Truckee deer herd covers the "panhandle" and the north central portions of the site. Some residential and golf course development is proposed within the winter range; however, there is also a significant amount of acreage left as open space.

An easement for a 120 kilovolt electrical transmission line bisects the property in a north/south direction. Water tanks and access easements are found in the southeastern corner and along the southeastern property line. The water tanks create a negative visual impact and the power line easement is a visual and physical barrier to development.

Access to the property is via the extensions of Zolezzi and Whites Creek Lanes. No connection with the Mt. Rose Highway or surrounding local streets is contemplated.

Land use designations are discussed in Chapter 6, Planning Analysis, and indicate a lessening of residential density from east to west across the property. The master plan for this park district anticipates trails along Thomas Creek for access to the Mt. Rose Crest Trail and around the northern portion of the project for access to the Mackay Fair Flume Trail and the U.S. Forest Service parcel in Section 11.

**Planning Concepts** - Blending the constraints and opportunities analysis with the allowable lot count of 1,090 dwelling units and the development program, which calls for 36 holes of golf, the following design objectives were formulated and implemented in the concept plan:

- Provide significant natural open space buffers around the periphery of the project to preserve the visual and physical environment of surrounding residents and to focus the views from within the property.
- Preserve the Thomas Creek and Dry Creek corridors and use creek edges, where feasible, for golf course fairways and for visual amenities from lots.
- Distribute land uses so that the progression from the property boundaries inward is from open space, to golf or large lots, to smaller lots, to the Village Center.
- Remain consistent with the intent of the Southwest Truckee Meadows Area Plan. Set aside a location for the civic uses proposed in the Area Plan -- schools, neighborhood park, regional trails, trail head, and a fire station.
- Create a major community entrance at the extension of Zolezzi Lane and a secondary community entrance at Whites Creek Lane with signage,

monumentation, special paving, and landscaping. Integrate the bridge structures across Thomas Creek with the community entrance features.

- Use the earthquake faults and associated building setbacks, wherever practical, as golf course fairways, road right-of-ways, and open space.
- Establish a rural golf course community theme by locating golf course fairways, open space, and larger lots adjacent to collector roads by using smaller paved road sections, by creating neighborhood enclaves, and by controlling development through comprehensive design standards.
- Develop a mix of lot sizes ranging from approximately 45 percent one acre and large lots, 15 percent 1/2 acre lots, and 40 percent with a minimum size of 12,000 square feet. Primary lot orientation should be to the golf courses and/or the northeastern views.
- Locate the first phases of development east of the power line easement and west of Thomas Creek. Subsequent phases are generally west of the power line easement.

**Elements of the Community** - As shown on the Concept Plan on the following page, the land use pattern clusters residential neighborhoods within enclaves created by the golf course fairways and the two major loop roads. Both the fairways and the roads are located to maximize the use of the earthquake faults. All edges of the proposed development reserve substantial areas of natural open space, ranging from the entire "panhandle" to a minimum of 500 feet to the nearest existing lot. The average distance to existing lots outside Southwest Pointe is 1,500 feet.

Two loop roads provide access to the three phases of the project. The primary loop enters the property as an extension of Zolezzi Lane. From this main entry point, the road proceeds westward to the Village Center and south towards Whites Creek Lane and the second project entrance. The secondary loop road connects to the primary loop road below the driving range and the Village Center. It then proceeds westward toward Dry Creek and serves as the main

circulation route in Phases II and III. From these two loop roads, 19 neighborhoods and the Village Center (clubhouse and retail/service uses) are served. Identity entry points will be established for each neighborhood with special signage, monumentation, and landscaping.

A bridge crossing Thomas Creek, special signage, monumentation, and landscape treatment will create the primary entry at Zolezzi Lane. Entering Southwest Pointe, the views will be of open space, the equestrian center on the right, golf course fairways, the Village Center, and the mountain back drop. The first neighborhood entry is found to the south between two golf holes and leads to one-acre lots (Neighborhood A). Proceeding westward on the primary loop road, vistas are across golf fairways, the driving range, and toward the Village Center, which is placed at the confluence of eight golf holes and has panoramic views of downtown Reno.

As the loop road turns southward past the entrance to the Village Center, a view corridor (3,200 feet in length) is created by the golf course. The second neighborhood entrance occurs to the east and introduces a neighborhood of 12,000 square foot lots (Neighborhood H). This neighborhood contains an internal landscaped open space system to provide an amenity for lots that do not front the golf course fairways. Further to the south, the second entry to Neighborhood H coincides with the entry for Neighborhood G to the west. Neighborhood G is composed of 1/2-acre lots. The internal road system connects through the golf course to Neighborhood F, which is an area of similar lot size.

Proceeding eastward to the secondary community entry at Whites Creek Lane, the loop road passes the entry to Neighborhood B before crossing Thomas Creek. The civic uses are clustered at this entrance. The remaining neighborhoods in Phase I (Neighborhoods C, D, and E) consist of 1-acre lots.

The secondary loop road serves the five neighborhoods in Phase II and the six neighborhoods in Phase III. The visual experience moving through the developed areas is focused up and down the golf course fairways with the mountain back drop and defined by neighborhood entry points and golf fairway crossings.

Each phase has a mixture of the three lot sizes -- 12,000 square feet, 1/2 acre, and 1 acre and larger. Land uses by phase are presented in Table 2-1.

Table 2-1  
**Land Use Summary**  
 (acres)

<u>Land Use</u>	<u>Phase I</u>	<u>Phase II</u>	<u>Phase III</u>	<u>Total Acreage</u>
Residential	268	147	538	953(29%)
Golf Course, Roads, and Common Area	266	183	220	669(21%)
Civic Uses	48	0	0	48( 1%)
Village Center inc. Driv. Range	27	0	0	27( 1%)
Open Space	<u>621</u>	<u>361</u>	<u>593</u>	<u>1,575 (48%)</u>
<b>TOTAL</b>	<b>1,230</b>	<b>691</b>	<b>1,351</b>	<b>3,272 (100%)</b>

**Village Center** - The Village Center is centrally located in the community to serve the needs of the two golf courses and the future residents. This 9-acre center is planned to contain a clubhouse (minimum floor area: 15,000 square feet) and a neighborhood commercial center (minimum floor area ranging from 15,000-20,000 square feet). The driving range is adjacent to the village center and encompasses approximately 18 acres. As a gathering place for the community and a destination for golfers, the Village Center will be created by a cluster of pavilions linked to the clubhouse by protected walks and trellises. The pavilions will house uses such as a country store, day care, real estate office, and similar neighborhood uses. (Refer to Figures 2-2 and 2-3.)

**Development Program**

The project will be developed in three phases. Phase I includes a tentative map for 410 lots, an 18-hole golf course, the Village Center, driving range. Construction of the golf course and the driving range will commence

Figure 2-2  
**Clubhouse & Village Center**

N.T.S.

Figure 2-3

# Conceptual Site Plan For Village Center

simultaneously with recordation of the first final maps for the subdivision. Within the village center, construction of the club house will start after the golf course is open. Temporary facilities will be used until the clubhouse is completed. The neighborhood commercial uses are within the Village Center and, therefore, included in Phase I. Actual construction of the commercial uses will, however, probably not occur until a later phase because there will not be enough residents to support these uses until that time.

Phase II will include an additional 9 holes of golf, the equestrian center and a tentative map for approximately 230 lots. Phase III includes the remaining 450 lots and the last 9 holes of golf.

The open space will be distributed among all three phases to maintain a density of 0.3 dwelling units per acre. The amount of acreage designated open space (approximately 1,575 acres) may vary minimally up or down with subsequent tentative maps. However, the number of lots allowed on this property (1,090) remains constant and is consistent with the Southwest Truckee Meadows Area Plan.

Various civic uses are also shown on the concept plan. These include an elementary school, middle school, fire station, neighborhood park, trail head, and regional trails. (These facilities are discussed in detail in Chapter 5, Infrastructure/Services.) The Washoe County School District will be responsible for construction of the elementary and middle schools. The timing for the middle school is unknown, but the District hopes to have the elementary school open in September 1995. Construction of the fire station will be the responsibility of the Nevada Division of Forestry (NDF); however, it is possible that the Truckee Meadows Fire Protection District will also be involved in the construction and operation of the station since the location could serve both NDF and Truckee Meadows. The Washoe County Department of Parks and Recreation will be responsible for developing the trail head and trails. To construct the neighborhood park, the developers hope to enter into an agreement with Washoe County whereby the developer will construct the recreational facilities in the park and then be reimbursed by Washoe County from fees collected in Southwest Pointe the Residential Construction Tax.

## Schedule

Approval of this application for a preliminary development agreement does not authorize development or the issuance of any building permits. A final development agreement must be recorded prior to commencing development. A draft of the final development agreement, for all or a portion of the project, will be submitted to Washoe County within 6 months of BCC approval of the preliminary development agreement. Staff will have two months to prepare their comments on the draft final agreement. After receiving the staff comments, the final development agreement will be submitted to Washoe County for approval within 3 months. Upon recordation, the development agreement binds all parties and their successors in interest for the duration of the agreement.

It is anticipated that construction of this project will occur over a 15-year period. Therefore, the duration of the development agreement should also be for 15 years. Section 110.814.95 of the Development Code states that amendments to the development agreement can be approved by the BCC if the amendment is consistent with the Comprehensive Plan. Should market conditions or other unforeseen delays necessitate a longer time period for construction, it would be necessary for the property owner to initiate an amendment to the agreement.

A tentative map for the lots within Phase II will be filed within 5 years and for the lots in Phase III within 10 years. The tentative maps for these phases will comply with the lot sizes and density shown on the concept plan.

### III. DESIGN GUIDELINES

This chapter outlines design guidelines and standards that will apply to Southwest Pointe. These Guidelines are intended to provide the county and the residents in the Southwest Truckee Meadows with a feeling for the type of development being proposed. Another purpose is to help prospective architects, designers, builders, and owners create residences that will fit within a defined architectural character. The Guidelines included in this chapter will serve as the basis for more detailed design standards that will be prepared for the final development agreement.

These Guidelines, along with the provisions that will be set forth in the Southwest Pointe CC&Rs, form the basis for evaluation of all drawings and specifications for construction submitted to the Architectural and Landscape Control Committee (ALCC) for review and approval, including any additions and modifications. Any items or issues not addressed in the governing instruments for this community are matters left to the discretionary judgment of the ALCC acting in good faith on behalf of the best interests of the homeowners as a whole. The ALCC may, at its discretion, amend the Guidelines from time to time for the purpose of more fully describing their original intention. The Guidelines, however, are not meant to duplicate or supersede the requirements of Washoe County. Home plans will need to be processed through Washoe County and appropriate public agencies as well as through the ALCC.

#### Design Philosophy

Southwest Pointe is set in the context of a rugged mountain backdrop and sagebrush covered slopes that are punctuated by Thomas and Dry Creeks. To those natural conditions have been added two 18-hole golf courses with residential neighborhoods clustered within the golf course fairways. The residential components of the community are intended to blend harmoniously and aesthetically with the natural environment.

Community Design Theme - The Guidelines seek to establish a community-wide theme for Southwest Pointe that transcends individual property boundaries. The underlying design concept emphasizes the scenic natural beauty and a refined image that harmonizes with the natural setting.

Architectural Design Theme - The intent is to encourage a variety of residential styles and diversity within a regional architectural expression and to blend the residences with the natural and created landscape environment. These Guidelines allow design latitude and flexibility, while insuring that the value of property will be enhanced through the control of site planning, architecture, and landscaping elements. Creativity in these areas will successfully integrate the residential sites with the golf course and natural site features to ensure a pleasant, cohesive community. The Design Guidelines will be used to review each builder's proposal for conformance with the overall community objectives.

Landscape Design Theme - Landscaping will play a significant role in establishing the character of Southwest Pointe. The open space system responds to site conditions and creates a visual framework for the entire project. Neighborhood entries and roadway landscaping will enhance the street circulation pattern and intersections to establish a "sense of place" within Southwest Pointe. Also contributing to the overall community identity are other landscape elements such as walls, fences, lighting, signage, and paving.

In addition to providing exciting and challenging play, the golf courses have been carefully situated along the creeks, adjacent to major roads, and routed to take advantage of the panoramic views from the property. Utilizing concepts from the traditions of golf, the courses have been planned to incorporate manicured lawns for the tees, fairways, and greens. Transition landscaping will enhance the beauty of the adjacent native vegetation through contrasts in color and texture. Through careful planning, the golf courses and the entire Southwest Pointe community have been gently blended into the natural environment.

## Community Design Guidelines

Community Entrances - Residents and guests will arrive at the main entrances at the edges of the community along Zolezzi Lane and Whites Creek Lane. (Refer to Figures 3-1 and 3-2.) The landscape elements, monumentation, and lighting will create a theme that reflects both the natural setting and the relaxed sophistication that characterizes Southwest Pointe. The entrances will include indigenous rock, deciduous trees, perennials, and shrubs. Periodically, a low split rail fence will meander through the clustered landscaped areas. These elements will be designed to focus the entry experience towards views of the clubhouse, the golf course, and the natural environs. Each neighborhood will be identified with signage, monumentation, and lighting consistent with the community entrance theme.

Bridges - Bridges will use indigenous rock, heavy rails, and an overall simple design. (Refer to Figure 3-3.) Culverts will be sensitively designed and placed to minimize creek bed disturbances and to allow unimpeded flow.

Fencing - There will only be two types of community fencing in Southwest Pointe. The first will be a low decorative split rail design either with or without native stone pilasters. (Refer to Figures 3-4 and 3-5.) The second is a higher solid wood fence with native stone pilasters which will provide a visual screen and will only be allowed in certain areas of the development. Use of these fences will be strictly controlled to preserve the open and rural community theme.

Signs - Street signs will be accomplished in a variety of attractive and creative ways. Signs will be mounted on specially designed posts, consistent with overall community design themes. Community and neighborhood signs will be integrated with entry monoliths.

Lighting - Lighting will be provided with landscape uplights on vegetation and pedestrian-scale bollards. Where necessary, along roadways and at intersections, lighting levels will be no more than absolutely required to perform the task for which it is intended (e.g., ambiance, safety). In most

## Architectural Design Guidelines

The intent of the Guidelines is to establish a continuity of high quality residential design through the creative use of architectural elements which respond to climate, function, and natural setting. These Guidelines define the materials, colors, forms, and elements that can be used to implement the architectural theme in the residential areas.

The ALCC is the guiding body for determining the quality, integrity, and completeness of design as it relates to the Design Guidelines. Architects, designers, builders, and owners are encouraged to work closely with the Committee realizing the Guidelines are for everyone's benefit and that the ALCC is the sole interpreter of the Guidelines. To ensure high standards, owners are required to employ a designer or architect licensed in the State of Nevada.

**Minimum Lot Width** - All residential lots shall comply with the following minimum average width requirements: 1 acre and larger lot, 150 feet; 1/2 acre lots, 100 feet; and 12,000 square foot lots, 80 feet.

**Setback and Yard Dimensions**- Each residential lot will have building setbacks that define where and how structures can be built. The underlying objective is to encourage articulated building forms, one- and two-story massing, unobstructed views, privacy, and varied setback on the street, golf course, and between residences.

The minimum setback and yard dimensions are described below:

<u>Lot Size</u>	<u>Front Yard</u>	<u>Side Yard</u>	<u>Back Yard</u>
1 acre +	30'	12'	30'
1/2 acre	25'*	10'	20'
12,000 sq. ft.	20'	8'	20'

\* Reduced to 20' with detached or side-entry garage.

Projections, such as chimneys, covered and not enclosed porches, decks, roof overhangs, fences, canopies, eaves, or other similar architectural features may extend into a required side, front, or back yard setback not to exceed 2 feet. Some lots may have varying setbacks which relate to unusual property features and geometry, and these will be specified by the ALCC.

**Height** - The maximum height of any structure in Southwest Pointe shall not exceed 35 feet measured from the average grade of the building footprint to the highest roof ridge. Two stories is the maximum building mass. It is the intent of the height standard to encourage both one- and two-story massing on uphill and downhill sides of structures and to design units which have elements that come to one story plates at all edges.

Upsloping lots, viewed from the front from a lower elevation, should provide one story elements to diminish the verticality of any second story elements. Down sloping lots, viewed from the rear from a lower elevation, should provide one story elements to the rear to prevent a high profiled wall against the skyline. Any exposed foundation or retaining wall shall be adequately treated in a manner consistent with the architectural character of the home so as not to show exposed masonry block or wall.

**Grading** - The individual lot purchaser or builder will present drawings to the ALCC for review that are creative and sensitive as to the individual footprint, setting on the lot, and natural grade. The builder/architect is encouraged to utilize stepped level and/or raised deck and retaining wall techniques in his/her design to minimize the amount of grading on each lot. This same concept should be carried forth in the design of the hardscape and landscape areas adjacent to the building structure. Every effort should be made to achieve a final design which fits the shape of the lot and the land around it.

All graded slopes shall be contoured and rounded on the top sections, manufactured slopes shall be undulated and the gradient varied, where appropriate, to meet existing contours.

Existing drainage patterns are to be maintained where possible and modified as little as possible. Each individual lot purchaser must be prepared to accept drainage from all upstream lots and pass it through to lots downstream in areas where surface waters are not directed to public streets or natural drainage.

**Garages** - Side entry, motor court, and detached garage arrangements are encouraged to reduce the visual impact of garage doors. Houses designed with four or more bedrooms must have at least a three car garage. All others shall have minimum two car garages.

**Pool and Spas** - Pools, spas, and hot tubs shall be designed so as to minimize the impact to adjacent properties with light or sound. Pool heaters and pumping equipment must be screened from view and sound proofed. Pool fencing should be integral with design of pool or spa areas. Transparent fencing is preferred. Fencing must blend with the residential architecture.

**Form, Mass and Proportions** - The Southwest Pointe architectural theme encourages the use of design interpretations that achieve:

- Simple, bold, roof dominated forms.
- Articulation of wall planes.
- Combinations of one- and two-story stepped massing.
- Unpretentious detailing (not ornate).
- Shadow and depth through the use of recesses and projections.
- Subtle and consistent use of textured surfaces with natural stone and wood materials and earthtone colors.
- A blending of indoor and outdoor living spaces and climate sensitivity through the use of porches, trellises, patios and landscaping.

**Building Materials** - The design elements of a structure shall be compatible with and complimentary to each other and make consistent use of building materials. Exterior treatments shall be consistently detailed around the entire house. Simulated or artificial building materials shall not be approved. False

brick, stone, and plywood siding, for instance, will not be approved. This applies to all structures, landscape, walls, etc. Where more than one wall material is used, they must be architecturally related.

Acceptable exterior materials are wood siding or shingles, stone (natural field stone, cut granite, random field stone or river rock), stucco, and masonry. Stucco shall be of a construction and material composition that eliminates cracking and the use of heavy textures is discouraged. Use of wood shingles may be restricted on some lots by the Nevada Division of Forestry.

Different materials must meet at logical junctions and the change in wall materials should reflect a consistent approach on all facades of the building (wainscoting, wall recesses or projections, pilasters, window bays, etc.). For example, masonry piers or masonry which wraps around structures is permissible whereas one sided "skirt fronting" will not be approved. Wood siding should be carried down to within six inches of the finished ground line to eliminate the need for introducing additional materials at the foundation. Stone should be carried to below ground level to ensure proper appearance.

**Paving Materials** - Flat paved areas may be concrete, stone, exposed aggregate concrete, stamped concrete, stone pavers, brick, or paving blocks. Asphalt paving is acceptable for driveways.

**Colors** - Harmonies of color will be required, and color intensity must be kept low for large surfaces. Exterior building wall colors should be consistent with the architectural character of the structure using earth tones with accents for windows, shutters, and doors. Fascia and corner boards are appropriate. No exterior materials shall have a high gloss or reflective/glare finish, and bright colors are discouraged. Exterior hardscape colors should be complimentary to exterior house colors.

**Roofs** - Hip, gable, and shed roofs are all acceptable forms. Roof slopes should have four feet or more of vertical rise for every twelve feet of horizontal run,

except on porch elements. Combining one- and two-story elements, creating jogs in ridgeline and varying plate heights and ridge heights, are encouraged.

Where horizontal styles are used, long overhangs should be used to protect both windows and walls from sun and rain and to avoid the need for gutters and downspouts. Eave lines should be extended as low as possible and earth berms can be used to reduce the overall height of the exterior.

Slate, approved simulated slate, tile, fire treated wood shake or shingle, and concrete shingles will be allowed. Metal roofs must be approved on a case-by-case basis by the ALCC. All roofing materials must be approved by the Nevada Division of Forestry. Only subtle blends of roof color will be accepted.

**Openings** - The location and proportionality of windows and doors to exterior surfaces will be carefully considered by the ALCC for each elevation of the proposed structure. The style of window and door is required to be consistent on all elevations of the proposed structures. Windows and doors should be grouped to emphasize the horizontal. Gabled windows with pot shelves, bay windows with shutters, and windows to follow roof pitch are consistent with the architectural theme.

Wood, brick, and stone columns, pot shelves, box and bay windows, heavy wood beams, deep overhangs, and porch elements should be used to emphasize and give depth to windows and doors. Wood and wood clad windows, doors, and frames are encouraged. Window and door glazing shall be clear, solar bronze, or gray only and shall be non-reflective.

**Fences and Walls** - The master fencing concept for Southwest Pointe uses split rail to portray a rural theme, to identify boundaries of the community, and to control vehicular traffic at golf course and open space areas. Aside from developer-installed common area fencing, private property line fencing is discouraged. Rather, the emphasis is on homes sensitively placed into the environment where groves of trees and vegetation are emphasized to define private spaces.

Where free-standing screens and fences are necessitated to insure privacy or enclose a pool area, the fence design should: (1) create the sense of and separation of privacy, (2) frame the maximum panoramic view possible, and (3) become an extension of the architecture that creates outdoor spaces and integrates the landscape with the architecture.

Free-standing walls and fences should be integrated into the design of the structure to which they are attached. They should be of identical material and color and appear to be an extension of the wall of the structure. All exposed surfaces should be finished.

Special consideration shall be taken when installing walls so not to obstruct views from adjacent homes. Any privacy walls and fences will be installed by the homeowner or builder and maintained by the homeowner.

**Porches & Balconies** - Porches are consistent with the Southwest Pointe architectural themes and should be used in front and back yards or entries to integrate the outdoors with the indoors. The incorporation of balconies onto or within the building form is encouraged for both practical and aesthetic value. Balconies should be integrated to break up large wall masses, offset floor setbacks, and add human scale to the building.

**Accessory Structures** - Detached garages, outbuildings, patio structures, sun shades, trellises, terraces, and other appurtenant improvements shall be designed with an architectural character which is compatible with that of the main structure on the lot in terms of colors, material, and format. Shade, patio, and garden structures should be constructed of materials of a permanent nature which are the same as those used on the main structure.

**Antennas** - All antennas are restricted to the attic or interior of the residence. It is mandatory that all homes be pre-wired to accommodate cable reception. Satellite "dish" antennas are allowed only if adequately screened and not visible from surrounding areas.

**Meters and Mechanical Equipment** - Meter locations are to be designed into the architecture and screened from view. All air conditioning, heating equipment, etc. must be screened from view and insulated for sound attenuation. Air conditioning units are not permitted on roofs.

**Sheet Metal and Skylights** - All flashing, sheet metal, vent stacks, and pipes must be colored to match the material which they are attached to or project from.

Skylights are to be designed as an integral part of the roof. Skylight glazing shall be clear, solar, bronze, or gray only. Skylight framing material shall be translucent, bronze, anodized, or colored to match adjacent roof material.

**Solar Equipment** - Solar equipment is encouraged but cannot be roof mounted. All solar designs must be ground mounted and screened as approved by the ALCC.

**Service Areas** - Due to the unsightliness and noisiness of mechanical equipment of all kinds, all such items shall be either incorporated into the house design as mechanical rooms and enclosures or shall be contained within a solid walled and gated area designed to match the house in both character and materials. Landscape screens are not acceptable. The minimum height of these enclosures shall be six feet. It is recommended that they be located inside parking courts, as extensions of garages, or integrated into perimeter wall design.

The interior of these service areas shall not be visible. These areas shall contain but not be limited to the storage and location of trash, firewood, maintenance tools, pool equipment, heating and ventilating equipment, irrigation and mechanical equipment, antenna dishes, and ground-mounted solar panels.

**Exterior Lighting** - Homeowners are encouraged to utilize landscape lighting -- to subtly highlight unique architectural features, trees, and focal landscape areas. Lighting levels should also be provided which insure safe passage along walks to building entrys. Lighting of patio and deck areas to provide for nighttime usage is also encouraged.

Landscape lighting should be integrated into the overall design of the site. Downlights can be recessed into arbors and soffits. Ground mounted landscape bollards may also be used. Pole lights and monoliths with lights greater than 48 inches in height are not allowed. Light sources should not be directly visible. Light trespass and glare onto adjacent properties is prohibited. Lighting should highlight special features and use areas rather than a uniform glow across the property.

**Exterior Signs** - Exterior signs other than house numbers are prohibited. During construction or sale, one approved construction/sales sign may be placed in front of each home.

**Energy Conservation** - All residential units shall include site design and building design or construction features and devices which are capable of conserving energy. Measures encouraged in the design of all residential structures are:

- Double glazing
- Size and placement of windows and other major openings shall take into account prevailing breezes during the summer season and protection from stronger winds during the winter season.
- Appropriate design features to deflect sunlight or allow it to enter the residence, depending on seasonal needs.
- Strategically locate and select plant materials in areas adjacent to the residence to reduce temperature buildup and sun penetration during the summer season.

## Landscape Design Guidelines

These landscape design guidelines are intended to enhance the character and quality of the community established by the architectural guidelines. The streetscape planting creates softly landscaped edges to the road through the residential areas. The vegetation has been opened up to allow framed views into the golf course and open space areas.

For the protection and preservation of property values, the CC&Rs empower the ALCC to establish rules and regulations and authorizes them to enforce those rules. The following guidelines have been created to provide owners, architects, designers, and landscapers a reference point from which to develop their individual plans. These guidelines may be amended from time to time, so it is recommended that a current set be obtained prior to commencing design.

### General Guidelines

- All plant materials selected should be suitable for the climate, soil conditions, and theme of the community. (Refer to Table 3-1 which includes a list of recommended plants.)
- Landscape planting palettes should be simple and kept to a limited number of plant materials.
- Plantings should be done in masses or groupings of a single species to avoid complexity.
- Landscape plantings should provide for effective screening of parking areas, utility enclosures, or any visually undesirable element or structure.
- Planting selections should strive to maximize color during all four seasons.
- All landscaped areas must have an automatic irrigation system, preferably designed by a Landscape Architect or irrigation consultant to ensure efficient water usage.
- Group plants with similar water requirements.

## Front Yard Landscaping

- "Gravel gardens" are prohibited.
- All visible areas of yard not hardscaped must be landscaped in some acceptable form.
- Front yards shall be planted with a combination of trees, shrubs, and ground cover or lawn. All lawns shall be sodded.
- At least five trees shall be planted per front yard on 1-acre lots, three trees per front yard on 1/2-acre lots, and 2 trees per front yard on 12,000 square foot lots. Groupings of vertical trees are encouraged.
- Trees in front yards should be planted a minimum of 5 feet away from structures and paved surfaces.
- Front yards are to be irrigated with permanent underground automatic systems.
- The use of moisture sensor devices is encouraged.
- Driveways and walkways can be textured paving, stone, patterned concrete, or asphalt.
- Homeowners are encouraged to use indigenous grasses.

## Side and Rear Yard Landscaping

- Side yard planting is encouraged to create a sense of privacy between adjacent homes.
- Rear yard planting can provide shade and privacy, define outdoor spaces and frame views. Care must be taken, however, in planting trees and tall shrubs so as not to obstruct views from adjacent lots to the golf course and mountains. Final placement of all rear yard trees is subject to approval by the ALCC.

**Boulders** - The use of native rock clusters and terraces is encouraged. Planting between the rocks and careful rock placement can result in a very natural aesthetic effect. Rocks should be firmly placed and look permanent rather than in a precarious position. Some general rules for rock placement are:

- Use indigenous stone.
- Use large rocks and boulders rather than “head size” stones. Smaller stones improperly placed can result in a “rubble pile” look.
- Set the rock 30 percent into the ground plane, this will make the rock appear more settled and natural.
- When stacking rock, place larger rocks on the bottom - to work against gravity is very unsettling visually.
- Group rocks - rocks in clusters of varying sizes will appear more natural than stones spotted around without a relationship to each other.
- Plant in and around the rock clusters, this will help soften the edges of the “pile”.

## IV. ENVIRONMENTAL FEATURES

### Topography

Elevations on the 3,272-acre site range from 5,900 feet near the southwest corner of the property to 4,950 at the eastern edge of the site. There are several natural drainages crossing the property, with the most prominent being Thomas and Dry Creeks.

As shown on the slope analysis in Figure 4-1, the steepest slopes are located at the northwest end of the property. In this area, the slopes generally exceed 15 percent, and therefore, this area is shown as permanent open space. The only disturbance contemplated is an extension of the trail system. Slopes in excess of 15 percent are found in sporadic locations along Thomas Creek, and, again, no development is proposed.

Throughout the majority of the site, the property is characterized by gently and moderately sloping terrain with slopes ranging between 5 to 15 percent. The development is concentrated in this area because it represents the best slope development conditions. However, it should be noted that a considerable amount of this area has also been left as permanent open space.

### Geology and Soils

Harding Lawson Associates conducted a geotechnical investigation (soil and fault investigation) within Phase I of Southwest Pointe. The following summarizes the major items of importance from their report, which is included in its entirety in Appendix D.

- Eleven faults were located and dated as Holocene age. (Refer to Plate 1 of Appendix D for locations and Table 3 of Appendix D for the required setback distance for residential homes and structures from each fault.) Figure 4-2 shows the fault information available from both Harding Lawson and the Bureau of Mines and Geology. Holocene-age faults in Phase I were

Figure 4-2

- a major consideration in laying out the tentative map. The location of all Holocene-age faults has been surveyed, and the tentative map places all such faults in the golf course, roads, or common areas.
- Foundations for residential buildings should be bottomed on native, undisturbed dense to very dense granular soils or engineered fill compacted to at least 90 percent relative compaction (ASTM D 1557-85). Footings should not be bottomed on a combination of native and engineered fill soils due to differential settlement concerns. Maximum allowable soil bearing pressure for footings placed, as described above, is 2000 pounds per square foot.
- Numerous cobbles and boulders (diameter  $\leq$  4 feet) are scattered at the surface across the site.
- Partially cemented to cemented, medium dense to very dense poorly graded sand with silt, gravel, cobbles, and boulders (diameter  $\leq$  3 feet) were encountered throughout the site at depths ranging from one foot to the depth explored in each test pit (maximum 7 feet). The percentage of gravel, cobbles, and boulders (by volume) at each test pit varied but was as high as 40 to 50 percent gravel, 30 to 40 percent cobbles (diameter 3" to 12"), and 5 to 10 percent boulders (diameter 12" to 3'). The partially cemented to cemented sand was very difficult to excavate with a Case 580K backhoe which encountered refusal at several test pit locations. Harding Lawson recommends that contractors pothole various locations on site to determine the suitable heavy equipment necessary to excavate.
- Preliminary pavement structural section thicknesses are as follows: Local streets - 3" asphalt concrete (A.C.) over 6.5" Type 2, Class B aggregate base; Two lane collector - 4.0" A.C., over 7.5" Type 2, Class B aggregate base.
- Native, desiccated, moderately to highly expansive fat clay soils were encountered at various test pit locations throughout the site to depths of approximately 3 feet (maximum). The fat clay soils should be removed

from beneath proposed footings, pavement areas, and concrete slabs (i.e., house, garage, driveway, sidewalk, patio).

### Vegetation

This east-side Sierra site is at an average elevation of approximately 5,400 feet and is characterized by upland, sagebrush vegetation. The site is covered with moderate to dense stands of bitterbrush and sagebrush and thinly scattered field grass and alfalfa. There is some riparian vegetation, primarily willows and cottonwoods, along Thomas Creek.

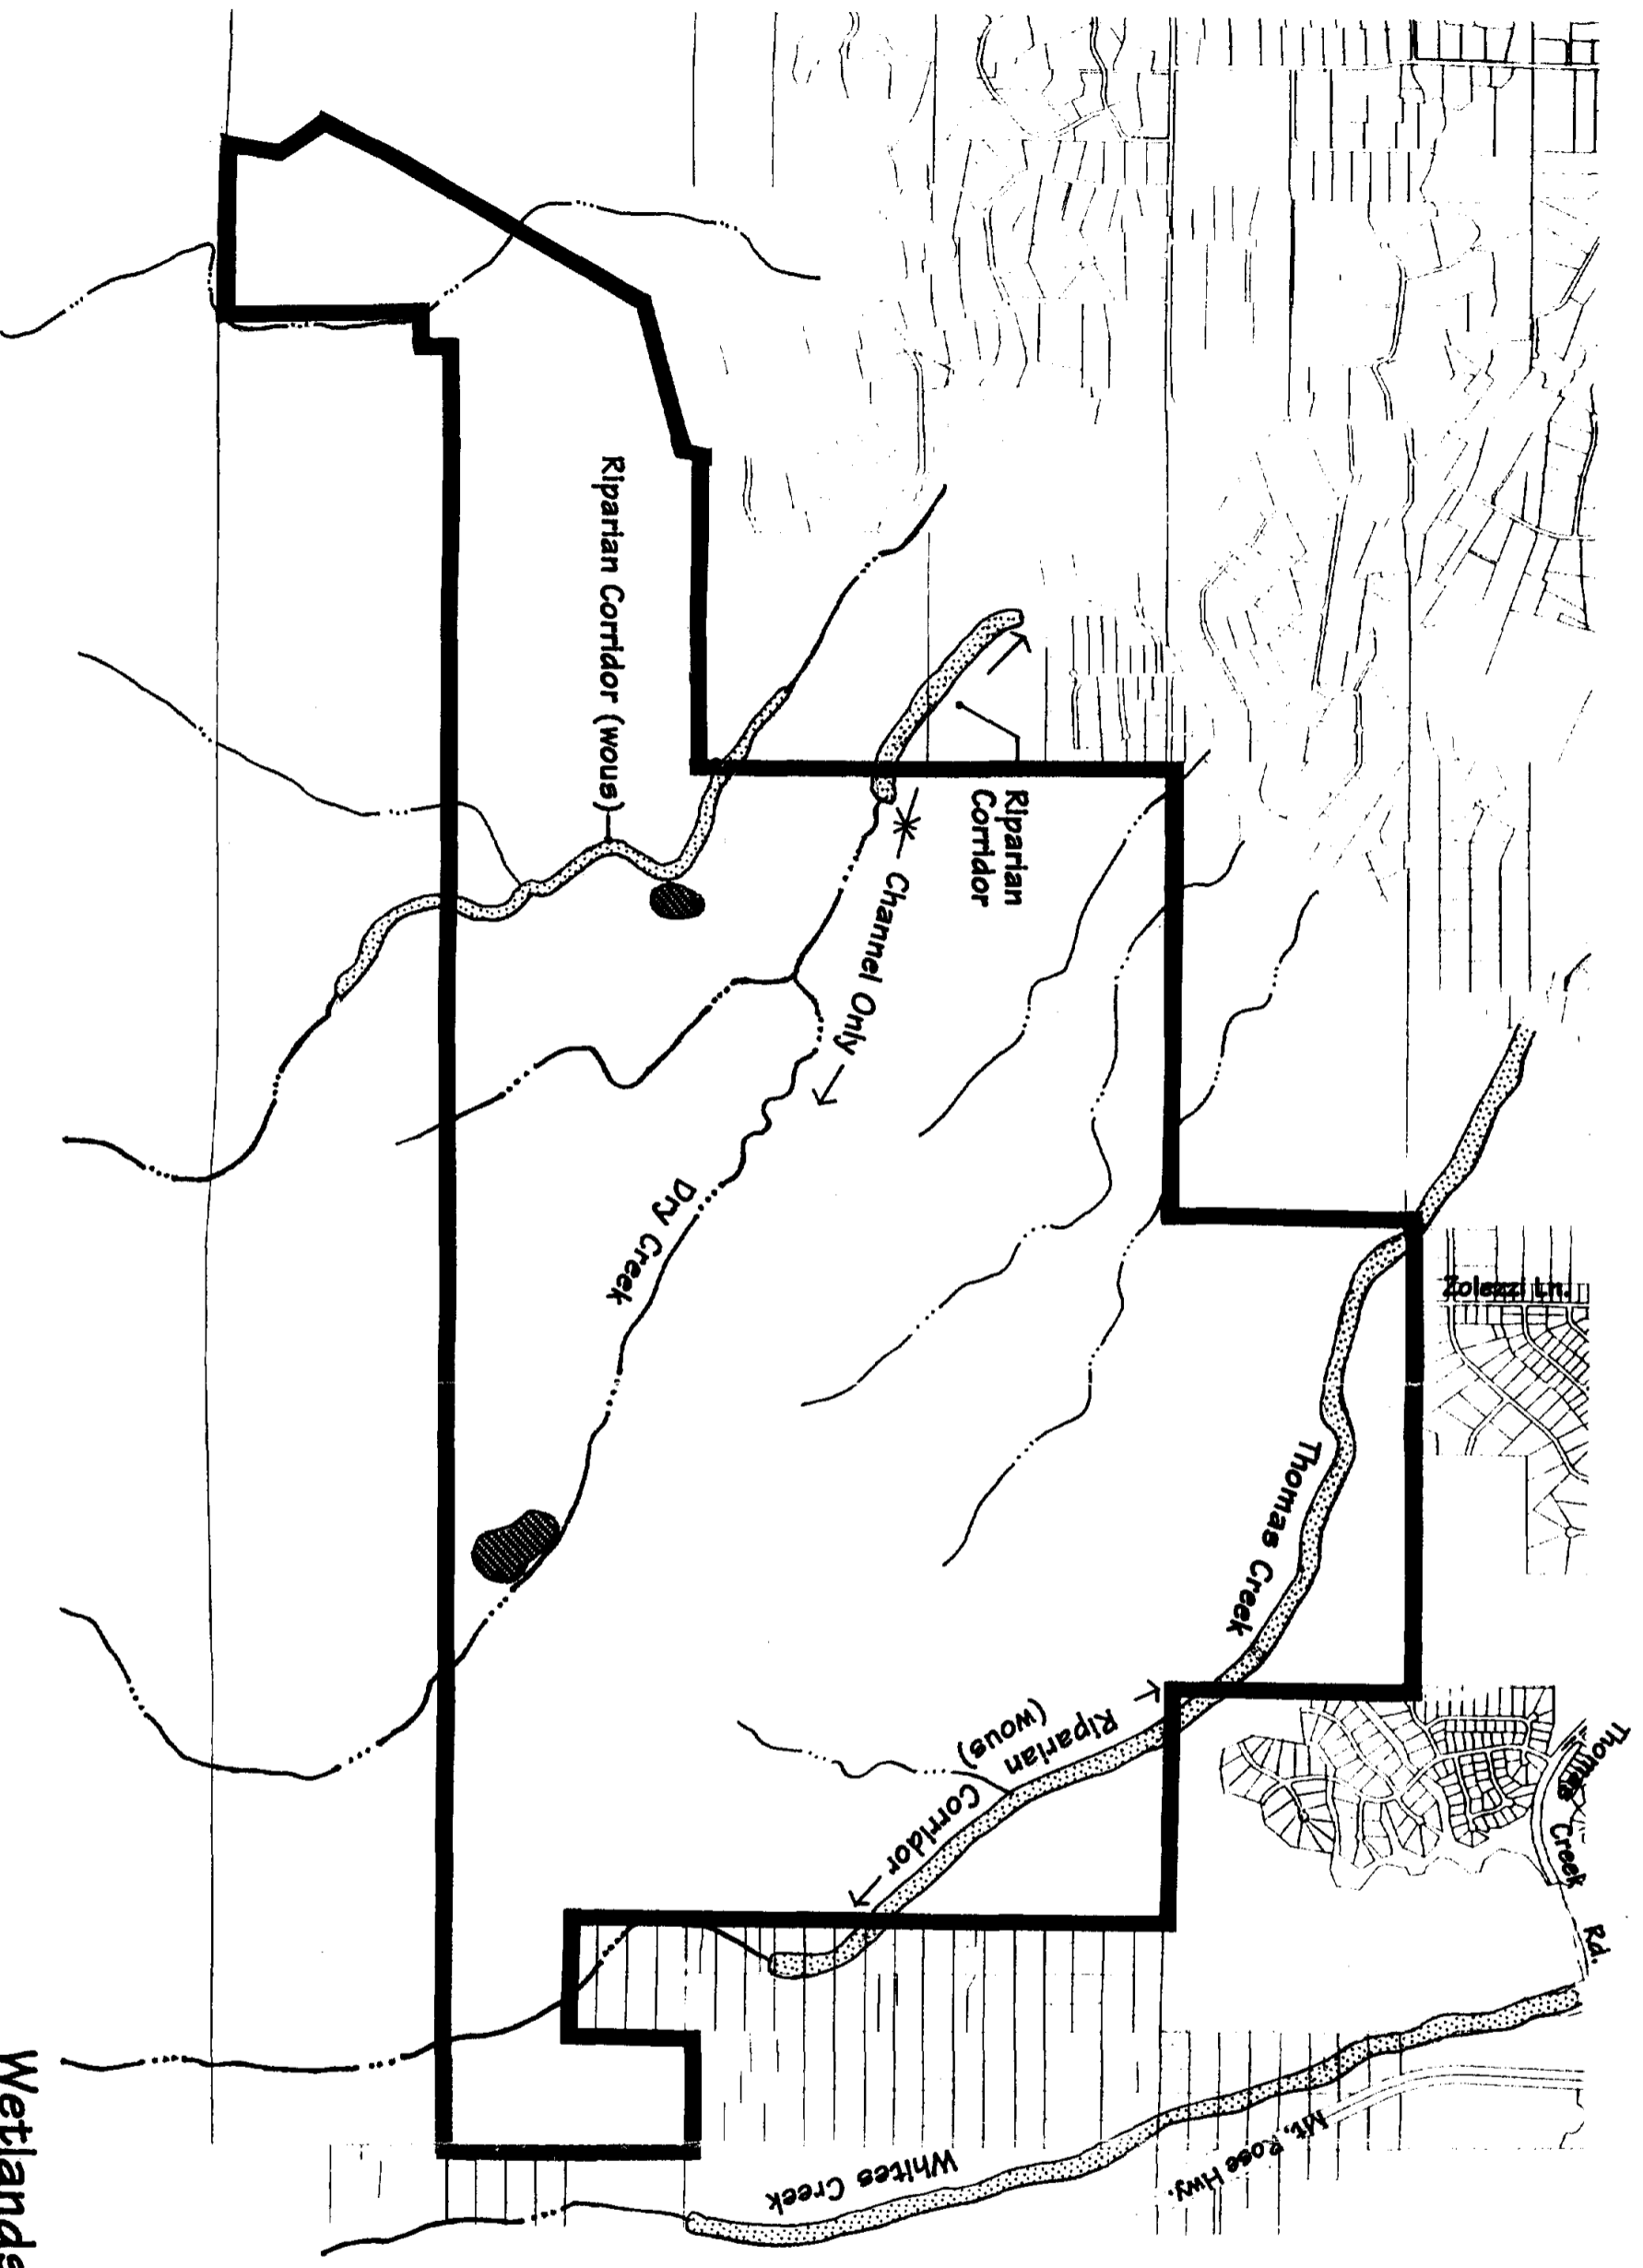

### Wetlands

A preliminary wetland assessment of this property was prepared by Huffman and Associates in July 1991. (This assessment is presented in Appendix E.) In general, three types of waters/wetlands were observed -- stream channels without adjacent wetlands, stream channels bordered by riparian wetlands, and spring seep wetlands. (Refer to Figure 4-3.) The Waters of the United States (WOUS) are subject to the regulatory authority of the Corps of Engineers pursuant to Section 404 of the Clean Water Act.

### Hydrology and Drainage

Thomas and Dry Creeks cross the property. The FEMA Flood Insurance Rate Maps for the area (Panel 1444, April 16, 1990, and Panel 1500, August 1, 1984) show localized flooding along the creeks. (Refer to Figure 4-3.) As shown on the concept plan and tentative map, Thomas Creek will be undisturbed. Dry Creek will also remain largely undisturbed; however, it will be incorporated into the design of the golf course and, in subsequent tentative maps, it will be crossed by one or more roads to gain access to the west side of the creek.

The site drains generally toward the northeast and lies within the Thomas Creek and Dry Creek watersheds. Thomas Creek flows through the southeast

Figure 4-3

part of the site. About half the site drains directly to Thomas Creek; the remainder drains to a natural channel tributary to Dry Creek, which lies north of the site. (For further information, refer to the Preliminary Hydrology Report in Appendix F.)

The objectives of the proposed drainage system and storm water management plan are to intercept the runoff from the 10-year storm, to detain the increase in 10-year runoff due to the development, and to pass the 100-year runoff occurring in Thomas Creek and the natural drainageways.

The proposed storm drain system will consist of underground reinforced concrete pipes sized for the 10-year storm and surface channels sized for the 100-year storm. Detention will be provided by several ponds generally located in open space or golf course areas. For the purposes of this preliminary drainage study, the Graphical Peak Discharge module and the Detention Storage Estimate module, Haestad Methods Quick TR-55, were used to estimate peak on-site runoff and detention storage volume requirements.

Thomas Creek will be crossed in two locations: Zolezzi Lane and Whites Creek Lane. Both crossings will be precast Con/Span bridges or similar. Recent studies (1990) for Thomas Creek have estimated the 100-year discharge in the project area at 2500-2600 cubic feet per second.

### Wildlife

Portions of the project site are located in the winter range of the Loyalton-Truckee deer herd. (Refer to Figure 4-4.) The herd summers largely at higher elevations and winters in the lower reaches of the Sierra Nevada. Some residential and golf course development is proposed within the winter range; however, there is also a significant amount of acreage within the winter range that will be left as open space. Some key mule deer winter range habitat has also been identified at the northwest end of Southwest Pointe. For the most part, this area is proposed to be left as open space.

**Legend**

**Southwest  
Pointe**

Scale : 1"=3000'

**Mule Deer Habitat**

Figure 4-4

Southwest Pointe is one of a number of projects that have been developed or are planned within the range of the deer herd. The combined effect of these projects, together with natural and man-induced factors, has had an impact on the herd. According to Craig Mortimore, Biologist with the Nevada Department of Wildlife, since the habitat maps were prepared about 10 years ago, the deer range has shrunk considerably.

To reduce the impacts of development on the deer herd, the following mitigation measures are proposed:

1. Leave dedicated open space around the developed area and provide open areas within the development in conjunction with the golf course. (This measure has already been incorporated into the concept plan and tentative map.)
2. Regulate recreational use of the open space. (The only recreational use currently proposed in the open space is an extension of the regional trail system.)
3. Limit fencing. (This topic is addressed in the Design Guidelines and could be addressed in the CC&Rs.)
4. Prohibit dogs from running loose. (This measure could be addressed in the CC&Rs.)

### Visual Analysis

Southwest Pointe consists primarily of homes and golf courses. All of the homes will have prime distant valley, mountain, or city views because this property occupies a strategic location in the Southwest Truckee Meadows. The elevation of the property ranges from 5,900 feet near the southwest corner to 4,950 at the eastern edge. Therefore, this site is above most surrounding development and the views are panoramic.

**On-Site Views** - Three major visual features characterize Southwest Pointe:

1. The dominant western mountain edge,
2. The northeastward sloping sagebrush plateaus, and
3. The creek corridors of Dry and Thomas Creeks.

The entire western side of the property is bordered by steeply sloping, pine covered mountain edges. (Refer to Figure 4-5.) This visual element also defines the western boundary of the Truckee Meadows. All on-site views to the west are into this mountain terrain.

A majority of the property is comprised of gently sloping plateaus that proceed from the base of the mountain slopes in a north and west direction. Covered with sagebrush and with an average 8 percent slope, these are the primary development areas of the site. Because of the northwest sloping character of these plateaus, views to downtown Reno and the Southeast Truckee Meadows are dominant from most of the property. Closer to the eastern boundaries of the property, views of the surrounding residential development begin to compete with the longer city views.

As Dry and Thomas Creeks pass through the property, they create a variety of visual features and interest. Increased vegetation and some tree clusters occur along the creek edges. The northern reaches of Dry Creek and the northeastern portion of Thomas Creek form deep ravines which can only be viewed from their immediate edges. From most areas of the plateaus, the creek corridors are not visible.

**Off-Site Views** - Due to the property's large size, western mountain edge, and high elevation, it is highly visible from the northeast. Moving southward along I-580 or U.S. 395, the mountain backdrop and sloping plateaus are visible. South of the intersection of Zolezzi Lane and U.S. 395, the site is marginally visible traveling in a southerly direction. Northbound on U.S. 395, the property is not a significant part of the view corridor. Instead, visual orientation is dominated by views of the city.

**Legend**

 Key City Views

**Southwest Pointe**

Scale : 1"=3000'

Figure 4-5

**Visual Analysis**

Viewing the property from I-580, the dominant feature below the mountain slopes is the steep sides and greener vegetation of the northern reaches of Dry Creek. Some areas of the upper plateaus are blocked from view by the more steeply sloping terrain running diagonally along the northeastern corner of the property.

Views into the site from surrounding areas are dominated by the mountain backdrop. Many of the plateaus are blocked from view by the steeper changes in topography and minor ridgelines that occur on the upper reaches of Thomas Creek in the southern portions of the site, on the eastern edge at the end of Zolezzi Lane, and in the northeast corner of the property.

For a common open space development, the Department of Development Review requires an analysis of off-site views. After discussions with Mr. Bob Katai, Senior Planner, it was determined that three off-site views would be examined. The location and orientation of the views is shown in Figure 4-6.

- **South from Lamay Lane** - The photographs shown in Figure 4-7 are taken from the end of Lamay Lane, which is located at the northeast corner of the property. As shown in the view with the proposed project, the development is in the distance. There is a large open space buffer between the existing development and Southwest Pointe. The nearest golf hole and residence is 2,200 feet away, for a distance of nearly 1/2 mile.
- **West from Zolezzi Lane** - These photographs were taken from the end of Zolezzi Lane at the Reno Christian Fellowship. (Refer to Figure 4-8.) In the foreground is Thomas Creek Estates and the TMS property. The property line of Southwest Pointe is actually 1/4 mile west of the end of Zolezzi Lane. The developed area is another 600 feet from the property line. Therefore, from Zolezzi Lane the view would be of the golf course with the residences in the background.
- **North from Mt. Rose Highway** - The photographs in Figure 4-9 were taken near Callahan Ranch Road. The before and after view is unchanged because Southwest Pointe is not visible from this location. There is a bluff between the Mt. Rose Highway and Southwest Pointe. The homes shown in

the distance are on the government tracts, and, as shown in the photographs, only a few of the several homes on the government tracts are visible from Mt. Rose. The closest developed area in Southwest Pointe is another 1,500 feet north of the government tracts

Impacts of Development Plan - Distant views to the property from I-580 and U.S. 395 will continue to be dominated by the mountain backdrop, the Dry Creek corridor, and the natural open space buffer along the northeastern portion of the site. Low density residential development and golf fairways will be visible on the upper portions of the plateaus.

Development areas have been limited to the plateau portions of the site and held back from surrounding uses and property boundaries. Surrounding residential areas will, first, view large natural open space buffers on the south, east, and north sides of the property. In most cases, the next view sequence will be of golf course fairways followed by residential development. One acre and larger lots are planned on the outside edges of the developed areas with 1/2 acre and 12,000 square foot lots nestled between golf fairways.

To minimize any potential impacts on adjacent land uses, the following restrictions could be added into either the Design Guidelines or CC&Rs.

1. Exterior lighting shall adhere to the following standards:
  - a. Lighting levels shall be no more than absolutely required to perform the task for which it is intended (e.g., safety, aesthetics).
  - b. In most locations, fixtures shall be limited to cut-off types that direct illumination downward.
2. Exterior colors should harmonize with the site. On exterior walls, the predominant tone should tend toward earthy hues. Accent colors may be used to enliven the buildings.
3. Roofing materials shall be non-reflective and the color shall tend toward earthy hues.

## V. INFRASTRUCTURE/SERVICES

### Water Service

The property is outside the boundary of the South Truckee Meadows General Improvement District/Special Assessment District #18. Staff at the Washoe County Utility Division has recommended that this property be developed outside the district; however, all of the facilities will eventually be dedicated to Washoe County. The developer of Southwest Pointe will be constructing a new water system since there are no existing facilities to accommodate this project. The Southwest Pointe water system will connect to the existing system. Washoe County has drilled several exploratory wells on the property. The developers of Southwest Pointe intend to use these wells as the main production wells for the project.

The staff at the Washoe County Utility Division have identified the elevations at which water storage tanks should be located to obtain the proper pressure. To serve Phase I, Phase II, and a portion of Phase III, a tank would be located at an elevation of 5,710 feet. (This location is 138 feet higher than the elevation identified by the Utility Division. The tank was moved to a slightly higher elevation to serve all of Phase I.) To serve the remainder of Phase III, a smaller tank would be constructed at an elevation of 5,848 feet. (The tank sites are shown on the concept plan.) Both tanks would have a height of 24 feet. The total water storage requirement is between 1.2 and 1.4 million gallons (i.e., 926,500 gallons residential storage, 240,000 gallons commercial storage, and 120,000 gallons per tank residential fire storage). The lower tank would have a storage requirement of 975,000 to 1.2 million gallons and either one or two tanks would be constructed to satisfy this requirement. The upper tank would have a capacity of 200,000 gallons. The tanks have been located in a ravine to screen them from view. If additional screening is necessary, landscaping could be installed to the satisfaction of the Department of Development Review.

The anticipated water rights dedication for the residential portion of the project is 1,221 acre feet (i.e., 1,090 units x 1.12 acre feet/unit). The developer is

exploring several different sources for the acquisition of water rights available for use on the project. Water rights are available and will be purchased and dedicated to Washoe County in amounts sufficient to serve the project.

Water usage for the golf courses is estimated to be approximately 375 acre feet per course (based on water usage at the Genoa Lakes Golf Course which is owned by Dingman Investments). To serve the two proposed golf courses in Southwest Pointe, as well as the other courses planned in the vicinity, Washoe County proposes to reuse treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. (Refer to the letter from the Washoe County Utility Division in Appendix B.) Since water is such a critical resource, the county encourages the beneficial reuse of treated wastewater, particularly for uses that will enhance groundwater recharge within the service area. According to the 1991 Effluent Management Plan, all treated wastewater is currently discharged onto the county's CDB land application site, which is the only permitted discharge site for the treatment plant. However, once flow surpasses the CDB reuse capacity, other reuse sites will need to be considered and additional treatment may be necessary.

The county has been approached by several developers in the South Truckee Meadows who are interested in purchasing the treated effluent for golf course irrigation. According to the Effluent Management Plan, golf course irrigation represents the largest potential reuse opportunity in the South Truckee Meadows. The effluent will be available on a first-come, first-served basis and is dependent on availability. To construct the necessary improvements, it may be possible to create a special assessment district among the participating land owners.

Sufficient effluent will not be available for several years, and it is anticipated that there will be a gradual conversion from groundwater irrigation to irrigation using treated effluent. In anticipation of this conversion, the developers of Southwest Pointe are considering installing the necessary on-site infrastructure as part of the initial construction.

## Sewer Service

Southwest Pointe will be served by the South Truckee Meadows Wastewater Treatment Plant. According to staff at the Washoe County Utility Division, capacity will be available. The plant currently has a capacity of 0.75 million gallons per day (mgd); however, the ultimate capacity is planned to be 6.0 mgd. Based on the number of existing and approved dwelling units within the service area, the current capacity has been allocated. This allocation exists only on paper and would be a problem only if all of the currently approved homes were constructed immediately. According to the county staff, the plant has been designed for expansion, and capacity will be available for this project.

There is a possibility that the developers of Southwest Pointe will have an opportunity to acquire sewer hook-ups that were previously allocated to the Galena Resort project. These hook-ups have already been accounted for in the current capacity of the plant.

Existing sewer service is only a short distance from Southwest Pointe. A 10-inch line has been extended to Saddlehorn and another 10-inch line serves Fieldcreek Ranch. Because of the topography and site plan, it is probable that Southwest Pointe will be sewered along Zolezzi Lane to the existing line in Fieldcreek Ranch.

## Schools

Children in Southwest Pointe will attend Galena High School, Pine Middle School, and the new elementary school in the Southwest. According to Roger Means, the Director for School Planning and Government Relations with the Washoe County School District, ground breaking on a new elementary school will occur in September 1994, and the school is scheduled to open in September 1995. (A bond issue was approved in Fall 1992 for the construction of new schools and renovation of existing schools, and money has been set aside to construct a new elementary school in the Southwest Truckee Meadows.) The scheduled opening coincides with the occupancy of the first residential units in Southwest Pointe. Should any residential units be occupied before that date,

the children would attend either Elizabeth Lenz or Brown Elementary Schools. The concept plan identifies a 10-acre elementary school site and a 25-acre middle school site on Whites Creek Lane near the south entrance of Southwest Pointe. These sites have been discussed with Roger Means, and the School District has expressed interest in acquiring this property. The developers of Southwest Pointe understand the importance of having schools on or near Southwest Pointe and are willing to dedicate the necessary property to the School District.

To estimate the number of school-age children within this project, the following assumptions were used: for every 1,000 residents, 9.4 percent will be in elementary school (KG-6th), 3.1 percent in middle school (7th-8th), and 5.5 percent in high school (9th-12th). (Washoe County School District) Based on these assumptions, together with an average household size of 2.5 persons per household, it is estimated that there will be 256 elementary school students, 85 middle school students, and 150 high school students, for a total of 491 students at buildout (approximately 15 years).

### Parks, Open Space, and Trails

The concept plan identifies approximately 1,575 acres of natural open space, a 10-acre neighborhood park, approximately 6 miles of regional trails, and a 1-acre trail head. (The amount of acreage left as open space is approximate and may vary -- up or down -- with subsequent tentative maps.) The open space is located around the entire periphery of the project and provides a generous buffer between Southwest Pointe and all adjacent properties. Within the project itself, the goal is to create an open feeling through the use of trails, controls on fencing and siting of homes, and development of 36 holes of golf that meander through the neighborhoods.

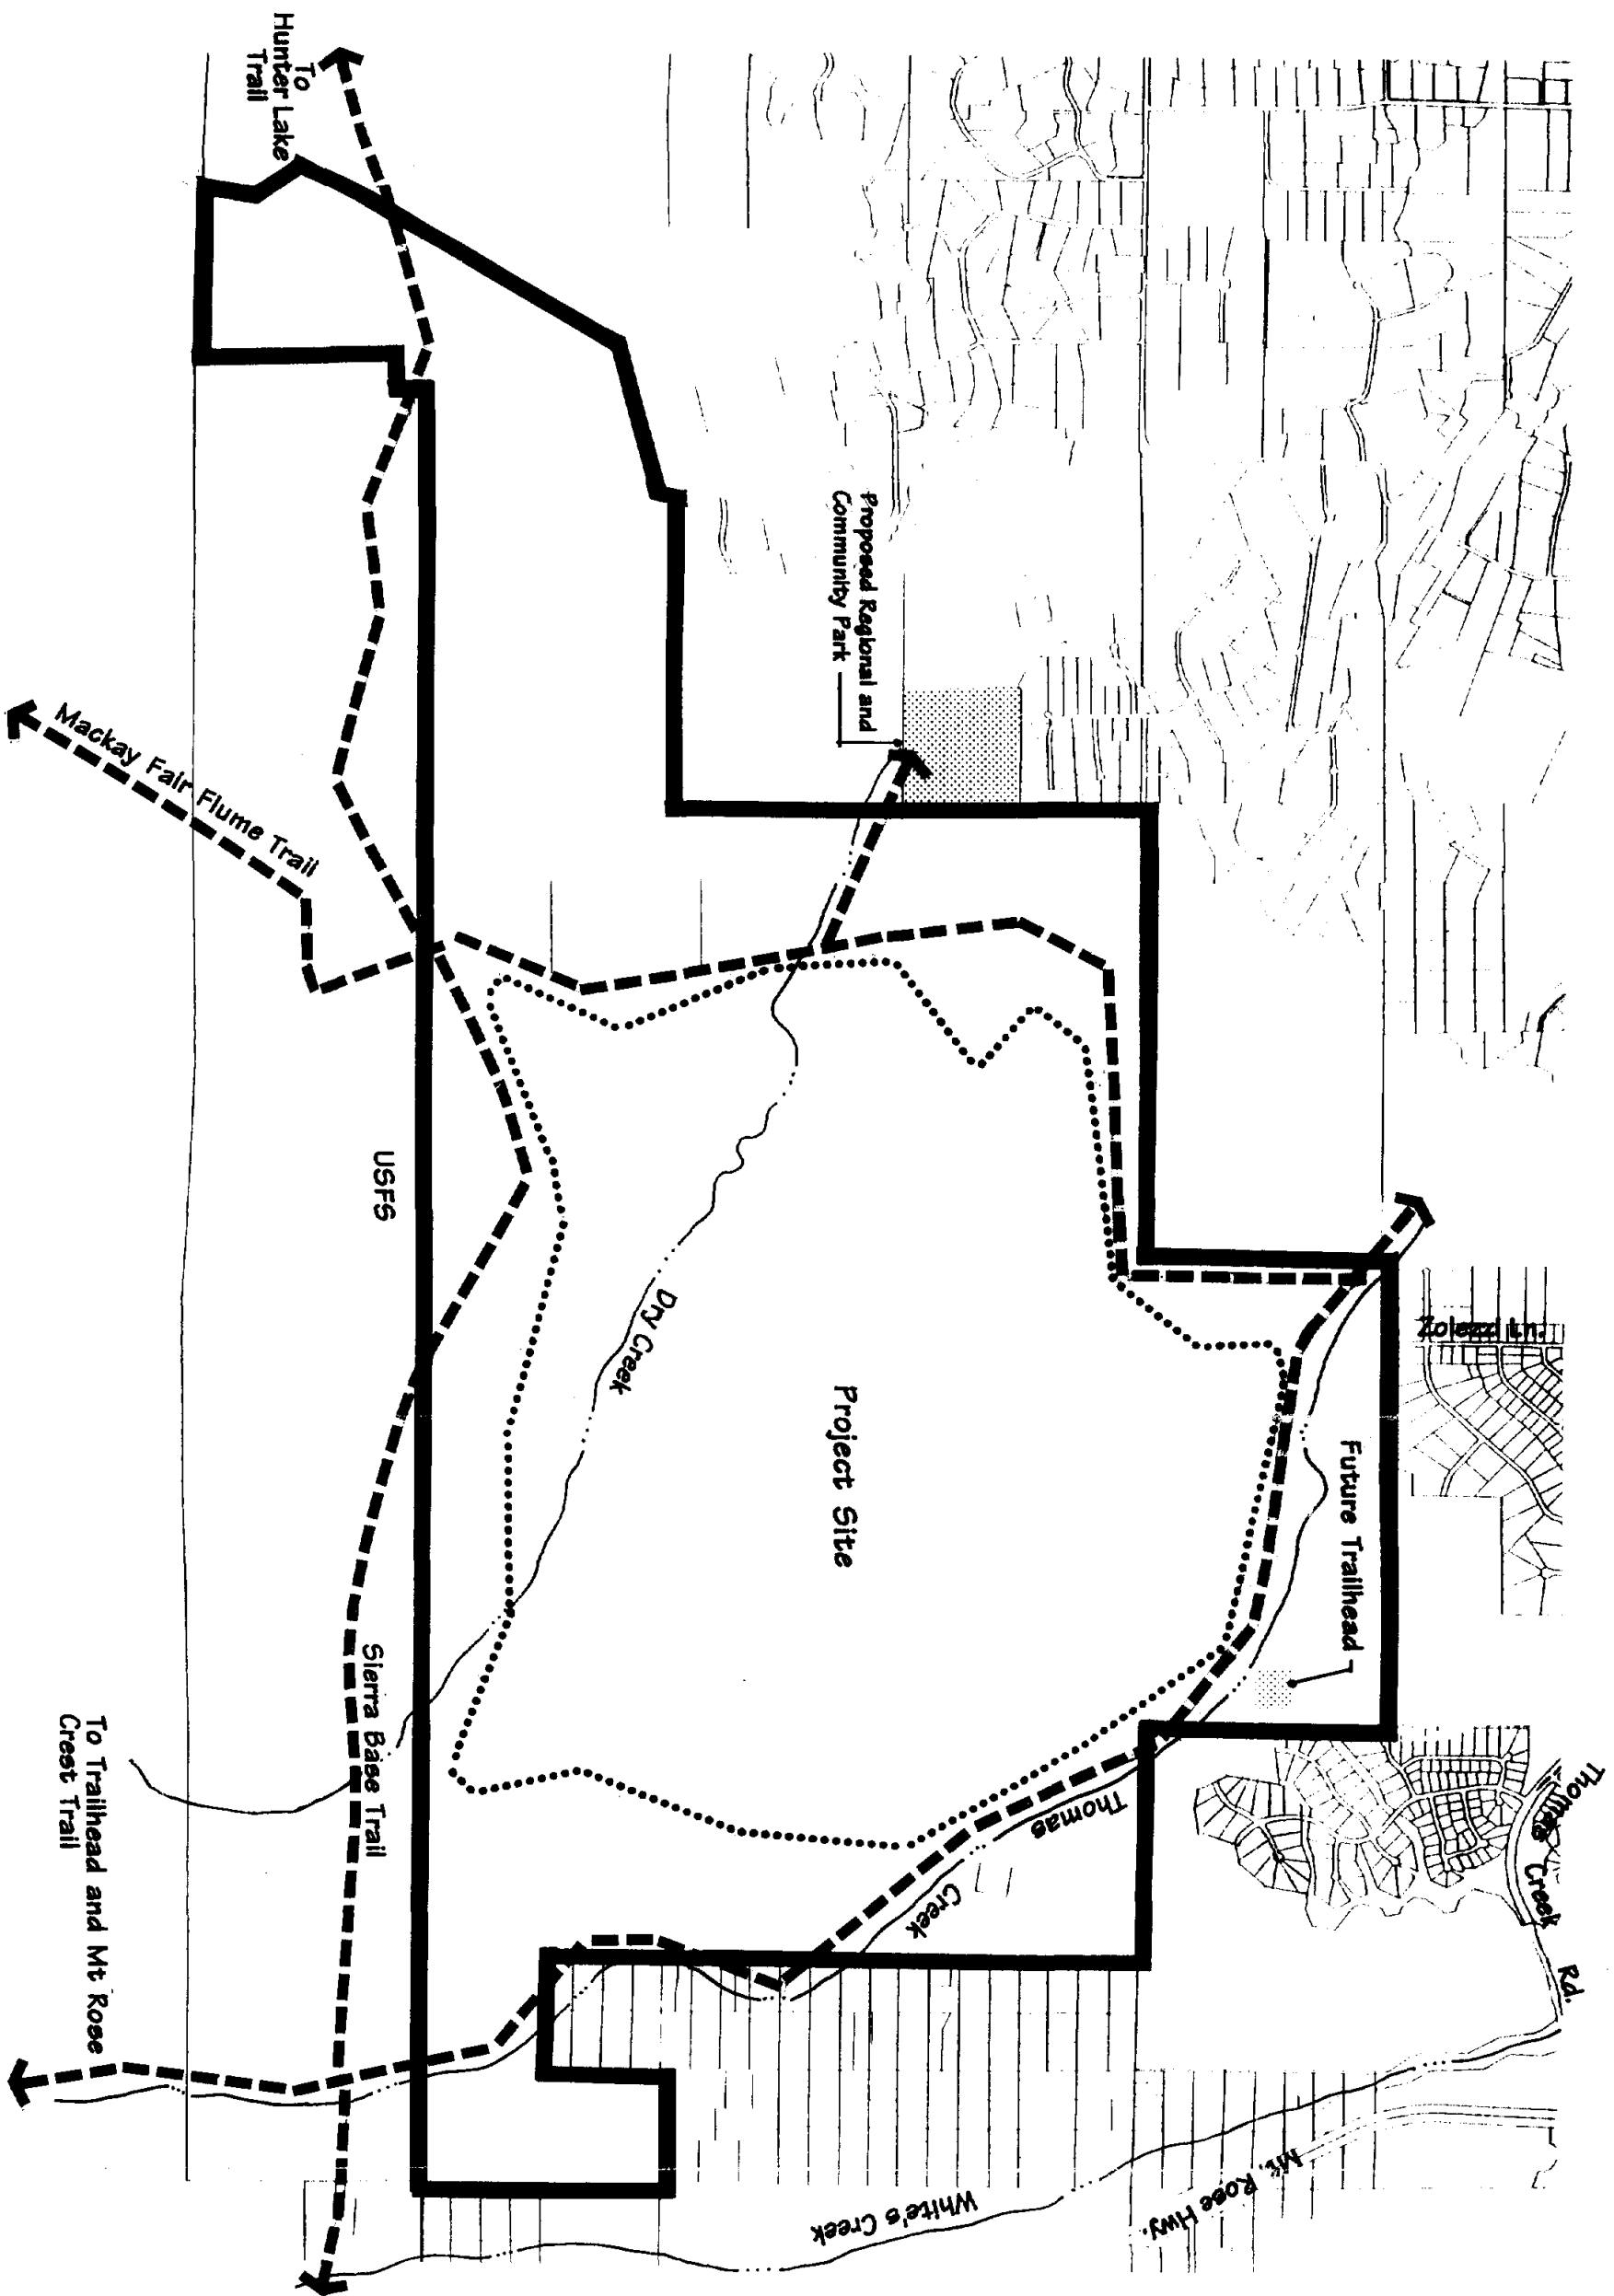

A 10-acre neighborhood park is shown between the middle school and Thomas Creek. The park fronts on Whites Creek Road and its linear configuration takes advantage of the creekside location and also serves as a buffer between the school, the creek, and the residences. The developers of Southwest Pointe anticipate entering into an agreement with Washoe County whereby the

developer will construct the recreational facilities in the park. The developer would then be reimbursed by Washoe County from fees collected in Southwest Pointe from the Residential Construction Tax. The developer or some other entity, such as a Homeowners' Association, may assume responsibility for the maintenance of all or a portion of the park. The purpose of this type of agreement would be to ensure that recreational facilities are developed in a time frame that coincides with development and that adequate funds are available for long-term maintenance.

The proposed trail system is consistent with the county's master plan for this park district, and, in fact, the proposed trails exceed the system shown in both the Southwest Truckee Meadows Area Plan and the Truckee Meadows Regional Parks and Trails Plan. (Refer to Figure 5-1.) Regional trails are proposed along Thomas Creek for access to the Mt. Rose Crest Trail and around the northern portion of the project for access to the Mackay Fair Flume Trail and the U.S.F.S. parcel in Section 11. Both trails provide access to the Sierra Base Trail, which eventually ties into the Hunter Lake Trail. Portions of the Sierra Base Trail are located on U.S.F.S. property and other portions, especially near Dry Creek, are located on project property. It may be necessary to relocate portions of the existing trail because of golf course and residential development near Dry Creek. If this is necessary, the developer will provide a dedication or easement in another location acceptable to the Department of Parks and Recreation.

Along Thomas Creek the county would prefer a 50-foot wide easement or dedication. In other locations, a 25-foot wide trail is sufficient. A one-acre trail head for parking and picnicking is also proposed across from the park on Whites Creek Lane. This site would be dedicated to Washoe County. The developer will work with the staff of the Parks and Recreation Department to locate the public trails in a manner that will satisfy the county and also insure reasonable distance between the golf course and the residences.

The developer will enter into discussions with the appropriate governmental entities regarding the ultimate disposition of the open space areas. These properties may be left under the control of the Homeowners' Association or

- Legend**
- > Trail System
  - ..... Outline of Project Site

# Southwest Pointe

Scale : 1"=2000'

may be dedicated to Washoe County or the U.S.F.S. The only improvements contemplated in the open space areas are public trails, secondary access roads, storm water detention ponds, and two or three water storage tanks.

### Fire Protection

Fire protection service will be provided by the Nevada Division of Forestry, Sierra Fire Protection District. The closest existing station is Galena Station #2, which is located on the Mt. Rose Highway approximately 2 miles west of the intersection of Mt. Rose and Thomas Creek Road. An acceptable response time is 5 to 7 minutes or approximately 5 miles with good access. Southwest Pointe is within this distance and response time; and therefore, is consistent with the minimum service standards adopted by Washoe County in the Land Use and Transportation Element.

The Southwest Truckee Meadows Area Plan shows a proposed fire station in this portion of the Southwest. After discussions with Rich Riolo and Jim Reinhardt, Nevada Division of Forestry, NDF would be interested in a location in Southwest Pointe, and a one-acre site is shown near the proposed schools. According to NDF staff, the station would be 3,800-4,000 square feet with two bays and living quarters. There would be two, full-time employees supported by volunteers.

A station in Southwest Pointe would provide a central location and good access for both NDF and the Truckee Meadows Fire Protection District. To avoid duplication of services, NDF and Truckee Meadows may wish to consider developing a joint station in Southwest Pointe.

Many of the neighborhoods in Southwest Pointe will be gated. The developer will meet with NDF staff to discuss their needs in order to maintain emergency access. Fire fuel breaks will also be required in many locations and an acceptable design will be developed with NDF staff. Maintenance of the fire fuel breaks will be the responsibility of the individual homeowner or the Homeowners' Association depending on the location.

### Police Protection

The Washoe County Sheriff's Department will provide police protection service to this site from the main station at 911 Parr Boulevard. According to the Southwest Truckee Meadows Area Plan, there is currently one patrol unit regularly assigned to the area, with an average response time of 10 minutes. This 10-minute response time is consistent with the minimum response times (i.e., 10-15 minutes) adopted by Washoe County as part of the Land Use and Transportation Guide.

The response time in this area should be greatly improved when the Sheriff's Department locates a substation in the community center in the South Valleys Regional Park at the intersection of Whites Creek Lane and Wedge Parkway. The first phase of the park will be under construction in Fall 1993. The community center is located in a later phase; therefore, it may be several years before the substation is operational.

### Transportation

Primary project access will be from extensions of Zolezzi Lane and Whites Creek Lane. With Phase I, Zolezzi Lane will be constructed from its current terminus near the Reno Christian Fellowship into the project site. Zolezzi Lane ties into the village center where it turns and becomes the primary loop road. The primary loop provides the main circulation within Phase I and eventually connects into Whites Creek Lane. With Phase I, Whites Creek Lane will be constructed to emergency road standards (i.e., 24 feet wide with an all-weather surface). However, should the Washoe County School District begin construction of the elementary school by Fall 1994, it is probable that Whites Creek Lane will be constructed earlier. In Phases II and III, there is a secondary loop road that provides the main circulation within these neighborhoods.

To provide adequate access to Southwest Pointe, the right-of-way dedications and roadway improvements discussed below are recommendations based on the traffic analysis prepared by Solaegui Engineers, which is included in Appendix C.

a. **Zolezzi Lane** - A right-of-way of 80 feet will be required for Zolezzi Lane. This width will be reduced to 60 feet at the village center, where Zolezzi Lane turns and becomes the primary loop road. Currently, an 80-foot right-of-way exists as far west as the Reno Christian Fellowship (i.e., northwest corner of Sections 18 and 19) Past that point, a 40-foot roadway dedication was made with Parcel Map #1347 and with recordation of the official plat for Thomas Creek Unit #3-F. This latter dedication brings the right-of-way to the Southwest Pointe property line. On the northerly boundary, a 60-foot easement was reserved by the Nell J. Redfield Trust when it sold the adjacent property to TMS.

Zolezzi Lane is unimproved from the Reno Christian Fellowship westward. The developer proposes to construct the south half of Zolezzi Lane to county standards between the Reno Christian Fellowship and the Southwest Pointe property line. When Zolezzi Lane enters the project site, the improvements will transition to the full-street improvements proposed in Figure 5-2, labeled "Suburban Collector Street." As proposed, the travel lanes are sufficiently wide to accommodate bicyclists. In most locations, there will also be a meandering pedestrian path along the roadway. The path will generally be within the common area but may be within the right-of-way in some locations. The landscaping within the right-of-way will be installed by the developer and, initially, maintained by the developer until that responsibility is turned over to the Homeowners' Association. No on-street parking will be permitted. No driveways from individual lots will be allowed direct access onto Zolezzi Lane.

b. **Whites Creek Lane** - A 100-foot right-of-way exists along the south side of Fieldcreek Ranch. This is the only portion of the right-of-way that has been dedicated. Based on the traffic analysis prepared by Solaegui Engineers, which shows that Whites Creek will not attract a significant amount of traffic, the right-of-way will transition to 60 feet west of Thomas Creek Road.

With Phase I, Whites Creek Lane will be constructed to emergency road standards (i.e., 24 feet wide with an all-weather surface) from Thomas Creek Road into the project site. With later phases of development, the developer is proposing to construct the on-site portions of Whites Creek Lane to the "Rural

Collector Road" standards shown in Figure 5-3. The proposed travel lanes are sufficiently wide to be shared with bicyclists. Additionally, in some locations, there will be an on-site meandering pedestrian path either in the common area or within the right-of-way along Whites Creek Lane. The landscaping within the right-of-way will be installed by the developer and, initially, maintained by the developer until that responsibility is turned over to the Homeowners' Association. No on-street parking will be permitted. No driveways from individual lots will be allowed direct access onto Whites Creek Lane.

With Phase II, off-site (between Thomas Creek Road and the project boundary) improvements will consist of two travel lanes to county standards. No frontage improvements are proposed off-site because the road crosses the 120-acre U.S.F.S. parcel, which is being held for sale or exchange for future development. The developer of this property should be required to construct frontage improvements such as sidewalk, curb and gutter. It should be noted, however, that the Washoe County School District may construct Whites Creek Lane between Thomas Creek Road and the school sites if the District decides to open the elementary school in September 1995.

c. **Primary Loop Road** - Zolezzi Lane and Whites Creek Lane become the primary loop road that runs through Phase I. As proposed, the primary loop road, Zolezzi Lane, and Whites Creek Lane are the only public streets in Southwest Pointe. The proposed right-of-way is 60 feet. Improvements are shown in Figure 5-3 and are labeled "Rural Collector Road." The travel lanes have been designed to be shared with bicyclists. In most locations, a meandering pedestrian path will be constructed along the primary loop road. The path will generally be within the common area but there may be some locations where the path will be within the right-of-way. The landscaping within the right-of-way will be installed by the developer and, initially, maintained by the developer until that responsibility is turned over to the Homeowners' Association. No on-street parking will be permitted. No driveways from individual lots will be allowed direct access onto the primary loop.

d. **Secondary Loop Road** - A secondary loop road provides access within Phases II and III. This is a private road with a 60-foot right-of-way. The street section for this road is shown in Figure 5-2 and is labeled "Rural Local Road." Again, the travel lanes are wide enough to be shared with bicyclists. A pedestrian path is not planned along the secondary loop road. Only low plantings will be allowed in the drainage swales. Landscaping within the right-of-way will be installed by the developer and, initially, maintained by the developer until that responsibility is assumed by the Homeowners' Association. No on-street parking will be permitted. No driveways from individual lots will be allowed direct access onto the secondary loop.

e. **Rural Roads** - Rural roads provide access within the individual neighborhoods. As shown in Figure 5-4, all rural roads will be private with a 50-foot right-of-way. Two, 11-foot wide travel lanes are proposed. Driveways will have direct access onto rural roads. Only low plantings will be allowed in the drainage swales. If necessary, the drainage swales will be maintained by the developer until that responsibility is assumed by the Homeowners' Association.

f. **Rural Cul-de-Sac Roads** - Cul-de-sacs will have a right-of-way of 41 feet with two, 10-foot wide travel lanes. (Refer to Figure 5-4.) No on-street parking will be permitted. Driveways will have direct access onto cul-de-sacs. Only low plantings will be allowed in the drainage swales. If necessary, the drainage swales will be maintained by the developer until that responsibility is assumed by the Homeowners' Association.

### **Storm Water Management**

Public streets with curb and gutter will have catch basins and storm drain pipes that will eventually discharge into Thomas Creek. The drainage from private streets will go into roadside ditches and will periodically be picked up by a piped system that will also discharge into Thomas Creek.

Figure 5-4

Street Sections

Any increased flows from the 10-year storm caused by this development will be retained on site, as required by Washoe County. All catch basins and inlets will be equipped with a petrochemical device that will trap grease and silts prior to any downstream discharge.

Water runoff from the golf course can be controlled, and, in fact, there is not a large amount of runoff from turf grass. In locations where there is any concentrated runoff from the golf course, the water will be daylighted into native areas before it arrives at more sensitive (i.e., Thomas Creek) areas. The fertilizer and pesticide program will be closely monitored by the golf coursesuperintendent. As pointed out by the golf course architect, the grass is given fertilizer to keep it in proper playing condition, and if the proper species is planted, it is not necessary to apply large amounts of fertilizer.

In June 1990, Kennedy/Jenks/Chilton completed hydrologic modeling for the Thomas Creek drainage basin and analyzed several storm water detention/debris basin sites for the Washoe County Flood Control Master Plan Project. The purpose of these facilities is to reduce the 100-year peak flood flows reaching South Virginia Street. Two detention/debris basin sites, one on-stream and the other off-stream, were studied. Both of these sites are located in Southwest Pointe (i.e., western half of Section 24). Washoe County submitted an application for funding to the Army Corps of Engineers for consideration as a small watershed project. The Corps decided that the benefit-cost ratio was not supportable and, therefore, no funding is available from the Corps. Since the local entities cannot fund the project alone, the project is no longer being pursued. The ponds on the golf course could be designed for stormwater management. This would be beneficial to the developer and to the county because it would alleviate downstream flooding.

### Utilities

Electrical power for the project will be provided by Sierra Pacific Power Company. Nevada Bell will provide telephone service. Natural gas service is available from Westpac Utilities. Cable TV is provided by Continental Cablevision

of Reno. All of these services are near the site (i.e., at Thomas Creek Road and Zolezzi Lane) and can easily be extended into Southwest Pointe.

Solid Waste Disposal

Reno Disposal Company will provide service to the project via its contract with Washoe County.

## VI. PLANNING ANALYSIS

### Land Use Compatibility

Generous open space buffers are provided around the entire periphery of the project. These buffers will remain as permanent open space with the only disturbance being an extension of the regional trail system, secondary access roads, storm water detention ponds, and two or three water tanks. The open space encompasses 1,575 acres or 48 percent of the project site. (The amount of acreage left as open space is approximate and may vary -- up or down -- with subsequent tentative maps.)

Development areas are limited to the interior of the property and have been separated from adjacent subdivisions and property boundaries. Surrounding residential areas will, first, view large natural open space buffers and, second, the golf course fairways followed by residential development. The largest lots (1 acre and larger) are planned on the outside edges of the developed area with 1/2 acre and 12,000 square foot lots nestled between golf course fairways.

### Southwest Truckee Meadows Area Plan

Land Use Designations - The Southwest Truckee Meadows Area Plan designates this property as shown in Table 6-1 and Figure 6-1.

Table 6-1  
Land Use Designations

<u>Designation</u>	<u>Acres</u>	<u>Density</u>	<u>Units</u>
Low Density Suburban	307	1 du/acre	307
High Density Rural	1,800	1 du/2.5 acres	720
Medium Density Rural	70	1 du/5 acres	14
Low Density Rural	228	1 du/10 acres	28
General Rural	<u>867</u>	1 du/40 acres	<u>21</u>
	3,272		1,090

**Legend**  
Land Use  
Designations

**Southwest  
Pointe**

Scale : 1"=2000'

Figure 6-1

**Land Use**

**Designations**

The amount of acreage within each land use designation and the resultant density was estimated by CFA in January 1992 and confirmed by Skip Canfield, Washoe County Department of Comprehensive Planning, in correspondence dated February 19, 1992. (Refer to Appendix B.) The allowed number of units is 1,090, and the concept plan proposes to develop exactly that number.

Neighborhood-serving commercial uses are proposed in the village center. Such uses are allowed, with approval of a special use permit, in a Low Density Suburban regulatory zone. However, because of the approach taken in planning this property (i.e., a common open space development in conjunction with a development agreement), the neighborhood commercial uses have actually been located outside the area designated Low Density Suburban. According to Mike Harper, Director Washoe County Department of Development Review, this approach is acceptable if consistency with the intent of the master plan is maintained. (Refer to Appendix B.)

The concept plan is consistent with the master plan for several reasons. First, the neighborhood commercial uses are located near the center of the project rather than on the fringe. This is the best location because it serves all of the residents and allows them to walk or bicycle to the village center. Second, by locating the commercial uses in the village center with the clubhouse, a focal point is created. Third, the boundary for the Low Density Suburban designation follows the boundary of the previous A-1 zoning district, which in turn follows the boundary between two sections. This is arbitrary and not based on any of the property's physical characteristics. The proposed concept plan is based on detailed site planning that attempts to lay out the best site plan for the entire property. And fourth, the purpose of a common open space development is to develop a concept plan that fits the property rather than follow an arbitrary zoning boundary. The proposed concept plan does precisely this and, in doing so, addresses many of the concerns of adjacent residents.

**Area Plan Policies** - The following policies from the Southwest Truckee Meadows Area Plan are relevant to this project:

**SWTM.3.3** Guide future development on the Redfield properties in the following manner:

B. Encourage the transfer of the Redfield properties in Sections 3, 10, 15, 22, 27, and 34, T18N, R19E, to the U.S. Forest Service or for low and high density rural residential development, as shown on the Land Use Plan Map.

**Comment:** Property within these sections was transferred to the U.S. Forest Service in 1984. The remaining property will be developed in compliance with the Land Use Plan Map, and, in fact, large portions of this property will be left as open space. The developer intends to enter into discussions with the appropriate governmental entities regarding the ultimate disposition of the open space areas and all or some portions of the open space may eventually be dedicated to the U.S. Forest Service.

**SWTM.3.10** Ensure that access to public lands is provided within the Southwest Truckee Meadows Planning Area.

SWTM.3.10.1 Development adjacent to U.S. Forest Service land shall be required to maintain and, when possible, improve public access to the National Forest. Access easements or corridors shall be a minimum of 20 feet in width.

**Comment:** The proposed trail system is consistent with the county's master plan for this park district, and, in fact, the proposed trails exceed the system shown in both the Southwest Truckee Meadows Area Plan and the Truckee Meadows Regional Parks and Trails Plan. Along Thomas Creek, the county would prefer a 50-foot wide easement or dedication. In other locations, a 25-foot wide trail is sufficient.

**SWTM.4.2** Require any development proposal that must have access to Whites Creek Lane to meet the following conditions when appropriate:

- A. Contribute to construction of the Whites Creek Road.
- B. Time construction of the development with completion of the appropriate portion of the Whites Creek Lane needed for that development.

**Comment:** The developers of Southwest Pointe will contribute to the construction of Whites Creek Lane. Refer to the transportation section which starts on page 5-8 and Appendix C.

**SWTM.5.1** Encourage all new developments with a density of one acre or less and located outside the service area of the Truckee Meadows Fire Protection District to petition for annexation into the service area of the Truckee Meadows Fire Protection District.

**Comment:** Initial discussions regarding fire protection have been held with the Nevada Division of Forestry. The developer is willing to enter into discussions with the Truckee Meadows Fire Protection District since the boundary between the two districts is near this property. A one-acre site for a fire station is shown on Whites Creek Lane next to the elementary school. This site provides good access for both NDF and the Truckee Meadows Fire Protection District. The two agencies may want to consider developing a joint station at this site.

**SWTM.5.4** Require all new projects, when appropriate, to annex to the South Truckee Meadows General Improvement District.

**Comment:** The property is outside the boundary of the South Truckee Meadows General Improvement District. Staff at the Washoe County Utility Division has recommended that this property be developed outside the district; however, all of the facilities will eventually be dedicated to Washoe County.

**SWTM.5.7** Encourage the development of additional schools within the Southwest Truckee Meadows Planning Area.

**SWTM.5.7.1** Developers shall work with the Washoe County Department of Comprehensive Planning and the Washoe County School District to integrate new school facilities with future residential development.

**Comment:** The concept plan shows a 10-acre elementary school site and a 25-acre middle school site on Whites Creek Lane. These sites have

been discussed with Roger Means, and the School District is interested in acquiring this property. The developer of Southwest Pointe is willing to dedicate both sites to the School District.

**SWTM.5.8** Encourage the location of community and neighborhood parks and trails in the Southwest Truckee Meadows Planning Area.

**SWTM.5.8.2** The Regional Trail System and the trails depicted in the Southwest Truckee Meadows Area Plan should be used as a guide for the acquisition and location of recreational trail facilities within the planning area.

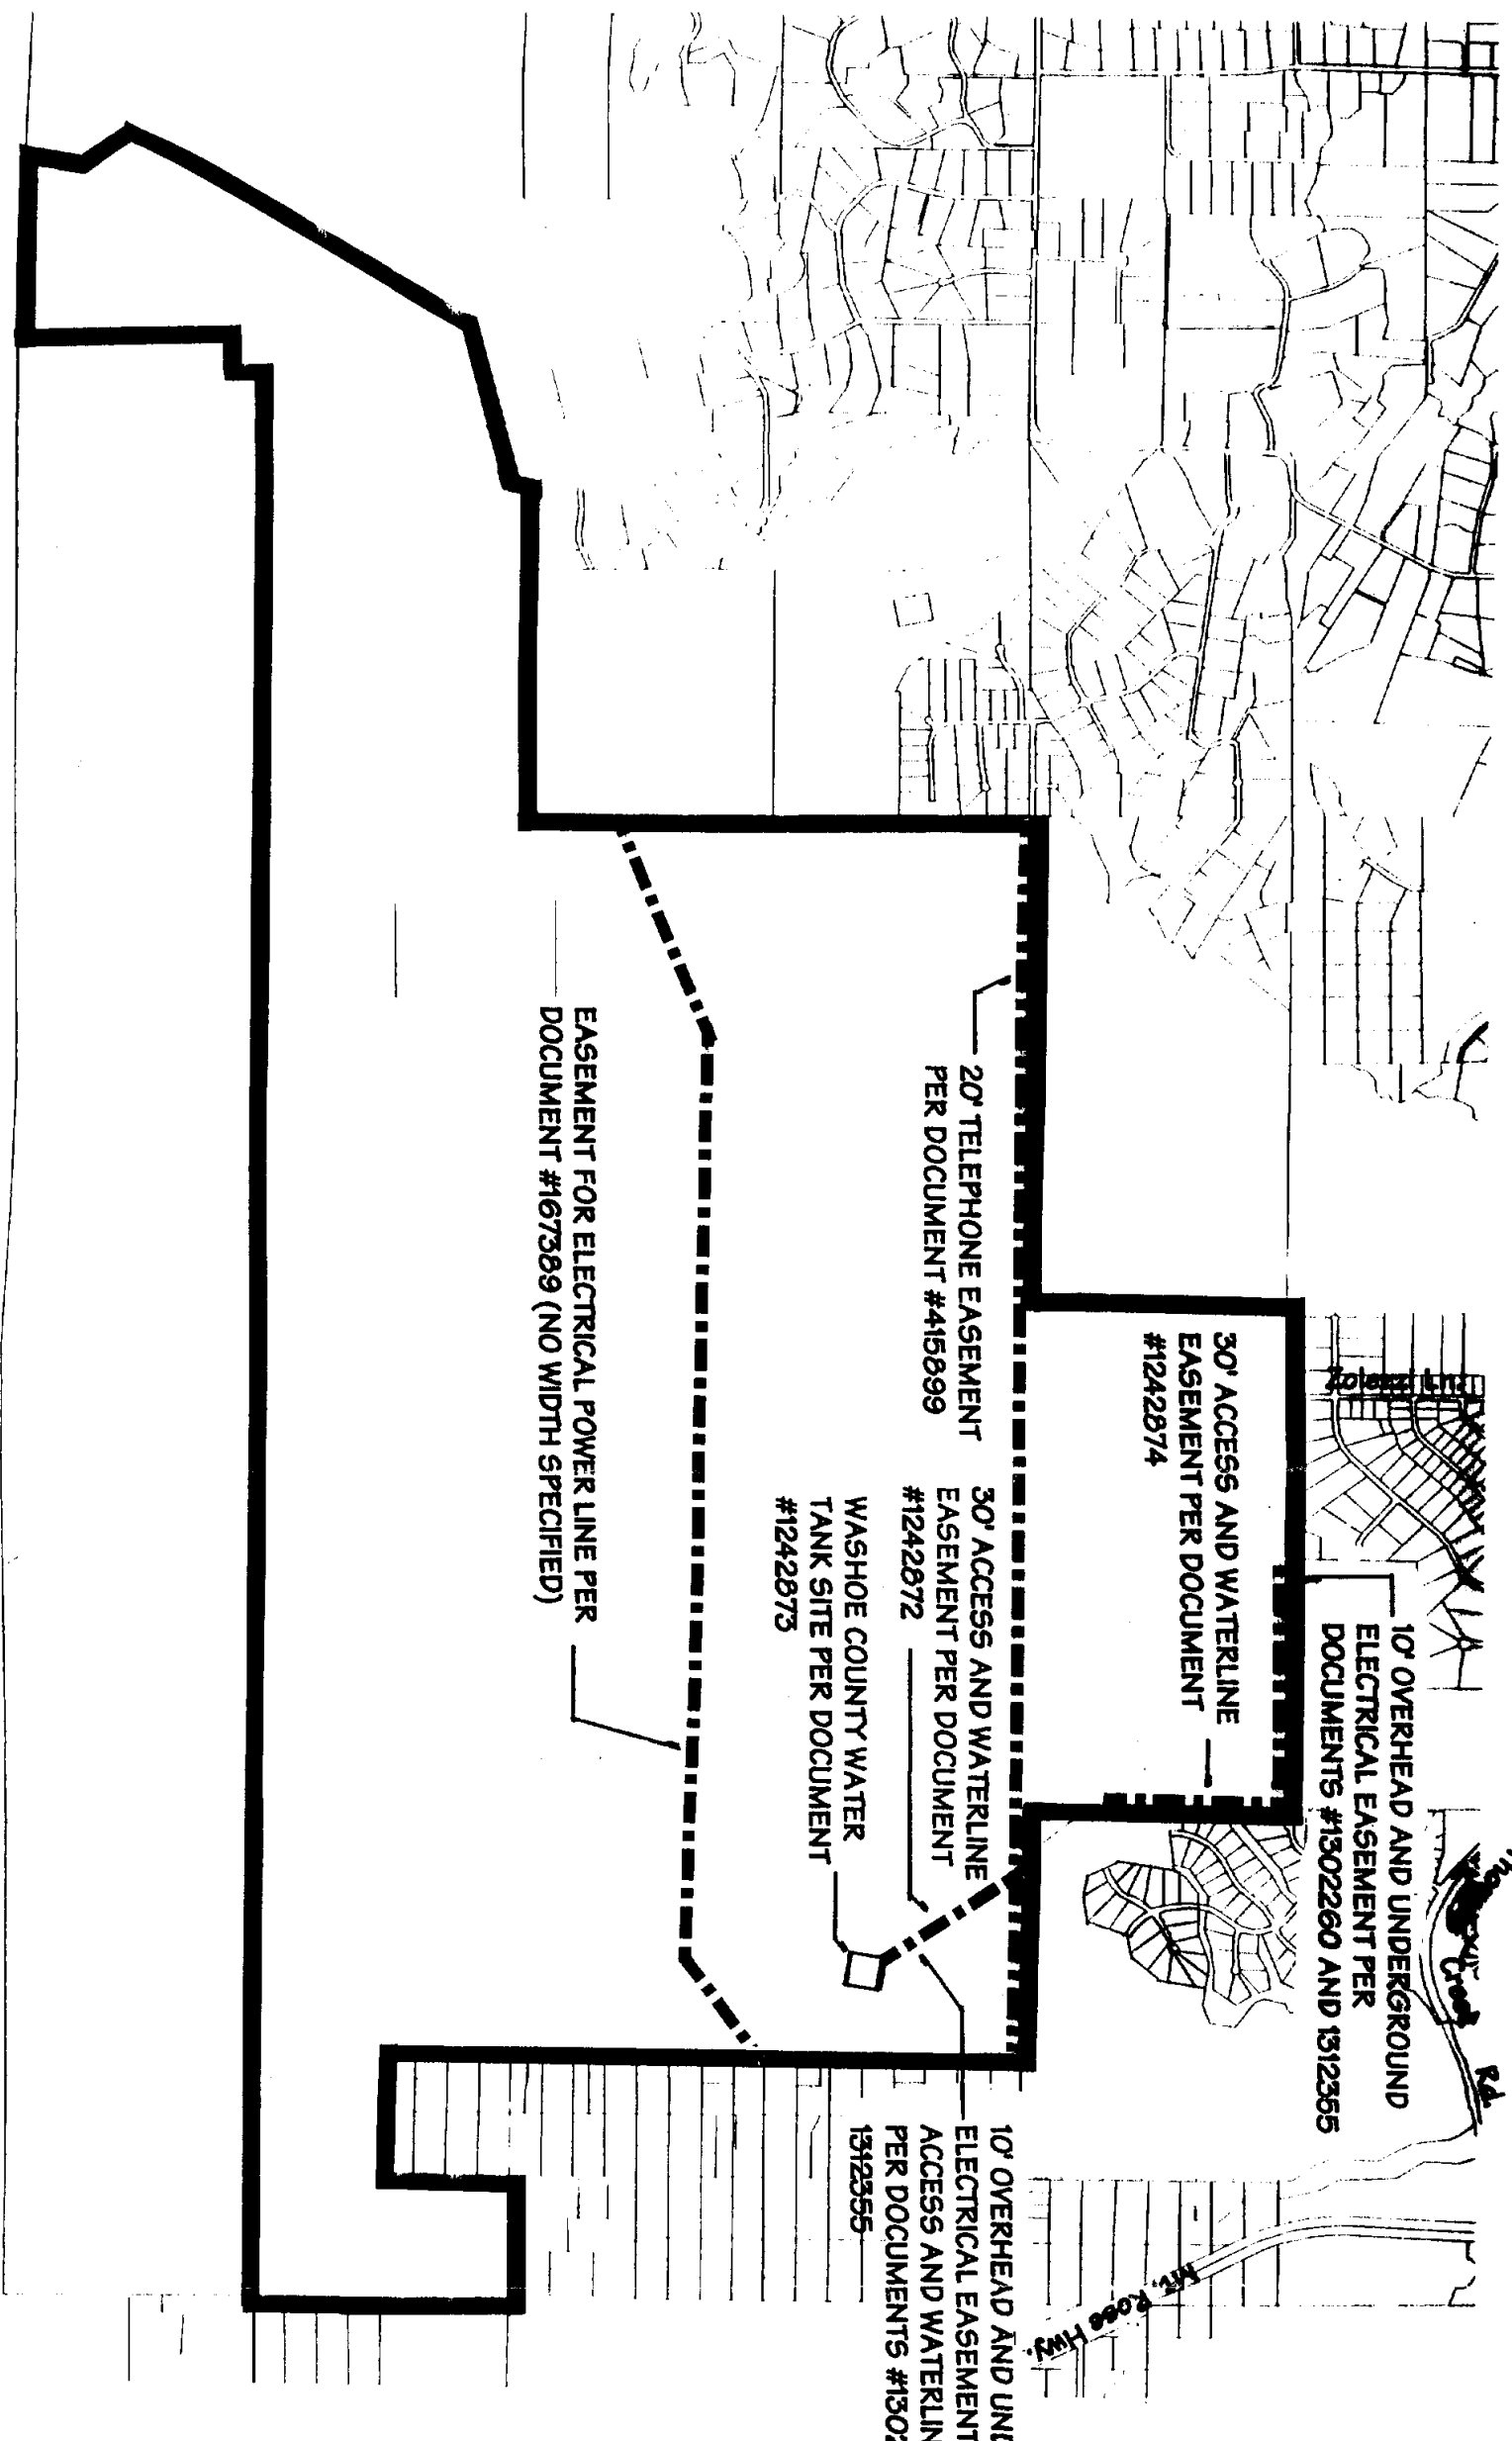

**Comment:** Refer to previous statement under policy SWTM.3.10. A 10-acre neighborhood park is also shown between the middle school and Thomas Creek.

### Easements

As shown in Figure 6-2, the property is relatively free of easements. The most prominent easement is the SPPCo electrical power easement, which crosses through the center of the property in a north-south direction. This is a 120 kilovolt line that extends from Carson City to the Mt. Rose Substation. It is a transmission, rather than a distribution, line.

Document #167389 does not specify a width for this easement. The concept plan does, however, show no structures within 100 feet of either side of the power line.

**WASHOE COUNTY**  
**DEPARTMENT OF DEVELOPMENT REVIEW**  
**TENTATIVE SUBDIVISION MAP APPLICATION**  
**SUPPLEMENTAL INFORMATION**

---

(ALL REQUIRED INFORMATION MAY BE SEPARATELY ATTACHED)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific reference to Tentative Subdivision Maps may be found in Sections 110.608.00 through 110.608.30.

1. Location (address or distance and direction from nearest intersection):

Nearest intersection is Zolezzi Lane and Thomas Creek Road  
approximately 0.5 mile east of Southwest Pointe.

---

---

2. Subdivision Name (proposed name must not duplicate the name of any existing subdivision):

Southwest Pointe

---

3. Density and Lot Design:

- a. Acreage of project site: Total acreage: 3,271.6 acres. Acreage covered by tentative map: 1,230 acres
- b. Total number of lots: 1,000 lots. Lots in Phase I tentative map: 410
- c. Dwelling units per acre: 0.3 dwelling unit per acre
- d. Minimum area of proposed lots: 12,000 square feet
- e. Minimum width of proposed lots: 80 feet
-

4. For Common Open Space Subdivisions (Article 408), answer the following:

a. Range of lot sizes: 12,000 square feet, 0.5 acre, 1 acre and larger

b. Average lot size: 0.5 acre

c. Proposed yard setbacks if different from minimums established by Table 110.406.05.1:

12,000 square foot lots - 20' front and back, 8' side.

1/2 acre lots 25' front reduced to 20' with detached or side-in garage, 20' back, 10' side. 1 acre and larger lots - 30' front and back, 12' side.

d. Identify all proposed non-residential uses: Golf course, clubhouse, driving range, village center (e.g., daycare, neighborhood commercial uses), water tanks, schools, neighborhood park, regional trails, trailhead, fire station.

e. Acreage of common open space: Approximately 1.575 acres (The amount of acreage left as open space is approximate and may vary with subsequent tent.

f. Improvements proposed for the common open space: Regional trails, maps.)

Secondary access roads, two or three water tanks, and stormwater detention ponds.

g. Identify the party responsible for the maintenance of the common open space:

A final decision has not been made. Long-term maintenance may be the responsibility of the U.S.F.S., Washoe County Parks and Recreation Department, or a Homeowners' Association.

5. Utilities:

a. Sewer Service Washoe County

b. Electrical Service Sierra Pacific Power Company

c. Telephone Service Nevada Bell

d. LPG or Natural Gas Service Westpac Utilities

e. Solid Waste Disposal Service Reno Disposal Company

f. Cable Television Service Continental Cablevision of Reno

g. Water Service Washoe County

6. Washoe County Code, Chapter 110, Article 422 requires the dedication of water rights to Washoe County when creating new parcels, indicate the type and quantity of water rights you have available:

- a. Permit # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- b. Certificate # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- c. Surface Claim # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- d. Other, # \_\_\_\_\_ acre-feet per year \_\_\_\_\_

Title of those rights (as filed with the State Engineer in the Division of Water Resources of the Department of Conservation and Natural Resources):

The developer is looking at several potential sources for acquiring water rights. Sufficient water rights will be acquired and dedicated to Washoe County to serve the project.

When water service is by domestic wells, the Washoe County Comprehensive Plan allows the county to grant an exemption from the water dedication requirements for the existing parcel. Check the box at right if you request the exemption.

7. Community Services: (Provider and nearest facilities)

Fire Station Nevada Division of Forestry, Galena Station #2

Health Care Facility Washoe Medical Center, St. Mary's Regional Medical Center

Elementary School A new elementary school is scheduled to open in Fall 1995

Middle School Pine Middle School

High School Galena High School

Parks Thomas Creek and Saddlehorn Parks, South Valleys Regional Park

Library Galena High School

Citifare Bus Stop There is no Citifare service in the vicinity.

8. Describe the aspects of the tentative subdivision which contribute to energy conservation:

A village center is proposed which may include daycare and neighborhood-serving commercial uses. This should reduce the number of trips from the site; thereby, promoting energy conservation.

9. Is the subject property in an area identified by the Department of Comprehensive Planning as potentially containing rare or endangered plants and/or animals?  Yes  No  
If so, please list the species and describe what mitigation measures will be taken to prevent adverse impacts to the species:

---

---

---

---

---

10. Is the subject property located within a Scenic Corridor as delineated within the applicable area plan?  Yes  No If so, describe how the tentative map complies with the additional, adopted policies of that Scenic Corridor?

---

---

---

---

---

11. For tentative maps within the Forest Planning Area, explain how the tentative map conforms to that plan's open space policies?

NA

---

---

---

---

---

---

---

---

12. For parcel maps proposed in the Verdi Planning Area:

a. What are the water supply sources? NA  
\_\_\_\_\_  
\_\_\_\_\_

b. Quality of the water supply (attach District Health Department Certificate or provide evidence of satisfactory water quality based on information of water sources in the immediate vicinity of the subject site).

c. Quantity of the water supply (sustained pump test volume, delivered pipe capacity, etc.).  
NA  
\_\_\_\_\_  
\_\_\_\_\_

\_\_\_\_\_  
STAFF RESERVES THE RIGHT TO RETURN ANY INCOMPLETE PACKET TO THE APPLICANT AND TO RESCHEDULE THE APPLICATION UPON RESUBMITTAL. NO APPLICATION WILL BE DEEMED ACCEPTED UNTIL ALL INFORMATION IS RECEIVED.

WASHOE COUNTY  
DEPARTMENT OF DEVELOPMENT REVIEW  
SPECIAL USE PERMIT APPLICATION  
SUPPLEMENTAL INFORMATION

(ALL REQUIRED INFORMATION MAY BE SEPARATELY ATTACHED)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific reference to Special Use Permits may be found in Sections 110.810.00 through 110.810.75.

1. What is the type of project being requested?

Utility services - i.e., water storage tanks

2. What currently developed portions of the property or existing structures are going to be used with this permit?

None

3. What improvements (e.g., new structures, roadway improvements, utilities, sanitation, water supply, drainage, parking, signs, etc.) will have to be constructed or installed and what is the projected time frame for the completion of each?

Two or possibly three water tanks will be constructed for a total water storage requirement of 1.2-1.4 million gallons. The lower tank(s) will be located at an elevation of 5,710 feet and will have a storage requirement of 975,000-1.2 million gallons. To satisfy this requirement, one or two tanks with a height of 24 feet will be constructed. The remaining

4. What is the intended phasing schedule for the construction and completion of this project? \*

The lower tank(s) must be operational prior to construction of any homes. The upper tank must be operational prior to construction of any homes above 5,500 feet.

5. What physical characteristics of your location and/or premises are especially suited to deal with the impacts and the intensity of your proposed use?

The tanks will be located in a ravine to shield them from view as much as possible.

\*tank will be located at an elevation of 5,848 feet and will have a capacity of 200,000 gallons. The proposed location of these tanks is (June 12, 1993) shown on the concept plan and the tentative map. SUP-AP1.DOC

6. What are the anticipated beneficial impacts or effects your project will have on adjacent properties and the community?

The tanks are needed to meet Washoe County water storage and fire  
flow protection requirements.

7. What will you do to minimize the anticipated negative impacts or effects your project will have on adjacent properties?

The tanks will be located in a ravine. If necessary, landscaping  
will be installed to screen the tanks from view of adjacent  
properties.

8. What measures will you employ or what elements currently exist that will prevent the proposed use from resulting in significant damage or discrimination to other property in the vicinity?

There will be no significant damage resulting from this use. The  
tanks will be constructed in a ravine to screen them from view. If  
additional screening is necessary, landscaping will be installed.

9. How many improved parking spaces, both on-site and off-site, are available or will be provided? (Please indicate on site plan.)

No parking spaces are required for this use.

10. What types of landscaping (e.g., shrubs, trees, fencing, painting scheme, etc.) are proposed? (Please indicate location on site plan.)

The water tanks will be landscaped to the satisfaction of the  
Department of Development Review.

11. What type of signs and lighting will be provided? On a separate sheet, show a depiction (height, width, construction materials, colors, illumination methods, lighting intensity, base landscaping, etc.) of each sign and the typical lighting standards. (Please indicate location of signs and lights on site plan.)

No signs or lighting will be necessary.

12. Are there any deed restrictions, restrictive covenants, or recorded conditions that apply to the area subject to the abandonment request? YES \_\_\_\_\_ NO X If so, please attach a copy.

13. Utilities:

- a. Sewer Service NA
- b. Electrical Service \_\_\_\_\_
- c. Telephone Service NA
- d. LPG or Natural Gas Service NA
- e. Solid Waste Disposal Service NA
- f. Cable Television Service NA
- g. Water Service Washoe County

For most uses, the Washoe County Code, Chapter 110, Article 422 requires the dedication of water rights to Washoe County. Please indicate the type and quantity of water rights you have available should dedication be required:

- a. Permit # NA acre-feet per year \_\_\_\_\_
- b. Certificate # NA acre-feet per year \_\_\_\_\_
- c. Surface Claim # NA acre-feet per year \_\_\_\_\_
- d. Other, # NA acre-feet per year \_\_\_\_\_

Title of those rights (as filed with the State Engineer in the Division of Water Resources of the Department of Conservation and Natural Resources):

NA

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

14. Community Services: (Provider and nearest facilities)

- a. Fire Station NA
- b. Health care facility NA
- c. Elementary School NA
- d. Middle School NA
- e. Parks NA
- f. Library NA
- g. Citifare bus stop NA

**WASHOE COUNTY  
DEPARTMENT OF DEVELOPMENT REVIEW  
SPECIAL USE PERMIT APPLICATION  
SUPPLEMENTAL INFORMATION**

(ALL REQUIRED INFORMATION MAY BE SEPARATELY ATTACHED)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific reference to Special Use Permits may be found in Sections 110.810.00 through 110.810.75.

1. What is the type of project being requested?  
Child care - either large-family daycare or child daycare  

---
2. What currently developed portions of the property or existing structures are going to be used with this permit?  
None  

---

---
3. What improvements (e.g., new structures, roadway improvements, utilities, sanitation, water supply, drainage, parking, signs, etc.) will have to be constructed or installed and what is the projected time frame for the completion of each?  
Daycare will be located in the village center. Utilities, roads, and other services will be extended to the village center with construction of the golf course.  

---
4. What is the intended phasing schedule for the construction and completion of this project?  
Construction of a daycare center is dependent on whether or not there is an operator who identifies a need for such a facility. The developers of Southwest Pointe believe that a childcare facility would be desirable and, therefore, want to create an opportunity for a daycare operator to locate within the development.
5. What physical characteristics of your location and/or premises are especially suited to deal with the impacts and the intensity of your proposed use?  
The daycare center would be located within the village center, which is at the heart of the project. This is the ideal location for such a use.  

---

---

6. What are the anticipated beneficial impacts or effects your project will have on adjacent properties and the community?

This use will offer a needed service to the residents in the surrounding community.

7. What will you do to minimize the anticipated negative impacts or effects your project will have on adjacent properties?

No negative impacts are anticipated.

8. What measures will you employ or what elements currently exist that will prevent the proposed use from resulting in significant damage or discrimination to other property in the vicinity?

This use will not result in significant damage to other property in the vicinity.

9. How many improved parking spaces, both on-site and off-site, are available or will be provided? (Please indicate on site plan.)

The daycare center will comply with Article 410 (parking and loading) of the Washoe County Development Code.

10. What types of landscaping (e.g., shrubs, trees, fencing, painting scheme, etc.) are proposed? (Please indicate location on site plan.)

The center will comply with the requirements of Article 412 (landscaping) of the Washoe County Development Code.

11. What type of signs and lighting will be provided? On a separate sheet, show a depiction (height, width, construction materials, colors, illumination methods, lighting intensity, base landscaping, etc.) of each sign and the typical lighting standards. (Please indicate location of signs and lights on site plan.)

Signs and lighting will be addressed in the final development agreement. The architecture, signs, lighting, landscaping etc., for the daycare center will be coordinated with the remainder of the village center.

12. Are there any deed restrictions, restrictive covenants, or recorded conditions that apply to the area subject to the abandonment request? YES  NO  If so, please attach a copy.

13. Utilities:

- a. Sewer Service Washoe County
- b. Electrical Service SPPCo
- c. Telephone Service Nevada Bell
- d. LPG or Natural Gas Service Westpac Utilities
- e. Solid Waste Disposal Service Reno Disposal Company
- f. Cable Television Service Continental Cablevision of Reno
- g. Water Service Washoe County

For most uses, the Washoe County Code, Chapter 110, Article 422 requires the dedication of water rights to Washoe County. Please indicate the type and quantity of water rights you have available should dedication be required:

- a. Permit # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- b. Certificate # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- c. Surface Claim # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- d. Other, # \_\_\_\_\_ acre-feet per year \_\_\_\_\_

Title of those rights (as filed with the State Engineer in the Division of Water Resources of the Department of Conservation and Natural Resources):

Sufficient water rights will be acquired and dedicated to Washoe  
County to serve the project.

14. Community Services: (Provider and nearest facilities)

- a. Fire Station Nevada Division of Forestry, Galena Station #2
- b. Health care facility Washoe Medical Center, St. Mary's Regional Medical Center
- c. Elementary School A new elementary school is scheduled to open in Fall 1995
- d. Middle School Pine Middle School
- e. Parks Thomas Creek and Saddlehorn Parks, South Valleys Regional Park
- f. Library Galena High School
- g. Citifare bus stop There is no Citifare service in the vicinity.

SPW9-12-93

WASHOE COUNTY  
DEPARTMENT OF DEVELOPMENT REVIEW  
SPECIAL USE PERMIT APPLICATION  
SUPPLEMENTAL INFORMATION

(ALL REQUIRED INFORMATION MAY BE SEPARATELY ATTACHED)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific reference to Special Use Permits may be found in Sections 110.810.00 through 110.810.75.

1. What is the type of project being requested?

Neighborhood commercial center.

Approximate square footage: 15,000 - 20,000 square feet.

2. What currently developed portions of the property or existing structures are going to be used with this permit?

None

3. What improvements (e.g., new structures, roadway improvements, utilities, sanitation, water supply, drainage, parking, signs, etc.) will have to be constructed or installed and what is the projected time frame for the completion of each?

The neighborhood commercial center will be located in the village center, which also includes the clubhouse and the daycare center.

Utilities and services will be extended to the village center with construction of the golf course.

4. What is the intended phasing schedule for the construction and completion of this project?

The neighborhood commercial center would probably not be constructed until late in Phase II or with Phase III because there would not be enough of a population base to support the center before that time.

5. What physical characteristics of your location and/or premises are especially suited to deal with the impacts and the intensity of your proposed use?

The village center is centrally located within the project. Since the center is being master planned within the community, there is ample opportunity to minimize any impacts. The village center will not impact any adjacent existing land uses because it is too far away from any such uses.

6. What are the anticipated beneficial impacts or effects your project will have on adjacent properties and the community?

The center will provide services that meet the needs of the immediate neighborhood, thereby, reducing automobile trips.

7. What will you do to minimize the anticipated negative impacts or effects your project will have on adjacent properties?

No negative impacts are anticipated. The village center has been master planned within the community; it is not an after-thought. Since this is a planned use, there is ample opportunity to intergrate it into the community.

8. What measures will you employ or what elements currently exist that will prevent the proposed use from resulting in significant damage or discrimination to other property in the vicinity?

For the reasons described previously, this use will not result in any significant damage to other property.

9. How many improved parking spaces, both on-site and off-site, are available or will be provided? (Please indicate on site plan.)

The neighborhood commercial center will comply with Article 410 (parking and loading) of the Washoe County Development Code.

10. What types of landscaping (e.g., shrubs, trees, fencing, painting scheme, etc.) are proposed? (Please indicate location on site plan.)

The center will comply with or exceed the requirements of Article 412 (landscaping) of the Washoe County Development Code. The final development agreement will include a preliminary landscape plan for the commercial center.

11. What type of signs and lighting will be provided? On a separate sheet, show a depiction (height, width, construction materials, colors, illumination methods, lighting intensity, base landscaping, etc.) of each sign and the typical lighting standards. (Please indicate location of signs and lights on site plan.)

Signs and lighting for the commercial center will be addressed in the final development agreement. The architecture, signs, lighting, etc. for all the uses in the village center will be coordinated.

12. Are there any deed restrictions, restrictive covenants, or recorded conditions that apply to the area subject to the abandonment request? YES \_\_\_\_\_ NO X If so, please attach a copy.

13. Utilities:

- a. Sewer Service Washoe County
- b. Electrical Service SPPCo
- c. Telephone Service Nevada Bell
- d. LPG or Natural Gas Service Westpac Utilities
- e. Solid Waste Disposal Service Reno Disposal Company
- f. Cable Television Service Continental Cablevision of Reno
- g. Water Service Washoe County

For most uses, the Washoe County Code, Chapter 110, Article 422 requires the dedication of water rights to Washoe County. Please indicate the type and quantity of water rights you have available should dedication be required:

- a. Permit # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- b. Certificate # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- c. Surface Claim # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- d. Other, # \_\_\_\_\_ acre-feet per year \_\_\_\_\_

Title of those rights (as filed with the State Engineer in the Division of Water Resources of the Department of Conservation and Natural Resources):

Sufficient water rights will be acquired and dedicated to Washoe  
County to serve the project.

14. Community Services: (Provider and nearest facilities)

WASHOE COUNTY  
DEPARTMENT OF DEVELOPMENT REVIEW  
SPECIAL USE PERMIT APPLICATION  
SUPPLEMENTAL INFORMATION

(ALL REQUIRED INFORMATION MAY BE SEPARATELY ATTACHED)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific reference to Special Use Permits may be found in Sections 110.810.00 through 110.810.75.

1. What is the type of project being requested?

Commercial outdoor sports and recreation - i.e., golf courses, driving range, tennis courts, swimming pool, clubhouse.

2. What currently developed portions of the property or existing structures are going to be used with this permit?

None

3. What improvements (e.g., new structures, roadway improvements, utilities, sanitation, water supply, drainage, parking, signs, etc.) will have to be constructed or installed and what is the projected time frame for the completion of each?

An 18-hole golf course, driving range, and temporary clubhouse will be constructed with the initial phase of residential development.

The permanent clubhouse will be started after the golf course is operational.

4. What is the intended phasing schedule for the construction and completion of this project?

Phase II includes an additional 9 holes of golf and the remaining holes will be constructed with the third phase of development.

5. What physical characteristics of your location and/or premises are especially suited to deal with the impacts and the intensity of your proposed use?

This large property is ideally suited for a master-planned development of this type. The golf course has been integrated into the site plan and the clubhouse has been located near the center of the project.

All of these uses are located a considerable distance from any existing development.

6. What are the anticipated beneficial impacts or effects your project will have on adjacent properties and the community?

The golf courses and clubhouse, in conjunction with the planned residential development, will enhance the community's overall image and value.

7. What will you do to minimize the anticipated negative impacts or effects your project will have on adjacent properties?

No negative impacts are anticipated. These uses have been planned within the community; they have not been added as an after-thought. All of the proposed development is separated from adjacent subdivisions with open space buffers.

8. What measures will you employ or what elements currently exist that will prevent the proposed use from resulting in significant damage or discrimination to other property in the vicinity?

No significant damage to adjacent properties is anticipated.

9. How many improved parking spaces, both on-site and off-site, are available or will be provided? (Please indicate on site plan.)

These uses will comply with Article 410 (parking and loading) of the Washoe County Development Code.

10. What types of landscaping (e.g., shrubs, trees, fencing, painting scheme, etc.) are proposed? (Please indicate location on site plan.)

The clubhouse landscaping will comply with or exceed the requirements of Article 412 (landscaping) of the Washoe County Development Code. The final development agreement will include a preliminary landscape plan for the clubhouse.

11. What type of signs and lighting will be provided? On a separate sheet, show a depiction (height, width, construction materials, colors, illumination methods, lighting intensity, base landscaping, etc.) of each sign and the typical lighting standards. (Please indicate location of signs and lights on site plan.)

Signs and lighting for the clubhouse and village center will be addressed in the final development agreement. The architecture, signs, lighting, etc. for all of the uses in the village center will be coordinated.

12. Are there any deed restrictions, restrictive covenants, or recorded conditions that apply to the area subject to the abandonment request? YES  NO  If so, please attach a copy.

13. Utilities:

- a. Sewer Service Washoe County
- b. Electrical Service SPPCo
- c. Telephone Service Nevada Bell
- d. LPG or Natural Gas Service Westoac Utilities
- e. Solid Waste Disposal Service Reno Disposal Company
- f. Cable Television Service Continental Cablevision of Reno
- g. Water Service Washoe County

For most uses, the Washoe County Code, Chapter 110, Article 422 requires the dedication of water rights to Washoe County. Please indicate the type and quantity of water rights you have available should dedication be required:

- a. Permit # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- b. Certificate # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- c. Surface Claim # \_\_\_\_\_ acre-feet per year \_\_\_\_\_
- d. Other, # \_\_\_\_\_ acre-feet per year \_\_\_\_\_

Title of those rights (as filed with the State Engineer in the Division of Water Resources of the Department of Conservation and Natural Resources):

Sufficient water rights will be acquired and dedicated to Washoe  
County to serve the project.

14. Community Services: (Provider and nearest facilities)

- a. Fire Station Nevada Division of Forestry, Galena Station #2
- b. Health care facility Washoe Medical Center, St. Mary's Regional Medical Center
- c. Elementary School A new elementary school is scheduled to open in Fall 1995
- d. Middle School Pine Middle School
- e. Parks Thomas Creek and Saddlehorn Parks, South Valleys Regional Park
- f. Library Galena High School
- g. Citifare bus stop There is no Citifare service in the vicinity.

WASHOE COUNTY  
DEPARTMENT OF DEVELOPMENT REVIEW  
ADMINISTRATIVE PERMIT APPLICATION  
SUPPLEMENTAL INFORMATION

(ALL REQUIRED INFORMATION MAY BE SEPARATELY ATTACHED)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific reference to Administrative Permits may be found in Sections 110.808.00 through 110.808.75.

1. What is the type of project being requested?  
Commercial stables (i.e., equestrian center)  
\_\_\_\_\_  
\_\_\_\_\_
  
2. What currently developed portions of the property or existing structures are going to be used with this permit?  
None  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_
  
3. What improvements (e.g., new structures, roadway improvements, utilities, sanitation, water supply, drainage, parking, signs, etc.) will have to be constructed or installed and what is the projected time frame for the completion of each?  
The equestrian center is located in the second phase of the project.  
It may include boarding, riding facilities, and riding instruction.  
\_\_\_\_\_  
\_\_\_\_\_
  
4. What is the intended phasing schedule for the construction and completion of this project?  
The equestrian center is planned as part of Phase II.  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_
  
5. What physical characteristics of your location and/or premises are especially suited to deal with the impacts and the intensity of your proposed use?  
The equestrian center is located near the project entrance and  
connects to the proposed trail system.  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

6. What are the anticipated beneficial impacts or effects your project will have on adjacent properties and the community?

The equestrian center will be an amenity to the project.

7. What will you do to minimize the anticipated negative impacts or effects your project will have on adjacent properties?

No negative impacts are anticipated. There is an open space buffer between the equestrian center and the TMS property to the north.

8. What measures will you employ or what elements currently exist that will prevent the proposed use from resulting in significant damage or discrimination to other property in the vicinity?

No significant damage is anticipated.

9. How many improved parking spaces, both on-site and off-site, are available or will be provided? (Please indicate on site plan.)

The equestrian center will comply with Article 410 (parking and loading) of the Washoe County Development Code.

10. What types of landscaping (e.g., shrubs, trees, fencing, painting scheme, etc.) are proposed? (Please indicate location on site plan.)

The equestrian center will comply with Article 412 (landscaping) of the Washoe County Development Code. The final development agreement will include a preliminary landscape plan for the equestrian center.

11. What type of signs and lighting will be provided? On a separate sheet, show a depiction (height, width, construction materials, colors, illumination methods, lighting intensity, base landscaping, etc.) of each sign and the typical lighting standards. (Please indicate location of signs and lights on site plan.)

Signs and lighting will be addressed in the final development agreement. The architecture, signs, lighting, etc. will be coordinated with the remainder of the development.

12. Are there any deed restrictions, restrictive covenants, or recorded conditions that apply to the area subject to the abandonment request? YES \_\_\_\_\_ NO X If so, please attach a copy.

13. Utilities:

- a. Sewer Service Washoe County
- b. Electrical Service SPPCo
- c. Telephone Service Nevada Bell
- d. LPG or Natural Gas Service Westpac Utilities
- e. Solid Waste Disposal Service Reno Disposal Company

## LEGAL DESCRIPTION

All that certain lot, piece or parcel of land situate in the County of Washoe, State of Nevada, described as follows:

### Parcel 1

T. 18 N., R. 19 E., MDB&M

Section 3: The south half

Excepting therefrom that portion thereof conveyed to Caleb Van Husen Whitbeck by Deed recorded in Book 86, Page 247, Deed Records.

Section 10: All

Excepting therefrom that portion thereof conveyed to Caleb Van Husen Whitbeck by Deed recorded in Book 86, Page 247, Deed records.

Further excepting therefrom those portions conveyed to the United States of America by Deed recorded October 23, 1984, in Book 2084, Page 80, as Document No. 957829, Official Records.

### Parcel 2

T. 18 N., R. 19 E., MDB&M

Section 14: All

Section 15: The east half

Section 22: The east half

Section 23: All

Section 24: The west half

Section 26: The north half

Excepting therefrom that portion conveyed to the County of Washoe, a political subdivision, by Deed recorded April 29, 1988, in Book 2728, Page 395, as Document No. 1242873, Official Records.

Section 27: The northeast quarter; the west half of the southeast quarter; the southeast quarter of the southeast quarter.

Containing 3,272 acres, more or less.

LEGAL DESCRIPTION  
FOR  
PHASE I TENTATIVE MAP

A parcel of land situate within portions of Sections 14, 23, 24, 26, and 27, T. 18 N., R. 19 E., MDM; more particularly described as follows:

Beginning at the north quarter corner of said Section 24;  
thence along the north-south centerline of said Section 24, S 00°36'39" W, 5261.48 feet to the south quarter corner of said Section 24;  
thence along the south line of said Section 24, N 89°55'59" W, 2627.11 feet to the southwest corner of said Section 24;  
thence along the east line of said Section 26, S 00°39'06" W, 2648.96 feet to the east quarter corner of said Section 26;  
thence along the east-west centerline of Section 26, N 89°56'30" W, 5266.22 feet to the west quarter corner of said Section 26;  
thence along the east-west centerline of Section 27, S 89°18'19" W, 1324.70 feet to the northwest corner of the northeast quarter of the southeast quarter of said Section 27;  
thence along the west line of said northeast quarter of the southeast quarter of Section 27, S 00°56'01" W, 1299.17 feet to the southwest corner of said northeast quarter of the southeast quarter of Section 27;  
thence along the south line of said northeast quarter of the southeast quarter of Section 27, N 89°45'40" E, 1321.69 feet to the southeast corner of said northeast quarter of the southeast quarter of Section 27;  
thence along the east line of said Section 27, S 01°03'16" W, 1309.77 feet to the southeast corner of said Section 27;  
thence along the south line of said Section 27, N 89°46'52" W, 2637.50 feet to the south quarter corner of said Section 27;  
thence along the north-south line of said Section 27, N 00°48'40" E, 4800.00 feet;  
thence S 60°08'04" E, 1029.56 feet;  
thence N 80°11'08" E, 2057.50 feet;  
thence N 29°43'14" E, 1337.68 feet;  
thence N 22°29'22" E, 426.95 feet;  
thence N 24°23'41" E, 510.84 feet;  
thence N 35°21'19" E, 577.29 feet;  
thence N 43°49'05" E, 851.63 feet;  
thence N 07°54'30" W, 1116.46 feet;  
thence N 61°21'48" E, 1206.19 feet;  
thence N 87°31'14" E, 303.28 feet;  
thence N 00°00'00" E, 356.49 feet;  
thence N 89°07'08" E, 144.88 feet;  
thence N 02°08'59" W, 1196.40 feet;  
thence S 83°31'05" E, 1042.54 feet;  
thence S 28°20'18" W, 1583.85 feet;  
thence S 83°31'05" E, 293.90 feet;  
thence along the arc of a tangent 20.00 foot radius curve to the left through a central angle of 81°40'15", a distance of 28.51 feet;  
thence along the arc of a tangent 300.00 foot radius curve to the right through a central angle of 27°28'34", a distance of 143.86 feet;  
thence N 42°17'14" E, 772.18 feet;  
thence along the arc of a tangent 440.00 foot radius curve to the right through a central angle of 62°16'39", a distance of 478.26 feet;  
thence S 75°26'07" E, 529.63 feet;  
thence along the arc of a tangent 1960.00 foot radius curve to the left through a central angle of 36°12'16", a distance of 1238.50 feet;  
thence N 68°21'38" E, 660.48 feet;  
thence along the arc of a tangent 1040.00 foot radius curve to the right through a central angle of 05°29'34", a distance of 99.70 feet to a point on the north line of said Section 24;  
thence along the north line of said Section 24, N 89°48'54" E, 349.88 feet to the point of beginning.

Containing 1230.33 acres of land, more or less.

# FIRST AMERICAN TITLE COMPANY OF NEVADA

241 Ridge Street (P.O. Box 531) Reno, Nevada 89504 (702)688-4848

## *Preliminary Report*

March 31, 1993

Your No.:

Our Order No.: 167821SL AP # 041-030-12,049-010-04, 10

Form of Policy Coverage Requested:

In response to the above referenced application for a policy of title insurance, this Company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy of Title Insurance in the form specified above, the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy form.

This report (and supplements or amendments thereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of March 16, 1993 at 8:30 a.m.

*R.M. Stark, Title Officer*

Title to said estate or interest at the date hereof is vested in:

BETTY ALYCE JONES, HELEN JEANE JONES, IRIS G. BREWERTON, KENNETH G. WALKER and GERALD C. SMITH as Trustees under the provisions of that certain Revocable Trust Agreement dated May 21, 1980

The estate or interest in the land hereafter described or referred to covered by this report is:

A FEE

At the date hereof exceptions to coverage in addition to the printed exceptions and exclusions contained in said policy form would be as follows:

1. Any liens which may be or may become due the Truckee Meadows General Improvement District by reason of the location of said land within the boundaries of said District and any use of the services provided thereby. Specific amounts may be obtained by calling the Washoe County Public Works Department, Utility Division at (702) 785-4743.
2. Right of way for any existing roads, trails, canals, ditches, drain ditches, pipe, pole or transmission lines traversing said lands.
3. Any right of way for Evans Creek and any and all tributaries of said Evans Creek, and any and all drain ditches traversing said property which would be disclosed and located by an accurate survey.  
(Affects Parcel 1)
4. Any right of way for Thomas Creek and any and all tributaries of said Thomas Creek, and any and all drain ditches traversing said property which would be disclosed and located by an accurate survey.  
(Affects Parcel 2)
5. A right of way granted to Bell Telephone Company of Nevada, a corporation, and Sierra Pacific Power Company, a corporation, for public utility purposes and all rights in connection therewith and over property as set forth in instrument recorded November 28, 1973, in Book 780, Page 401, Document No. 309541, Official Records.  
(Affects Parcel 2)
6. Easement over a portion of said land, for public utility purposes, and all rights and reservations connected therewith, as granted to Bell Telephone Company of Nevada, by instrument recorded July 3, 1976, in Book 987, Page 901, Document No. 415899, Official Records.  
(Affects Parcel 2)
7. First Right of Refusal to purchase was granted to MAXIT FINANCIAL CORPORATION, by Document No. 581011, in Book 1337, Page 382, Official Records, Washoe County, Nevada.  
(Affects Parcel 2)  
  
A partial assignment of said First Right of Refusal to purchase was recorded on December 7, 1978, as Document No. 575173, in Book 1347, Page 335, Official Records, Washoe County, Nevada.
8. An easement for ingress and egress 50 feet in width as granted to Merle Winburn and Marlene Ruth Winburn, husband and wife, recorded November 24, 1980 in Book 1572, Page 540, Document No. 708260, Official Records.  
(Affects Parcel 2)

(CONTINUED ON NEXT PAGE)

9. A 30 foot access and waterline easement and right of way and incidentals thereto, as granted to the COUNTY OF WASHOE, a political subdivision of the State of Nevada, by Grant of Easement dated March 31, 1988, recorded April 29, 1988 in Book 2728, Page 390, as Document No. 1242872, Official Records.  
(Affects Parcel 2)
10. A 30 foot access and waterline easement and right of way and incidentals thereto, as granted to the COUNTY OF WASHOE, a political subdivision of the State of Nevada, by Grant of Easement dated March 31, 1988, recorded April 29, 1988, in Book 2728, Page 400, as Document No. 1242874, Official Records.  
(Affects Parcel 2)
11. An easement and right of way, to construct, operate and maintain, overhead electric distribution facilities and all rights incidental thereto, as granted to Sierra Pacific Power Company, a Nevada corporation, by Grant of Easement dated November 22, 1988, recorded January 31, 1989, in Book 2860, Page 866, as Document No. 1302260, Official Records.  
(Affects Parcel 2)
12. An easement and right of way to construct, operate and maintain underground electric distribution facilities and all rights incidental thereto, as granted to Sierra Pacific Power Company, a Nevada corporation, by Grant of Easement dated February 17, 1989, recorded March 23, 1989 in Book 2882, Page 917, as Document No. 1312355, Official Records.  
(Affects Parcel 2)
13. Notice of Claim of Easement and incidental purposes as disclosed by an instrument recorded September 23, 1992 in Book 3570, Page 985 as Document No. 1607389, Official Records.  
(Reference is made to said document for full particulars)
14. Notice of Claim of Easement and incidental purposes as disclosed by an instrument recorded September 23, 1992 in Book 3571, Page 1, as Document No. 1607392, of Official Records.  
(Reference is made to said document for full particulars)
15. Prior to the issuance of any Policy of Title Insurance this office will require a full copy of the Trust referred to in the vesting herein and any amendments thereto for our review.

## TENTATIVE SUBDIVISION MAP DRAWING REQUIREMENTS

THE FOLLOWING INFORMATION MUST BE SHOWN ON THE TENTATIVE MAP AND/OR ACCOMPANYING DRAWINGS. THE ATTACHED "DESIGN REQUIREMENTS" OF ARTICLE 604 OF THE DEVELOPMENT CODE MUST BE FOLLOWED.

- X   1. All tentative maps submitted to the County shall be prepared by, or under the supervision of a Nevada Registered Civil Engineer or Land Surveyor, and shall be stamped with appropriate seals.
- X   2. Map to be drawn on 24" x 36" or 30" x 42" sheets using standard engineering scales (minimum scale 1" = 100').
- X   3. Property boundary lines, distances and bearings.
- X   4. Contours at five foot intervals or two foot intervals where, in the opinion of the County Engineer or the director of the Department of Development Review, topography is a major factor in the subdivision design.
- X   5. Indication of prominent landmarks, areas of unique natural beauty, rock outcroppings, vistas and natural foliage which will be deciding considerations in the design of the subdivision. Plans shall call for maximum retention of such features.
- X   6. The width of right-of-way, proposed name and approximate grade of each highway, street, alley or public way within the proposed subdivisions and approximate radius of all curves and diameter of each cul-de-sac. Cuts increasing any portion of the slope to a ratio greater than two horizontal to one vertical, for parking areas, roads or other purposes, shall be controlled by a retaining wall or other acceptable method, and shall be designed on the map.
- X   7. Dimensions of each lot and area of each non-rectangular lot.

DRAWING REQUIREMENTS *(continued next page)*

---

**All plans must be folded to an 8 1/2" x 11" size.**

---

STAFF RESERVES THE RIGHT TO RETURN ANY INCOMPLETE PACKET TO THE APPLICANT AND TO RESCHEDULE THE APPLICATION UPON RESUBMITTAL. NO APPLICATION WILL BE DEEMED ACCEPTED UNTIL ALL INFORMATION IS RECEIVED.

DRAWING REQUIREMENTS (continued)

- X   8. All blocks shall be numbered and block numbers shall be consecutive and shall begin with the number "1" or the letter "A". Lot numbers shall be consecutive within each block, beginning with the number "1" or the letter "A". No lot shall be divided by City-County boundary lines. In all cases where practical, the side lot lines shall be at approximate right angles to the street upon which they front.
- X   9. The setback distance or that distance between the right-of-way within the subdivision shall be designated on the map.
- X   10. The width and approximate location of all existing or proposed easements, whether public or private, for roads, drainage, sewers, irrigation or public utility purposes.
- X   11. Location and size of any land to be reserved or dedicated for parks, recreation areas, common open space areas, schools or other public uses.
- X   12. If any portion of the land within the boundary of the subdivision is subject to inundation or storm water overflow, as shown on the adopted Federal Emergency Management Agency's Flood Boundary and Floodway Maps, that fact and the land so affected shall be clearly shown on the map by a prominent note on each sheet. Information indicating the 100 year flood elevation (if septic tanks are proposed, should reflect FEMA requirements included in the County Flood Plain Management Ordinance) shall be clearly indicated, as well as width and direction of flow of each water course within the boundaries of the subdivision.
- NA   13. The location and outline to scale of each existing building or structure which is not to be moved in the development.
- X   14. Existing roads, trails or rights-of-way within the subdivision shall be designated on the map. Topography and existing developments within 300 feet must be also shown on the map.
- X   15. Vicinity map showing the proposed subdivision in relation to the surrounding area.

DRAWING REQUIREMENTS (continued next page)

---

**All plans must be folded to an 8 1/2" x 11" size.**

---

STAFF RESERVES THE RIGHT TO RETURN ANY INCOMPLETE PACKET TO THE APPLICANT AND TO RESCHEDULE THE APPLICATION UPON RESUBMITTAL. NO APPLICATION WILL BE DEEMED ACCEPTED UNTIL ALL INFORMATION IS RECEIVED.

DRAWING REQUIREMENTS (continued)

- X   16. Name and address of the landowner, developer, planner, architect, landscape architect.
- X   17. Name and address of the surveyor or engineer who prepared the map.
- X   18. Date, north point, scale and number of sheet in relation to the total number of sheets.
- X   19. Design of public and private streets, rights-of-way and driveways shall be such that emergency access by fire fighting vehicles is practicable. Emergency fire trails shall be utilized when appropriate and shall be so designed on the map.
- NA  20. Location of snow storage areas sufficient to handle snow removed from public and private street, if applicable.
- X   21. All known areas of potential hazard, including but not limited to, earth slide areas, avalanche areas or otherwise hazardous slopes, shall be clearly designated on the map and shall pose no threat to the proposed development, occupants or improvements. Additionally, active fault lines (post-Holocene) shall be delineated on the map.
- X   25. The following additional requirements shall apply to common open space developments:
- X   (a) The building envelopes for residential structures. If the proposal involves a single family subdivision, typical building envelopes can be submitted.
- NA  (b) Location of all off-street parking areas, garages, carports and trash enclosures.
- X   (c) Location of all non-residential uses.
- NA  26. Tentative maps in the Spanish Springs Planning Area shall delineate an open space/scenic view buffer on the parcels adjoining all arterial rights-of-way. The buffer shall at least 25 feet wide as measured in from the street edge property line. The tentative map shall note that no fences, walls, or structures shall be permitted in the buffer areas.
- X   27. Location of areas with slopes greater than 15%.
- X   28. Boundary of any wetland areas within the project site.

---

**All plans must be folded to an 8 1/2" x 11" size.**

---

STAFF RESERVES THE RIGHT TO RETURN ANY INCOMPLETE PACKET TO THE APPLICANT AND TO RESCHEDULE THE APPLICATION UPON RESUBMITTAL. NO APPLICATION WILL BE DEEMED ACCEPTED UNTIL ALL INFORMATION IS RECEIVED.

**TENTATIVE SUBDIVISION MAP**  
**MATERIALS REQUIRED FOR SUBMITTAL**

- X   1. **APPLICATION FEE:** For proposed subdivisions containing under 200 lots, utilize the fee schedule below. For proposed subdivisions containing 200 or more lots, please call 328-6100 for fee information.
- With community sewer and water  
\$780.00 plus \$10.00/lot.
- Without community sewer or community water  
\$885.00 plus \$10.00/lot
- Make check payable to Washoe County.**
- X   2. Thirty-five (35) packets containing the Application Cover Sheet, and the Supplemental Information sheet and tentative map. (See attached tentative map drawing requirements.)
- X   3. Thirty-five (35) copies of tentative map reduced to 8 1/2" x 11".
- X   4. Thirty-five (35) copies of a Traffic Report, if the subdivision will generate 80 or more peak hour trips (See attached Traffic Report Guidelines).

*Please make thirty-five (35) separate packets for the information required for Items 2 through 4 and secure each packet with a large rubber band or within an envelope or binder.*

MATERIALS *(continued next page)*

---

**All plans must be folded to an 8 1/2" x 11" size.**

---

STAFF RESERVES THE RIGHT TO RETURN ANY INCOMPLETE PACKET TO THE APPLICANT AND TO RESCHEDULE THE APPLICATION UPON RESUBMITTAL. NO APPLICATION WILL BE DEEMED ACCEPTED UNTIL ALL INFORMATION IS RECEIVED.

MATERIALS (continued)

\_\_\_\_\_ 5. One of the thirty-five (35) packets must be marked "Original" and must include the following additional documents:

- X   a. The Owner(s) Affidavit(s).
- X   b. The check for the tentative map fee.
- X   c. A check for the Nevada Division of Environmental Protection (\$100 base fee plus \$1 per lot)
- X   d. A check for the Nevada Division of Water Resources (\$150 base fee plus \$1 per lot)
- X   e. A preliminary title report prepared within the last 30 days by a title company which provides the following information:
  - Name and address of property owners
  - Legal description of property
  - Description of all easements and/or restrictive covenants
  - Description of all liens against property
- X   f. A tax certificate from the Washoe County Treasurer
- NA   g. Two (2) copies of all survey computations. Not required per conversation with Dave Price W.C. Public Works Dept.
- X   h. A map showing all structures presently located on the property and their distances from the proposed property lines and each other. Please indicate existing septic, leachfield, well locations, or other important features.
- X   i. One color 35mm slide of the tentative map
- NA   j. A completed "Request to Reserve New Street Name" form (attached). Please print all street names on the tentative map. Note whether they are existing or proposed. Per the approval of Bob Katai, a request to reserve street names has not been submitted at this time.
- X   k. One copy of a proposed plan indicating potential development of the entire area if the tentative map is a portion of a larger holding or proposed development.
- X   l. If the subject property is in an area identified by the Department of Comprehensive Planning as potentially containing wetlands, submit a Preliminary Wetlands Determination.
- NA   m. If a mobile home park is within 300 feet of the project, submit three (3) sets of mailing labels for all tenants of the park.

MATERIALS (continued next page)

---

**All plans must be folded to an 8 1/2" x 11" size.**

---

STAFF RESERVES THE RIGHT TO RETURN ANY INCOMPLETE PACKET TO THE APPLICANT AND TO RESCHEDULE THE APPLICATION UPON RESUBMITTAL. NO APPLICATION WILL BE DEEMED ACCEPTED UNTIL ALL INFORMATION IS RECEIVED.

MATERIALS (continued)

The following additional information is required to be collated into six (6) separate packets and shall be marked "SECONDARY INFORMATION".

- X   6. Six (6) copies of a preliminary geotechnical report prepared by a Nevada registered civil engineer, including soils characteristics sufficient for use in tentative structural design, i.e. street sections, building pads, etc.
- X   7. Six (6) copies of a preliminary grading, drainage, and erosion control plan for the entire project, prepared by a Nevada registered civil engineer, showing existing contours at maximum five foot intervals, approximate street grades, proposed surface drainage, approximate extent of cut and fill slopes, approximate building envelopes and all pad elevations sufficient to convey the impact of grading.
- X   8. Six (6) copies of a hydrological report including such conditions as ground water or seepage conditions, and location of wells and springs, to be prepared by a qualified civil engineer registered with the State of Nevada.
- NA   9. Six (6) copies of a tree preservation and protection plan, where applicable, shall be made a part of the tentative plat with indication thereon of those trees proposed to be removed, those to remain and where new trees are to be planted.
- X   10. Six (6) copies of a proposed phasing plan depicting the number of lots to be recorded per phase. This phasing plan must be coordinated with the project's approved Determination of Adequate Facilities.
- NA   11. Six (6) copies of a Solid Waste Management Plan. Based on a conversation with Doug Coulter W.C. District Health Dept. a solid waste Management Plan has not been submitted at this time.
- NA   12. If the subject property is adjacent to an arterial roadway, submit six (6) copies of a preliminary landscape plan for the area along the roadway. The plans shall comply with the provisions of Article 412 of the Development Code.

MATERIALS (continued next page)

---

All plans must be folded to an 8 1/2" x 11" size.

STAFF RESERVES THE RIGHT TO RETURN ANY INCOMPLETE PACKET TO THE APPLICANT AND TO RESCHEDULE THE APPLICATION UPON RESUBMITTAL. NO APPLICATION WILL BE DEEMED ACCEPTED UNTIL ALL INFORMATION IS RECEIVED.

MATERIALS (continued)

- X   13. The following additional material is required for Common Open Space Developments (Article 408 of the Development Code):
- X   h. Six (6) copies of a viewshed analysis.
  - NA   a. \* Six (6) copies of the proposed conditions, covenants, and restrictions.
  - X   b. Six (6) copies of the site analysis prepared in accordance with Section 110.408.30.
  - NA   c. \* Six (6) copies of the preliminary landscaping plan for the project.

\*Items 13a and 13c are not required per conversation with Mike Harper and Bob Katai.

*The Design Review Committee will be requested to review the design of your subdivision prior to Planning Commission action. The applicant is urged, but not required to submit six (6) copies of a preliminary landscaping/design with this application. For single family subdivisions, this plan shall cover landscaping and maintenance plans for wall, fences, and landscape strips along collectors and arterials. For multifamily developments, the plans shall reflect the provisions of Section 110.412.35.*

## SPECIAL USE PERMIT

### MATERIALS REQUIRED FOR SUBMITTAL

1. FEE: Residential, Agricultural, Recreational \$200.00  
FEE: Civic, Commercial, Industrial \$400.00  
Make check payable to **Washoe County**.
2. Fifteen (15) packets. One packet must be labeled "Original" and must include the notarized Owner Affidavit. Each packet shall include: the Washoe County Development Application Cover Sheet, Special Use Permit Application Supplemental Information sheet, complete site plan and structural elevations, the planting plan, and the irrigation plan (see requirements below). It is highly recommended that a soils analysis be completed and attached.
- NA 3. An additional five (5) copies of a complete site plan and structural elevations must be attached to the original application packet. To be submitted with final development agreement.
- NA 4. If a mobile home park is within 300 feet of the project, mailing labels for all tenants of the park must be provided.
- NA 5. One site plan reduced to 8 1/2" x 11". To be submitted with final development agreement.
6. In accordance with the grading provisions of Washoe County Code Chapter 100, if the thresholds for a grading permit are met or exceeded, the applicant must incorporate the required information into the packets in a readily identifiable manner.
7. If the threshold for a traffic report (see attached Traffic Report Guidelines) is met or exceeded, the applicant must incorporate the required information into the packets in a readily identifiable manner.

Site plan specifications follow: To be submitted with final development agreement.

- a. Lot size with dimensions drawn to a minimum scale of 1" equals 100' showing all streets and ingress/egress to the property.
- b. Show the location and configuration of all proposed buildings (with distances from the property lines and from each other), all existing buildings that will remain (with distances from the property lines and from each other), all existing buildings that will be removed, and site improvements on a base map with existing and proposed topography expressed in intervals of no more than five (5) feet.
- c. Show the location and configuration of wells, septic systems and leachfields, overhead utilities, water and sewer lines, and all easements.
- d. Show locations of parking (including stall dimensions and striping), landscaping, signage and lighting (including lumen isolines).
- e. If applicable, on separate sheet, show sign dimensions, messages, methods and intensities of lighting, and materials.

MATERIALS (continued next page)

**MATERIALS** *(continued)*

To be submitted with final development agreement.

Planting plan specifications follow. The planting plan must include all necessary information to satisfy Washoe County Code Section 110.412.60 Planting Standards:

- \_\_\_\_\_ a. Location, spacing, size, and genus and/or species of proposed plantings, and identification of existing plants.
- \_\_\_\_\_ b. Existing vegetation, natural features, and site improvements on adjoining properties within ten (10) feet of the property line.
- \_\_\_\_\_ c. Plant list which includes the following: quantity of proposed plants; existing plants to remain; number of proposed trees; number of existing trees to be preserved; amount of paved area; and the amount of turf.

To be submitted with final development agreement.

Irrigation plan specifications follow. The irrigation plan must include all necessary information to satisfy Washoe County Code Section 110.412.65 Irrigation Standards.

- \_\_\_\_\_ a. Location, size, and specifications of water source(s), water mains, meter(s), valves, and the controller.
- \_\_\_\_\_ b. Temporary or permanent water irrigation systems.
- \_\_\_\_\_ c. Specifications of irrigation equipment identified by manufacturer's name and equipment identification number.
- \_\_\_\_\_ d. An approved backflow prevention device is required on all landscape irrigation systems.

---

**All plans must be folded to an 8 1/2" x 11" size.**

---

STAFF RESERVES THE RIGHT TO RETURN ANY INCOMPLETE PACKET TO THE APPLICANT AND TO RESCHEDULE THE APPLICATION UPON RESUBMITTAL. NO APPLICATION WILL BE DEEMED ACCEPTED UNTIL ALL INFORMATION IS RECEIVED.

**ADMINISTRATIVE PERMIT**  
**MATERIALS REQUIRED FOR SUBMITTAL**

---

- X   1. FEE: \$150.00. Make check payable to **Washoe County**.
- X   2. Five packets (5) packets. One packet must be labeled "Original" and must include the notarized Owner Affidavit. Each packet shall include: the Washoe County Development Application Cover Sheet, the Administrative Permit Supplemental Information sheet, site plan, planting plan, and irrigation plan (see requirements below). It is highly recommended that a soils analysis be completed and attached.
- NA   3. If a mobile home park is within 300 feet of the project, mailing labels for all tenants of the park **must** be provided.
- NA   4. In accordance with the grading provisions of Washoe County Code Chapter 100, if the thresholds for a grading permit are met or exceeded, the applicant must incorporate the required information into the packets in a readily identifiable manner.

Site plan specifications follow: To be submitted with final development agreement.

- a. Lot size with dimensions drawn to a minimum scale of 1" equals 100' showing all streets and ingress/egress to the property.
- b. Show the location and configuration of all proposed buildings (with distances from the property lines and from each other), all existing buildings that will remain (with distances from the property lines and from each other), all existing buildings that will be removed, and site improvements on a base map with existing and proposed topography expressed in intervals of no more than five (5) feet.
- c. Show the location and configuration of wells, septic systems and leachfields, overhead utilities, water and sewer lines, and all easements.
- d. Show locations of parking (including stall dimensions and striping), landscaping, signage and lighting (including lumen isolines).
- e. If applicable, on separate sheet, show sign dimensions, messages, methods and intensities of lighting, and materials.

Subject: Redfield Properties in the Southwest Truckee Meadows

Dear Brita:

This letter is in response to your January 17, 1992 letter requesting the Washoe County Department of Comprehensive Planning confirm the density that is allowed on the Redfield properties based on the land use plan map in the Southwest Truckee Meadows Area Plan. Your letter included incorrect acreage estimates since you included lands with slopes between 15.1 and 20 percent at densities greater than 1 du per 40 acres. Based on your second letter, dated February 3, 1992, which had acreage estimates reflecting the County policy of 1 du per 40 acres on slopes of 15 percent or greater, the number of acres within each land use category on the Redfield properties was estimated. The calculations can be found in the following table. These figures represent the density allowed on the Redfield properties.

<u>Land Use Designation</u>	<u>Acres</u>	<u>Density</u>	<u>Units</u>
<b>Assessor's parcels 49-010-04, 49-010-10, 41-030-12 (3,272 acres).</b>			
<b>Location: West of Zolezzi Lane, on the Thomas and White's Creeks fan.</b>			
Low Density Suburban	307	1 du/ac	307
High Density Rural	1,800	1 du/2.5 ac	720
Medium Density Rural	70	1 du/5 ac	14
Low Density Rural	228	1 du/10 ac	28
General Rural	<u>867</u>	1 du/40 ac	<u>21</u>
<b>Subtotal</b>	<b>3,272</b>		<b>1,090</b>

Land Use Designation	Acres	Density	Units
<b>Assessor's parcel 49-060-06 (120 acres).</b>			
<b>Location:</b> North side of Mt. Rose Highway, east of Timberline Estates.			
High Density Rural	113	1 du/2.5 ac	45
General Rural	<u>7</u>	1 du/40 ac	<u>0</u>
<b>Subtotal</b>	<b>120</b>		<b>45</b>
<b>Assessor's parcels 49-450-25 and 49-450-26 (552 acres).</b>			
<b>Location:</b> South side of Mt. Rose Highway, south and west of Galena High School.			
Medium Density Suburban	202	3 du/ac	606
General Rural	<u>350</u>	1 du/40 ac	<u>8</u>
<b>Subtotal</b>	<b>552</b>		<b>614</b>
<b>Assessor's parcels 49-382-07, 49-382-08, 49-450-04, 49-450-13, and 49-450-14 (366 acres).</b>			
<b>Location:</b> South side of Mt. Rose Highway, around the freeway extension.			
General Commercial	43	NA	NA
Low Density Urban	13	10-14 du/ac	156
Medium Density Suburban	20	3 du/ac	60
General Rural	<u>290</u>	1 du/40 ac	<u>7</u>
<b>Subtotal</b>	<b>366</b>		<b>223</b>
<b>Assessor's parcels 49-381-08, 49-381-09, 49-381-11, and 49-450-14 (129 acres).</b>			
<b>Location:</b> North side of Mt. Rose highway, east of Lancer Estates.			
General Commercial	37	NA	NA
Medium Density Suburban	56	3 du/ac	168
Low Density Suburban	31	1 du/ac	31
General Rural	<u>5</u>	1 du/40 ac	<u>0</u>
<b>Subtotal</b>	<b>129</b>		<b>199</b>
<b>Grand Total</b>	<b>4,439</b>		<b>2,171</b>

Notes: The unit figures are potential and the actual units depend on the specific site plan.  
 Units are rounded down.

Letter to: Ms. Brita Tryggvason, Senior Planner  
Subject: Redfield Properties in the Southwest Truckee Meadows  
February 19, 1992  
Page 3

These calculations were prepared by Skip Canfield so please feel free to contact him if you have any questions. In addition to calculating the density on the Redfield properties, you also asked for clarification of Washoe County's position on two items.

1. The Redfield Land Company may desire to convert commercially designated property to residential. Is this possible and would a conversion rate comparable to the density represented by the Medium Density Urban designation (14-21 du/ac) be allowed?

In response to this question, Washoe County does not have a policy regarding the conversion of commercial to residential. An area plan amendment would be required and this would entail either a policy amendment or map amendment, or both.

2. What is the procedure and policy for transferring development rights between non-contiguous parcels owned by the same property owner and within the same planning area?

Washoe County does not have a procedure or policy for non-contiguous, single owner TDR. A policy amendment or a map amendment to the area plan would be required.

If you have any further questions, please feel free to contact Skip Canfield at 328-3626 or me.

Sincerely,

John B. Hester, AICP  
Director

Subject: Southwest Pointe

Dear Brita:

As we discussed, it is Washoe County's intent to sell treated effluent from the South Truckee Meadows Water Reclamation Facility for reuse purposes, such as irrigating golf courses.

The availability of effluent for any specific project is contingent upon sufficient flows at the treatment facility.

If you have any questions, please call me at 785-4743.

Sincerely,

PAUL C. ORPHAN, P.E.

RE: Questions on Development Agreement Process

Dear Brita:

This is in response to your questions concerning the Development Agreement process contained in Article 814 of the Washoe County Development Code. My notes indicate that you had two specific questions:

1. Could a use be located in a regulatory zone that did not permit that use as long as the area encumbered by the development agreement did have a regulatory zone that permitted the use?
2. Can a development agreement create the standards for future discretionary permits so that a general area can be identified for a future discretionary permit without specifying an exact location?

#### Response to Question 1

Your question revolved around the ability of your client to show commercial uses in a regulatory zone that does not permit commercial uses. You pointed out that the entire property under consideration does have regulatory zones that do allow commercial uses. You also noted that in exchange for locating the commercial use in the prohibited regulatory zone, your client would not intend to place a commercial use in the permitted zone.

As I promised, I have reviewed the state statutes relating to development agreements and Article 814 of the *Development Code* for an answer. Unfortunately, no clear cut one emerges. NRS 278.0203 states that "The governing body may, if it finds that the provisions of the agreement are **consistent with the master plan**, approve the agreement by ordinance" (highlight added). NRS 278.0205 essentially has the same language for amendments to approved development agreements. Section 110.814.05 states that "A development agreement may be approved by ordinance for land which is to be developed as a single entity provided that the development, including uses and development standards, is **consistent with the Comprehensive Plan, including the area plans**, and any specific plan, if applicable" (highlight added). Section 110.814.55 (e) requires that one of the findings for approving a development agreement is "The extent to which the accompanying plan is consistent with the Comprehensive Plan policies and the area plan(s)." All of the above mandate a finding of consistency with the master plans adopted by the local jurisdiction, but do not indicate the degree of consistency.

Since the above did not provide direction on the extent of compliance, I reviewed the language concerning purpose in both Nevada Revised Statutes and the Development Code. In NRS 278.0201, the second paragraph states that "Unless the agreement otherwise provides, the ordinances, resolutions or regulations applicable to that land and governing the permitted uses of that land, density and standards for design, improvements and construction are those in effect at the time the agreement is made." This language suggests that alterations to the standards in the ordinances, etc. are permitted. When coupled with the language noted above about compliance

B. Tryggvi  
RE: Development Agreement Questions  
August 10, 1993; page 2

with the master plan in NRS, one could conclude that changes to ordinance standards are permitted as long as consistency with the master plan is maintained. Language similar to the state statute is contained in the Development Code at 110.814.15 (a): "The allowed uses, densities and standards of the land subject to the development agreement shall be those in effect at the time the agreement is made, provided that all such uses, densities and standards are consistent with the Comprehensive Plan, including the area plans, and any specific plan, if applicable." I believe that the same inference suggested in Nevada Revised Statutes about alterations to the ordinance being allowed as long as master plan consistency is retained can also be made from the Development Code language.

The above language from the Nevada Revised Statutes and the Development Code, coupled with the principle that development agreements are intended to provide flexibility to the development process, leads me to conclude that the county can permit, through a development agreement, a use in a regulatory zone that is not specifically allowed otherwise. The caveat is that consistency with the intent of the master plan must be maintained. This is a strong caveat that requires justification by the applicant.

Response Question 2

Your second question revolved around the possible location sites for utility uses. You suggested that the applicant might wish to create standards for development of utility sites so that when one was identified, the evaluation of the site would be against the adopted standards. You further indicated that your client did not wish to specifically establish utility sites in the initial application, but to create those sites when development patterns were more firmed up through the development agreement process.

In my opinion, one of the prime advantages of the development agreement process is to create development standards. It permits the applicant and the county to specify development standards for uses which obviate the need for site selection at the outset of the project review process. Of course the standards need to be specific enough so that meaningful evaluation can take place. My interpretation of the language in the Development Code supports the direction that you wish to pursue.

Brita, I am forwarding this letter to Dean Diederich and Rusty Nash for their comments and concurrence. Since I will be on vacation commencing the 13th of August through the 20th, I am asking them to respond to you, directly, if they are in disagreement with my interpretations. I am hoping that I may receive a response prior to the 13th, but it may be difficult for both of these gentlemen to respond in so short a time period. Should some disagreement occur, it would be appropriate for all of us to meet.

Sincerely,

Michael A. Harper, AICP  
Director

## TRAFFIC ANALYSIS

### EXECUTIVE SUMMARY

The proposed Southwest Pointe development is located in Washoe County, Nevada. The project site is located west of Thomas Creek Road and north of Mt. Rose Highway. The site is currently undeveloped land. The purpose of this study is to address the project's impact upon the adjacent street network. The Zolezzi Lane and Mt. Rose Highway intersections with Wedge Parkway, South Virginia Street, and the I-580 northbound and southbound ramps have been identified for analysis.

The proposed Southwest Pointe development will consist of the construction of 1,090 single family homes, two 18 hole golf courses, and a village center which includes the clubhouse, a neighborhood commercial center, and a daycare center. Additional public land uses within the project site include an elementary and middle school, neighborhood park, and fire station. The developer is not seeking approval for these public uses so they were not included in the traffic analysis.

The project is expected to generate 13,421 average daily trips with 1,290 trips occurring during the PM peak hour. Construction of the project is scheduled to be completed in approximately 15 years. A buildout date of 2007 was assumed for this project due to available traffic volume data. This study also includes analysis of future traffic volumes for the year 2015.

Traffic generated by the proposed Southwest Pointe development will have some impact on the adjacent roadways. The following recommendations are made to mitigate project traffic impacts.

It is recommended that any required signing, striping, or traffic control improvements comply with Washoe County and Nevada Department of Transportation requirements.

It is recommended that Zolezzi Lane be improved as an 80 foot wide right of way from its existing stub to the onsite village center, west of that area it can be reduced to a 60 foot right of way.

It is recommended that Whites Creek Lane be improved as a 60 foot wide right of way from Thomas Creek Road west through the site.

It is recommended that the onsite primary and secondary residential loop collector streets be improved as 60 foot wide right of way streets.

It is recommended that the onsite residential streets be improved as 50 foot wide right of way streets.

It is recommended that the onsite cul de sac streets be improved as 41 foot wide right of way streets.

It is recommended that construction traffic impacts be reduced by restricting construction hours to between 6:00 AM and 9:00 PM and that Washoe County Dust Control Regulations be followed.

# INTRODUCTION

## STUDY AREA

The proposed Southwest Pointe development is located in Washoe County, Nevada. The project site is located west of Thomas Creek Road and north of Mt. Rose Highway. The location of the project is shown in Figure 1. The purpose of this study is to address the project's impact upon the adjacent street network. The Zolezzi Lane and Mt. Rose Highway intersections with Wedge Parkway, South Virginia Street, and the I-580 northbound and southbound ramps have been identified for analysis.

## EXISTING AND PROPOSED LAND USES

The project site is currently undeveloped land. Adjacent development consists primarily of scattered single family homes to the north, south, and east. The proposed Southwest Pointe development will consist of the construction of 1,090 single family homes, two 18 hole golf courses, and a village center which includes the clubhouse, a neighborhood commercial center, and a daycare center. Additional public land uses within the project site include an elementary and middle school, neighborhood park, and fire station. The developer is not seeking approval for these public uses so they were not included in the traffic analysis. The project is expected to generate 13,421 average daily trips with 1,290 trips occurring during the PM peak hour. Construction of the project is scheduled to be completed in approximately 15 years. A buildout date of 2007 was assumed for this project due to available traffic volume data. This study also includes analysis of future traffic volumes for the year 2015.

## EXISTING AND PROPOSED ROADWAYS AND INTERSECTIONS

Zolezzi Lane is currently a two lane facility with one lane in each direction in the vicinity of the site. The speed limit is 35 miles per hour. Roadway improvements include two paved travel lanes with graded shoulders. With the construction of the I-580 interchange, preliminary plans indicate that Zolezzi Lane will initially be improved to a two lane facility and later upgraded to a four lane facility east of South Virginia Street.

Mt. Rose Highway is currently being improved to a four lane facility from South Virginia Street to beyond Callahan Ranch area. The speed limit is anticipated to be 45 miles per hour near the proposed site. Roadway improvements will include a two-way center left turn lane and graded shoulders.

South Virginia Street is a six lane facility, three lanes in each direction in the vicinity of the site. The speed limit is 50 miles per hour. Roadway improvements include a wide striped center left turn lane and left turn pockets at intersections and graded shoulders.

**SOUTHWEST POINTE**  
**VICINITY MAP**  
**FIGURE 1**

Wedge Parkway does not currently exist but is expected to ultimately be a four lane facility with two lanes in each direction.

The I-580 extension is expected to be a controlled access six lane freeway with three lanes in each direction in the vicinity of the site. Tentatively, the freeway extension is planned to be completed to Brown School by 1997 with the Zolezzi Lane interchange constructed sometime after 1997.

The proposed Zolezzi Lane interchange is anticipated to be a diamond interchange with traffic signal control at both the north and southbound ramp intersections. The interchange is anticipated to contain single lane off-ramps.

The proposed Mt. Rose Highway interchange is anticipated to be a modified diamond interchange with northbound and southbound loop on-ramps. Nevada Department of Transportation construction plans indicate that the southbound off-ramp will split into separate ramps for the right and left turning movements onto Mt. Rose Highway. The left turn movement will be provided from a single lane and will likely be stop sign controlled. The right turn movement will be a free movement with merging required with westbound Mt. Rose Highway traffic.

The South Virginia Street/Zolezzi Lane intersection is currently a five phase traffic signal controlled intersection with protected left turn phasing on the South Virginia Street approaches. The north approach contains one left turn lane, three through lanes, and one right turn lane. The south approach contains one left turn lane, two through lanes, and a shared through-right turn lane. The west approach contains one left turn lane and a shared through-right turn lane. The east approach contains one lane from which all turning movements are made.

The South Virginia Street/Mt. Rose Highway intersection is currently a traffic signal controlled intersection. The north approach contains one left turn lane, three through lanes, and one right turn lane separated by a corner island. The south approach contains one left turn lane, two through lanes, and a right turn lane separated by a corner island. The west approach contains one left turn lane, one shared left turn-through lane, and right turn lane separated by a corner island. The east approach contains one left turn lane, one through lane, and one right turn lane separated by a corner island.

The proposed Zolezzi Lane/Wedge Parkway intersection currently does not exist but is expected to ultimately be a signalized four-leg intersection.

The proposed Mt. Rose Highway/Wedge Parkway intersection currently does not exist but is expected to initially be an unsignalized "T" intersection with stop sign control on the north approach upon construction of the adjacent Sterling Ranch subdivision. Future signalization of the intersection may ultimately be required.

## TRIP GENERATION

In order to assess the magnitude of traffic impacts of the proposed development on the key intersections, trip generation rates and peak hours had to be determined. Trip Generation rates were based upon information taken from the Fifth Edition of "ITE Trip Generation" (1991) for Land Uses 210: Single Family Detached Housing, 430: Golf Course, and 820: Shopping Center. The shopping center land use was used to estimate trips generated by the village center. The village center will contain the clubhouse, a neighborhood commercial center, and a daycare center. The size of the village center is limited by its proposed location and will contain between 15,000 and 20,000 square feet of building space. The hour between 4:00 and 6:00 PM were studied for this analysis. Table 1 shows a summary of the average daily traffic volumes and peak hour volumes generated by the development.

TABLE 1  
TRIP GENERATION

<u>LAND USE</u>	<u>ADT</u>	<u>PM IN</u>	<u>PM OUT</u>	<u>PM TOTAL</u>
Single Family Housing 1,090 Units	9,315	605	326	931
Golf Course 36 Holes	1,521	64	59	123
Shopping Center 20,000 SF	2,585	118	118	236
<b>Total New Trips</b>	<b>13,421</b>	<b>787</b>	<b>503</b>	<b>1,290</b>

## TRIP DISTRIBUTION

The distribution of the project traffic to the key intersections was based upon existing peak hour traffic patterns and the locations of attractions and productions in the area. Separate directions of approach were used for the residential, golf, and commercial land uses. The residential land uses are expected to attract/produce trips on an areawide basis. The trips generated by the commercial land uses are anticipated to be primarily local trips. The commercial land uses will provide neighborhood services such as convenience shopping and day care services. We do not anticipate that these uses will attract any significant number of trips on an areawide basis. It is assumed that the commercial uses will attract trips from residential areas within a 1.5 mile radius resulting in no new trips produced at the key intersections.

The golf course is expected to generate both on and off-site trips. It is assumed that the 1,090 lot subdivision will comprise approximately one third of the trips generated by the golf course. The remaining golf course trips are distributed areawide. The directions of approach are shown in Figure 2.

## TRIP ASSIGNMENT-EXISTING AND PROJECTED TRAFFIC VOLUMES

Peak hour turning movement volumes for the South Virginia Street/Zolezzi Lane and South Virginia Street/Mt. Rose Highway intersections were obtained from the 1992 traffic studies for White's Creek Meadows and Sterling Ranch, respectively. The 1992 traffic volumes were updated to 1993 existing volumes by applying a 4% average annual growth rate. Figure 3 shows the existing PM peak hour turning movement volumes.

Figure 4 shows the PM peak hour project trip assignment based upon the directions of approach presented in Figure 2. Figure 5 shows the 2007 PM peak hour turning movement volumes for the background and background plus project scenarios. Figure 6 shows the year 2015 PM peak hour turning movement volumes for the background and background plus project scenarios.

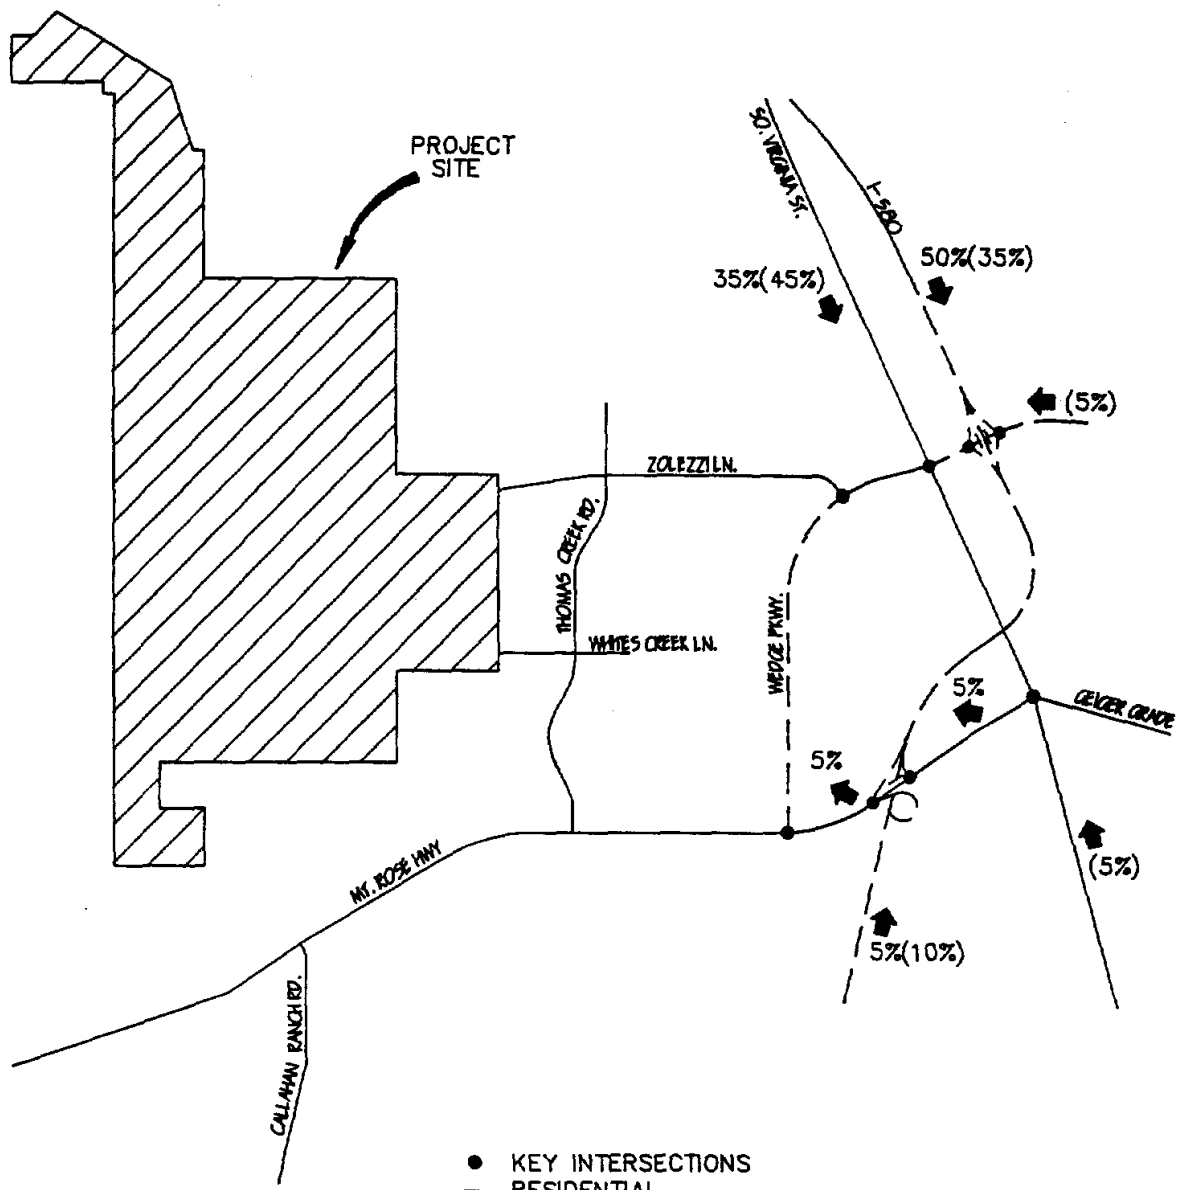

The 2007 and 2015 peak hour background traffic volumes were derived from information obtained from the Regional Transportation Commission.

## TRAFFIC CAPACITY

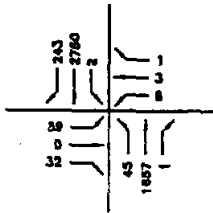

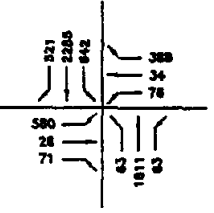

The key intersections were analyzed for capacity based upon procedures presented in the 1985 Highway Capacity Manual prepared by the Transportation Research Board for signalized and unsignalized intersections.

The result of capacity analysis is a "level of service" rating for each intersection. "Level of service" is a qualitative measure of traffic operating conditions whereby a letter grade "A" through "F," corresponding to progressively worsening traffic operation, is assigned to the intersection.

The "level of service" for signalized intersections is stated in terms of the average stopped delay per vehicle for peak 15 minute analysis period. The signalized intersection "level of service" criteria are shown in Table 2.

**TABLE 2  
LEVEL OF SERVICE CRITERIA FOR  
SIGNALIZED INTERSECTIONS**

---

Level of Service	Stopped Delay Per Vehicle (Seconds)
A	5.0 or Less
B	5.1 - 15.0
C	15.1 - 25.0
D	25.1 - 40.0
E	40.1 - 60.0
F	60.1 or More

---

The 1985 Highway Capacity Manual defines "level of service" in terms of delay for unsignalized intersections. Delay is a measure of driver discomfort, frustration, fuel consumption and loss of travel time. The unsignalized intersection "level of service" criteria are shown in Table 3.

---

**TABLE 3  
LEVEL OF SERVICE CRITERIA  
UNSIGNALIZED INTERSECTIONS**

---

Level of Service	Expected Traffic Delay
A	Little or No Delay
B	Short Delay
C	Average Delay
D	Long Delay
E	Very Long Delay
F	Extreme Delay and Congestion

---

A summary of the PM peak hour "level of service" (L.O.S.) operation for the key intersections in this analysis is shown in Table 4.

- \* Signalized intersection level of service and delay time in seconds
- @ Unsignalized intersection reserve capacity and level of service
- # Relationship to capacity for signalized intersections using planning method

**ZOLEZZI LANE/SOUTH VIRGINIA STREET**

The Zolezzi Lane/South Virginia Street intersection was analyzed as a signalized intersection for all scenarios. The intersection currently operates at level of service B with a delay time of 11.8 seconds during the PM peak hour. For the 2007 background traffic volumes, the intersection operates at level of service C with a delay time of 24.1 seconds during the PM peak hour. With the addition of project traffic in 2007, the intersection operates at level of service C with a delay time of 24.9 seconds during the PM peak hour. The 2007 level of service runs were performed using optimal signal timing strategies and intersection improvements which include separate left, through, and right turn lanes at the east approach for the background scenario and two through lanes on each the east and west approaches for the background plus project scenario. For the year 2015 the intersection was analyzed for capacity based on the planning method as presented

in the Highway Capacity Manual for signalized intersections. During the PM peak hour the intersection operates near capacity for the background scenario and over capacity for the background plus project scenario. These future year capacity problems can be reduced with additional turn lanes on the Zolezzi Lane approaches.

#### ZOLEZZI LANE/I-580 SOUTHBOUND RAMPS

The Zolezzi Lane/I-580 Southbound Ramp intersection was analyzed as a signalized intersection for the 2007 and 2015 scenarios. For the 2007 background traffic volumes, the intersection operates at level of service B with a delay time of 13.9 seconds during the PM peak hour. With the addition of project traffic in 2007, the intersection operates at level of service C with a delay time of 15.2 seconds during the PM peak hour. The intersection was analyzed with one through lane and a shared through-right turn lane at the west approach, one left turn lane and two through lanes at the east approach, and one left turn lane, one shared left turn-through lane, and one right turn lane at the off-ramp. For the year 2015 the intersection was analyzed for capacity based on the planning method as presented in the Highway Capacity Manual for signalized intersections. During the PM peak hour the intersection operates under capacity for the background scenario and near capacity for the background plus project scenario.

#### ZOLEZZI LANE/I-580 NORTHBOUND RAMPS

The Zolezzi Lane/I-580 Northbound Ramp intersection was analyzed as a signalized intersection for the 2007 and 2015 scenarios. For the 2007 background traffic volumes, the intersection operates at level of service B with a delay time of 10.8 seconds during the PM peak hour. With the addition of project traffic in 2007, the intersection remains at level of service B with delay time increasing to 12.9 seconds during the PM peak hour. The intersection was analyzed with one through lane and a shared through-right turn lane at the east approach, two left turn lanes and two through lanes at the west approach, and one shared left turn-through lane and one right turn lane at the off-ramp. For the year 2015 the intersection was analyzed for capacity based on the planning method as presented in the Highway Capacity Manual for signalized intersections. During the PM peak hour the intersection operates under capacity for both the background and background plus project scenarios.

#### ZOLEZZI LANE/WEDGE PARKWAY

The Zolezzi Lane/Wedge Parkway intersection was analyzed as an unsignalized "T" intersection for the 2007 scenarios. For the 2007 background scenario, the intersection critical movements operate at level of service C or better during the PM peak hour. For the 2007 background plus project scenario, the intersection critical movements operate at level of service C or better during the PM peak hour with the exception of the left turn movement from the west approach of Zolezzi Lane to the east approach of Zolezzi Lane which operates at level of service F. For the year 2015 the intersection was analyzed for capacity based on the planning method as presented in the Highway Capacity Manual for signalized intersections. During the PM peak hour the

intersection operates under capacity for both the background and background plus project scenarios.

#### MT. ROSE HIGHWAY/SOUTH VIRGINIA STREET

The Mt. Rose Highway/South Virginia Street intersection was analyzed as a signalized intersection for all scenarios. For the 1993 existing scenario, the intersection fails during the PM peak hour. The level of service run for the existing scenario was performed using signal timing data obtained from the Regional Transportation Commission.

The 2007 and 2015 level of service runs were performed using optimal signal timing strategies and include intersection improvements such as south to eastbound dual left turn lanes and three through lanes at the south approach. For both the 2007 background and background plus project scenarios, the intersection operates at level of service C with a delay time of 24.5 seconds. For the year 2015 the intersection was analyzed for capacity based on the planning method as presented in the Highway Capacity Manual for signalized intersections. During the PM peak hour the intersection operates under capacity for both the background and background plus project scenarios.

#### MT. ROSE HIGHWAY/I-580 SOUTHBOUND RAMPS

The Mt. Rose Highway/I-580 Southbound Ramp intersection was analyzed as an unsignalized "T" intersection for the 2007 and 2015 scenarios. The intersection operates with the southbound left turn movement opposed by only the east and westbound through movements. The southbound right turn movement is made from a separate off-ramp section with merging onto Mt. Rose Highway. Southbound I-580 traffic will be served by a loop on-ramp east of the intersection for westbound traffic and an on-ramp west of the intersection for eastbound traffic. For both the 2007 background and background plus project scenarios, the southbound left turn movement operates at a level of service D. For both the 2015 background and background plus project scenarios, the southbound left turn movement operates at a level of service F. A traffic signal may be required in the year 2015 to serve the anticipated traffic volumes.

#### MT. ROSE HIGHWAY/I-580 NORTHBOUND RAMPS

The Mt. Rose Highway/I-580 Northbound Ramp intersection was analyzed as an unsignalized "T" intersection for the 2007 and 2015 scenarios. The intersection operates with the northbound left and right turn movements opposed by only the east and westbound through movements. Northbound I-580 traffic will be served by a loop on-ramp west of the intersection for westbound traffic and an on-ramp east of the intersection for eastbound traffic. For both the 2007 background and background plus project scenarios, the northbound left turn movement operates at a level of service E. For both the 2015 background and background plus project scenarios, the northbound left turn movement operates at a level of service F. A traffic signal may be required in the year 2015 to serve the anticipated traffic volumes.

## MT. ROSE HIGHWAY/WEDGE PARKWAY

The Mt. Rose Highway/Wedge Parkway intersection was analyzed as an unsignalized "T" intersection for the 2007 and 2015 scenarios. For all scenarios the intersection critical movements operate at a level of service C or better with the exception of the southbound left turn movement which operates at level of service F during the PM peak hour. A traffic signal may be required in the year 2015 to serve the anticipated traffic volumes.

## SITE PLAN REVIEW

A copy of the Southwest Pointe concept plan and tentative map for phase one are included in this submittal. The site plan shows access from two roadways (Zolezzi Lane and Whites Creek Lane) located at the project's east boundary. No project access is shown from the north, south, or west. Onsite traffic circulation is provided from two looping residential collector streets which connect to Zolezzi and Whites Creek Lanes. It is recommended that Zolezzi Lane be improved as an 80 foot wide right of way from its existing stub to the onsite village center, west of that area it can be reduced to a 60 foot right of way. It is recommended that Whites Creek Lane be improved as a 60 foot wide right of way from Thomas Creek Road west through the site. It is recommended that the onsite loop residential collector streets (label as primary and secondary loops on the concept plan) be improved as 60 foot wide right of way streets. It is recommended that the onsite residential streets be improved as 50 foot wide right of way streets. It is recommended that the onsite cul de sac streets be improved as 41 foot wide right of way streets.

We anticipate that Zolezzi Lane will be the primary project access for construction vehicles. It is recommended that construction traffic impacts be reduced by restricting construction hours to between 6:00 AM and 9:00 PM and that Washoe County Dust Control Regulations be followed.

## RECOMMENDATIONS

Traffic generated by the proposed Southwest Pointe development will have some impact on the adjacent roadways. The following recommendations are made to mitigate project traffic impacts.

It is recommended that any required signing, striping, or traffic control improvements comply with Washoe County and Nevada Department of Transportation requirements.

It is recommended that Zolezzi Lane be improved as an 80 foot wide right of way from its existing stub to the onsite village center, west of that area it can be reduced to a 60 foot right of way.

It is recommended that Whites Creek Lane be improved as a 60 foot wide right of way from Thomas Creek Road west through the site.

It is recommended that the onsite primary and secondary residential loop collector streets be improved as 60 foot wide right of way streets.

It is recommended that the onsite residential streets be improved as 50 foot wide right of way streets.

It is recommended that the onsite cul de sac streets be improved as 41 foot wide right of way streets.

It is recommended that construction traffic impacts be reduced by restricting construction hours to between 6:00 AM and 9:00 PM and that Washoe County Dust Control Regulations be followed.

## ILLUSTRATIONS TABLES

1.0 INTRODUCTION

This report presents the results of Harding Lawson Associates' (HLA) geotechnical investigation for the proposed Southwest Pointe - Phase I. The site is located north of State Highway 431 and west of Thomas Creek Road in Washoe County, Nevada.

HLA understands the development for Phase I covers approximately 375 acres for single family homes and in addition will include one 18-hole professional golf course. No finish grade elevations for roadways or residential lots were established at the time of this investigation.

HLA's services were provided in accordance with the revised HLA letter proposal dated July 12, 1993. The scope of services consisted of the following:

- Locate, excavate by backhoe, log, and sample 15 to 20 exploration test pits for soil engineering recommendations and 12 exploration test pits (trenches) to better define the extent of individual faults and their age (pre- or post-Holocene) in residential areas.
- Conduct laboratory testing on representative soil samples obtained from test pits to check field classifications and soil engineering properties.
- Perform engineering analysis to develop recommendations for site grading, foundation design criteria, and pavement structural section thickness.

- Prepare a typed report (this report) summarizing our field observations, test pit logs, site plan, laboratory test data, and soil recommendations for the site. The report will also provide recommendations for residential structure setbacks from potentially active faults.
- Soil engineering recommendations will include:
  1. Spread footing design
  2. Resistance to lateral loads
  3. Estimate of settlement
  4. Allowable soil bearing pressure
  5. Site preparation and grading
  6. Preliminary flexible pavement structural section thickness
  7. Fault hazard set back

HLA previously conducted an investigation at the proposed Southwest Pointe and prepared a report entitled, "Preliminary Geological Earthquake Fault Investigation, Proposed Redfield Estates, Reno, Nevada," dated July 31, 1992.

This document was prepared for the sole use of Dingman Investments and CFA, Inc., the only intended beneficiaries of HLA's work. No other party should rely on the information contained herein without prior written consent of HLA.

## 2.0 FIELD EXPLORATION AND LABORATORY TESTING

HLA explored subsurface soil conditions by excavating 27 test pits, TP-1 through TP-27, to depths ranging from 3.5 to 7.0 feet at the locations presented on Plate 1. Potential faults were investigated by excavating 15 test pits, TP-4 through TP-13, TP-16, TP-20, TP-24, TP-25, and TP-27.

The laboratory test results are summarized on the test pit logs, Plates 2 through 15. Individual soil test results are presented on Plates 17 through 19.

The test pits were excavated using a Case 580K rubber-tire backhoe. HLA's geotechnical engineers logged the test pits and closely inspected each test pit for fault features and obtained loose bulk soil samples at selected depths.

Summary logs of the test pits are presented on Plates 2 through 15. The soils were visually classified in accordance with the Unified Soil Classification System (ASTM D2487-85) shown on Plate 16.

Our geological engineer examined each lineament in the field to determine if the topographic irregularities are fault related, due to changes in vegetation or from man-made modification. Stereographic examination of aerial photographs was used to assist in the identification and interpretation. Low sun angle aerial photographs on file with the Nevada Bureau of Mines and Geology and aerial photographs provided by CFA, Inc. were of particular help in evaluating surface lineaments. Faults that were considered to be active (Holocene age) were staked in the field by HLA's field engineer and surveyed by CFA, Inc.

Soil samples obtained from test pits were reexamined in the laboratory to confirm field classifications and to select representative samples for testing. The laboratory testing program included percent passing No. 200 sieve size, particle size analysis, Atterberg limits and resistance value (R-value) tests. Due to the cemented characteristics of the subgrade soils encountered and shown on the test pit logs as poorly graded sand, particle size analysis results are not presented. Many large cemented sand chunks, on the order of 12 inches, would not break down during washing, drying and sieving.

### 3.0 SURFACE AND SUBSURFACE CONDITIONS

#### 3.1 Surface Conditions

The site is covered with a moderate to dense growth of bitterbrush and sagebrush and thinly scattered field grass and alfalfa. Numerous cobbles and boulders (diameter  $\leq$  4 feet) are scattered at the surface across the site. Some dirt roads and powerlines are located on the site.

The site slope varies, ranging from approximately 2 to 25 percent to the northeast. Maximum relief across the site, west to east, is approximately 670 feet. Several drainages on site trend southwest to northeast. Thomas Creek borders the southern and eastern portions of the development.

#### 3.2 Subsurface Conditions

As shown on the summary logs of test pits, the subsurface soils in general consist of loose silty sand (topsoil) in the upper 6 to 12 inches underlain by medium dense to dense clayey sand or moderately to highly expansive, desiccated, stiff to very stiff sandy fat clay to depths of approximately 3 feet. Underlying the clayey soils in the majority of the test pits is partially cemented to cemented medium dense to very dense poorly graded sand with silt, gravel, cobbles, and boulders (dia.  $\leq$  3 feet). The depth of these soils, which were very difficult to excavate, ranged from one foot to the depth explored or refusal for the Case 580K backhoe. The percentage of gravel, cobbles, and boulders (by volume) at each test pit varied, but was as high as 40 to 50 percent gravel, 30 to 40 percent cobbles, and 5 to 10 percent boulders.

No free groundwater was encountered in the test pits at the time of our investigation.

#### 3.3 Geologic Setting

The property is situated on the gently sloping surface of the broad Mt. Rose fan complex believed to have formed during Illinoian time (mid- to late-Pleistocene or pre-Holocene). The fans are part of the Donner Lake outwash and consist of poorly sorted, silty and clayey pebble gravels with variable amounts of cobbles and boulders, mostly of volcanic origin with some of granitic origin. These "cemented gravels" have a weathered, clay-residual soil horizon that is

overlain by a dark brown sandy silt surface soil judged to be of younger age, probably Holocene. The fan deposits are up to several hundred feet in thickness and were deposited by meandering streams draining the higher elevations in the Mt. Rose area. According to published geologic maps, numerous fault scarps trending in a north-south direction are present throughout the west slope of the Reno basin and Truckee Meadows and have been age-dated based on morphologic features. In general, the more pronounced and steeper the break-in-slope or topographic scarp, the more recent the faulting. In other locations, disrupted drainage courses and displacement of young soil deposits are indicative of faulting during Recent or Holocene time.

4.0 CONCLUSIONS AND RECOMMENDATIONS

4.1 Faults

Faults are dated based on the age of the most recent movement or by the age of the materials that have been displaced. Ideally, age dates on faults are determined by trenching a segment of a fault which has Holocene age materials along its length to determine if these materials have actually been displaced, i.e., the fault is younger than 11,000 years before present (YBP); or has not displaced Holocene age material and, therefore, the fault is older than 11,000 YBP.

Test pits (trenches) were located across scarps and topographical features judged to be fault related. Trenches exposed near-vertical contacts between different soil units. The contacts are considered to be fault contacts. Because the displacement extends through the residual soil zone into the upper dark brown soil zone, these faults are considered active.

The fault traces that were trenched and staked are judged to be fault traces having relatively high risk of ground rupture from local earthquakes. Buildings for human occupancy should not be sited over these faults and a zone of no construction is recommended for each side of the fault. Setbacks for each fault are presented on Table 3. These zones are necessary due to inaccuracies in precisely locating the continuation of the fault trace and to allow for irregular surface rupture patterns which may occur during fault movement. Additionally, two areas shown on Plate 1 have a high density of faults not individually located, and in HLA's professional judgment, are not suitable for occupied residential development.

4.2 Site Grading

4.2.1 Clearing and Stripping

Structural, roadway, and proposed fill areas should be cleared of the existing surface vegetation, cobbles, and boulders. Clearing and stripping should extend horizontally at least 5 feet beyond the above areas. The estimated stripping depth is from 6 to 12 inches. The stripped material is unsuitable for use as engineered fill, but may be used in landscaping areas, if suitable.

4.2.2 Fill Criteria

Generally, the existing granular subsurface soils can be used as engineered fill provided rocks larger than 6 inches are screened out of the soil and they do not contain any organic or debris.

Native sandy fat clay soils should be removed from beneath proposed footings, pavement areas, and concrete slabs (house, garage, driveway, sidewalk, and patios) due to their desiccated condition and expansion potential. Overexcavation of the sandy fat clay should be verified by the soils engineer prior to placement of engineered fill to ensure that soil conditions are consistent with our recommendations. The clayey soils may be suitable for pond lining.

Screened rocks may be placed in fill areas if the following criteria is met: No placement within 4 feet of finished subgrade elevations in structure and roadway areas; nesting is unacceptable; soils engineer should observe placement of all oversize rocks to verify that compacted fill is placed within all voids around the rocks. HLA recommends that oversize rocks not be placed in roadway or structural fill areas to minimize the difficult excavating for utility construction.

Imported fill and native soils used as engineered fill should be reasonably well graded, granular and free of organic and other perishable material. In addition, they should meet the following criteria:

Sieve Size	Percent Passing (bv dry weight)
6 inch	100
No. 200	0-25
Liquid Limit	35% maximum
Plasticity Index	15% maximum
R-value*	25 minimum

\* Pavement areas only

4.2.3 Fill Placement

Before fill placement, exposed surfaces should be scarified to a minimum depth of 8 inches and recompacted to at least 90 percent relative

compaction<sup>1</sup> at or near optimum moisture content except for landscape areas which should be recompactd to at least 85 percent relative compaction.

Fill should be placed in lifts not exceeding 8 inches (loose thickness), moisture conditioned to near optimum moisture content, and compacted to at least 90 percent relative compaction, except for proposed landscape areas which should be compacted to at least 85 percent relative compaction.

Compacted fill limits should extend laterally beyond the edge of footings, pavement and concrete slab areas a distance at least equal to the depth of fill below the base of the footing, pavement, or concrete slab, respectively.

Existing slopes steeper than 5:1 (horizontal:vertical) should be benched before engineered fill is placed. The initial bench at the toe of the fill shall be at least 12 feet in width on dense undisturbed native granular soil. The soils engineer shall determine the width and frequency of all succeeding benches which will vary with the soil conditions and the steepness of slope.

#### 4.2.4 Excavation

Subsurface materials encountered during the subsurface field exploration consisted of partially cemented to cemented, medium dense to very dense poorly graded sand with varying percentages (by volume) of gravels, cobbles and boulders. In HLA's professional opinion, the cemented sand with gravel, cobbles and boulders is rippable using proper heavy equipment. HLA recommends that earthwork contractors pothole various locations onsite to determine the suitable heavy equipment necessary to excavate onsite.

Temporary excavation walls will be required during construction for excavations greater than 5 feet. Excavation walls should be sloped at a ratio of 1:1 (horizontal:vertical) from the bottom of the excavation. If temporary excavation slopes cannot be constructed, then shoring will be required. Safety requirements established by OSHA or other regulatory agencies should be followed during excavation.

#### 4.2.5 Finish Site Grading

The site should be graded to provide positive drainage away from the structures and adjacent to and within pavement areas.

Cut/fill slopes should be constructed no steeper than 2:1 (horizontal:vertical) without mechanical stabilization. Slopes steeper than 2:1 are not recommended because they do not promote good vegetation growth thereby inhibiting erosion control. If slopes steeper than 2:1 are required, they should be mechanically stabilized by rip-rap, concrete slurry or retaining walls.

Landscape fill slopes should be constructed at a minimum relative compaction of 85 percent. The upper 8 inches of finish grade in landscape cut slope areas should be scarified, moisture conditioned to near optimum, and compacted to at least 85 percent relative compaction.

HLA recommends that cut/fill slopes 2:1 and flatter be seeded with at least a superior weed mixture to facilitate good vegetation growth.

#### 4.3 Foundation Support

Proposed single family buildings can be supported by shallow spread footings bearing on engineered fill compacted to at least 90 percent relative compaction or dense to very dense native granular soils. Spread footings founded as described above may be designed for a maximum allowable soil bearing pressure of 2,000 pounds per square foot (psf) for dead plus live loads. This value may be increased one-third for combined dead, live, wind, and seismic loads. Footings should not be placed on a combination of engineered fill and undisturbed native granular soils due to potential differential settlement. Exterior footings should be founded at least 24 inches below the lowest adjacent finished ground surface for confinement and frost protection. Interior footings should be founded at least 12 inches below the lowest adjacent finished ground surface for confinement.

The estimated settlement of footings placed as recommended above is less than 1/2 inch. Differential settlements are estimated to be on the order of 1/4 inch.

### 4.4 Lateral Resistance

Resistance to lateral loads for spread footings can be obtained from passive earth pressures acting against the sides of footings and friction along the base of footings. Passive resistance should be neglected in the upper foot unless confined by slab or pavement. The coefficient of friction should be applied to vertical dead loads only. See Table 1 for the recommended passive pressure and friction coefficient values.

### 4.5 Concrete Slab-on-Grade

For all concrete slabs-on-grade (houses, garages, sidewalks, driveways, and patios), the upper native sandy fat clay subgrade soils beneath slabs should be removed, due to their desiccated condition and expansive potential, and be replaced with engineered fill as recommended in the Section, "Site Grading." If slabs-on-grade are placed entirely on dense to very dense undisturbed native granular soils, the upper 8 inches of surfaces exposed after excavation should be scarified, moisture conditioned to near optimum moisture content then recompact to at least 90 percent relative compaction.

Subbase preparation for concrete slab-on-grade floors should consist of at least 4 inches of clean crushed rock that will act as a capillary moisture break, then overlain by a moisture vapor barrier and a 2-inch layer of clean sand. The sand should be kept moist prior to concrete placement.

The slab should be reinforced as required for temperature, strength, and load requirements. Also, construction joints should be placed as required to minimize concrete shrinkage cracks.

### 4.6 Preliminary Pavement Design

The pavement design was performed in accordance with the California Department of Transportation Highway Design Manual, fourth edition.

The design of a flexible asphalt concrete (AC) pavement section is based on the relationship between the Traffic Index (TI) and the Resistance value (R-value) of the natural subgrade material. R-value tests were conducted on the native sandy fat clay subgrade soils encountered in test pits TP-9 and TP-25. The results of the laboratory

analysis indicate R-values less than 5 as shown on Plates 18 and 19. Due to low R-value results and moderate to high expansive characteristics of the native sandy fat clay soils, HLA recommends that these soils be overexcavated and replaced beneath proposed pavement areas as described in the Section "Site Grading." For this design, HLA assumed a minimum R-value of 25 for granular onsite or import subgrade material. Since traffic information was not available for the proposed roadways, a TI of 5 was assumed for local streets, consistent with moderate levels of vehicular traffic and truck traffic, and a TI of 6 was assumed for a two lane collector, consistent with moderate to high levels of vehicular and truck traffic.

In addition to the subgrade R-value, an R-value for the base material must be considered. HLA assumed a granular base material (Type 2, Class B aggregate base) with a minimum R-value of 70. See Table 2 for the recommended pavement structural section thicknesses.

The aggregate base should meet the quality requirements for Type 2, Class B aggregate base in accordance with the "Standard Specifications for Public Works Construction," (Orange Book dated 1992). The aggregate base should be compacted to at least 95 percent relative compaction. Prior to aggregate base placement, all fill underlying roadway pavement should be compacted to at least 90 percent relative compaction. If fill soils are not required to achieve finish subgrade elevations, the undisturbed native subgrade soils should be scarified to a depth of 8 inches, moistened or dried as necessary to obtain near optimum moisture content, then recompact to at least 90 percent relative compaction.

A final pavement design should be completed after roadway subgrade elevations and final road alignments are established. This pavement design does not take into account the possibility of roadways being completed prior to completion of major construction activities which involve heavy equipment usage on roads. The pavement design should be reevaluate if major construction activities are not completed prior to completion of roadways.

**4.7 Additional Soil Engineering Services**

HLA should review final plans and specifications for conformance with the intent of HLA recommendations. Prior to and during construction, the following operations should be performed under HLA's observation.

1. Site preparation and grading
2. Overexcavation of fat clay soils
3. Suitability of on-site materials for use as engineered fill
4. Suitability of imported fill material, if required
5. Fill placement and compaction
6. Footing excavations prior to concrete placement
7. Subgrade preparation for concrete slab-on-grade

Observation of these operations will allow verification that soil conditions are consistent with this geotechnical investigation and to evaluate variations in soil conditions which may require special consideration or modification of these recommendations.

## END NOTES

1. Relative compaction refers to the in-place dry density of soil expressed as a percentage of the maximum dry density of the same material as determined by the ASTM D1557-85 laboratory test procedure. Optimum moisture content is the moisture content corresponding to the maximum dry density.

Taylor Woodrow Homes  
Nevada Limited - Northern Division  
3301 S. Virginia Street  
Reno, Nevada 89509

**Subject: Preliminary Wetland Assessment - Redfield Property,  
Washoe County, Nevada**

Dear Mr. Doerr:

This is in response to your request for a preliminary wetland assessment of the Redfield property located east of Reno, Washoe County, Nevada.

A field survey was conducted on July 12 and 13, 1991. The location and estimated extent of all waters of the United States, including wetlands were noted on a topographic map provided by CFA.

In general, three types of waters/wetlands were observed on the property. These include stream channels without adjacent wetlands, stream channels bordered by riparian wetlands, and spring seep wetlands. The attached map depicts the location and general extent of these waters/wetlands.

These waters of the United States are subject to the regulatory authority of the Corps of Engineers pursuant to Section 404 of the Clean Water. In the event that you wish to proceed with a plan for developing the property, we recommend that a detailed delineation be completed and forwarded to the Corps of Engineers for their verification.

If you need any further assistance or clarification in this matter or have any other questions please don't hesitate to call me at (916) 732-2050, or call Lori Carpenter in our Reno Office at (702) 828-1991.

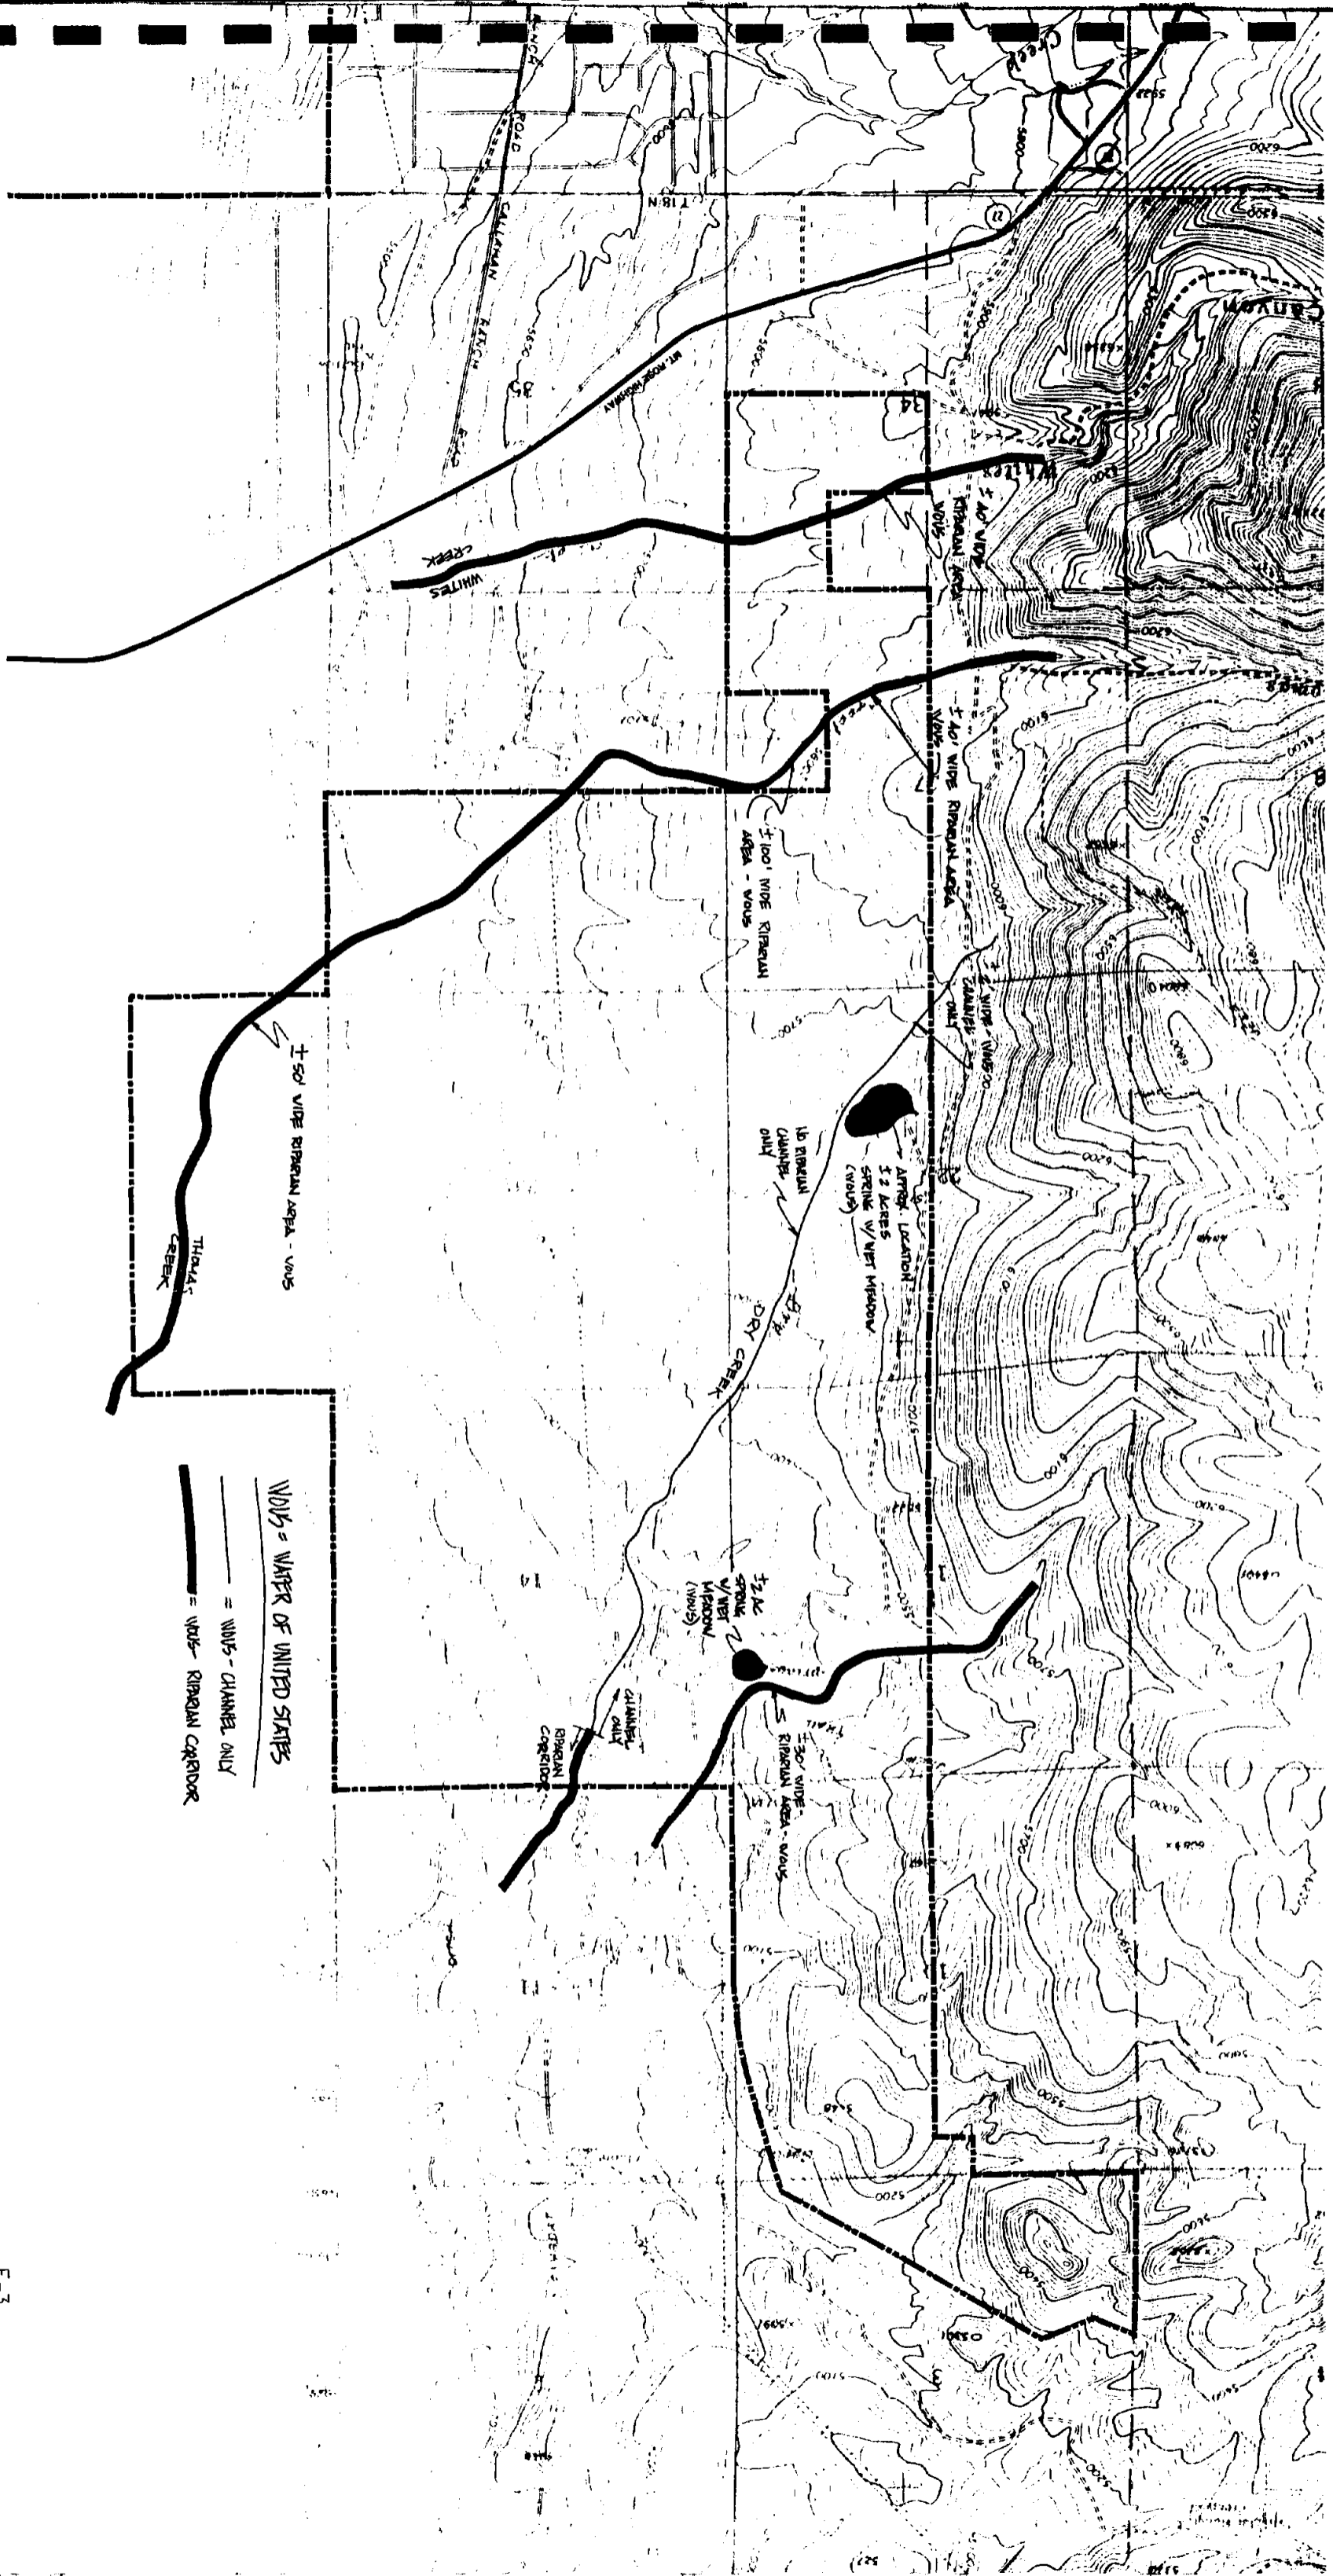

Sincerely,

Tom Skordal  
Vice President

PRELIMINARY HYDROLOGY REPORT  
SOUTHWEST POINTE

WASHOE COUNTY, NEVADA

PREPARED BY:

CFA, INC.

# PRELIMINARY HYDROLOGY REPORT

## SOUTHWEST POINTE

### INTRODUCTION

This report presents the results of a preliminary hydrology study for Phase 1 of the proposed Southwest Pointe master-planned development on Redfield property in Washoe County, Nevada. The site lies within the Thomas Creek and Dry Creek watersheds. A FEMA Flood Zone A has been identified for Thomas Creek, which crosses the Phase 1 site. Dry Creek crosses a future phase of development and is not considered in this report.

The objectives of the proposed drainage system and storm water management plan are to intercept the runoff from the 10-year storm, to detain the increase in 10-year runoff due to the development, and to pass the 100-year runoff occurring in Thomas Creek and the natural drainage ways. The increased runoff in the 10-year storm due to development will be detained on-site.

### SITE DESCRIPTION

Phase 1 comprises 1230 acres of undeveloped land located west of the present terminus of Zolezzi Lane (see Plate 1, Site Location Map). The site slopes generally toward the northeast at grades ranging from 6 to 10 percent. Thomas Creek flows through the south and east parts of the site. Native soils consist primarily of silty sands underlain by sandy clays. Vegetation consists of grasses and sagebrush.

## **PROJECT DESCRIPTION**

Southwest Pointe (Phase 1) proposes 410 residential lots and an 18-hole golf course. Gross density is 0.33 dwelling units per acre. Development is clustered into neighborhoods with minimum lot sizes range from 12,000 square feet to 1 acre.

## **FLOOD ZONE**

The FEMA Map, Panel No. 1500, dated August 1, 1984, identifies a Zone A 100-year flood boundary for Thomas Creek, which flows in a well-defined channel through the south and east parts of the site. Flood zone boundaries are illustrated on the Tentative Map. No development, other than roadway crossings, is proposed for the Zone A areas.

## **MAJOR DRAINAGE**

### Existing Conditions

Thomas Creek drains a watershed of approximately 9.14 square miles originating in the Sierra Nevada Range (Nimbus, 1990-b). The peak 100-year flow in the project vicinity was estimated by Nimbus (1990-a,b) to be 2,640 cubic feet per second (CFS) and by Kennedy/Jenks/Chilton (1990) to be 2,550 CFS.

The extreme northern portion of the Phase 1 Tentative Map area is part of the Dry Creek watershed. Since Dry Creek itself is entirely outside the proposed development, it will not be considered further at this time.

### Proposed Improvements

Thomas Creek will be crossed in two locations: Zolezzi Lane and Whites Creek Lane. Both crossings will be precast Con/Span bridges or similar. Crossings will be designed to pass the 100-year peak runoff. No detention is proposed within the existing floodway.

## **MINOR DRAINAGE**

### Existing Conditions

The site drains generally toward the northeast by sheet flow or shallow concentrated flow. The property lies above the Steamboat Ditch and is not considered to be irrigated land.

### Proposed Improvements

Runoff generated on-site in the 10-year storm will be picked up by the storm drain system and conveyed to the proposed detention ponds. Runoff exceeding the capacity of the underground storm drain will run in surface channels or in street right-of-ways to a designated point of discharge. The ponds will be sized to reduce peak 10-year site runoff to pre-development levels. The storm drain system will discharge to a natural drainage way (e.g. Thomas Creek) and will be designed so that no increase will occur to the 10-year flow in any natural drainage way.

## **HYDROLOGY**

For the purposes of this preliminary drainage study, five major drainage basins within the project site were identified. Basins D-1 through D-3 are within Dry Creek watershed and T-1 and T-2 are in the Thomas Creek watershed (see Plate 2, Preliminary Hydrology Map). The basins were defined according to location of primary outfall and the need for detention.

The Graphical Peak Discharge module and the Detention Storage Estimate module, Haestad Methods Quick TR-55, were used to estimate peak on-site runoff and detention storage volume requirements. The TR-55 Graphical Peak Method was used to estimate peak 10-year and 100-year flows. We also estimated the required detention volume to reduce incoming flows to existing levels in the 10-year storm. The computations are presented following this narrative and the estimated peak flows are summarized in Table 1.

SCS curve numbers, based on Soil Type C, are 79 for undeveloped areas, 80 for low density residential areas (1 DU/acre), and 83 for medium density residential areas (4 DU/acre). Time of concentration (in hours) is estimated as  $0.5 + L/3600V$ , where L is the length of the watershed, and V is the assumed flow velocity (5 FPS for existing conditions and 6 FPS for developed). Average precipitation values, taken from the NOAA Atlas 2, are 2.2 inches for the 10-year storm and 3.4 inches for the 100-year storm (24 hour duration).

The increase in runoff associated with the proposed development will be retained by the proposed ponds. Storm water will be released at a rate not exceeding existing peak rates. Storm water will be pre-treated for petrochemicals and silts at the street catch basins per Washoe County standards. The retention time in the open channels and ponds will allow for further improvement of the quality of the runoff before it leaves the property.

The detention storage calculations indicate that a total pond volume of approximately 7 acre-feet is required to detain the increase in the 10-year runoff. The estimated pond volumes required for each drainage basin are included in Table 1. A detailed pond design and flood routing study will be submitted for approval prior to final design.

## **CONCLUSIONS**

1. The storm drainage improvements proposed with this project will be adequate to detain the increased runoff due to development in the 10-year storm.
2. A master storm drainage plan with detailed hydrologic and hydraulic computations and detention pond routing should be prepared prior to any final design.

1 acre.....	20	51	68	79	84
2 acres .....	12	46	65	77	82
<i>Developing urban areas</i>					
Newly graded areas (pervious areas only, no vegetation) <sup>5</sup> .....		77	86	91	94
Idle lands (CN's are determined using cover types similar to those in table 2-2c).					

<sup>1</sup>Average runoff condition, and  $I_a = 0.2S$ .

<sup>2</sup>The average percent impervious area shown was used to develop the composite CN's. Other assumptions are as follows: impervious areas are directly connected to the drainage system, impervious areas have a CN of 98, and pervious areas are considered equivalent to open space in good hydrologic condition. CN's for other combinations of conditions may be computed using figure 2-3 or 2-4.

<sup>3</sup>CN's shown are equivalent to those of pasture. Composite CN's may be computed for other combinations of open space cover type.

<sup>4</sup>Composite CN's for natural desert landscaping should be computed using figures 2-3 or 2-4 based on the impervious area percentage (CN = 98) and the pervious area CN. The pervious area CN's are assumed equivalent to desert shrub in poor hydrologic condition.

<sup>5</sup>Composite CN's to use for the design of temporary measures during grading and construction should be computed using figure 2-3 or 2-4, based on the degree of development (impervious area percentage) and the CN's for the newly graded pervious areas.

Figure 3-1.—Average velocities for estimating travel time for shallow concentrated flow.

Jeff Dingman  
Dingman Investments  
1597 Esmeralda Avenue  
Minden, NV 89423

Dear Mr. Dingman:

I, Judi Bailey, County Clerk and Clerk of the Board of County Commissioners, Washoe County, Nevada, do hereby certify that at a regular meeting of the Board of County Commissioners, held on November 8, 1994, Chairman Cornwall issued the following order:

94-941 AMENDMENT OF DEVELOPMENT AGREEMENT CASE NO. DA9-1-93 -  
SOUTHWEST POINTE/DINGMAN INVESTMENTS (APN: 49-010-04, 49-010-10  
AND 41-030-12)

6:00 p.m. This was the time set in a Notice of Public Hearing, mailed to affected property owners on October 27, 1994, to consider the recommendation of the Washoe County Planning Commission to approve an amendment to the preliminary development agreement that facilitates development of a residential community which includes 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center and a commercial village center for Dingman Investments/Southwest Pointe. The amendment would allow the applicant to begin preliminary grading of the golf course and installation of infrastructure along Zolezzi Lane prior to the approval of the final development agreement. The total acreage of the project is ±3,171.6 acres. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR), and General Rural (GR) and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26 and 27, T18N, R19E, MDM, Washoe County, Nevada. Proof was made that due and legal Notice had been given.

Mike Harper, Director of Development Review, stated that the applicant is requesting to move forward with one of the two golf courses prior to completing the final development agreement and that staff is recommending some revised conditions they feel are necessary safeguards. Pursuant to questions at Caucus regarding water, Mr. Harper stated that the Utility Division indicated they are comfortable with the proposals.

Commissioner Bradhurst expressed concern regarding whether there is adequate water for this project and asked how much water will be needed for the golf course. Brita Tryggvi, CFA, Inc., representing applicant, stated that approximately 350 acre feet will be needed for the golf course. A discussion then ensued regarding using the treated effluent from the South Truckee Meadows sewer treatment plant for the golf courses when it is available.

Chairman Cornwall opened the public hearing by calling on anyone wishing to speak regarding this item.

Tim Howsley and Dennis Geeson, area residents, expressed concern about starting any construction prior to completion of the final development agreement stating that there are still many issues to be resolved, especially water and access.

There being no one else wishing to speak, the public hearing was closed.

Mr. Harper then answered questions of the Board. Commissioner Bradhurst expressed his concern regarding the water. Following further discussion, on motion by Commissioner McDowell, seconded by Commissioner Beck, which motion duly carried, Chairman Cornwall ordered that an amendment of Development Agreement Case No. DA9-1-93, which will allow the applicant to begin preliminary grading of the golf course and installation of infrastructure along Zolezzi Lane prior to the approval of the final development agreement, be approved subject to the following amended conditions which modify Washoe County Board of County Commissioners Clerk's Order No. 94-86:

19. The final development agreement shall not be approved until the right-of-way of all necessary off-site accesses from the project to Thomas Creek Road are obtained. Provided however, that preliminary golf course and roadway grading may commence before such approval has been obtained so long as such construction is done in accordance with Condition 21. A recorded right-of-way document shall be provided to the satisfaction of the County Engineer and the District Attorney's Office.
45. Prior to the issuance of a grading permit or approval of a final map, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.
47. A general concept level storm drain master plan shall be submitted and approved prior to acceptance of the final development agreement to the satisfaction of the County Engineer. The general concept level storm drain master plan shall address in general terms proposed methods for handling the existing and increased flows for the 10- and 100-year storms including detention and other proposed mitigation measures for both on- and off-site areas. This master plan shall include a drawing which shows the existing drainage basins within the development and indicate how they may be impacted. After approval of the final development agreement, and prior to approval of the tentative map for each phase or approval of any

special use permit, a preliminary hydrology report shall be submitted and approved to the satisfaction of the County Engineer. This preliminary hydrology report shall be prepared in accordance with County requirements for tentative maps, in conformance with the general concept level storm drain master plan, and be applicable to the specific tentative map or special use permit being approved.

The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities.

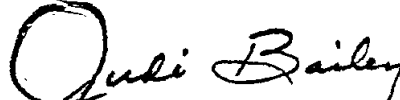

48. Prior to the submittal of any final map or issuance of any grading permit, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.

Prior to the issuance of a grading permit, the applicant shall provide a letter granting a blanket drainage and construction easement to the Southwest Pointe Subdivision that allows the subdivision to drain onto the golf course and to construct detention facilities necessary to accommodate the subdivision-generated stormwaters in mutually agreed upon locations to the satisfaction of the County Engineer. The easement shall be submitted with the plans for the final golf course improvements.

59. Prior to issuance of a grading permit for the golf course and/or final map, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.
60. Prior to the issuance of a grading permit for the golf course or approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
61. Prior to the issuance of a grading permit for the golf course, a golf course management plan shall be prepared that documents how the migration of fertilizers, pesticides, herbicides, and fungicides to surface and ground waters will be prevented. A service and ground water sampling program shall be implemented to demonstrate that

migration is not occurring, and commits to modifying practices in the event that any of the above materials are detected.

Very truly yours,

Dear Mr. Dingman:

I, Judi Bailey, County Clerk and Clerk of the Board of County Commissioners, Washoe County, Nevada, do hereby certify that at a regular meeting of the Board of County Commissioners, held on September 27, 1994, Chairman Cornwall issued the following order:

94-854     AMENDMENT OF DEVELOPMENT AGREEMENT CASE NO. DA9-1-93 -  
SOUTHWEST POINTE/DINGMAN INVESTMENTS - (APN: 49-010-04,  
49-010-10 & 41-030-12)

9:30 a.m. This was the time set in a Notice of Public Hearing, mailed to affected property owners on September 14, 1994, and published in the Reno Gazette-Journal on September 16, 1994, to consider the recommendation of the Washoe County Planning Commission to approve an amendment of a development agreement timeline and thereby grant an 18-month extension to Dingman Investments for Southwest Pointe to finalize the document which facilitates construction of a residential community which includes 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities and a commercial village center, the total acreage being ±3,171.6 acres, designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR), and General Rural (GR) and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26 and 27, T18N, R19E, MDM, Washoe County, Nevada. Proof was made that due and legal Notice had been given.

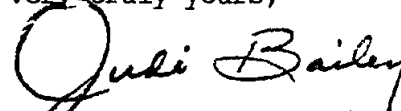

Bob Katai, Department of Development Review, presented the staff report and answered questions of the Board.

Chairman Cornwall opened the public hearing by calling on anyone wishing to speak regarding this amendment. There being no response, the hearing was closed.

Upon recommendation of the Washoe County Planning Commission, on motion by Commissioner Shaw, seconded by Commissioner Beck, which motion

duly carried, Chairman Cornwall ordered that the amendment of Development Agreement Case No. DA9-1-93 be approved.

Very truly yours,

A handwritten signature in cursive script that reads "Judi Bailey". The signature is written in black ink and is positioned above the typed name.

JUDI BAILEY  
County Clerk

Jeff Dingman  
Dingman Investments  
1597 Esmeralda Avenue  
Minden, NV 89423

Dear Mr. Dingman:

I, Judi Bailey, County Clerk and Clerk of the Board of County Commissioners, Washoe County, Nevada, do hereby certify that at a regular meeting of the Board of County Commissioners, held on February 8, 1994, Chairman Cornwall issued the following order:

94-86      DEVELOPMENT AGREEMENT CASE NO. DA9-1-93 - DINGMAN INVESTMENTS  
SOUTHWEST POINTE (APN: 49-010-04, 49-010-10 AND 41-030-12)

6:00 p.m. This was the time set in a Notice of Hearing published in the Reno Gazette-Journal on January 27, 1994, to consider Development Agreement Case No. DA9-1-93, a request by Dingman Investments to develop a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center and a commercial village center. The total acreage of the project is ±3,171.6 acres. The project entrance is proposed west of the intersection of Zolezzi Lane and Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR), is located in the Southwest Truckee Meadows Planning Area, and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. Proof was made that due and legal notice had been given.

Jeff Murphree, Planner, Department of Development Review, described the proposed project and stated that the purpose of a Development Agreement is to provide a mechanism for comprehensive review of a large scale development, to insure that adequate public facilities and services are provided consistent with the development, and to provide assurances that the master plan will not be changed during the course of the agreement, which in this case is 15 years. He explained the process stating that, if approved by this Board tonight, this preliminary development agreement, which is basically a conceptual plan, will be sent to the Regional Planning Commission as a project of regional significance for their review; that the applicant will then have six months to meet the conditions of approval; that it will then come back to staff for review; and that when all conditions have been met, staff will then bring the final development agreement to the Board of County Commissioners for final approval.

Mr. Murphree also reviewed the history of the subject agreement at the Planning Commission level and stated that the major outstanding issue is the traffic impacts that will be created by this development. He stated that the primary access for this development will be via White's Creek Lane with Zolezzi Lane serving as a gated, emergency access only; that staff was concerned about the project not having two resident accesses; and that the Planning Commission felt that White's Creek Lane as proposed by the developer will meet the needs. Mr. Murphree stated that the residents in Field Creek who will be adjacent to White's Creek Lane are very concerned about this, although White's Creek Lane first appeared as a major street in the 1984 master plan; that there were some changes when the area plan was adopted in 1989; and that when Field Creek Ranch Subdivision was approved, prior to the 1989 area plan, the developer was required to dedicate a 100-foot wide corridor for a future street--White's Creek Lane. In response to Commissioner Beck, Mr. Murphree stated that White's Creek Lane will be constructed as a 4-lane road from Thomas Creek Road west into the subject property only; that from Thomas Creek Road east to Wedge Parkway it will be constructed as a 2-lane minor arterial; and that when warranted in the future, that portion will be widened to 4 lanes also, but that won't be for many years as it will not be necessary until complete buildout of all the projects in the area.

Mr. Murphree stated that the other major issue at the Planning Commission was the flood detention facilities, which has been resolved through negotiations. He then answered specific questions of the Board.

Brita Tryggvi, CFA, Inc., representing applicant, stated that the proposed development is consistent with the Southwest Truckee Meadows Area Plan for both density and the proposed roadway system; and that they propose to cluster all of the development in the center of the project thereby creating wide open space buffers, retaining the existing vegetation, and preserving the muledeer habitat. Using maps, she located wide buffers between this project and the surrounding developments, showing that approximately 1500 acres, 48 percent of the site, will be open space, which will eventually be dedicated to a public entity or a nonprofit organization such as the Washoe Parks Foundation. Ms. Tryggvi also explained how they are planning different, distinct neighborhoods separated by golf courses and common open space, some with 12,000 square foot lots, some with half-acre lots, and some with one acre lots, the two 18-hole golf courses, one of which will be constructed in the first phase, the commercial center, and the recreational facilities they are planning.

Ms. Tryggvi then discussed the developer's proposal for constructing White's Creek Lane and stated that their idea is to create a special assessment district involving all the developers who will benefit and that that would get this entire road constructed much sooner than originally proposed, which will relieve the traffic problems in Thomas Creek Estates and on Zolezzi Lane. She stated that there are some residents in Field Creek who are going to be impacted by White's Creek Lane, cited alternatives roads that have been proposed and considered, and explained the problems with each of them. Ms. Tryggvi then described the mitigation measures that can be taken to minimize the impacts to those Field Creek residents and stated that they will work with those homeowners to come up with the best possible solutions. Ms. Tryggvi then answered questions from the Board.

Chairman Cornwall opened the public hearing and called on those wishing to speak regarding the proposed project.

The following area residents spoke in support of the project and overwhelmingly supported the construction of White's Creek Lane, some of them stating that they feel it should be constructed as soon as possible to relieve traffic in their neighborhoods: Cory Kristie, Cathy Bush, Elaine Walker, Jim Lucas, Robert Archie, Randy Jackson, Robert Duvall, Wendy Foyer, Thomas Bower, Beverly Sindlinger, and Patty Beers. Ms. Walker also submitted a petition signed by many of her neighbors in support of the project; and a letter of support from Mr. Walker was placed on file with the Clerk, along with the petition.

The following residents of the Field Creek Subdivision spoke in opposition to the project and the construction of White's Creek Lane, citing how they will be adversely impacted, such as the road being too close to their homes creating noise and danger, their views being obstructed, and their property values being affected: John Gulick, Pat and Doug Powell, Bruno Menicucci, Thomas Shrake, Wayne Avery, Randy Moore, Brad Swenson, Robert Young, Lee Parker, and John Zidich. Mr. Shrake submitted a petition signed by his neighbors supporting accessing this project from the Mt. Rose Highway, which was placed on file with the Clerk.

Pat and Doug Powell, 13440 Field Creek, also explained that Mr. Powell had gone to the County Planning offices before purchasing their property trying to learn what was planned for the area and no one told them about a 4-lane road going in their backyard. Randy Moore, 13560 Field Creek also stated that he went to the County offices to view the subdivision plans, which did not even show the easement through the area.

Buck Metcalf, Washoe County Planning Commission; Bruce Arkell, formerly with the Nevada Department of Transportation; and Greg Krause, Regional Transportation Commission; each discussed the complexities involved in developing the master plan, including the transportation element therein, and urged the Commission to follow the master plan and not to change the proposed construction of White's Creek Lane.

Keith Kellison, Chairman, Southwest Truckee Meadows Citizens Advisory Board, stated that Southwest Pointe is a quality project that will benefit the entire area; that no one spoke against the project at the numerous meetings they held regarding the project; and that on behalf of the CAB he is requesting that the Board approve the project. Nick Stosic, CAB member, stated that he was also on the CAB when the master plan was adopted and urged the Board to follow the plan and approve the project as it is in conformance with the plan. Steven Walther, former CAB member stated that a line has been drawn indicating this road since February, 1983; that the plan is fragile and should be carefully followed, which this project does; and that he believes that the deer herd and wildlife habitat will be protected by all the open space that is planned.

Dick Heikka, Chief of the Galena Volunteer Fire Department, answered some of the questions that had been raised regarding emergency access and fire protection, stating that their response time would be

good, and described the numerous pieces of equipment that the Department currently has, assuring the Board that there would be adequate fire protection. He also stated that the open space planned in this project will protect the wildlife habitat and the resident muledeer in the area; and that with all the development in the area, White's Creek Lane will have to be built someday just on the basis of good planning.

Sandra Wilson, 13350 Fieldcreek, stated that the construction vehicles should use the Mt. Rose Highway; and that when White's Creek Lane is constructed, it should include walking paths and bike lanes so that it will be conducive to the rural life of the area.

Chris Spandow stated that he does not live in the project area, but does use the streets there and urged the Board to maintain the integrity of the area plan and allocate the traffic fairly to all streets.

Nancy Maddox, 4045 LaMay Lane, stated that her concern is the water; that she lives on the north end of the project; and that she and her neighbors are all on private wells and are concerned that their wells will be impacted.

There being no one else wishing to speak, Chairman Cornwall closed the public hearing. She then asked Mr. Murphree to clarify the issues of construction traffic and the approximate time when White's Creek Lane will be constructed.

Mr. Murphree stated that construction traffic will initially use Zolezzi Lane during construction of the golf course, but that that will not be in and out traffic; and that when the first building permit is issued, the construction traffic will use Mt. Rose to Thomas Creek to White's Creek. He further stated that they had planned to require construction of White's Creek Lane by the 85th residential permit, but the applicant desires to do it before that time.

Ms. Tryggvi stated that the developer has no objection to moving it up to the 35th building permit as someone suggested since they hope to construct White's Creek Lane much sooner through the special assessment district. Ms. Tryggvi and the Board then discussed, at length, possible mitigation measures that can be taken to alleviate the impacts on those residents living on Field Creek Lane, such as placing the lanes as far to the south as possible, lowering the road, fencing and installing sound walls. Ms. Tryggvi stated that they will work with those homeowners, even meeting with them individually if necessary, to come up with acceptable solutions to minimize the impacts on them.

In regard to the concern expressed concerning water, Commissioner Bradhurst asked if there has been an analysis of whether this project might impact private wells. Ms. Tryggvi stated that they have not yet done that but are working with the Utility Division to determine this.

Commissioner McDowell asked if the Board is going to add or change any conditions. Mike Harper, Director of Development Review, reminded the Board that this is a Preliminary Development Agreement; that if

the Commission modifies the agreement, the changes must go back through the Planning Commission process; and that the Board's input would certainly be taken into consideration when preparing the Final Development Agreement for the Board's approval.

Commissioner Bradhurst then asked questions about the open space dedication and the trails system, which were answered by Gene Sullivan, Parks and Recreation Director.

Chairman Cornwall stated that she definitely wants the residents on Field Creek Lane who will be impacted by the construction of White's Creek Lane to be involved in the design process regarding the mitigation measures used to alleviate those problems; that she does want the condition regarding construction traffic clarified to include how that issue will be enforced; and that she does not believe the residents in this area want street lights in the neighborhood.

Legal Counsel Maureen Griswold stated that she feels those changes are acceptable; that since the developer has agreed to change the 85th building permit to the 35th, she sees no problem with that; and that she does not believe that these clarifications would require resubmittal to the Washoe County Planning Commission.

On motion by Commissioner McDowell, seconded by Commissioner Bradhurst, which motion duly carried, Chairman Cornwall ordered that the preliminary development agreement in Development Agreement Case No. DA9-1-93 be approved subject to the following conditions as clarified by the Board at this meeting:

GENERAL CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE

COMPLIANCE WITH THE CONDITIONS OF THIS DEVELOPMENT AGREEMENT IS THE RESPONSIBILITY OF THE DEVELOPER, ITS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY AND THEIR SUCCESSORS IN INTEREST.

A COPY OF ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL BE FILED WITH THE DEVELOPMENT REVIEW STAFF.

GENERAL CONDITIONS

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.

2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The recorded final development agreement shall be effective for a period not-more-than 15 years. An extension of this approval may be granted if mutually agreed to by the developer and Washoe County.
4. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's office and the development review staff. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. Said CC&Rs shall specifically address the potential for liens against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement, of the following items, at a minimum.
  - a. Private roads within the subdivision.
  - b. Equestrian center.
  - c. Staffing of maintenance and security forces.
  - d. Common area landscaping.
  - e. Entrance gates.
  - f. Snow removal and storage areas.
  - g. Landscaping along streets.
  - h. Fire and fuelbreaks on open space.
  - i. Detention basins and the accumulated sediment.
  - j. Equestrian/pedestrian trails.
  - k. Bicycle and pedestrian paths.
  - l. Private streets and utilities.
  - m. Golf cart crossings.
  - n. Off-site residential parking areas
  - o. Public park center.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
- b. Specifications on the limitation of turf area for single family homes.
- c. Notice of requirement to pay future sewer user fees
- d. Minimum defensible space requirements.
- e. Snow storage areas.

- f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
  - g. Potential for conservation easements or dedication of open space.
  - h. Prohibition of motorized vehicles in open space.
  - i. Areas with potential for equestrian traffic.
  - j. Requirement of open space remaining open to pedestrian and bicycle traffic.
  - k. Notice of pedestrian easements to abutting properties.
5. Prior to ground disturbing activity, the developer shall provide an archaeological/historical survey for review by the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology.
  6. The developer shall participate in any applicable General Improvement District or Special Assessment District formed by Washoe County to the satisfaction of the applicable division of Public Works.
  7. All new utilities shall be placed underground to the satisfaction of the County Engineer.
  8. Prior to final map approval, the developer is to provide written approval of the plans for the installation of mail delivery facilities from the US Postal Service. The system must be shown on the project construction plans and installed as part of the on-site improvements to the satisfaction of the County Engineer and the US Postal Service.
  9. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
  10. Prior to submittal to the Washoe County Board of County Commissioners, the final development agreement shall be reviewed and approved by the Washoe County District Attorney's Office.
  11. Within six months of the approval of the preliminary development agreement, a draft final development agreement that conforms with the provisions of section 814 of the Washoe County Development Code shall be completed and submitted to the Washoe County Department of Development Review. Washoe County Department of Development Review will provide comments on the draft final agreement. The final development agreement will then be submitted to the Washoe County Board of County Commissioners within three months. Extensions of any of these time frames may be requested if mutually agreeable to Washoe County and the developer.

### PHASING

12. The project shall be developed in three phases. Phase I includes a tentative map for 436 lots, an 18-hole golf course, the village center and driving range. Phase II will include an additional nine holes, the equestrian center and a tentative map for approximately 220 dwelling units. Phase III includes the remaining 434 lots and the last nine holes of golf. Modification to the proposed phasing plan may be made if mutually agreeable the developer and Washoe County. These modifications may include the commercial portion of the project and the second 18-hole golf course, which may be constructed during phase II or phase III.
13. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

14. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.

### TRAFFIC

15. A LOS C, or the current Washoe County standard, shall be used as a basis for evaluating transportation needs and traffic impact mitigation requirements.
16. Prior to the issuance of the first building permit, two lanes of Whites Creek Lane shall be constructed, to two-lane minor arterial standards as a minimum, from Thomas Creek Road to the project site, to the satisfaction of the County Engineer.
17. Prior to the issuance of the first building permit, a second access shall be constructed to the project site to emergency standards to the satisfaction of the applicable fire protection agency.
18. Prior to the issuance of the 35th building permit, the following roadway improvements shall be constructed to the satisfaction of the County Engineer:

- A. The remaining two lanes of Whites Creek Lane from Thomas Creek Road to the project site if warranted by projected traffic demands.
  - B. Two (2) lanes of Whites Creek Lane from Thomas Creek Road to Wedge Parkway with 100 feet of right-of-way. These two lanes will be constructed so that an additional two lanes may be added in the future if warranted by projected traffic volumes.
  - C. Whites Creek Lane will be designed in a manner that minimizes any impacts on the adjacent homes to the north in Fieldcreek Ranch (e.g., fencing, berms, lowering the travel lanes).
19. The final development agreement shall not be approved until the right-of-way of all necessary off-site accesses from the project to Thomas Creek Road are obtained. A recorded right-of-way document shall be provided to the satisfaction of the County Engineer and the District Attorney's Office.
  20. Prior to the final approval of the development agreement, the developer for Southwest Pointe shall petition the Washoe County Board of County Commissioners to create a Special Assessment District (SAD) for the purpose of financing the construction of Whites Creek Lane from the project site to Wedge Parkway and other roads as defined in the SAD agreement. In the event that a special assessment district is not created, the developer shall construct Whites Creek Lane, as outlined in Condition No.'s 16 and 18, from the project site to Wedge Parkway, to the satisfaction of the County Engineer.

Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

NOTE

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

21. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

Enforcement of the approved construction haul routes shall be the responsibility of the applicant and the County Engineer. Failure of construction vehicles to follow approved roads, will result in cessation of building permits and/or certificate-of-occupancies.

22. Prior to approval of the final development agreement, the developer shall provide a street maintenance program to the satisfaction of the County Engineer and the Department of Development Review. Street maintenance of private streets shall be performed by the homeowner's association and shall be perpetually funded.
23. Prior to the approval of the final development agreement, a schematic pedestrian circulation plan. As part of each tentative map, a detailed pedestrian circulation plan will be submitted and approved by the Department of Development Review.

24. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
25. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
26. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - C. Private - 50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.

- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
  - F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 1/2 foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
  - G. Public - 100 ROW major arterial street (more than 10,830 ADT).
27. Landscaped medians shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer, Washoe County Department of Development Review and the developer. Maintenance of median landscaping shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
28. Meandering asphalt paths will be acceptable provided:
- A. Pedestrian easements are included for portions of the paths located outside the County r.o.w.
  - B. Landscaping between the back of the curb and the path shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer.
  - C. Maintenance of the asphalt paths and landscaping shall be the responsibility of the developer and, when created, by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
29. Proposed roadways (public or private) are not to be centered along fault lines. Faultlines shall be located behind the curbline, on the up-thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback excluding construction for buildings for human occupancy may be reduced, to the satisfaction of the County Engineer.
30. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded.

31. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement, to the satisfaction of the County Engineer.
32. Temporary County Standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street, to the satisfaction of the County Engineer.
33. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs that are longer than 500 feet to the satisfaction of the County Engineer and the applicable fire protection agency. These roads shall have a 30-foot access easement with a minimum 20-foot width of 6 inches of Type 2 Class B aggregate base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer.
34. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. The emergency access road shall be constructed within a 30 foot access easement to a minimum 20 foot width with 4 inches of Type 2 Class B aggregate base.
35. Street lights shall be installed at major intersections to the satisfaction of the County Engineer.
36. Unless otherwise stated in the final development agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided to the satisfaction of the County Engineer.
37. The minimum pavement structural section shall be 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector-classified streets and shall be 3 inches of asphalt over 6 inches of granular base for roadways for local streets to the satisfaction of the County Engineer.
38. The applicant shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required.

39. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater, to the satisfaction of the County Engineer. Where possible, crossings should be below the grade of public streets.
40. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
41. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
42. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
43. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.
44. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

#### AIR QUALITY MANAGEMENT

45. Prior to the approval of the final development agreement, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

#### DRAINAGE

46. Detention/retention facilities are to be maintained by a homeowner's association and perpetually funded unless the County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County.

47. A general concept level storm drain master plan shall be submitted and approved prior to acceptance of the final development agreement to the satisfaction of the County Engineer. The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities.
48. Prior to recordation of any final map, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.
49. A maintenance plan of all drainage facilities, to be owned by the homeowner's association, shall be provided prior to approval of the final development agreement. All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe county water treatment plant, and associated Steamboat Ditch conveyance system. All runoff from improved areas which runs into the Steamboat Ditch shall be pre-treated for silt and petrochemicals and shall be routed through a "wet" detention facility or approved alternative, to the satisfaction of the Utility Division and the Department of Development Review.
50. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.
51. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:
  - A. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to

the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.

- B. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within five (5) years of the approval of the final development agreement. If construction is not started within by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - C. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - D. If the detention basin is constructed, Washoe County shall pay fair market value for the property.
52. The increase in development-caused runoff from the 100 year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained On-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company, to the satisfaction of the County Engineer.
53. Prior to the approval of the final development agreement, a geotechnical report shall be prepared, which considers the effects of earthquake forces and faulting in the area, to the satisfaction of the County Engineer.

The siting and design of detention/retention facilities shall be addressed based on the findings and recommendations provided in the geotechnical report.

54. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
55. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.
56. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.

57. The stormwater discharges from this development that flow to Dry Creek shall be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. The applicant shall provide drainage structures under Steamboat Ditch that would pass the 10-year frequency storm or demonstrate that there will not be any water quality degradation in Steamboat Ditch.
58. Prior to approval of the final map, the developer shall obtain a Stormwater Discharge Permit from the Nevada Division of Environmental Protection. If required, point discharge permit for each proposed detention pond will be obtained from the Nevada Division of Environmental Protection and copy submitted to the Engineering Division.

The applicant shall contact the Division of Water Resources, State of Nevada, to determine whether the proposed flood detention facilities will require a permit.

59. Prior to approval of the final development agreement, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.
60. Prior to approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
61. Prior to approval of the final development agreement, a golf course management plan shall be prepared that documents how the migration of fertilizers, pesticides, herbicides, and fungicides to surface and ground waters will be prevented. A service and ground water sampling program shall be implemented to demonstrate that migration is not occurring, and commits to modifying practices in the event that any of the above materials are detected.
62. An animal waste management plan for the equestrian center shall be prepared prior to the issuance of a building permit for that facility, that documents how the migration of bacteria, nutrients and other animal waste by-products to surface and ground waters will be prevented.
63. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100 year flows and lined, to the satisfaction of the County Engineer.

#### WATER

64. Prior to the approval of the final development agreement, the applicant shall provide staff with a phasing schedule for the dedication

of water rights. Permitted or certificated groundwater rights in the amount of 1.12 acre feet must be dedicated to Washoe County for each lot of a final map. Prior to acceptance, the water rights must be in good standing with the State of Nevada Division of Water Resources and must reflect a point of diversion, place and manner of use acceptable to the Utility Division.

65. Prior to the approval of the final map, the developer shall demonstrate how compliance with NRS 278.349, that requires the availability of water meet applicable health standards and is sufficient in quantity to serve the foreseeable needs of the subdivision, shall be met to the satisfaction of the District Health Department and Washoe County Department of Development Review.
66. Prior to the approval of the final development agreement, a complete water analysis from at least one monitoring well must be submitted to the District Health Office. The analysis must demonstrate the water conforms to the existing and proposed drinking water standards.
67. Prior to the approval of the final development agreement, a schematic water system plan for the referenced proposal must be submitted to the Utility Division and the District Health Department. Prior to final map approval, the plan must show that the water system will conform to the State of Nevada Water Supply Regulations, NAC Chapter 445, and the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, NAC 278.400 through 278.410.
68. Prior to final map approval, a letter of approval for the water rights serving this proposal must be submitted from the Division of Water Resources. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource to the satisfaction of the Utility Division.
69. The developer shall provide adequate assurance that the sewage, water and drainage systems will be satisfactorily maintained and operated
70. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters.
71. Water quality results from a State certified laboratory for new water sources shall be submitted to the Utility Division. The water quality sampling and testing shall be in compliance with the current State of Nevada Regulations for Public Water Systems, NAC 445.
72. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits.

73. Any wells on the property not in use for production or monitoring purposes, shall be properly abandoned in accordance with State Regulations governing Water Wells and Related Drilling.
74. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval. The water source shall meet both primary and secondary standards of the Safe Drinking Water Act.
75. The tentative maps shall show the maintenance roads for the existing and proposed water tanks. The location of these roads shall be mutually agreeable to Washoe County and the developer.
76. The developer shall provide access to the existing monitoring wells to the satisfaction of the Utility Division. In the event access is no longer available, the developer shall construct new wells to the satisfaction of the Utility Division.
77. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

#### WASTEWATER

78. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
79. The project shall be designed to accommodate a gravity flow sanitary sewer system within the boundaries of the subdivision. Such design shall be to the satisfaction of the Utility Division.
80. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.
81. All minor infrastructure for potable water distribution shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infra-

structure design can be accomplished prior to the approval of the final map.

82. Responsibility for design of wells, pump structure, controls, telemetry, and appurtenances, storage tanks, and transmission lines to the edge of the subdivision, all necessary to provide water service to the project, will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
83. The sanitary sewer collection system and water system facilities must be offered for dedication to Washoe County.
84. The developer shall construct or provide the financial assurances for the construction of the water and sewer system facilities. The financial assurances must be in a form and amount that is satisfactory to the Utility Division.
85. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance to the satisfaction of the Utility Division.
86. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development.
87. Fees for plan checking and inspection shall be paid in accordance with Washoe County ordinance.
88. Easements for all water and sewer utilities shall be offered for dedication to the satisfaction of the Utility Division.

#### GRADING

89. The development shall comply with the requirements of the Hillside Development Ordinance, as applicable.

#### SCHOOLS

90. Should the proposed "off-stream" location for the flood detention facility proposed in the 1990 Kennedy/Jenks report not be dedicated for this purpose, a minimum ten acre site for an elementary school and a minimum 25 acre site for a middle school shall be offered for dedication.

If the "off-stream" flood control facility is dedicated to Washoe County, a 10 acre site for the elementary school shall be offered for dedication.

If the area for the "off-stream" facility is dedicated, but the County has not complied with Condition No. 51, the use for the area shall revert back to a school site and/or a park site (if requested by Washoe County) as proposed by the developer. If a school or park site is not requested by Washoe County, this area shall remain as an open space buffer.

#### FIRE PROTECTION

91. The plans submitted with a building permit application shall show evidence of compliance with the recommendations of the applicable fire protection agency. Those concerns are fire flows, fire hydrant number and location, access, sequential phasing of firebreaks during development, permanent firebreaks, minimum defensible space, use of fire resistant construction and/or roof material, sprinklering of structures, and spark arrestors in chimneys. Access and fire flows shall be addressed to the satisfaction of the fire protection agency prior to the introduction of any combustible materials to the site.
92. A minimum one-acre site shall be offered for dedication, if requested by the applicable fire protection agency, for a fire station. The developer shall enter into talks with the applicable fire protection agency for any other requirements, such as, a fire station site, manpower and equipment needs, or for coordination with other developments that have similar requirements.

#### PARKS/RECREATION/OPEN SPACE

93. Prior to the approval of the final development agreement, an open space management plan and map shall be prepared that specifies the ownership of open spaces, type of uses allowed, phasing of open space dedication, phasing of trail construction and who is responsible for maintenance. This plan shall address the provisions of Section 110.408.45 of the Development Code. Common areas shall be maintained by the homeowner's association and provisions be made for perpetual funding for maintenance.

Prior to approval of the final development agreement, a government entity (e.g. United States Forest Service, Washoe County Parks Department, etc.) or a non-profit organization (e.g. Washoe Parks Foundation) shall be identified that will accept the dedication of the open space buffers identified on the Concept Plan, which consists of approximately 1,500 acres.

94. The final development agreement shall include a provision for the public open space that prohibits the sale of any open space without the consent of Washoe County.
95. Unless the off-stream site is dedicated to the County, a minimum 10-acre public park site shall be offered for dedication to the

County. A sketch plan has been submitted, which if conceptually approved by the County, should be included in the final development agreement. The final park design shall be mutually agreeable to the County and the developer. The developer will construct the recreational facilities in the park and then be reimbursed for the cost of the construction from the Residential Construction Tax. The responsibility of park maintenance shall be negotiated by the developer and Washoe County prior to the approval of the final development agreement.

96. The developer will work together with staff from the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer.

#### LANDSCAPING/ARCHITECTURAL DESIGN

97. Prior to the approval of the final development agreement, the developer shall submit schematic landscaping and architectural design guidelines of the entire project to the Design Review Committee (DRC) for its review and approval. These guidelines shall address, but not be limited to, type and color of building material, general architectural design, fencing, landscaping material (if plant material: type, size at time of planting, maturation size at full growth, period of time between planting and full growth), landscaping location, landscaping irrigation system, and financial assurances that landscaping will be planted and maintained.

The Design Review Committee shall also review the design of Whites Creek Lane, specifically to address Condition No. 18C.

98. The developer shall minimize grading to the maximum extent possible in the area around the critical mule deer habitat in order to preserve the existing browse shrubs.
99. Homes located on 12,000 square foot lots shall have a minimum 160 square foot storage space added in their garages, if only one garage space is provided.
100. A minimum 25 foot landscape buffer shall be installed between the homes and the collector and secondary loop streets. The homeowners association shall be required to perpetually maintain these areas.

#### OTHER

101. Prior to acceptance of the first final map, the telephone easement Doc. No. 415899, which runs through the middle of many lots, shall be realigned with appropriate abandonment and relocation easements, or the proposed lots realigned, to the satisfaction of the County Engineer.

\* \* \* \* \*

TENTATIVE MAP CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.  
  
If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.  
  
The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.
4. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.
5. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.

6. The roadway structural sections for the proposed 80 foot public right-of-way shall have as a minimum 5 inches of asphalt on 8 inches of aggregate base. A final geotechnical report must be prepared, however, prior to final map approval to determine if additional structural capacity above the minimum is required. On-site construction haul route traffic and school traffic is to be considered in the pavement analysis. The proposed on-site private road right-of-way widths are acceptable as shown for the tentative map of Phase 1.
7. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.

- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot asphalt meandering one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
- F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 1/2 foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
- G. Public - 100 ROW major arterial street (more than 10,830 ADT).
8. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater, to the satisfaction of the County Engineer. Where possible, crossings should be below the grade of public streets.
9. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
10. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
11. Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

NOTE

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

12. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
13. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.
14. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

#### AIR QUALITY MANAGEMENT

15. Prior to the approval of the final development agreement, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

#### DRAINAGE

16. Detention/retention facilities are to be maintained by a homeowner's association and perpetually funded unless the County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County.

The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.

17. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:
  - A. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the

Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.

- B. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within five (5) years of the approval of the final development agreement. If construction is not started within by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - C. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - D. If the detention basin is constructed, the property shall be dedicated to Washoe County.
18. The increase in development-caused runoff from the 100 year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained On-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company, to the satisfaction of the County Engineer.
19. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
20. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.
21. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable by Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.
22. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100 year flows and lined, to the satisfaction of the County Engineer.

#### WASTEWATER

23. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.

PARKS AND RECREATION

24. The developer will work together with staff from the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer.

LANDSCAPING

25. A minimum 25 foot landscape buffer shall be installed between the homes and the collector and secondary loop streets. The homeowners association shall be required to perpetually maintain these areas.

OTHER

26. All new utilities shall be placed underground to the satisfaction of the County Engineer.

\* \* \* \* \*

FINAL MAP CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE

ALL CONDITIONS MUST BE MET OR FINANCIAL ASSURANCES SHALL BE PROVIDED IN AN APPROPRIATE FORM AND AMOUNT, TO THE SATISFACTION OF THE PUBLIC WORKS DEPARTMENT PRIOR TO RECORDATION OF THE FINAL MAP, UNLESS OTHERWISE STATED.

PRIOR TO FILING A FINAL MAP FOR RECORDATION, THE DEVELOPER SHALL MEET WITH THE ENGINEERING DIVISION AND THE DEVELOPMENT REVIEW STAFF AT LEAST FOUR (4) WEEKS BEFORE THE ANTICIPATED RECORDATION DATE TO REVIEW REQUIREMENTS, FINAL CONSTRUCTION DRAWINGS, AND DOCUMENTATION NECESSARY TO ADEQUATELY COMPLY WITH THE CONDITIONS OF APPROVAL.

A REQUEST FOR AN EXTENSION OF TIME FOR THE RECORDING OF A FINAL MAP, WHICH PERMITS THE ADDITION, DELETION, OR AMENDMENT OF CONDITIONS, MUST BE SUBMITTED TO THE DEVELOPMENT REVIEW STAFF AT LEAST 60 DAYS PRIOR TO THE EXPIRATION DATE OF THE TENTATIVE SUBDIVISION MAP; SAID EXPIRATION BEING ONE YEAR FROM THE DATE OF THE BOARD OF COUNTY COMMISSIONERS APPROVAL OF THE TENTATIVE MAP OR A SUBSEQUENT FINAL MAP.

GENERAL CONDITIONS

1. Unless specifically stated in the final development agreement, final maps and final construction drawings shall comply with all applicable statutes, ordinances, rules, regulations, and policies in effect at the time of approval of the final map or any subsequent extension date.
2. Final maps shall be in substantial compliance with all plans and documents submitted with and made part of this tentative map request, as may be amended by action of the final approving authority. All documentation necessary to satisfy the conditions noted

below shall accompany the final map when submitted to the Engineering Division and the development review staff.

3. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's office and the development review staff. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. Said CC&Rs shall specifically address the potential for liens against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement of the following items, at a minimum:

- a. Private roads within the subdivision.
- b. Equestrian center.
- c. Staffing of maintenance and security forces.
- d. Common area landscaping.
- e. Entrance gates.
- f. Snow removal and storage areas.
- g. Landscaping along streets.
- h. Fire and fuelbreaks on open space.
- i. Detention basins and the accumulated sediment.
- j. Equestrian/pedestrian trails.
- k. Bicycle and pedestrian paths.
- l. Private streets and utilities.
- m. Golf cart crossings.
- n. Off-site residential parking areas.
- o. Public park center.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
  - b. Specifications on the limitation of turf area for single family dwellings.
  - c. Notice of requirement to pay future sewer user fees
  - d. Minimum defensible space requirements.
  - e. Snow storage areas.
  - f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
  - g. Potential for conservation easements or dedication of open space.
  - h. Prohibition of motorized vehicles in open space.
  - i. Areas with potential for equestrian traffic.
  - j. Requirement of open space remaining open to pedestrian and bicycle traffic.
  - k. Notice of pedestrian easements to abutting properties.
4. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

5. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.
6. A note shall be placed on all construction drawings stating:

NOTE:

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.

7. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada, when field conditions mandate construction other than that shown in the original drawing.
8. The final map shall designate faults, by distance and bearings, that have been active during the Holocene epoch of geological time and shall contain the following note to the satisfaction of the development review staff:

NOTE

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time. The faults have been located by Civil Engineer Registered in Nevada and experienced in Geotechnical Engineering and field surveyed by a Nevada Registered Land Surveyor.

9. A complete set of construction improvement drawings, including an on-site grading plan, shall be submitted to the Engineering Division for approval prior to finalization of any portion of the subdivision. Grading shall comply with best management practices and shall include detailed plans for grading and drainage on each lot, erosion control, slope stabilization, mosquito abatement. Placement or disposal of any excavated material shall be indicated on the grading plan.

10. All soil boring logs must be included as part of the construction drawings to the satisfaction of the County Engineer.
11. All new utilities shall be placed underground to the satisfaction of the County Engineer.
12. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
13. The Washoe County Planning Commission certificate on the final map shall be to the satisfaction of the County Engineer and the Department of Development Review.

#### TRAFFIC

14. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a

haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

Enforcement of the approved construction haul routes shall be the responsibility of the applicant and the County Engineer. Failure of construction vehicles to follow approved roads, will result in cessation of building permits and/or certificate-of-occupancies.

15. Prior to approval of the final development agreement, the developer shall provide a street maintenance program to the satisfaction of the County Engineer and the Department of Development Review. Street maintenance of private streets shall be performed by the homeowner's association and shall be perpetually funded.
16. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
17. The roadway structural sections for the proposed 80 foot public right-of-way shall have as a minimum 5 inches of asphalt on 8 inches of aggregate base. However, a final geotechnical report must be prepared prior to final map approval to determine if additional structural capacity above the minimum is required. On-site construction haul route traffic and school traffic is to be considered in the pavement analysis. The proposed on-site private road right-of-way widths are acceptable as shown for the tentative map of Phase 1. Public right-of-way will not be evaluated until the recommended transportation study is completed.
18. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
19. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum

four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

- B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
- F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 <sup>1</sup>/<sub>2</sub> foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
- G. Public - 100 ROW major arterial street (more than 10,830 ADT).

20. Medians shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer. Maintenance of median landscaping shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
21. Meandering asphalt paths are acceptable provided pedestrian easements are included in portions of the paths located outside the County right-of-way. Landscaping between the back of the curb and the paths shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer. Maintenance of median landscaping and pedestrian paths shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
22. Proposed roadways (public or private) are not to be centered along fault lines. Faultlines shall be located behind the curbline, on the up-thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback, excluding construction for buildings for human occupancy, may be reduced to the satisfaction of the County Engineer.
23. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded.
24. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement, to the satisfaction of the County Engineer.
25. Temporary County Standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street, to the satisfaction of the County Engineer.
26. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs serving ten or more lots to the satisfaction of the County Engineer. These roads shall have a 30-foot access easement with a minimum 20-foot width of 6 inches of Type 2 Class B aggregate base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer.
27. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. The emergency access road shall be constructed within a 30 foot access easement to a minimum 20 foot width with 4 inches of Type 2 Class B aggregate base.

28. Street lights shall be installed at major intersections to the satisfaction of the County Engineer.
29. Unless specifically stated in the final development agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided to the satisfaction of the County Engineer.
30. The minimum pavement structural section shall be 4 inches of asphalt over 6 inches of granular base for roadways (public and private) with a right-of-way of 60 feet in width and shall be 3 inches of asphalt over 6 inches of granular base for roadways with a right-of-way of 50 feet in width to the satisfaction of the County Engineer.
31. The applicant shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required.
32. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
33. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
34. Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

NOTE

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact

fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

35. Project streets that are designed with security gates at points intersecting shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
36. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.

#### DRAINAGE

37. Prior to recordation of any portion of the subdivision, a final, detailed hydrology/hydraulic report for that phase, prepared by a registered engineer, shall be submitted to the County Engineer for approval. The report shall include the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both the site and off-site areas and the methods for handling those flows. The report shall include all storm drain pipe and ditch sizing calculations and a discussion of and mitigation measures for any impacts on existing off-site drainage facilities and properties.
38. Prior to recordation of any final map, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.
39. The 100-year floodplain boundaries and flood elevations shall appear on each final map to the satisfaction of the County Engineer. If the floodplain boundary has been changed by a Federal Emergency Management Agency (FEMA) Conditional Letter of Map Amendment or Conditional Letter of Map Revision, the date of that letter and a note to that effect shall appear on the final map to the satisfaction of the County Engineer. Grading or building permits shall not be issued for areas currently shown as "A" zones on the FEMA floodplain maps until a Letter of Map Amendment or Revision is submitted

or until conformance with Washoe County flood construction standards is determined by the County Engineer.

40. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts to the satisfaction of the District Health Department and the County Engineer.
41. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.

#### WATER

42. Prior to the approval of a final map by the District Health Department, the production wells that will serve any phase of this development must be constructed, pump tested and sampled to ensure the proposed water system has sufficient quality and quantity.
43. Before approval of the final map will be considered; a letter from the water purveyor committing adequate water service to this proposal must be submitted District Health Department.
44. Prior to final map approval, a letter of approval for the water rights serving this proposal must be submitted from the Division of Water Resources. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource to the satisfaction of the Utility Division.
45. The developer shall provide adequate assurance that the sewage, water and drainage systems will be satisfactorily maintained and operated.
46. Pursuant to Section 278.340 of the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, no grading permit shall be issued prior to District Health Department approval of the referenced final map. This condition does not apply to the construction of production wells required in condition Number 48.

The applicant may seek relief from the District Board of Health for this requirement or may choose to create a separate parcel for the first 18-hole golf course.

47. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters.
48. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior issuance of any building permits.

49. A letter, which can be a will-serve letter, from the appropriate provider committing water service must be submitted to the District Health Department and Utility Division. This letter shall indicate that the facility will not be brought beyond its permitted capacity by this service.
50. The final map shall contain the following note to the satisfaction of the development review staff:

NOTE

No Certificate of Occupancy shall be issued until the water facilities have been completed and accepted by resolution of the Board of County Commissioners.

51. The developer shall provide access to the existing monitoring wells to the satisfaction of the Utility Division. In the event access is no longer available, the developer shall construct new wells to the satisfaction of the Utility Division.
52. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

WASTEWATER

53. Proper easements shall be shown for off-site sewage and drainage systems to the satisfaction of the Utility Division and the County Engineer.
54. The Nevada Division of Environmental Protection must submit a letter to the District Health Department certifying their approval of the final map.
55. All minor infrastructure for sewer collection shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division.
56. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.

57. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.
58. All hookup fees for the area within the final map will be paid to the satisfaction of the Utility Division.
59. The developer shall deposit with the Utility Division the sum of \$50.00 per lot prior to recordation of all or part of the final map. This fee shall represent the development's prorated share of the completed water and wastewater facilities plan for the south Truckee Meadows.
60. Prior to final map approval, a letter, which can be a will-serve letter, from the Utility Division committing sewer service, must be submitted to the District Health Department. This letter shall indicate that the treatment facility will not be brought beyond its permitted capacity by this service.
61. All minor infrastructure for potable water distribution shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infrastructure design can be accomplished prior to the approval of the final map.
62. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development.

#### GRADING

63. Prior to approval of the first final map, an erosion control/soil stabilization plan and grading plan shall be approved by the Washoe-Storey Conservation District. A copy of the approval shall be submitted to the District Health Department, Department of Development Review and Washoe County Engineer.

#### LANDSCAPING

64. Detailed landscaping and irrigation plans for the village commercial center, club house, golf courses, golf driving range and equestrian center shall be submitted prior to the issuance of a building permit for the particular use.

\* \* \* \* \*

SPECIAL USE PERMIT APPLICATION CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
4. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
5. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
6. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT):  
minimum 22 foot pavement width; curb and gutter or County Engi-

neer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

- B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
- F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 <sup>1</sup>/<sub>2</sub> foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.

G. Public - 100 ROW major arterial street (more than 10,830 ADT).

DRAINAGE

7. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.
8. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
9. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.
10. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.

\* \* \* \* \*

SPECIAL USE PERMIT CONSTRUCTION CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINT

GENERAL CONDITIONS

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of

compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.

3. A note shall be placed on all construction drawings stating:

NOTE

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.

4. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada, when field conditions mandate construction other than that shown in the original drawing.
5. The final map shall designate faults that have been active during the Holocene epoch of geological time and shall contain the following note to the satisfaction of the development review staff:

NOTE

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time.

6. All new utilities shall be placed underground to the satisfaction of the County Engineer.

TRAFFIC

7. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed

Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

Enforcement of the approved construction haul routes shall be the responsibility of the applicant and the County Engineer. Failure of construction vehicles to follow approved roads, will result in cessation of building permits and/or certificate-of-occupancies.

8. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
9. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.

#### DRAINAGE

10. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts to the satisfaction of the District Health Department and the County Engineer.

GRADING

11. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.

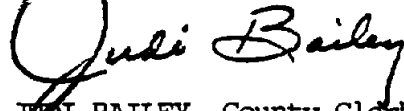

WATER

12. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

LANDSCAPING

13. Detailed landscaping and irrigation plans for the village commercial center, club house, golf courses, golf driving range and equestrian center shall be submitted prior to the issuance of a building permit for the particular use.

Very truly yours,

JUDI BAILEY, County Clerk  
and Clerk of the Board of  
Washoe County Commissioners

## BOARD OF COUNTY COMMISSIONERS, WASHOE COUNTY, NEVADA

TUESDAY

5:15 P.M.

FEBRUARY 8, 1994

PRESENT:

Dianne Cornwall, Chairman  
Jim Shaw, Vice Chairman  
Larry Beck, Commissioner  
Steve Bradhurst, Commissioner  
Gene McDowell, Commissioner

Judi Bailey, County Clerk  
John MacIntyre, County Manager  
Maureen Griswold, Legal Counsel

The Board met in regular session in the Commission Chambers of the Washoe County Administration Complex, 1001 E. Ninth Street, Reno, Nevada. Following the pledge of allegiance to the flag of our Country, the Clerk called the roll and the Board conducted the following business:

AGENDA

In accordance with the Open Meeting Law, on motion by Commissioner Beck, seconded by Commissioner McDowell, which motion duly carried, Chairman Cornwall ordered that the agenda for the February 8, 1994, meeting be approved.

MINUTES

On motion by Commissioner McDowell, seconded by Commissioner Beck, which motion duly carried, Chairman Cornwall ordered that the minutes of the regular meeting of January 11, 1994, be approved.

PUBLIC COMMENTS

The comments of the individuals who spoke, Frank Partlow regarding the Truckee Meadows Project and David Farside regarding the letter to Senator Reid, are included under the particular agenda items they were addressing.

94-63

AUTHORIZATION TO ADVERTISE FOR BIDS - BARTLEY RANCH  
INTERPRETIVE/MEETING CENTER BUILDING - PARKS/PUBLIC WORKS

Upon recommendation of Gene Sullivan, Parks and Recreation Director, on motion by Commissioner McDowell, seconded by Commissioner Beck, which motion duly carried, Chairman Cornwall ordered that the Public Works Department be authorized to advertise for bids for the Bartley Ranch Interpretive/Meeting Center building.

It was noted that the architect's estimate for construction is \$285,000 and that the funds will be expended out of Bond Account 90051-7878.

94-64 AWARD OF BID - SOUTH VALLEY REGIONAL SPORTS COMPLEX, PHASE I - PUBLIC WORKS/PARKS

This was the time set to consider award of bid, Notice to Contractors for receipt of sealed proposals having been published in the Reno Gazette-Journal on January 12 and 19, 1994, for construction of the South Valleys Regional Sports Complex, Phase I, (grading and utilities) on behalf of the Public Works Department. Proof was made that due and legal Notice had been given.

Following is a summary of the bids received:

Huntington Bros	\$251,278.00
WES Construction	349,883.00
Burdick Excavating	372,804.25
Bertagnolli & Assoc.	378,463.75
Interstate Utility Constructors	407,457.75
B & B Concrete Construction	429,800.00
Sierra Nevada Construction	437,473.00
Joy Engineering	446,515.00

Upon recommendation of Craig McConnell, Public Works Director, on motion by Commissioner McDowell, seconded by Commissioner Beck, which motion duly carried, it was ordered that the bid for construction of the South Valleys Regional Sports Complex, Phase I-Grading and Utilities, be awarded to the low bidder, Huntington Bros., in the amount of \$251,278.00 for the base bid and that Chairman Cornwall be authorized to execute the contractual documents on presentation.

94-65 SPECIAL USE PERMIT CASE NO. SPB12-37-92 - LOUIS DAMONTE/PIONEER HILLS MINI STORAGE - AGREEMENT

Upon recommendation of the Department of Development Review staff, on motion by Commissioner Beck, seconded by Commissioner Bradhurst, which motion duly carried, it was ordered that an agreement between the County and Louis G. Damonte, Cynthia Damonte and Benjamin J. Damonte, Jr., regarding fulfillment of a condition of approval of Special Use Permit Case No. SPB12-37-92 concerning the limitations placed on the retention and addition of billboards on property located at 13199 South Virginia Street, Reno, Nevada, be approved and Chairman Cornwall be authorized to execute.

94-66 AGREEMENT - NEVADA OCCUPATION HEALTH PLAN - WORKER'S COMPENSATION PROGRAM - RISK MANAGEMENT

Upon recommendation of Ray Sibley, Risk Manager, on motion by Commissioner Beck, seconded by Commissioner Bradhurst, which motion duly carried, it was ordered that an agreement between Washoe County and Nevada Occupation Health Plan concerning managed care services for the County's

Workers' Compensation Program be approved and that the Risk Manager be authorized to execute the agreement on behalf of Washoe County.

It was noted that the cost of the program will be approximately \$25,500 per year based on the County's claims experience and that this is a five-year contract with the fee being negotiated annually. It was also noted that the selection process was done in conjunction with the Washoe County School District, the City of Reno, and the City of Sparks, which not only saved staff time and resources for all the entities, but also resulted in achieving a better price for the services.

94-67      PURCHASE AND SALE AGREEMENT - ROBERT G. JONES - TRUCKEE RIVER PROPERTY - PARKS

Upon recommendation of Gene Sullivan, Director, Parks and Recreation, on motion by Commissioner Beck, seconded by Commissioner Bradhurst, which motion duly carried, it was ordered that the Agreement of Purchase and Sale between Washoe County and Robert G. Jones concerning a 6.5-acre parcel of Truckee River property be approved contingent upon the approval of other funding sources, i.e., grants from Land and Water Conservation Funds (L.W.C.F.), the City of Reno, and the Nevada Department of Wildlife. It was further ordered that Chairman Cornwall be authorized to execute the agreement; and that the expenditure of \$210,000 in Park Construction Tax funds be authorized.

94-68      AUTHORIZATION FOR PARKS DEPT. TO PREPARE AGREEMENT - ACQUISITION OF CAMP WE-CHE-ME - CAMPFIRE BOYS AND GIRLS, INC.

Pursuant to discussion at Caucus, County Manager John MacIntyre stated that Children's Cabinet has expressed an interest in participating with the County in this program; and that there may be an opportunity for a partnership between the County and Children's Cabinet with respect to the Campfire Boys and Girls facility, Camp We-Che-Me, located within Galena Creek Park.

Sheila Leslie, Children's Cabinet, stated that they feel this is an ideal public-private partnership; that they would like to see the facility preserved for the use of Washoe County; and that they are eager to work with the County on this project. Warren Goddard, representing the Campfire Boys and Girls, Inc., urged the Board to proceed and stated that their organization will help in any way they can.

Upon recommendation of Gene Sullivan, Parks and Recreation Director, on motion by Commissioner McDowell, seconded by Commissioner Bradhurst, which motion duly carried, Chairman Cornwall ordered that the Parks Department be authorized to prepare an agreement, for subsequent Board approval, for the acquisition of 40 acres known as Camp We-Che-Me owned by Campfire Boys and Girls, Inc., and located within Galena Creek Park for \$150,000; that the Parks Department be authorized to begin the Notice and Sale process to sell the 101 acres east of the Mt. Rose Highway as indicated in the Galena Creek Master Plan to finance the acquisition and initial renovation of the Campfire Camp; and that negotiations be commenced with Children's Cabinet for joint participation in this project.

94-69

DEED OF DEDICATION - PORTION OF EIGHTH AVENUE, SUN VALLEY - JOSEPH E. AND JOSEPH L. IVESON (PORTION OF APN 085-431-19)

Upon recommendation of James Gale, Senior Property Agent, through Craig McConnell, Public Works Director, on motion by Commissioner Bradhurst, seconded by Commissioner Shaw, which motion duly carried, it was ordered that a Deed of Dedication from Joseph E. and Joseph L. Iveson, offering for dedication a portion of Eighth Avenue in Sun Valley, be approved and Chairman Cornwall be authorized to execute on behalf of Washoe County.

94-70

RIGHT-OF-WAY APPLICATION - BUREAU OF LAND MANAGEMENT - GERLACH TRANSFER STATION

Upon recommendation of Robert Mays, Road Superintendent, through Craig McConnell, Public Works Director, on motion by Commissioner Bradhurst, seconded by Commissioner Shaw, which motion duly carried, it was ordered that an application requesting a right-of-way grant from the Bureau of Land Management for a roadway easement for the Gerlach Transfer Station be approved and Chairman Cornwall be authorized to execute.

94-71

TRAVEL

On motion by Commissioner McDowell, seconded by Commissioner Beck, which motion duly carried, Chairman Cornwall ordered that the following travel requests and advancement of travel funds be approved:

<u>Name</u>	<u>Department</u>	<u>Destination</u>	<u>Date</u>	<u>Amount</u>
R. Snyder	Sheriff	Santa Clara, CA	4/06/94 4/10/94	\$ 60.50
H. Tapia	Juvenile Probation	Chicago, IL	2/18/94 2/22/94	209.00
R. Walker	Juvenile Probation	Chicago, IL	2/18/94 2/22/94	209.00

94-72

APPROVAL OF RECRUITMENT TRAVEL - LAW LIBRARY

Upon recommendation of Brian Mirch, Finance Division, on motion by Commissioner McDowell, seconded by Commissioner Beck, which motion duly carried, Chairman Cornwall ordered that the Law Library be given approval to use present appropriations to fund employee recruitment travel for an upcoming vacant position.

94-73

CORRECTION OF FACTUAL ERRORS ON TAX BILLS ALREADY MAILED - 1993 SECURED ROLL AND 1993/94 UNSECURED ROLL

Upon recommendation of Jean Tacchino, Assistant Chief Deputy Assessor, on motion by Commissioner McDowell, seconded by Commissioner Bradhurst, which motion duly carried, Chairman Cornwall ordered that Roll Change Requests (RCR) Nos. 445 through 447, correcting factual errors on

tax bills already mailed for the 1993 Secured Roll and 1993/94 Unsecured Roll be approved for the reasons indicated on the RCR form and mailed to the property owners, a copy of which is on file in the Clerk's office.

94-74      RESOLUTION - NOTICE OF INTENTION TO SELL TAX DELINQUENT LANDS -  
TREASURER

Upon recommendation James Gale, Senior Property Agent, through Craig McConnell, Public Works Director, on motion by Commissioner McDowell, seconded by Commissioner Bradhurst, which motion duly carried, it was ordered that the following Resolution, directing the Washoe County Treasurer to give notice of intention to sell to the Airport Authority of Washoe County the tax delinquent parcel, APN 089-110-25, be adopted and that Chairman Cornwall be authorized to execute on behalf of Washoe County:

RESOLUTION      Of the Board of County Commissioners of the County of Washoe, Nevada, pertaining to disposition of a tax delinquent parcel of real property.

WHEREAS, pursuant to NRS 361.603, local governments are permitted to acquire tax delinquent properties held in trust by the Treasurer of their county by virtue of a deed made pursuant to the provisions of Chapter 361 of NRS; and

WHEREAS, the property described herein, being tax delinquent, is held in trust by the Washoe County Treasurer, by virtue of deed made pursuant to Chapter 361 of NRS; and

WHEREAS, the Board of County Commissioners of Washoe County hereby determines that the public interest will best be served by the sale of this property to a governmental unit.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF WASHOE COUNTY as follows:

1. The Washoe County Treasurer is hereby directed to give notice of intention to sell tax delinquent property described as APN 089-110-25 to the last known owner or owners of said property, or their heirs or devisees, in the manner provided by law.

2. If the owner or owners of APN 089-110-25 or their heirs or devisees, fail to redeem the property within the time allowed by law, the Washoe County Treasurer shall transfer ownership of said property to the Airport Authority of Washoe County in a manner prescribed by law.

94-75      REAPPOINTMENTS - SOCIAL SERVICES ADVISORY BOARD

Upon recommendation of May Shelton, Director, Social Services Department, on motion by Commissioner Bradhurst, seconded by Commissioner Beck, which motion duly carried, Chairman Cornwall ordered that the reappointments of Irma Cristina Bjerre, Phyllis Kaiser and Ron Sousa to the Social Services Advisory Board for two-year terms expiring February 25,

1996, be ratified. It was noted that this action supersedes the action taken by the Board on January 18, 1994, Item No. 94-48.

94-76 APPOINTMENTS - MT. ROSE/GEIGER GRADE CITIZEN ADVISORY BOARD

On motion by Chairman Cornwall, seconded by Commissioner Beck, which motion duly carried, it was ordered that F. Dwight Blevins be appointed to fill the Steamboat position on the Mt. Rose/Geiger Grade Citizen Advisory Board with a term expiring June 30, 1995. It was further ordered that Howard Dodge be appointed as alternate for the Toll Road position and Milus Scruggs be appointed as alternate for the Hidden Valley Homeowners position.

94-77 RESOLUTION AND APPOINTMENTS - SOUTHWEST TRUCKEE MEADOWS CITIZEN ADVISORY BOARD

On motion by Chairman Cornwall, seconded by Commissioner Beck, which motion duly carried, it was ordered that the following Resolution, changing the structure of the Southwest Truckee Meadows Citizen Advisory Board, be adopted and duly executed:

R E S O L U T I O N

WHEREAS, the Southwest Truckee Meadows Citizen Advisory Board has requested the positions for the Del Monte, Dryden, Mt. Rose Highway and Thomas Creek areas be changed to At-Large positions; and

WHEREAS, the Advisory Board will now consist of nine members, one each for the Lakeside/Holcomb, Mt. Rose Seat, South Hills, Windy Hill/Frost Ranch and Zolezzi/Spring Valley/Westridge areas and four At-Large; now, therefore, be it

RESOLVED, BY THE BOARD OF COMMISSIONERS OF WASHOE COUNTY, NEVADA, that the Southwest Truckee Meadows Citizen Advisory Board shall be structured as described above.

\* \* \* \* \*

It was further ordered that Stephen Topogna and Teri Seher be appointed to the Southwest Truckee Meadows Citizen Advisory Board as At-Large representatives with terms expiring June 30, 1995.

94-78 REFUND OF APPLICATION FEE - THOMAS AND LILLIAN LUGASKI - SPECIAL USE PERMIT CASE NO. SPB9-24-93 & VARIANCE CASE NO. V9-48-93

Upon recommendation of Development Review staff, on motion by Commissioner McDowell, seconded by Commissioner Beck, which motion duly carried, Chairman Cornwall ordered that a \$200 refund be granted to Thomas and Lillian Lugaski, representing one-half of the application fees paid by them for a Special Use Permit (SPB9-24-93) and a Variance (V9-48-93) that were subsequently withdrawn.

PYRAMID RANCH ESTATES SUBDIVISION UNIT 5C (5 LOTS) - RESOLUTION FOR ACCEPTING STREETS - RELEASE OF FINANCIAL GUARANTEE

Upon recommendation of David Price, County Engineer, through Craig McConnell, Public Works Director, on motion by Commissioner Beck, seconded by Commissioner Bradhurst, which motion duly carried, it was ordered that the following Resolution be adopted and Chairman Cornwall be authorized to execute on behalf of Washoe County:

RESOLUTION FOR ACCEPTING STREETS

PYRAMID RANCH ESTATES, UNIT 5C SUBDIVISION, TRACT MAP NO. 2939, DOCUMENT NO. 1678053, RECORDED MAY 28, 1993.

WHEREAS, it is a function of the County of Washoe to operate and maintain public roads; and

WHEREAS, certain streets, or portions thereof, were offered for dedication by Tract Map No. 2939, Document No. 1678053, recorded on May 28, 1993; and

WHEREAS, said offer of dedication was rejected by the Board of County Commissioners because said roads were not improved to County standards; and

WHEREAS, NRS 278.390 specifically provides that if at the time a final map is approved but the associated streets are rejected, the offer of dedication shall be deemed to remain open and the governing body may, by resolution at any later date and without further action by the subdivider, rescind its action and accept and open the streets for public use; and

WHEREAS, portions of said streets have recently been constructed and now meet current County standards; and

WHEREAS, said streets are necessary for public access; and

WHEREAS, the Board of Washoe County Commissioners find that it is in the best interest of the public to accept said streets.

NOW, THEREFORE, BE IT RESOLVED by the County Commissioners of the County of Washoe, pursuant to the authority of NRS 278.390, that the streets shown on Tract Map No. 2939 are hereby accepted and the Department of Public Works is directed to open the roads for public use and maintenance.

BE IT FURTHER RESOLVED and hereby ordered that the Clerk of Washoe County shall record this Resolution in the Office of the Washoe County Recorder.

\* \* \* \* \*

It was further ordered that Comstock Bank's Letter of Credit No. 0590, in the amount of \$71,400, be released. It was noted that approxi-

mately .06 mile will be added to the County system by this action and that the project is located west of the Pyramid Lake Highway and adjacent to Egyptian Drive.

94-80 WATER RIGHTS APPLICATIONS - RED ROCK BASIN - DONALD J. LEVERETT AND DAN WILLIAMS

Pursuant to a question at Caucus regarding the amount of unappropriated water in the Red Rock Basin, County Manager John MacIntyre advised that he believes the figure developed by John Collins, Chief Sanitary Engineer, is 102 acre-feet.

Upon recommendation of John Collins, Chief Sanitary Engineer, through Craig McConnell, Public Works Director, on motion by Commissioner Bradhurst, seconded by Commissioner McDowell, which motion duly carried, it was ordered that a Letter of Subordination of Washoe County's position under application 50193 be approved; that Chairman Cornwall be authorized to sign the letter; and that the Chief Sanitary Engineer be directed to send the letter to the State Engineer.

94-81 APPROPRIATION TRANSFERS - FINANCE DIVISION

Upon recommendation of Jerry McKnight, Budget Coordinator, on motion by Commissioner Bradhurst, seconded by Commissioner Beck, which motion duly carried, Chairman Cornwall ordered that the following transfers of appropriations be approved:

<u>DECREASE</u>		<u>INCREASE</u>	
<u>Account</u>	<u>Amount</u>	<u>Account</u>	<u>Amount</u>
001-1253-7181	\$20,000	001-1081-7001	\$37,800
001-1061-7181	22,800	001-1253-7105	5,000
019-1953-7497	<u>36,000</u>	019-1952-7497	<u>36,000</u>
	\$78,800		\$78,800

94-82 ACCEPTANCE OF DONATION - NEVADA YOUTH FOUNDATION - JUVENILE PROBATION

Upon recommendation of Brian Mirch, Finance Division, on motion by Commissioner Bradhurst, seconded by Commissioner Beck, which motion duly carried, Chairman Cornwall ordered that a donation from the Nevada Youth Foundation in the amount of \$60,000 be gratefully accepted and that the Comptroller be directed to make the following account entries:

<u>Increase</u>		<u>Increase</u>	
<u>Account</u>	<u>Amount</u>	<u>Account</u>	<u>Amount</u>
001-12721G-5802	\$60,000	001-12721G-7002	\$17,000
		-7103	25,000
		-7213	8,000
		-7266	4,500
		-7279	<u>5,500</u>
	<u>\$60,000</u>		\$60,000

94-83

AUTHORIZATION TO REIMBURSE CONTRACT PHYSICIAN FOR COUNTY  
RELATED TRAVEL - HEALTH DEPARTMENT

Chairman Cornwall abstained from discussion and voting on this item. Upon recommendation of Dave Rice, District Health Officer, on motion by Commissioner Bradhurst, seconded by Commissioner Beck, which motion duly carried, it was ordered that Stephen Zell, M.D., contract physician for the District Health Department, be reimbursed \$697.60 for travel costs while attending the "Clinical Care of the AIDS Patient" conference at the University of California, San Francisco, on December 12, through 15, 1993.

94-84

NEW COURTS COMPLEX PROJECT PHASE I - FINANCING PLAN - "1994  
SHORT-TERM BONDS GOBC REQUEST AND PUBLIC HEARING" RESOLUTION

Upon recommendation of Jerry McKnight, Budget Coordinator, on motion by Commissioner Beck, seconded by Commissioner Shaw, which motion duly carried, it was ordered that Finance Division staff, in conjunction with the County's financial consultants and bond counsel, be authorized to prepare the necessary documents to accomplish a partial refunding of the 1992 Capital Facilities Tax supported bonds and issue a 1994 Capital Facilities Tax Bond in an amount not to exceed \$7,000,000; and that the following resolution, calling for the General Obligation Bond Commission (GOBC) to convene to consider the proposed short-term financing bond issue and noticing the public hearing, be adopted and Chairman Cornwall be authorized to execute on behalf of Washoe County:

RESOLUTION

A RESOLUTION CONCERNING SHORT-TERM FINANCING; DIRECTING THE COUNTY CLERK TO NOTIFY THE WASHOE COUNTY GENERAL OBLIGATION BOND COMMISSION OF THE COUNTY'S PROPOSAL TO ISSUE GENERAL OBLIGATION SHORT-TERM BONDS; DIRECTING THE PUBLICATION OF A NOTICE OF INTENTION TO AUTHORIZE SHORT-TERM FINANCING UNDER CHAPTER 354 OF NEVADA REVISED STATUTES; PROVIDING CERTAIN DETAILS IN CONNECTION THEREWITH; AND PROVIDING THE EFFECTIVE DATE HEREOF.

WHEREAS, the Board of County Commissioners of Washoe County, Nevada, (the "Board," "County," and "State," respectively) proposes to issue short-term bonds of the County under Chapters 350 and 354 of Nevada Revised Statutes ("NRS"), bearing interest at a rate or rates which do not exceed by more than 3% the "Index of Twenty Bonds" most recently published in The Bond Buyer before bids are received for such short-term financing or a negotiated offer is accepted, and maturing within 10 years of the date of issuance thereof, in order to pay all or a portion of the cost of acquiring, constructing, improving and equipping public buildings within the County, including, but not limited to, courthouse facilities, and refunding certain of the County's outstanding General Obligation (Limited Tax) Various Purpose Bonds, Series March 1, 1992A (the "Project"); and

WHEREAS, the Board has determined and hereby determines that legally available funds of the County will at least equal the amount required in each year for the payment of interest and principal on such short-term bonds; and

WHEREAS, the County pursuant to § 350.005 (subject to the approval of the proposal to issue general obligation short-term bonds by the Washoe County General Obligation Bond Commission) and § 354.618, proposes to publish a notice of its intention to act upon a resolution authorizing short-term financing to issue the short-term bonds; and

WHEREAS, the Board proposes to incur this general obligation short-term bonds after adoption of an authorization resolution at a public hearing held at least 10 days after publication of a notice of its intent to act, and upon approval of the Washoe County General Obligation Bond Commission and the Executive Director of the State Department of Taxation of the following proposal:

GENERAL OBLIGATION (LIMITED TAX) SHORT-TERM BONDS  
PROPOSAL:

Shall the Board of County Commissioners (the "Board") be authorized to issue negotiable general obligation (Limited tax) short-term bonds in one series or more, in an aggregate principal amount of not exceeding \$7,000,000 to defray wholly or in part the cost of acquiring, constructing, improving and equipping public buildings within the County, including, but not limited to, courthouse facilities, and refunding certain of the County's outstanding General Obligation (Limited Tax) Various Purpose Bonds, Series March 1, 1992A, such bonds to mature not later than ten (10) years from the date of issuance of the bonds, to be payable from general (ad valorem) taxes (except to the extent other revenues are available therefor), and to be issued and sold at, above, or below par at an effective interest rate (including any sale discount) not exceeding the statutory maximum rate, as shall be determined at the time of the sale thereof, and otherwise to be issued in such manner, upon such terms and conditions, with such covenants and agreements, and with such detail as the Board may determine, including at its option but not necessarily limited to provisions for the redemption of bonds prior to maturity without or with the payment of a premium?

(the "Proposal"); and

WHEREAS, subsection 1 of NRS § 350.004 provides, in relevant part, as follows:

"1. Before any proposal to issue general obligations or levy a special elective tax may be submitted to the electors of a municipality, or before any other formal action may be taken preliminary to the issuance of any general obligations, the proposed issuance or levy must receive the favorable vote of two-thirds of the members of the general obligation bond commission of the county in which it is situated . . . . "

and

WHEREAS, subsection 1 of NRS § 350.005 provides, in relevant part, as follows:

"1. The governing body of the municipality proposing to issue general obligations, enter into short-term financing . . . shall notify the secretary of each appropriate commission, and shall submit a statement of its proposal in sufficient number of copies for each member of the commission . . . . "

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF WASHOE COUNTY, NEVADA:

Section 1. All action, proceedings, matters and things heretofore taken, had and done by the Board, and the officers thereof (not inconsistent with the provisions of this resolution) directed toward the issuance of the general obligation short-term bonds, be and the same hereby are ratified, approved and confirmed.

Section 2. The County Clerk be, and she hereby is, authorized and directed to notify immediately the Secretary of the Washoe County General Obligation Bond Commission of the Board's notice of and submission of a statement of the County's Proposal to issue general obligation short-term bonds, and to submit to said Secretary a certified copy of this resolution.

Section 3. The Clerk, upon approval of the Washoe County General Obligation Bond Commission of the County's Proposal, is hereby directed to publish a notice of intention to authorize short-term bonds in the appropriate form one time in the Reno Gazette-Journal, a newspaper of general circulation in the County, at least 10 days prior to the date designated for a hearing thereon.

Section 4. The Board shall meet on the date, at the time and in the place designated in such notice to conduct the hearing therein mentioned.

Section 5. All resolutions, or parts thereof, in conflict with the provisions of this resolution, are hereby repealed to the extent only of such inconsistency. This repealer shall not be construed to revive any resolution, or part thereof, heretofore repealed.

Section 6. If any section, paragraph, clause or other provisions of this resolution shall for any reason be held to be invalid or unenforceable, the invalidity or unenforceability of such section, paragraph, clause or other provision shall not affect any of the remaining provisions of this resolution.

Section 7. Except for Section 3 of this resolution which shall be effective upon approval of the Proposal by the Washoe County General Obligation Bond Commission, this resolution shall become effective and be in force immediately upon its adoption.

94-85 NEW COURTS COMPLEX PROJECT - PHASE I - AUTHORIZATION FOR OPTION V

Craig McConnell, Public Works Director, reviewed the history of the Washoe County Courts Complex, Phase I, stating that this has been ongoing for over four and a half years with many individuals involved; that any further delays in the project will cause major scheduling impacts and cost increases; and that the project is now at a critical decision making step. He stated that staff does believe that the needs of the users and scope of the project have been identified and that the Board has demonstrated its willingness to provide the additional resources necessary to meet those needs.

Mr. McConnell further stated that as the Board directed, staff investigated the feasibility of purchasing and renovating the U.S. Bank building at 200 South Virginia Street to convert it to a courts complex and concluded that that would not be cost effective or time responsive, which is outlined in detail in his memorandum of February 1, 1994. He stated that staff feels very strongly that renovation of another facility would be more costly than constructing the new building; that subject building is not compatible with the operation and business of courts; that the County has already invested \$7,000,000 in the other site; and that staff stands very strong on the recommendation to proceed with Option V as the most cost effective.

In response to questions of the Board, Mr. McConnell stated that renovating the bank building would probably take one additional year over constructing the new building; that earlier in the process, remodeling other buildings was considered; and that it was learned that trying to make an office building into a courthouse was very difficult.

Jim Spoo, speaking on behalf of Bill Thornton, Chairman of the Citizen Advisory Board to the Reno Redevelopment Agency, stated that there could be savings with the U.S. Bank building, but the County would not end up with the same kind of product; that there is a possible revenue source from the two extra floors; and that the issue is finding the best product for the best price. He disputed Mr. McConnell's figures citing figures developed by an architect they engaged, but did agree that the parking would be a problem and the time loss would be significant. He suggested that the Board take a little more time to review this possibility due to the potential for cost savings and revenue for the County.

Scott Jordan, Family Court Judge, speaking on behalf of the users of the new facility, urged the Board to proceed with building Option V of the new complex.

Commissioner Beck stated that extensive time and effort was spent on analyzing other buildings when the project was first started; and that none of those proved less costly than constructing a new building. He then moved that all the recommendations in Mr. McConnell's memorandum dated February 1, 1994, be approved.

Commissioner Bradhurst stated that he concurs that the County should proceed with staff's recommendation for the new facility, but stated that he disagrees with the recommendation to retain the project manager at the additional cost of \$120,000. He further stated that he believes the County should internalize the project manager function at a much lower cost. Chairman Cornwall pointed out that the recommendation to retain the project manager is through bid and award and then the scope of project manager services is to be reviewed, and that she is planning on scheduling meetings with staff and the building community to address this very issue. Mr. McConnell stated that due to the redesign to a 3-story building, it is very important to continue with the project manager until the construction bid is awarded. Commissioner Shaw also expressed concern regarding the costs of project management.

The motion was seconded by Commissioner McDowell. Commissioner Bradhurst asked if the recommendations could be voted on separately stating that he does support the first four recommendations, but not the retention of project management. Commissioner Beck was unwilling to amend his motion. Upon call for the vote, the motion carried with Commissioners Cornwall, Beck, and McDowell voting "yes" and Commissioners Bradhurst and Shaw voting "no," and Chairman Cornwall ordered that:

1. U.S. Bank Building, 200 South Virginia Street, be removed from further consideration for acquisition as an alternative to construction of the new Courts Building on the Sierra Street/Island Avenue site;

2. The Finance Division be authorized to obtain financing to implement Option V, bringing back associated items to the Board for approvals as necessary (SEE previous item No. 94-84);

3. Staff be directed to implement Option V via two separate, complete design/bid packages for: a) building shell plus core (structure and major systems), and b) interior tenant improvements (layouts for revised Option V occupancies);

4. Staff be authorized to direct ArcForm Group, Project Architect, to produce a complete design/bid package for the Option V building shell plus core at a cost not to exceed \$160,367; to negotiate the additional cost of producing the second complete design/bid package for interior tenant improvements; and prepare the corresponding amendment(s) to our "Agreement for Architectural Services," for Board approval;

5a. Retention of the Project Manager (PM), Lehrer McGovern Bovis, Inc., be authorized through the Bid and Award Phase for the shell plus core design/bid package, to be completed in May 1994, according to the current, updated project schedule, at an estimated cost of \$120,000, which includes the \$30,000 authorized by the Board on January 18, 1994, (SEE Item No. 94-38), and preparation of the associated amendment to the "Agreement for Project Management Services," for Board approval; and

5b. Staff be directed to review the scope and costs of continuing PM services beyond May 1994 for the remainder of the Bid and Award Phase for the interior tenant improvements design/bid package, and the subsequent new building Construction Phase (June 1994 through September 1995), and prepare a recommendation relative to continuation of PM services for said period.

94-86      DEVELOPMENT AGREEMENT CASE NO. DA9-1-93 - DINGMAN INVESTMENTS  
SOUTHWEST POINTE (APN: 49-010-04, 49-010-10 AND 41-030-12

6:00 p.m. This was the time set in a Notice of Hearing published in the Reno Gazette-Journal on January 27, 1994, to consider Development Agreement Case No. DA9-1-93, a request by Dingman Investments to develop a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center and a commercial village center. The total acreage of the project is ±3,171.6 acres. The project entrance is proposed west of the intersection of Zolezzi Lane and Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR), is located in the Southwest Truckee Meadows Planning Area, and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. Proof was made that due and legal notice had been given.

Jeff Murphree, Planner, Department of Development Review, described the proposed project and stated that the purpose of a Development Agreement is to provide a mechanism for comprehensive review of a large scale development, to insure that adequate public facilities and services are provided consistent with the development, and to provide assurances that the master plan will not be changed during the course of the agreement, which in this case is 15 years. He explained the process stating that, if approved by this Board tonight, this preliminary development agreement, which is basically a conceptual plan, will be sent to the Regional Planning Commission as a project of regional significance for their review; that the applicant will then have six months to meet the conditions of approval; that it will then come back to staff for review; and that when all conditions have been met, staff will then bring the final development agreement to the Board of County Commissioners for final approval.

Mr. Murphree also reviewed the history of the subject agreement at the Planning Commission level and stated that the major outstanding issue is the traffic impacts that will be created by this development. He

stated that the primary access for this development will be via White's Creek Lane with Zolezzi Lane serving as a gated, emergency access only; that staff was concerned about the project not having two resident accesses; and that the Planning Commission felt that White's Creek Lane as proposed by the developer will meet the needs. Mr. Murphree stated that the residents in Field Creek who will be adjacent to White's Creek Lane are very concerned about this, although White's Creek Lane first appeared as a major street in the 1984 master plan; that there were some changes when the area plan was adopted in 1989; and that when Field Creek Ranch Subdivision was approved, prior to the 1989 area plan, the developer was required to dedicate a 100-foot wide corridor for a future street--White's Creek Lane. In response to Commissioner Beck, Mr. Murphree stated that White's Creek Lane will be constructed as a 4-lane road from Thomas Creek Road west into the subject property only; that from Thomas Creek Road east to Wedge Parkway it will be constructed as a 2-lane minor arterial; and that when warranted in the future, that portion will be widened to 4 lanes also, but that won't be for many years as it will not be necessary until complete buildout of all the projects in the area.

Mr. Murphree stated that the other major issue at the Planning Commission was the flood detention facilities, which has been resolved through negotiations. He then answered specific questions of the Board.

Brita Tryggvi, CFA, Inc., representing applicant, stated that the proposed development is consistent with the Southwest Truckee Meadows Area Plan for both density and the proposed roadway system; and that they propose to cluster all of the development in the center of the project thereby creating wide open space buffers, retaining the existing vegetation, and preserving the muledeer habitat. Using maps, she located wide buffers between this project and the surrounding developments, showing that approximately 1500 acres, 48 percent of the site, will be open space, which will eventually be dedicated to a public entity or a nonprofit organization such as the Washoe Parks Foundation. Ms. Tryggvi also explained how they are planning different, distinct neighborhoods separated by golf courses and common open space, some with 12,000 square foot lots, some with half-acre lots, and some with one acre lots, the two 18-hole golf courses, one of which will be constructed in the first phase, the commercial center, and the recreational facilities they are planning.

Ms. Tryggvi then discussed the developer's proposal for constructing White's Creek Lane and stated that their idea is to create a special assessment district involving all the developers who will benefit and that that would get this entire road constructed much sooner than originally proposed, which will relieve the traffic problems in Thomas Creek Estates and on Zolezzi Lane. She stated that there are some residents in Field Creek who are going to be impacted by White's Creek Lane, cited alternatives roads that have been proposed and considered, and explained the problems with each of them. Ms. Tryggvi then described the mitigation measures that can be taken to minimize the impacts to those Field Creek residents and stated that they will work with those homeowners to come up with the best possible solutions. Ms. Tryggvi then answered questions from the Board.

Chairman Cornwall opened the public hearing and called on those wishing to speak regarding the proposed project.

The following area residents spoke in support of the project and overwhelmingly supported the construction of White's Creek Lane, some of them stating that they feel it should be constructed as soon as possible to relieve traffic in their neighborhoods: Cory Kristie, Cathy Bush, Elaine Walker, Jim Lucas, Robert Archie, Randy Jackson, Robert Duvall, Wendy Foyer, Thomas Bower, Beverly Sindlinger, and Patty Beers. Ms. Walker also submitted a petition signed by many of her neighbors in support of the project; and a letter of support from Mr. Walker was placed on file with the Clerk, along with the petition.

The following residents of the Field Creek Subdivision spoke in opposition to the project and the construction of White's Creek Lane, citing how they will be adversely impacted, such as the road being too close to their homes creating noise and danger, their views being obstructed, and their property values being affected: John Gulick, Pat and Doug Powell, Bruno Menicucci, Thomas Shrake, Wayne Avery, Randy Moore, Brad Swenson, Robert Young, Lee Parker, and John Zidich. Mr. Shrake submitted a petition signed by his neighbors supporting accessing this project from the Mt. Rose Highway, which was placed on file with the Clerk.

Pat and Doug Powell, 13440 Field Creek, also explained that Mr. Powell had gone to the County Planning offices before purchasing their property trying to learn what was planned for the area and no one told them about a 4-lane road going in their backyard. Randy Moore, 13560 Field Creek also stated that he went to the County offices to view the subdivision plans, which did not even show the easement through the area.

Buck Metcalf, Washoe County Planning Commission; Bruce Arkell, formerly with the Nevada Department of Transportation; and Greg Krause, Regional Transportation Commission; each discussed the complexities involved in developing the master plan, including the transportation element therein, and urged the Commission to follow the master plan and not to change the proposed construction of White's Creek Lane.

Keith Kellison, Chairman, Southwest Truckee Meadows Citizens Advisory Board, stated that Southwest Pointe is a quality project that will benefit the entire area; that no one spoke against the project at the numerous meetings they held regarding the project; and that on behalf of the CAB he is requesting that the Board approve the project. Nick Stosic, CAB member, stated that he was also on the CAB when the master plan was adopted and urged the Board to follow the plan and approve the project as it is in conformance with the plan. Steven Walther, former CAB member stated that a line has been drawn indicating this road since February, 1983; that the plan is fragile and should be carefully followed, which this project does; and that he believes that the deer herd and wildlife habitat will be protected by all the open space that is planned.

Dick Heikka, Chief of the Galena Volunteer Fire Department, answered some of the questions that had been raised regarding emergency

access and fire protection, stating that their response time would be good, and described the numerous pieces of equipment that the Department currently has, assuring the Board that there would be adequate fire protection. He also stated that the open space planned in this project will protect the wildlife habitat and the resident muledeer in the area; and that with all the development in the area, White's Creek Lane will have to be built someday just on the basis of good planning.

Sandra Wilson, 13350 Fieldcreek, stated that the construction vehicles should use the Mt. Rose Highway; and that when White's Creek Lane is constructed, it should include walking paths and bike lanes so that it will be conducive to the rural life of the area.

Chris Spandow stated that he does not live in the project area, but does use the streets there and urged the Board to maintain the integrity of the area plan and allocate the traffic fairly to all streets.

Nancy Maddox, 4045 LaMay Lane, stated that her concern is the water; that she lives on the north end of the project; and that she and her neighbors are all on private wells and are concerned that their wells will be impacted.

There being no one else wishing to speak, Chairman Cornwall closed the public hearing. She then asked Mr. Murphree to clarify the issues of construction traffic and the approximate time when White's Creek Lane will be constructed.

Mr. Murphree stated that construction traffic will initially use Zolezzi Lane during construction of the golf course, but that that will not be in and out traffic; and that when the first building permit is issued, the construction traffic will use Mt. Rose to Thomas Creek to White's Creek. He further stated that they had planned to require construction of White's Creek Lane by the 85th residential permit, but the applicant desires to do it before that time.

Ms. Tryggvi stated that the developer has no objection to moving it up to the 35th building permit as someone suggested since they hope to construct White's Creek Lane much sooner through the special assessment district. Ms. Tryggvi and the Board then discussed, at length, possible mitigation measures that can be taken to alleviate the impacts on those residents living on Field Creek Lane, such as placing the lanes as far to the south as possible, lowering the road, fencing and installing sound walls. Ms. Tryggvi stated that they will work with those homeowners, even meeting with them individually if necessary, to come up with acceptable solutions to minimize the impacts on them.

In regard to the concern expressed concerning water, Commissioner Bradhurst asked if there has been an analysis of whether this project might impact private wells. Ms. Tryggvi stated that they have not yet done that but are working with the Utility Division to determine this.

Commissioner McDowell asked if the Board is going to add or change any conditions. Mike Harper, Director of Development Review, reminded the Board that this is a Preliminary Development Agreement; that if

the Commission modifies the agreement, the changes must go back through the Planning Commission process; and that the Board's input would certainly be taken into consideration when preparing the Final Development Agreement for the Board's approval.

Commissioner Bradhurst then asked questions about the open space dedication and the trails system, which were answered by Gene Sullivan, Parks and Recreation Director.

Chairman Cornwall stated that she definitely wants the residents on Field Creek Lane who will be impacted by the construction of White's Creek Lane to be involved in the design process regarding the mitigation measures used to alleviate those problems; that she does want the condition regarding construction traffic clarified to include how that issue will be enforced; and that she does not believe the residents in this area want street lights in the neighborhood.

Legal Counsel Maureen Griswold stated that she feels those changes are acceptable; that since the developer has agreed to change the 85th building permit to the 35th, she sees no problem with that; and that she does not believe that these clarifications would require resubmittal to the Washoe County Planning Commission.

On motion by Commissioner McDowell, seconded by Commissioner Bradhurst, which motion duly carried, Chairman Cornwall ordered that the preliminary development agreement in Development Agreement Case No. DA9-1-93 be approved subject to the following conditions as clarified by the Board at this meeting:

GENERAL CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE

COMPLIANCE WITH THE CONDITIONS OF THIS DEVELOPMENT AGREEMENT IS THE RESPONSIBILITY OF THE DEVELOPER, ITS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY AND THEIR SUCCESSORS IN INTEREST.

A COPY OF ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL BE FILED WITH THE DEVELOPMENT REVIEW STAFF.

GENERAL CONDITIONS

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.

2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The recorded final development agreement shall be effective for a period not-more-than 15 years. An extension of this approval may be granted if mutually agreed to by the developer and Washoe County.
4. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's office and the development review staff. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. Said CC&Rs shall specifically address the potential for liens against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement, of the following items, at a minimum.
  - a. Private roads within the subdivision.
  - b. Equestrian center.
  - c. Staffing of maintenance and security forces.
  - d. Common area landscaping.
  - e. Entrance gates.
  - f. Snow removal and storage areas.
  - g. Landscaping along streets.
  - h. Fire and fuelbreaks on open space.
  - i. Detention basins and the accumulated sediment.
  - j. Equestrian/pedestrian trails.
  - k. Bicycle and pedestrian paths.
  - l. Private streets and utilities.
  - m. Golf cart crossings.
  - n. Off-site residential parking areas
  - o. Public park center.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
- b. Specifications on the limitation of turf area for single family homes.
- c. Notice of requirement to pay future sewer user fees
- d. Minimum defensible space requirements.
- e. Snow storage areas.

- f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
  - g. Potential for conservation easements or dedication of open space.
  - h. Prohibition of motorized vehicles in open space.
  - i. Areas with potential for equestrian traffic.
  - j. Requirement of open space remaining open to pedestrian and bicycle traffic.
  - k. Notice of pedestrian easements to abutting properties.
5. Prior to ground disturbing activity, the developer shall provide an archaeological/historical survey for review by the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology.
  6. The developer shall participate in any applicable General Improvement District or Special Assessment District formed by Washoe County to the satisfaction of the applicable division of Public Works.
  7. All new utilities shall be placed underground to the satisfaction of the County Engineer.
  8. Prior to final map approval, the developer is to provide written approval of the plans for the installation of mail delivery facilities from the US Postal Service. The system must be shown on the project construction plans and installed as part of the on-site improvements to the satisfaction of the County Engineer and the US Postal Service.
  9. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
  10. Prior to submittal to the Washoe County Board of County Commissioners, the final development agreement shall be reviewed and approved by the Washoe County District Attorney's Office.
  11. Within six months of the approval of the preliminary development agreement, a draft final development agreement that conforms with the provisions of section 814 of the Washoe County Development Code shall be completed and submitted to the Washoe County Department of Development Review. Washoe County Department of Development Review will provide comments on the draft final agreement. The final development agreement will then be submitted to the Washoe County Board of County Commissioners within three months. Extensions of any of these time frames may be requested if mutually agreeable to Washoe County and the developer.

### PHASING

12. The project shall be developed in three phases. Phase I includes a tentative map for 436 lots, an 18-hole golf course, the village center and driving range. Phase II will include an additional nine holes, the equestrian center and a tentative map for approximately 220 dwelling units. Phase III includes the remaining 434 lots and the last nine holes of golf. Modification to the proposed phasing plan may be made if mutually agreeable the developer and Washoe County. These modifications may include the commercial portion of the project and the second 18-hole golf course, which may be constructed during phase II or phase III.
13. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

14. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.

### TRAFFIC

15. A LOS C, or the current Washoe County standard, shall be used as a basis for evaluating transportation needs and traffic impact mitigation requirements.
16. Prior to the issuance of the first building permit, two lanes of Whites Creek Lane shall be constructed, to two-lane minor arterial standards as a minimum, from Thomas Creek Road to the project site, to the satisfaction of the County Engineer.
17. Prior to the issuance of the first building permit, a second access shall be constructed to the project site to emergency standards to the satisfaction of the applicable fire protection agency.
18. Prior to the issuance of the 35th building permit, the following roadway improvements shall be constructed to the satisfaction of the County Engineer:

- A. The remaining two lanes of Whites Creek Lane from Thomas Creek Road to the project site if warranted by projected traffic demands.
  - B. Two (2) lanes of Whites Creek Lane from Thomas Creek Road to Wedge Parkway with 100 feet of right-of-way. These two lanes will be constructed so that an additional two lanes may be added in the future if warranted by projected traffic volumes.
  - C. Whites Creek Lane will be designed in a manner that minimizes any impacts on the adjacent homes to the north in Fieldcreek Ranch (e.g., fencing, berms, lowering the travel lanes).
19. The final development agreement shall not be approved until the right-of-way of all necessary off-site accesses from the project to Thomas Creek Road are obtained. A recorded right-of-way document shall be provided to the satisfaction of the County Engineer and the District Attorney's Office.
20. Prior to the final approval of the development agreement, the developer for Southwest Pointe shall petition the Washoe County Board of County Commissioners to create a Special Assessment District (SAD) for the purpose of financing the construction of Whites Creek Lane from the project site to Wedge Parkway and other roads as defined in the SAD agreement. In the event that a special assessment district is not created, the developer shall construct Whites Creek Lane, as outlined in Condition No.'s 16 and 18, from the project site to Wedge Parkway, to the satisfaction of the County Engineer.

Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

NOTE

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

21. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

Enforcement of the approved construction haul routes shall be the responsibility of the applicant and the County Engineer. Failure of construction vehicles to follow approved roads, will result in cessation of building permits and/or certificate-of-occupancies.

22. Prior to approval of the final development agreement, the developer shall provide a street maintenance program to the satisfaction of the County Engineer and the Department of Development Review. Street maintenance of private streets shall be performed by the homeowner's association and shall be perpetually funded.
23. Prior to the approval of the final development agreement, a schematic pedestrian circulation plan. As part of each tentative map, a detailed pedestrian circulation plan will be submitted and approved by the Department of Development Review.

24. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
25. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
26. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - C. Private - 50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.

- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
  - F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 <sup>1</sup>/<sub>2</sub> foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
  - G. Public - 100 ROW major arterial street (more than 10,830 ADT).
27. Landscaped medians shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer, Washoe County Department of Development Review and the developer. Maintenance of median landscaping shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
28. Meandering asphalt paths will be acceptable provided:
- A. Pedestrian easements are included for portions of the paths located outside the County r.o.w.
  - B. Landscaping between the back of the curb and the path shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer.
  - C. Maintenance of the asphalt paths and landscaping shall be the responsibility of the developer and, when created, by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
29. Proposed roadways (public or private) are not to be centered along fault lines. Faultlines shall be located behind the curbline, on the up-thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback excluding construction for buildings for human occupancy may be reduced, to the satisfaction of the County Engineer.
30. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded.

31. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement, to the satisfaction of the County Engineer.
32. Temporary County Standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street, to the satisfaction of the County Engineer.
33. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs that are longer than 500 feet to the satisfaction of the County Engineer and the applicable fire protection agency. These roads shall have a 30-foot access easement with a minimum 20-foot width of 6 inches of Type 2 Class B aggregate base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer.
34. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. The emergency access road shall be constructed within a 30 foot access easement to a minimum 20 foot width with 4 inches of Type 2 Class B aggregate base.
35. Street lights shall be installed at major intersections to the satisfaction of the County Engineer.
36. Unless otherwise stated in the final development agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided to the satisfaction of the County Engineer.
37. The minimum pavement structural section shall be 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector-classified streets and shall be 3 inches of asphalt over 6 inches of granular base for roadways for local streets to the satisfaction of the County Engineer.
38. The applicant shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required.

39. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater, to the satisfaction of the County Engineer. Where possible, crossings should be below the grade of public streets.
40. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
41. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
42. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
43. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.
44. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

#### AIR QUALITY MANAGEMENT

45. Prior to the approval of the final development agreement, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

#### DRAINAGE

46. Detention/retention facilities are to be maintained by a homeowner's association and perpetually funded unless the County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County.

47. A general concept level storm drain master plan shall be submitted and approved prior to acceptance of the final development agreement to the satisfaction of the County Engineer. The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities.
48. Prior to recordation of any final map, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.
49. A maintenance plan of all drainage facilities, to be owned by the homeowner's association, shall be provided prior to approval of the final development agreement. All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe county water treatment plant, and associated Steamboat Ditch conveyance system. All runoff from improved areas which runs into the Steamboat Ditch shall be pre-treated for silt and petrochemicals and shall be routed through a "wet" detention facility or approved alternative, to the satisfaction of the Utility Division and the Department of Development Review.
50. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.
51. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:
  - A. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to

the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.

- B. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within five (5) years of the approval of the final development agreement. If construction is not started within by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - C. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - D. If the detention basin is constructed, Washoe County shall pay fair market value for the property.
52. The increase in development-caused runoff from the 100 year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained On-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company, to the satisfaction of the County Engineer.
53. Prior to the approval of the final development agreement, a geotechnical report shall be prepared, which considers the effects of earthquake forces and faulting in the area, to the satisfaction of the County Engineer.

The siting and design of detention/retention facilities shall be addressed based on the findings and recommendations provided in the geotechnical report.

54. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
55. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.
56. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.

57. The stormwater discharges from this development that flow to Dry Creek shall be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. The applicant shall provide drainage structures under Steamboat Ditch that would pass the 10-year frequency storm or demonstrate that there will not be any water quality degradation in Steamboat Ditch.

58. Prior to approval of the final map, the developer shall obtain a Stormwater Discharge Permit from the Nevada Division of Environmental Protection. If required, point discharge permit for each proposed detention pond will be obtained from the Nevada Division of Environmental Protection and copy submitted to the Engineering Division.

The applicant shall contact the Division of Water Resources, State of Nevada, to determine whether the proposed flood detention facilities will require a permit.

59. Prior to approval of the final development agreement, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.

60. Prior to approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.

61. Prior to approval of the final development agreement, a golf course management plan shall be prepared that documents how the migration of fertilizers, pesticides, herbicides, and fungicides to surface and ground waters will be prevented. A service and ground water sampling program shall be implemented to demonstrate that migration is not occurring, and commits to modifying practices in the event that any of the above materials are detected.

62. An animal waste management plan for the equestrian center shall be prepared prior to the issuance of a building permit for that facility, that documents how the migration of bacteria, nutrients and other animal waste by-products to surface and ground waters will be prevented.

63. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100 year flows and lined, to the satisfaction of the County Engineer.

#### WATER

64. Prior to the approval of the final development agreement, the applicant shall provide staff with a phasing schedule for the dedication

of water rights. Permitted or certificated groundwater rights in the amount of 1.12 acre feet must be dedicated to Washoe County for each lot of a final map. Prior to acceptance, the water rights must be in good standing with the State of Nevada Division of Water Resources and must reflect a point of diversion, place and manner of use acceptable to the Utility Division.

65. Prior to the approval of the final map, the developer shall demonstrate how compliance with NRS 278.349, that requires the availability of water meet applicable health standards and is sufficient in quantity to serve the foreseeable needs of the subdivision, shall be met to the satisfaction of the District Health Department and Washoe County Department of Development Review.
66. Prior to the approval of the final development agreement, a complete water analysis from at least one monitoring well must be submitted to the District Health Office. The analysis must demonstrate the water conforms to the existing and proposed drinking water standards.
67. Prior to the approval of the final development agreement, a schematic water system plan for the referenced proposal must be submitted to the Utility Division and the District Health Department. Prior to final map approval, the plan must show that the water system will conform to the State of Nevada Water Supply Regulations, NAC Chapter 445, and the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, NAC 278.400 through 278.410.
68. Prior to final map approval, a letter of approval for the water rights serving this proposal must be submitted from the Division of Water Resources. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource to the satisfaction of the Utility Division.
69. The developer shall provide adequate assurance that the sewage, water and drainage systems will be satisfactorily maintained and operated
70. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters.
71. Water quality results from a State certified laboratory for new water sources shall be submitted to the Utility Division. The water quality sampling and testing shall be in compliance with the current State of Nevada Regulations for Public Water Systems, NAC 445.
72. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits.

73. Any wells on the property not in use for production or monitoring purposes, shall be properly abandoned in accordance with State Regulations governing Water Wells and Related Drilling.
74. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval. The water source shall meet both primary and secondary standards of the Safe Drinking Water Act.
75. The tentative maps shall show the maintenance roads for the existing and proposed water tanks. The location of these roads shall be mutually agreeable to Washoe County and the developer.
76. The developer shall provide access to the existing monitoring wells to the satisfaction of the Utility Division. In the event access is no longer available, the developer shall construct new wells to the satisfaction of the Utility Division.
77. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

#### WASTEWATER

78. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
79. The project shall be designed to accommodate a gravity flow sanitary sewer system within the boundaries of the subdivision. Such design shall be to the satisfaction of the Utility Division.
80. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.
81. All minor infrastructure for potable water distribution shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infra-

structure design can be accomplished prior to the approval of the final map.

82. Responsibility for design of wells, pump structure, controls, telemetry, and appurtenances, storage tanks, and transmission lines to the edge of the subdivision, all necessary to provide water service to the project, will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
83. The sanitary sewer collection system and water system facilities must be offered for dedication to Washoe County.
84. The developer shall construct or provide the financial assurances for the construction of the water and sewer system facilities. The financial assurances must be in a form and amount that is satisfactory to the Utility Division.
85. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance to the satisfaction of the Utility Division.
86. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development.
87. Fees for plan checking and inspection shall be paid in accordance with Washoe County ordinance.
88. Easements for all water and sewer utilities shall be offered for dedication to the satisfaction of the Utility Division.

#### GRADING

89. The development shall comply with the requirements of the Hillside Development Ordinance, as applicable.

#### SCHOOLS

90. Should the proposed "off-stream" location for the flood detention facility proposed in the 1990 Kennedy/Jenks report not be dedicated for this purpose, a minimum ten acre site for an elementary school and a minimum 25 acre site for a middle school shall be offered for dedication.

If the "off-stream" flood control facility is dedicated to Washoe County, a 10 acre site for the elementary school shall be offered for dedication.

If the area for the "off-stream" facility is dedicated, but the County has not complied with Condition No. 51, the use for the area shall revert back to a school site and/or a park site (if requested by Washoe County) as proposed by the developer. If a school or park site is not requested by Washoe County, this area shall remain as an open space buffer.

#### FIRE PROTECTION

91. The plans submitted with a building permit application shall show evidence of compliance with the recommendations of the applicable fire protection agency. Those concerns are fire flows, fire hydrant number and location, access, sequential phasing of firebreaks during development, permanent firebreaks, minimum defensible space, use of fire resistant construction and/or roof material, sprinklering of structures, and spark arrestors in chimneys. Access and fire flows shall be addressed to the satisfaction of the fire protection agency prior to the introduction of any combustible materials to the site.
92. A minimum one-acre site shall be offered for dedication, if requested by the applicable fire protection agency, for a fire station. The developer shall enter into talks with the applicable fire protection agency for any other requirements, such as, a fire station site, manpower and equipment needs, or for coordination with other developments that have similar requirements.

#### PARKS/RECREATION/OPEN SPACE

93. Prior to the approval of the final development agreement, an open space management plan and map shall be prepared that specifies the ownership of open spaces, type of uses allowed, phasing of open space dedication, phasing of trail construction and who is responsible for maintenance. This plan shall address the provisions of Section 110.408.45 of the Development Code. Common areas shall be maintained by the homeowner's association and provisions be made for perpetual funding for maintenance.

Prior to approval of the final development agreement, a government entity (e.g. United States Forest Service, Washoe County Parks Department, etc.) or a non-profit organization (e.g. Washoe Parks Foundation) shall be identified that will accept the dedication of the open space buffers identified on the Concept Plan, which consists of approximately 1,500 acres.

94. The final development agreement shall include a provision for the public open space that prohibits the sale of any open space without the consent of Washoe County.
95. Unless the off-stream site is dedicated to the County, a minimum 10-acre public park site shall be offered for dedication to the

County. A sketch plan has been submitted, which if conceptually approved by the County, should be included in the final development agreement. The final park design shall be mutually agreeable to the County and the developer. The developer will construct the recreational facilities in the park and then be reimbursed for the cost of the construction from the Residential Construction Tax. The responsibility of park maintenance shall be negotiated by the developer and Washoe County prior to the approval of the final development agreement.

96. The developer will work together with staff from the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer.

LANDSCAPING/ARCHITECTURAL DESIGN

97. Prior to the approval of the final development agreement, the developer shall submit schematic landscaping and architectural design guidelines of the entire project to the Design Review Committee (DRC) for its review and approval. These guidelines shall address, but not be limited to, type and color of building material, general architectural design, fencing, landscaping material (if plant material: type, size at time of planting, maturation size at full growth, period of time between planting and full growth), landscaping location, landscaping irrigation system, and financial assurances that landscaping will be planted and maintained.

The Design Review Committee shall also review the design of Whites Creek Lane, specifically to address Condition No. 18C.

98. The developer shall minimize grading to the maximum extent possible in the area around the critical mule deer habitat in order to preserve the existing browse shrubs.
99. Homes located on 12,000 square foot lots shall have a minimum 160 square foot storage space added in their garages, if only one garage space is provided.
100. A minimum 25 foot landscape buffer shall be installed between the homes and the collector and secondary loop streets. The homeowners association shall be required to perpetually maintain these areas.

OTHER

101. Prior to acceptance of the first final map, the telephone easement Doc. No. 415899, which runs through the middle of many lots, shall be realigned with appropriate abandonment and relocation easements, or the proposed lots realigned, to the satisfaction of the County Engineer.

\* \* \* \* \*

TENTATIVE MAP CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

4. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.
5. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.

6. The roadway structural sections for the proposed 80 foot public right-of-way shall have as a minimum 5 inches of asphalt on 8 inches of aggregate base. A final geotechnical report must be prepared, however, prior to final map approval to determine if additional structural capacity above the minimum is required. On-site construction haul route traffic and school traffic is to be considered in the pavement analysis. The proposed on-site private road right-of-way widths are acceptable as shown for the tentative map of Phase 1.
7. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - C. Private - 50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.

- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot asphalt meandering one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
- F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 1/2 foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
- G. Public - 100 ROW major arterial street (more than 10,830 ADT).
8. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater, to the satisfaction of the County Engineer. Where possible, crossings should be below the grade of public streets.
9. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
10. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
11. Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

NOTE

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

12. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
13. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.
14. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

#### AIR QUALITY MANAGEMENT

15. Prior to the approval of the final development agreement, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

#### DRAINAGE

16. Detention/retention facilities are to be maintained by a homeowner's association and perpetually funded unless the County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County.

The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.

17. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:

- A. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the

Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.

- B. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within five (5) years of the approval of the final development agreement. If construction is not started within by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - C. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - D. If the detention basin is constructed, the property shall be dedicated to Washoe County.
18. The increase in development-caused runoff from the 100 year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained On-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company, to the satisfaction of the County Engineer.
19. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
20. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.
21. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable by Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.
22. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100 year flows and lined, to the satisfaction of the County Engineer.

WASTEWATER

23. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.

PARKS AND RECREATION

- 24. The developer will work together with staff from the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer.

LANDSCAPING

- 25. A minimum 25 foot landscape buffer shall be installed between the homes and the collector and secondary loop streets. The homeowners association shall be required to perpetually maintain these areas.

OTHER

- 26. All new utilities shall be placed underground to the satisfaction of the County Engineer.

\* \* \* \* \*

FINAL MAP CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE

ALL CONDITIONS MUST BE MET OR FINANCIAL ASSURANCES SHALL BE PROVIDED IN AN APPROPRIATE FORM AND AMOUNT, TO THE SATISFACTION OF THE PUBLIC WORKS DEPARTMENT PRIOR TO RECORDATION OF THE FINAL MAP, UNLESS OTHERWISE STATED.

PRIOR TO FILING A FINAL MAP FOR RECORDATION, THE DEVELOPER SHALL MEET WITH THE ENGINEERING DIVISION AND THE DEVELOPMENT REVIEW STAFF AT LEAST FOUR (4) WEEKS BEFORE THE ANTICIPATED RECORDATION DATE TO REVIEW REQUIREMENTS, FINAL CONSTRUCTION DRAWINGS, AND DOCUMENTATION NECESSARY TO ADEQUATELY COMPLY WITH THE CONDITIONS OF APPROVAL.

A REQUEST FOR AN EXTENSION OF TIME FOR THE RECORDING OF A FINAL MAP, WHICH PERMITS THE ADDITION, DELETION, OR AMENDMENT OF CONDITIONS, MUST BE SUBMITTED TO THE DEVELOPMENT REVIEW STAFF AT LEAST 60 DAYS PRIOR TO THE EXPIRATION DATE OF THE TENTATIVE SUBDIVISION MAP; SAID EXPIRATION BEING ONE YEAR FROM THE DATE OF THE BOARD OF COUNTY COMMISSIONERS APPROVAL OF THE TENTATIVE MAP OR A SUBSEQUENT FINAL MAP.

GENERAL CONDITIONS

- 1. Unless specifically stated in the final development agreement, final maps and final construction drawings shall comply with all applicable statutes, ordinances, rules, regulations, and policies in effect at the time of approval of the final map or any subsequent extension date.
- 2. Final maps shall be in substantial compliance with all plans and documents submitted with and made part of this tentative map request, as may be amended by action of the final approving authority. All documentation necessary to satisfy the conditions noted

below shall accompany the final map when submitted to the Engineering Division and the development review staff.

3. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's office and the development review staff. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. Said CC&Rs shall specifically address the potential for liens against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement of the following items, at a minimum:

- a. Private roads within the subdivision.
- b. Equestrian center.
- c. Staffing of maintenance and security forces.
- d. Common area landscaping.
- e. Entrance gates.
- f. Snow removal and storage areas.
- g. Landscaping along streets.
- h. Fire and fuelbreaks on open space.
- i. Detention basins and the accumulated sediment.
- j. Equestrian/pedestrian trails.
- k. Bicycle and pedestrian paths.
- l. Private streets and utilities.
- m. Golf cart crossings.
- n. Off-site residential parking areas.
- o. Public park center.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
  - b. Specifications on the limitation of turf area for single family dwellings.
  - c. Notice of requirement to pay future sewer user fees
  - d. Minimum defensible space requirements.
  - e. Snow storage areas.
  - f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
  - g. Potential for conservation easements or dedication of open space.
  - h. Prohibition of motorized vehicles in open space.
  - i. Areas with potential for equestrian traffic.
  - j. Requirement of open space remaining open to pedestrian and bicycle traffic.
  - k. Notice of pedestrian easements to abutting properties.
4. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

5. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.
6. A note shall be placed on all construction drawings stating:

NOTE:

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.

7. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada, when field conditions mandate construction other than that shown in the original drawing.
8. The final map shall designate faults, by distance and bearings, that have been active during the Holocene epoch of geological time and shall contain the following note to the satisfaction of the development review staff:

NOTE

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time. The faults have been located by Civil Engineer Registered in Nevada and experienced in Geotechnical Engineering and field surveyed by a Nevada Registered Land Surveyor.

9. A complete set of construction improvement drawings, including an on-site grading plan, shall be submitted to the Engineering Division for approval prior to finalization of any portion of the subdivision. Grading shall comply with best management practices and shall include detailed plans for grading and drainage on each lot, erosion control, slope stabilization, mosquito abatement. Placement or disposal of any excavated material shall be indicated on the grading plan.

10. All soil boring logs must be included as part of the construction drawings to the satisfaction of the County Engineer.
11. All new utilities shall be placed underground to the satisfaction of the County Engineer.
12. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
13. The Washoe County Planning Commission certificate on the final map shall be to the satisfaction of the County Engineer and the Department of Development Review.

#### TRAFFIC

14. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a

haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

Enforcement of the approved construction haul routes shall be the responsibility of the applicant and the County Engineer. Failure of construction vehicles to follow approved roads, will result in cessation of building permits and/or certificate-of-occupancies.

15. Prior to approval of the final development agreement, the developer shall provide a street maintenance program to the satisfaction of the County Engineer and the Department of Development Review. Street maintenance of private streets shall be performed by the homeowner's association and shall be perpetually funded.
16. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
17. The roadway structural sections for the proposed 80 foot public right-of-way shall have as a minimum 5 inches of asphalt on 8 inches of aggregate base. However, a final geotechnical report must be prepared prior to final map approval to determine if additional structural capacity above the minimum is required. On-site construction haul route traffic and school traffic is to be considered in the pavement analysis. The proposed on-site private road right-of-way widths are acceptable as shown for the tentative map of Phase 1. Public right-of-way will not be evaluated until the recommended transportation study is completed.
18. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
19. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum

four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

- B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- C. Private - 50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
- F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 <sup>1</sup>/<sub>2</sub> foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
- G. Public - 100 ROW major arterial street (more than 10,830 ADT).

20. Medians shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer. Maintenance of median landscaping shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
21. Meandering asphalt paths are acceptable provided pedestrian easements are included in portions of the paths located outside the County right-of-way. Landscaping between the back of the curb and the paths shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer. Maintenance of median landscaping and pedestrian paths shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
22. Proposed roadways (public or private) are not to be centered along fault lines. Faultlines shall be located behind the curbline, on the up-thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback, excluding construction for buildings for human occupancy, may be reduced to the satisfaction of the County Engineer.
23. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded.
24. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement, to the satisfaction of the County Engineer.
25. Temporary County Standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street, to the satisfaction of the County Engineer.
26. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs serving ten or more lots to the satisfaction of the County Engineer. These roads shall have a 30-foot access easement with a minimum 20-foot width of 6 inches of Type 2 Class B aggregate base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer.
27. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. The emergency access road shall be constructed within a 30 foot access easement to a minimum 20 foot width with 4 inches of Type 2 Class B aggregate base.

28. Street lights shall be installed at major intersections to the satisfaction of the County Engineer.
29. Unless specifically stated in the final development agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided to the satisfaction of the County Engineer.
30. The minimum pavement structural section shall be 4 inches of asphalt over 6 inches of granular base for roadways (public and private) with a right-of-way of 60 feet in width and shall be 3 inches of asphalt over 6 inches of granular base for roadways with a right-of-way of 50 feet in width to the satisfaction of the County Engineer.
31. The applicant shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required.
32. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
33. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
34. Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

NOTE

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact

fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

35. Project streets that are designed with security gates at points intersecting shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
36. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.

#### DRAINAGE

37. Prior to recordation of any portion of the subdivision, a final, detailed hydrology/hydraulic report for that phase, prepared by a registered engineer, shall be submitted to the County Engineer for approval. The report shall include the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both the site and off-site areas and the methods for handling those flows. The report shall include all storm drain pipe and ditch sizing calculations and a discussion of and mitigation measures for any impacts on existing off-site drainage facilities and properties.
38. Prior to recordation of any final map, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.
39. The 100-year floodplain boundaries and flood elevations shall appear on each final map to the satisfaction of the County Engineer. If the floodplain boundary has been changed by a Federal Emergency Management Agency (FEMA) Conditional Letter of Map Amendment or Conditional Letter of Map Revision, the date of that letter and a note to that effect shall appear on the final map to the satisfaction of the County Engineer. Grading or building permits shall not be issued for areas currently shown as "A" zones on the FEMA floodplain maps until a Letter of Map Amendment or Revision is submitted

or until conformance with Washoe County flood construction standards is determined by the County Engineer.

40. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts to the satisfaction of the District Health Department and the County Engineer.
41. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.

#### WATER

42. Prior to the approval of a final map by the District Health Department, the production wells that will serve any phase of this development must be constructed, pump tested and sampled to ensure the proposed water system has sufficient quality and quantity.
43. Before approval of the final map will be considered, a letter from the water purveyor committing adequate water service to this proposal must be submitted District Health Department.
44. Prior to final map approval, a letter of approval for the water rights serving this proposal must be submitted from the Division of Water Resources. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource to the satisfaction of the Utility Division.
45. The developer shall provide adequate assurance that the sewage, water and drainage systems will be satisfactorily maintained and operated.
46. Pursuant to Section 278.340 of the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, no grading permit shall be issued prior to District Health Department approval of the referenced final map. This condition does not apply to the construction of production wells required in condition Number 48.

The applicant may seek relief from the District Board of Health for this requirement or may choose to create a separate parcel for the first 18-hole golf course.

47. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters.
48. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior issuance of any building permits.

49. A letter, which can be a will-serve letter, from the appropriate provider committing water service must be submitted to the District Health Department and Utility Division. This letter shall indicate that the facility will not be brought beyond its permitted capacity by this service.
50. The final map shall contain the following note to the satisfaction of the development review staff:

NOTE

No Certificate of Occupancy shall be issued until the water facilities have been completed and accepted by resolution of the Board of County Commissioners.

51. The developer shall provide access to the existing monitoring wells to the satisfaction of the Utility Division. In the event access is no longer available, the developer shall construct new wells to the satisfaction of the Utility Division.
52. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

WASTEWATER

53. Proper easements shall be shown for off-site sewage and drainage systems to the satisfaction of the Utility Division and the County Engineer.
54. The Nevada Division of Environmental Protection must submit a letter to the District Health Department certifying their approval of the final map.
55. All minor infrastructure for sewer collection shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division.
56. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.

57. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.
58. All hookup fees for the area within the final map will be paid to the satisfaction of the Utility Division.
59. The developer shall deposit with the Utility Division the sum of \$50.00 per lot prior to recordation of all or part of the final map. This fee shall represent the development's prorated share of the completed water and wastewater facilities plan for the south Truckee Meadows.
60. Prior to final map approval, a letter, which can be a will-serve letter, from the Utility Division committing sewer service, must be submitted to the District Health Department. This letter shall indicate that the treatment facility will not be brought beyond its permitted capacity by this service.
61. All minor infrastructure for potable water distribution shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infrastructure design can be accomplished prior to the approval of the final map.
62. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development.

GRADING

63. Prior to approval of the first final map, an erosion control/soil stabilization plan and grading plan shall be approved by the Washoe-Storey Conservation District. A copy of the approval shall be submitted to the District Health Department, Department of Development Review and Washoe County Engineer.

LANDSCAPING

64. Detailed landscaping and irrigation plans for the village commercial center, club house, golf courses, golf driving range and equestrian center shall be submitted prior to the issuance of a building permit for the particular use.

\* \* \* \* \*

SPECIAL USE PERMIT APPLICATION CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
4. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
5. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
6. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT):  
minimum 22 foot pavement width; curb and gutter or County Engi-

near approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

- B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- C. Private - 50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
- F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 <sup>1</sup>/<sub>2</sub> foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.

G. Public - 100 ROW major arterial street (more than 10,830 ADT).

DRAINAGE

7. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.
8. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
9. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.
10. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.

\* \* \* \* \*

SPECIAL USE PERMIT CONSTRUCTION CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINT

GENERAL CONDITIONS

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of

compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.

3. A note shall be placed on all construction drawings stating:

NOTE

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.

4. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada, when field conditions mandate construction other than that shown in the original drawing.
5. The final map shall designate faults that have been active during the Holocene epoch of geological time and shall contain the following note to the satisfaction of the development review staff:

NOTE

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time.

6. All new utilities shall be placed underground to the satisfaction of the County Engineer.

TRAFFIC

7. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed

Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

Enforcement of the approved construction haul routes shall be the responsibility of the applicant and the County Engineer. Failure of construction vehicles to follow approved roads, will result in cessation of building permits and/or certificate-of-occupancies.

8. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
9. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.

#### DRAINAGE

10. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts to the satisfaction of the District Health Department and the County Engineer.

### GRADING

11. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.

### WATER

12. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

### LANDSCAPING

13. Detailed landscaping and irrigation plans for the village commercial center, club house, golf courses, golf driving range and equestrian center shall be submitted prior to the issuance of a building permit for the particular use.

94-87      ORDINANCE NO. 897, BILL NO. 1072 - AMENDING WCC CH. 20 -  
FIVE CENTS ADDITIONAL MOTOR VEHICLE FUEL TAX

6:00 p.m. This was the time set in a Notice of Public Hearing, published in the Reno Gazette-Journal on January 28, 1994, to consider second reading and adoption of Bill No. 1072. Proof was made that due and legal notice of hearing has been given.

Pursuant to questions at Caucus regarding the development of an impact fee and how that might be accomplished by the June 30, 1994, sunset date in the ordinance, County Manager John MacIntyre stated that Regional Transportation Commission Executive Director Celia Kupersmith and Planning Manager Greg Krause have prepared a report that was distributed to the Board and are available to answer questions.

In response to Commissioner Beck, Mr. Krause cited the pros and cons of an impact fee vs. a development tax and stated that an impact fee would be under the local entities' jurisdiction. Commissioner Bradhurst asked about the timetable for developing and implementing an impact fee; and Mr. Krause stated that the Blue Ribbon Committee is just starting on it and that it will probably be 12 to 15 months before implementation. They then discussed interim fees, noting that at \$1400 per dwelling unit, the City of Reno is the highest right now.

Chairman Cornwall stated that she is aware that June 30th is a very aggressive date, but that she wants to keep it in the ordinance, as she believes it will keep those working on this focused; and that the Board does have the flexibility of amending the ordinance if they find it necessary. She stressed the importance of providing accountability to the people who are going to be paying this tax and to make sure they do not bear the entire burden.

Commissioner Beck agreed that it is important to send a clear signal to the development community.

The Chairman opened the public hearing and called on those wishing to speak for or against the adoption of said Ordinance.

Shawn Carey, Sparks Public Works Director, distributed a Resolution to the Board adopted by the City of Sparks urging the Board to implement the 5-cent gas tax and stating that Sparks is committed to pursuing regional solutions for the needs of the region.

There being no one else wishing to speak, Chairman Cornwall closed the public hearing.

On motion by Commissioner Beck, for the Board as a whole, seconded by Commissioner Bradhurst, which motion duly carried, Chairman Cornwall ordered that Ordinance No. 897, Bill No. 1072, entitled, "An Ordinance amending the Washoe County Code by imposing an additional 5 cents per gallon motor vehicle fuel tax and providing for the effective dates thereof," be approved, adopted and published in accordance with NRS 244.100.

94-88      BUDGET AMENDMENT - 1993/94 AIR QUALITY MANAGEMENT PROGRAM  
BUDGET - HEALTH DEPARTMENT

Upon recommendation of Dave Rice, District Health Officer, on motion by Commissioner McDowell, seconded by Commissioner Bradhurst, which motion duly carried, Chairman Cornwall ordered that an amendment to the Air Quality Management Program budget for fiscal year 1993/94, in the amount of \$33,700.00 using supplemental federal funds, be approved and the following account transactions be made:

<u>Account Number</u>	<u>Description</u>	<u>Amount of Increase</u>
002-1700-1723G-4301	Federal Contributions	\$33,700.00
002-1700-1723G-7140	Professional Services	4,115.00
-7237	Personal Computer Software	3,000.00
-7304	Advertising	5,285.00
-7828	Communications Equipment	1,300.00
-7851	Vehicles	<u>20,000.00</u>
	Total	\$33,700.00

94-89      BUDGET AMENDMENT - 1993/94 IMMUNIZATION PROGRAM BUDGET -  
HEALTH DEPARTMENT

Upon recommendation of Dave Rice, District Health Officer, on motion by Commissioner McDowell, seconded by Commissioner Bradhurst, which motion duly carried, Chairman Cornwall ordered that an amendment to the fiscal year 1993/94 Immunization Program budget, in the amount of \$10,494.00 in federal funds, be approved and that the following account transactions be made:

<u>Account Number</u>	<u>Description</u>	<u>Amount of Increase</u>
02-1700-1735G-4301	Federal Contributions	\$10,494.00
02-1700-1735G-7140	Professional Services	1,500.00
-7234	Meals & Lodging	339.00
-7620	Travel	1,000.00
-7829	P C Hardware	7,655.00
	Program Total	\$10,494.00

94-90 BUDGET AMENDMENT - 1993/94 MATERNAL AND CHILD HEALTH PROGRAM  
BUDGET - HEALTH DEPARTMENT

Upon recommendation of Dave Rice, District Health Officer, on motion by Commissioner McDowell, seconded by Commissioner Bradhurst, which motion duly carried, Chairman Cornwall ordered that an amendment to the Maternal and Child Health Program budget for fiscal year 1993/94, in the amount of \$8,000.00, be approved and the following account transactions be made:

<u>Account Number</u>	<u>Description</u>	<u>Amount of Increase</u>
02-1700-1705G-5608	Services to Other Agencies	\$8,000.00
02-1700-1705G-7001	Base Salaries	3,362.00
-7042	Group Insurance	3,000.00
-7046	Workman's Compensation	443.00
-7047	Unemployment Compensation	60.00
-7048	Retirement	613.00
-7050	Medicare	49.00
-7250	Office Supplies	150.00
-7307	Auto Expense	323.00
	Program Total	\$8,000.00

94-91 PROPOSED HIDDEN VALLEY SPECIAL ASSESSMENT DISTRICT - PARKS  
DEPARTMENT

County Manager John MacIntyre reviewed all four recommendations contained in Parks Director Gene Sullivan's memorandum dated January 18, 1994, regarding a proposed special assessment district to acquire approximately 200 acres of land in Hidden Valley.

Commissioner McDowell questioned if the majority of the homeowners in Hidden Valley requested this. Karen Mullen, Assistant Director, Parks and Recreation Department, advised that staff did a preliminary survey, which did not include specific details, to ascertain interest in the proposed project, to which they received about a 28 percent response; that of those who responded, 60 percent stated they would support a special assessment district to acquire subject property; and that the 28

percent responding would represent approximately 206 homeowners and 60 percent of that is 184.

A discussion then ensued regarding forming the assessment district by way of the petition method and what assistance the District Attorney's office and the Parks Department could provide the homeowners. Commissioner Bradhurst noted that the committee is a long way away from the 90 percent required. Commissioner McDowell stated that he would like to see the property used for more than hiking and picnicking.

Chairman Cornwall stated that although the burden should be on the property owners to bring forth a petition, she would like staff to assist in the language on the petition and in advising the property owners of approximate costs.

On motion by Commissioner Bradhurst, seconded by Commissioner Beck, which motion duly carried, Chairman Cornwall ordered that the District Attorney's office move forward with the petition method for the proposed Hidden Valley Special Assessment District. It was noted that the three remaining recommendations in Mr. Sullivan's memorandum will be accomplished only if the homeowners are successful in obtaining the required signatures to create the special assessment district to purchase the property.

94-92      DISCUSSION OF REQUEST TO SEND LETTER TO U.S. SENATOR REID  
REGARDING LOCAL DECISION MAKING PROCESSES

David Farside, area resident, stated that he believes that the Board should demand an apology, in a very strongly worded letter, from U.S. Senator Harry Reid for his political attitude and interfering with the local governmental process with regard to the Truckee Meadows Project.

Commissioner Bradhurst stated that he does not have a problem with a United States Senator speaking out about a project that has bi-state implications, especially when you consider that much of the project crosses federal lands.

Commissioner Shaw stated that he has reservations about the letter being "strongly" worded and that he wonders what would be accomplished now since this occurred some time ago.

Commissioner Beck stated that approximately 87 percent of the State is owned by the federal government and he is concerned that Nevada's fate is going to be decided in Washington, D.C. He said that a "strong" letter would not be appropriate, but that perhaps something should be sent reminding the Senator about the process, the state laws, local ordinances and procedures.

Commissioner McDowell stated that he does not have a problem with sending a letter, but that he does not think it needs to be "strongly" worded.

Commissioner Beck suggested that the Chairman draft a letter for the Board to review. Commissioner Bradhurst suggested that it be a

letter with a signature block for each of them that wish to sign the letter. Commissioner McDowell stated that it should be from the entire Board or not at all, and suggested that those who wish, could write to the Senator individually.

94-93      TRUCKEE MEADOWS PROJECT - SPECIAL USE PERMIT - RESOLUTIONS

Frank Partlow, area resident, stated that the Board should be encouraging Washoe County residents to continue to conserve water to protect their way of life.

Franklyn Jeans, Project Manager for the Truckee Meadows Project, stated that three resolutions have been prepared to present to the Regional Planning Commission in order to clarify issues raised by them in their review of the Truckee Meadows Project; and that, pursuant to discussion at Caucus, Don Mahin, Washoe County Hydrologist, has revised one of the resolutions.

Mr. Mahin explained that the "Status of Water Resource Plans" resolution has been modified so that it includes more background information from the 1990 water plan, does not indicate that the Regional Water Supply and Quality Study supersedes anything with respect to the 1990 water plan, and better identifies the ongoing process between the Cities and the County with respect to the 1991 interlocal agreement and other surrounding documents. He stated that this has been done to clarify this information for the Regional Planning Commission as they are looking strictly at the Regional Plan without referring to the interlocal agreement.

Mr. Jeans stated that the second resolution concerns the public vote prior to a pledge of the County's full faith and credit to finance the project and provides that the issue will be put to a vote of the people should the County decide to finance the physical facilities of the project with a bond issue that requires the full faith and credit of the County, whether it be revenue-backed, a general obligation backed revenue bond, or a straight general obligation bond. He added that this is also in response to resolutions adopted by the two Cities concerning spending of funds on the project. In response to Commissioner Beck, Mr. Jeans further clarified that the County is under certain contractual agreements, one with Western Water Development to provide funding for the permitting process, and one with the Bureau of Land Management and various consultants for preparation of the environmental impact study, which are existing, ongoing processes, and that this resolution does not address those functions. He stated that what this resolution is saying is that once those processes are completed, if the County decides to finance the next phase--implementation of the project--through a general obligation instrument that pledges the full faith and credit of the County, or, in other words, the general revenues and tax revenues of the people of Washoe County, that bond issue would be put to a public vote.

Mr. Jeans stated that the third resolution concerns the issue of water conservation and is an attempt to communicate assuredly that conserved water be used only for drought protection for existing residents and not for new development.

LeAnn McElroy, a member of the Technical Advisory Committee (TAC) to the Water Board, stated that she had concerns regarding the language in the water conservation resolution in that she feels it misstates the TAC's recommendation; it indicates that permanent water conservation would somehow jeopardize the negotiated settlement; and it gives the impression that the Board only supports the use of conservation during times of drought. She suggested modifications, especially with regard to a permanent water conservation program, and requested that the Board change the resolution.

Chairman Cornwall stated that she is not opposed to a permanent program of water conservation but that she is opposed to any saved water being used for new growth; and that even if it is redundant, she would want that specifically spelled out in the resolution.

Mr. Mahin indicated that he has no problem with the changes Ms. McElroy requested.

Bill Isaeff, Reno City Attorney representing the Cities of Reno and Sparks, stated that the Cities have concerns with the other two resolutions. He stated that the resolution regarding the public vote misses the whole point of the resolutions that were adopted by the Cities of Reno and Sparks and submitted to the Commission, which called upon the County to stop spending any further monies on this project until there had been a public vote on the project regardless of how it is funded. He stated that the Cities are requesting that the matter be put on the November ballot, in the form of an advisory question, as the Truckee Meadows Project, and not just how it is to be financed, is an issue that is very important to the future of the people and the people should be allowed to express their opinion on it.

Mr. Isaeff then detailed concerns regarding the "Status of Water Resource Plans" resolution stating that the Cities object to the language in the sixth "WHEREAS" clause which states that the three entities "recognized the limitations of the 1990 Regional Water Resources Plan and entered into a written agreement on April 9, 1991..." and also object to the second "RESOLVED" which indicates that the process set up in the interlocal agreement somehow supersedes the 1990 water resources plan. He stated that the Cities felt that the 1990 plan was an excellent plan; that the three entities entered into the interlocal agreement because that was what the factfinder recommended; and that using that plan as the basis of the service and facilities plan has not been superseded by any other plans, studies, or agreements. Mr. Isaeff cited policies of the Regional Plan and stated that there are specific methods for changing the Regional Plan and that cannot be done by the entities signing an agreement or by adopting a resolution. He stated that the Cities feel there are three parts to the service and facilities plan: the water study, the CIP and the operating plan; and that since key parts of it are missing, adoption of this resolution at this time is premature. He then answered questions of the Board.

Susan Lynn, Public Resource Associates, stated that she wanted to reiterate what Mr. Isaeff said and what Ms. McElroy said about water

conservation and emphasized that conserved water is to be used for drought storage and environmental purposes, not for new development.

Carol Hart, Lemmon Valley resident, expressed her opposition to the Truckee Meadows Project and echoed previous speakers regarding water conservation.

Mr. Jeans stated that he does not object to the changes that Ms. McElroy requested in the conservation resolution as it would still communicate what they are trying to communicate to the Regional Planning Commission. He further stated that on the resolution regarding the public vote issue there is a big difference; that they are just trying to clarify for the Planning Commission the guidance given by the Board; and that that resolution stands as it is. Then Mr. Jeans asked Craig Howard, project legal counsel, to address Mr. Isaieff's concerns regarding the water resource plan resolution.

Mr. Howard stated that he feels this is a lot of quibbling; and that what the factfinder and the legislature directed are clear, which was that the County should do a coordinated water study and, based upon that study, a capital improvements program and an operating plan should be developed. He stated that the purpose is clear and the process is set forth as to who does what and who approves it.

Commissioner McDowell moved that the resolution regarding water conservation be adopted with the amendments proposed by Ms. McElroy and by the Board. The motion was seconded by Commissioner Beck. Upon call for the vote, the motion carried unanimously, and it was ordered that the following resolution be adopted and that Chairman Cornwall be authorized to execute on behalf of Washoe County:

#### RESOLUTION - WATER CONSERVATION

WHEREAS, Aggressive water conservation has been advocated by the Technical Advisory Committees;

WHEREAS, The Truckee Meadows Regional Plan (TMRP) contains several policies regarding water conservation for new and existing development;

WHEREAS, Policy 24(d) of the TMRP requires the water supply planning for the region to be based upon meeting average water demands in normal to dry years with additional conservation measures in period of severe drought;

WHEREAS, Short-term Water conservation efforts provide a valuable tool for use in drought water supply management;

WHEREAS, The TMRP Quality of Life Indicator for public Water Supply Systems requires the provision of sufficient supply of water to accommodate an overall regional demand of 250 gallons per person per day;

WHEREAS, The Preliminary Settlement Agreement and Nevada State law require drought water conservation plans;

WHEREAS, The Preliminary Settlement Agreement requires new development to provide at least one acre foot of new water rights for each acre foot of new demand;

WHEREAS, Past drought conservation efforts have met public resistance when there has been an appearance of using the conserved water to allow new development; therefore

BE IT RESOLVED: It is the policy of the Washoe County Board of Commissioners that water conservation is an important tool for drought water supply management that should not be used to reallocate the water supply for existing residents to provide additional supply to new development;

BE IT FURTHER RESOLVED: That the Board of County Commissioners supports the development of a permanent water conservation program for the purpose of providing water for drought protection and environmental purposes and Washoe County will work for the development and implementation of such a program throughout the region; and

BE IT FURTHER RESOLVED: That the Board of County Commissioners does not support the use of conserved water as a source of water supply for new municipal and industrial development.

\* \* \* \* \*

Commissioner Beck then moved that the resolution regarding a public vote prior to pledge of full faith and credit for financing water and wastewater facilities be adopted. The motion was seconded by Commissioner McDowell. Commissioner Bradhurst stated that he will be voting against adoption of this resolution as it focuses on the financing mechanism for the project and not the real issue of not expending any more public funds for this project without a vote of the people. Commissioner Shaw stated that the concerns of Reno and Sparks also have to be considered. Upon call for the question, the motion carried with Commissioners Cornwall, Beck and McDowell voting "yes" and Commissioners Shaw and Bradhurst voting "no," and it was ordered that the following resolution be adopted and that Chairman Cornwall be authorized to execute on behalf of Washoe County:

RESOLUTION - PUBLIC VOTE PRIOR TO A PLEDGE OF FULL  
FAITH AND CREDIT FOR FINANCING WATER AND WASTEWATER FACILITIES

WHEREAS, The Cities of Reno and Sparks have each adopted resolutions requesting Washoe County to stop spending money on the Truckee Meadows Project until there has been a public vote on the project;

WHEREAS, There has been much public debate over the wisdom of the issuance of bonds for water and wastewater facilities to serve new planned development, if the bonds pledge the full faith and credit of a local government;

WHEREAS, Our system of representative government has allowed our civilization to advance without requiring public elections on every governmental issue to be decided;

WHEREAS, There is a financial risk to the public from providing infrastructure for new development, if the financing is dependent upon the full faith and credit of the local government; therefore

BE IT RESOLVED: It is the policy of Washoe County to seek voter approval prior to the pledge of the full faith and credit of the County for bonds to support the development of water and wastewater infrastructure to meet the projected needs of new development; and

BE IT FURTHER RESOLVED: That the Board of County Commissioners hereby urges the Cities of Reno and Sparks to adopt similar policies.

\* \* \* \* \*

Chairman Cornwall stated that she has concerns with the Water Resources Plan resolution and feels that some of the language does need to be changed; that she agrees with Mr. Isaeff that the language "...recognized the limitations of the 1990 Regional Water Resources Plan..." does need to be deleted; and that she can see how the language "...said process supersedes the use of the 1990 Water Resources Plan as the basis..." could be misinterpreted and that should probably be changed.

Commissioner Beck stated that he was involved in the 1990 water resource plan; that he knew what a weak document it was; and that he thinks this resolution is asking for recognition of the Regional Water Supply and Quality Study as the second step in the process and does not ignore the 1990 document. He also stated that the reason for the factfinder's recommendation that the three entities enter into an agreement must also be considered.

The Board, Mr. Jeans, and Mr. Isaeff then revised some of the language, which Mr. Jeans read back to the Board. Mr. Isaeff stated that the Cities could accept that.

Commissioner McDowell then moved that the amended Resolution regarding the Status of Water Resource Plans be adopted. The motion was seconded by Commissioner Beck. Upon call for the vote, the motion carried with Commissioner Bradhurst voting "no," and it was ordered that the following resolution be adopted and that Chairman Cornwall authorized to execute on behalf of Washoe County:

RESOLUTION - STATUS OF WATER RESOURCE PLANS

WHEREAS, In 1990, the Regional Water Planning and Advisory Board of Reno-Sparks and Washoe County examined the then known water supply alternatives for the Region and prepared a "Regional Water Resources Plan" utilizing limited staff support provided by Washoe County, the Cities of Reno and Sparks and the water utilities in the Region;

WHEREAS, The Regional Water Planning and Advisory Board of Reno-Sparks and Washoe County adopted the Regional Water Resources Plan on July 18, 1990, with the proviso that it be accompanied by a "Letter of Concern;"

WHEREAS, Said Letter of Concern cautions readers that the 1990 Water Resources Plan is advisory only, is based upon many assumptions that are subject to change and validation, and is not to be considered as the approval of any water supply development proposal;

WHEREAS, On October 4, 1990, the Report of Fact Finder was presented to and accepted by the Regional Planning Governing Board;

WHEREAS, The Truckee Meadows Regional Plan, adopted by the Regional Planning Governing Board on March 21, 1991, has established a framework for Washoe County acting in its role as the Regional Water Management Agency to develop a "Service and Facility Plan" for the management of water resources for the Region;

WHEREAS, Washoe County and the Cities of Reno and Sparks entered a written agreement on April 9, 1991 to define the procedure for the development of a "Regional Water Supply and Quality Study" and Capital Improvement Program to address both water supply and water quality issues in response to the recommendations of the Fact Finder and to define the process to be followed in implementing other recommendations of the Fact Finder concerning Wastewater Facilities;

WHEREAS, Washoe County, acting as the Regional Water Management Agency hired technical consultants who, over a period of two years, developed the Regional Water Supply and Quality Study at a cost of \$1,377,000 to determine methods of providing water supply and water quality management for the Region under a broad spectrum of future conditions;

WHEREAS, The process of the development of the Service and Facility Plan as required by the Regional Plan has been defined by the Interlocal Agreement with Reno and Sparks to be satisfied by the preparation and adoption of a Capital Improvement Program based upon a Regional Water Supply and Quality Study as recommended by the Fact Finder; now therefore

BE IT RESOLVED: That the Washoe County Board of Commissioners hereby reaffirms the advisory status of the 1990 Regional Water Resources Plan as expressed by the Regional Water Planning and Advisory Board of Reno-Sparks and Washoe County in the Letter of Concern which accompanies the 1990 Regional Water Resource Plan;

BE IT FURTHER RESOLVED: That the Washoe County Board of Commissioners hereby reaffirms the process in the April 9, 1991 Interlocal Agreement for the preparation of the Regional Water Supply and Quality Study as the basis of the Capital Improvement Program and that said process builds upon the 1990 Water Resources Plan and other documents as the basis of the Service and Facility Plan; and

BE IT FURTHER RESOLVED: That the Regional Planning Commission be advised that Washoe County has complied with its agreement with the Cities to produce the Regional Water Supply and Quality Study as the preparatory step to the development of a Capital Improvement Program to be submitted to the Regional Planning Governing Board.

\* \* \* \* \*

There being no further business to come before the Board, the meeting adjourned at 12:15 a.m, February 9, 1994.

DIANNE L. CORNWALL, Chairman  
Washoe County Commission

ATTEST: JUDI BAILEY, County Clerk

---

Summary - An ordinance authorizing the issuance of the Washoe County, Nevada Special Assessment District No. 23 (ArrowCreek) Senior Local Improvement Refunding Bonds, 2003 Series A and Subordinate Local Improvement Refunding Bonds, 2003 Series B, approving the form of certain documents with respect to such bonds, ratifying action taken by County officers toward the issuance of such bonds, and providing other matters related thereto.

WASHOE COUNTY  
COMMUNITY DEVELOPMENT

BILL NO. 1397  
ORDINANCE NO. 1217

**AN ORDINANCE AUTHORIZING THE ISSUANCE AND SALE BY WASHOE COUNTY OF ITS SPECIAL ASSESSMENT DISTRICT NO. 23 (ARROWCREEK) SENIOR LOCAL IMPROVEMENT REFUNDING BONDS, 2003 SERIES A, AND SUBORDINATE LOCAL IMPROVEMENT REFUNDING BONDS, 2003 SERIES B IN THE COMBINED MAXIMUM AGGREGATE PRINCIPAL AMOUNT OF \$9,846,538 TO REFUND CERTAIN OUTSTANDING BONDS ISSUED FOR ARROWCREEK, A PLANNED COMMUNITY DEVELOPMENT IN SOUTHWEST RENO; PROVIDING FOR ITS ADOPTION AS IF AN EMERGENCY EXISTS; AND PROVIDING THE EFFECTIVE DATE OF THE ORDINANCE.**

WHEREAS, the Board of County Commissioners (the "Board") of the County of Washoe (the "County"), and State of Nevada (the "State"), pursuant to ordinances previously passed and adopted has created its Special Assessment District No. 23 (ArrowCreek) (the "District") and ordered the acquisition of certain local improvements for the District (the "Project") and determined to defray a portion of the entire cost and expense of the Project by special assessments, according to benefits, against the benefited lots, tracts and parcels of land in the District; and

the Board has by ordinances previously passed and adopted (the "Assessment Ordinance") levied assessments (the "Assessments") against the property benefited by the Project in the District; and

WHEREAS, the County has previously issued its "Washoe County, Nevada, Special Assessment District No. 23 (ArrowCreek), Local Improvement Bonds, Series November 1, 1997" in the aggregate original principal amount of \$12,825,000 (the "1997 Bonds" or the "Prior Bonds"); and

**WHEREAS**, the Prior Bonds are subject to prior redemption at the option of the County from any maturities (in any order of maturity and by lot within a maturity) on any interest payment date prior to maturity, at a price equal to the principal amount thereof, accrued interest to the redemption date and a premium of two percent (2%) of the principal amount so redeemed if redeemed between May 1, 1998 and November 1, 2005; and

**WHEREAS**, pursuant to Nevada Revised Statutes ("NRS") 271.488, the County is authorized to issue bonds in order to refund, pay and discharge certain outstanding bonds of the County for the purpose of reducing interest rates and effecting other economies and to evidence such borrowing by the issuance of bonds in accordance with the provisions of NRS § 350.500 through § 350.720, cited in § 350.500 thereof by the short title "Local Government Securities Law" (the "Bond Act"); and

**WHEREAS**, the County hereby determines that it is in the best interests of the County and the owners of property in the District to issue the County's Senior Local Improvement Refunding Bonds, 2003 Series A and Subordinate Local Improvement Refunding Bonds, 2003 Series B (collectively, the "2003 Bonds") to refund, pay and discharge the outstanding 1997 Bonds on November 1, 2003 and to reduce the interest payable on the Assessments (the "Refunding Project"); and

**WHEREAS**, the 2003 Bonds are to be payable from the sources permitted by the Consolidated Local Improvements Law, Chapter 271, NRS, and all laws amendatory thereof and supplemental thereto (the "Act"), as more fully described in the hereinafter referred to Original Indenture; and

**WHEREAS**, the 2003 Bonds are to be sold by the County to Stone & Youngberg LLC, as underwriters and purchasers of the 2003 Bonds (collectively, the "Purchaser"); and

**WHEREAS**, the 2003 Bonds are to be issued pursuant to a Trust (the "Trust Indenture") between the County and the Trustee; and

**WHEREAS**, the 2003 Bonds are to bear interest at the rates per annum provided in the bond purchase proposal submitted by the Purchaser and accepted by the County Finance Director, which rates must not exceed by more than 3% the Index of Twenty Bonds most recently published in The Bond Buyer prior to the time the offer to purchase the 2003 Bonds is received, and are to be sold

at a price equal to the principal amount thereof, plus accrued interest to the date of delivery of the 2003 Bonds, less a discount not exceeding 9% of the principal amount thereof, all as specified by the County Finance Director in a certificate dated on or before the date of delivery of the 2003 Bonds (the "Certificate of the County Finance Director"); and

**WHEREAS**, the County hereby elects to have the provisions of Chapter 348 of NRS (the "Supplemental Bond Act") apply to the 2003 Bonds; and

**WHEREAS**, the Council has found and determined and hereby declares:

A. It is necessary and for the best interests of the County to effect the Refunding Project and to issue the 2003 Bonds;

B. Each of the limitations and other conditions to the issuance of the 2003 Bonds in the Act, the Bond Act, the Supplemental Bond Act, and in any other relevant act of the State or the Federal Government, has been met; and pursuant to § 350.708, Bond Act, this determination of the Board that the limitations in the Bond Act have been met shall be conclusive in the absence of fraud or arbitrary or gross abuse of discretion; and

C. This ordinance pertains to the sale, issuance and payment of the 2003 Bonds; this declaration shall be conclusive in the absence of fraud or gross abuse of discretion in accordance with the provisions of NRS § 350.579(2).

**WHEREAS**, there have been presented to the Board at this meeting (i) the proposed form of the Trust Indenture, (ii) the proposed form of the Escrow Agreement, between the County and the Trustee (the "Escrow Agreement"); (iii) the proposed form of the Letter of Representations between the County and The Depository Trust Company, (iv) the proposed form of Bond Purchase Agreement (the "Bond Purchase Agreement") between the County and the Purchaser, (v) the proposed form of the Continuing Disclosure Agreement between the County and the Trustee (the "Disclosure Agreement") and (vi) the proposed form of the Preliminary Official Statement (the "Preliminary Official Statement") to be used by the Purchaser in connection with the offering of the 2003 Bonds;

**NOW THEREFORE, THE BOARD OF COUNTY COMMISSIONERS OF THE COUNTY OF WASHOE DO ORDAIN:**

Section 1. This Ordinance shall be known as, and may be cited by, the short title "District No. 23 2003 Refunding Bond Ordinance" (the "Ordinance").

Section 2. All actions, proceedings, matters and things heretofore taken, had and done by the County and the officers thereof (not inconsistent with the provisions of this Ordinance) concerning the District, including, but not limited to, the Refunding Project, and the issuance of the 2003 Bonds to provide funds to pay the costs of the Refunding Project be, and the same hereby are, ratified, approved and confirmed.

Section 3. To provide the funds for the Refunding Project, the County hereby authorizes the issuance of its local improvement bonds under the Act, the Bond Act and the Supplemental Bond Act, to be designated the "Washoe County, Nevada Special Assessment District No. 23 (ArrowCreek) Senior Local Improvement Refunding Bonds, 2003 Series A" and "Washoe County, Nevada, Special Assessment District No. 23 (ArrowCreek) Subordinate Local Improvement Refunding Bonds, 2003 Series B." The 2003 Bonds shall be in an aggregate principal amount, mature in the years and amounts, bear interest (including interest evidenced by supplemental interest coupons (the "Registered Coupons")) and be subject to redemption as provided in a Certificate of the County Finance Director prior to the delivery of the 2003 Bonds. The 2003 Bonds and Registered Coupons shall be dated, shall be substantially in the forms and in the denominations and shall have the terms and provisions (including, without limitation, provisions relating to their registration, authentication and redemption) provided for in the Trust Indenture. The 2003 Bonds are payable solely from the proceeds of the assessments against a portion of the specially benefitted lots, tracts and parcels of land in the District and from the other sources set forth in the Indenture. The provisions of Sections 271.428, 271.495 and 271.500, Nevada Revised Statutes do not apply to the 2003 Bonds.

Section 4. The forms, terms and provisions of the Trust Indenture, the Escrow Agreement, the Letter of Representations, the Disclosure Agreement, and the Bond Purchase Agreement be and they hereby are approved and the County shall enter into the Trust Indenture, the Escrow Agreement, the Letter of Representations, the Disclosure Agreement and the Bond Purchase Agreement in the forms of such documents presented to the Council at this meeting, with only such changes therein, if any, as are approved by the County Finance Director. The Chairman of the Board

is hereby authorized and directed to execute and deliver the Trust Indenture and the County Clerk is hereby authorized and directed to affix the County seal to and to attest such document and the Finance Director is hereby authorized to execute the Escrow Agreement and the Disclosure Agreement. The County Finance Director is hereby authorized and directed to execute and deliver the Letter of Representations and the Bond Purchase Agreement.

Section 5. The forms, terms and provisions of the 2003 Bonds and Registered Coupons, in the forms contained in the Trust Indenture, be and they hereby are approved, with only such changes therein, if any, as are not inconsistent herewith; the Chairman is hereby authorized and directed to execute the 2003 Bonds, the County Treasurer is hereby authorized and directed to countersign the 2003 Bonds and the County Clerk is hereby authorized and directed to affix the County seal to and to attest the 2003 Bonds; and the Treasurer is hereby authorized and directed to execute the Registered Coupons. Such signatures of the Chairman, the County Treasurer and the County Clerk and the seal of the County shall be by facsimile or manually affixed. In case any official whose signature should appear on any Bond or Registered Coupon shall cease to be such official before the delivery of such Bond or Registered Coupon, such signature shall nevertheless be valid and sufficient for all purposes, the same as if he or she had remained in office until delivery.

Section 6. The County hereby authorizes, ratifies and confirms the use of the Preliminary Official Statement by the Purchaser in connection with the offering of the 2003 Bonds and hereby approves the distribution by the Purchaser of a final Official Statement in connection with the offering of the 2003 Bonds, which final Official Statement shall be substantially in the form of the Preliminary Official Statement with only such changes as shall be approved in writing by the Finance Director.

Section 7. The officers of the County shall take all action in conformity with the Act necessary or reasonably required to effectuate the issuance of the 2003 Bonds and shall take all action necessary or desirable in conformity with the Act to acquire and improve the Refunding Project and to carry out, give effect to and consummate the transactions contemplated by this Ordinance, the Trust Indenture, the Escrow Agreement, the Letter of Representations and the Bond Purchase Agreement, including without limitation the execution and delivery of any closing documents to be delivered in connection with the sale and delivery of the 2003 Bonds.

Section 8. This Ordinance is adopted by virtue of the Act, the Supplemental Bond Act and the Bond Act and pursuant to their provisions; and the County has ascertained and hereby determines that each and every matter and thing as to which provision is made herein is necessary in order to carry out and to effectuate the purposes of the County in accordance with the Act, the Supplemental Bond Act and the Bond Act, and as provided in NRS 350.708 all limitations in the Bond Act imposed upon the issuance of bonds or other securities thereunder have been met.

Section 9. The County has determined and does hereby declare:

a. The estimated life or estimated period of usefulness of the improvements to be refinanced with the proceeds of the 2003 Bonds is not less than 8 years; and

b. The 2003 Bonds shall mature at times not exceeding such estimated life or estimated period of usefulness.

Section 10. It is necessary and for the best interests of the County and the inhabitants thereof that the County effect the Refunding Project and defray the cost thereof by issuing the 2003 Bonds therefor; and it is hereby so determined and declared.

Section 11. All actions, proceedings, matters and things heretofore taken, had and done by the Council and the officers of the County (not inconsistent with the provisions of this Ordinance), concerning the District, including but not limited to the performing of all prerequisites to the creation of the District, the implementation of the Refunding Project, the determination of the specially benefitted property therein, the levy of assessments and the issuance and sale of the 2003 Bonds for that purpose, be, and the same hereby are, ratified, approved and confirmed.

Section 12. The County hereby elects to redeem the 1997 Bonds on November 1, 2003 at a price equal to the principal amount thereof, accrued interest to the redemption date and a premium of 2% of the principal amount thereof. Notice of redemption shall be given in the name of and on behalf of the County by the Trustee, by mailing a copy of a notice of defeasance and prior redemption at least once not less than 15 days nor more than 60 days before the Redemption Date, by first class, postage prepaid mail, to at least the registered owners of any 1997 Bond at his or her address as it last appears on the registration records kept by the Trustee.

The Notice of Prior Redemption shall be in substantially the following form:

(FORM OF NOTICE OF PRIOR REDEMPTION)

**NOTICE OF PRIOR REDEMPTION**

**OF**

**WASHOE COUNTY, NEVADA  
SPECIAL ASSESSMENT DISTRICT NO. 23 (ARROWCREEK)  
LOCAL IMPROVEMENT BONDS, SERIES NOVEMBER 1, 1997**

**CUSIP NUMBERS**

**NOTICE IS HEREBY GIVEN** that the Washoe County, Nevada (the "County") has caused to be deposited in escrow with Wells Fargo Bank Arizona, National Association, refunding bond proceeds and other moneys which have been invested (except for an initial cash balance remaining uninvested) in bills, notes, bonds, and similar securities which are direct obligations of, or the principal and interest of which securities are unconditionally guaranteed by, the United States of America, to refund, pay, and discharge the principal, interest and prior redemption premiums on that portion of the outstanding "Washoe County, Nevada Special Assessment District No. 23 (ArrowCreek) Local Improvement Bonds, Series November 1, 1997" (the "Refunded Bonds").

Refunded Bonds in the aggregate principal amount of \$ \_\_\_\_\_ are called for redemption on November 1, 2003. On such date the principal amount thereof, accrued interest thereon to the redemption date, and a premium equal to two percent (2.0%) of the principal amount of each Refunded Bond so redeemed will become due and payable at the office of \_\_\_\_\_, and thereafter interest will cease to accrue.

According to a report pertaining to such escrow of The Arbitrage Group, the escrow, including the known minimum yield from such investments and the initial cash balance remaining uninvested, is fully sufficient at the time of the deposit and at all times subsequently, to pay the principal, interest and prior redemption premiums on the Refunded Bonds as the same become due, and upon the redemption of the Refunded Bonds on November 1, 2003.

In compliance with the Comprehensive National Energy Policy Act of 1992 (H.R. 776) and Dividend Compliance Act of 1983, the Paying Agent is required to withhold 31% from payments of principal to individuals who fail to furnish valid Taxpayer Identification Numbers. A completed form W-9 should be presented with your Refunded Bond.

The CUSIP numbers have been assigned to this issue by Standard & Poor's Corporation and are included solely for the convenience of the bondholders. Neither the County nor the Paying Agent shall be responsible for the selection or use of the CUSIP numbers, nor is any representation made as to their correctness on the Refunded Bonds or as indicated in any redemption notice.

**DATED** on this \_\_\_\_\_, 2003.

WELLS FARGO BANK ARIZONA, N.A.  
as Escrow Agent

/s/ \_\_\_\_\_  
Authorized Officer

(End of Form of Notice of Prior Redemption and Defeasance)

Section 13. All ordinances, resolutions, bylaws and orders, or parts thereof, in conflict with the provisions of this Ordinance are hereby repealed to the extent only of such inconsistency. This repealer shall not be construed to revive any ordinance, resolution, bylaw or order, or part thereof, heretofore repealed.

Section 14. Because the Board has expressed in the preambles of this Ordinance that this Ordinance pertains to the sale, issuance and payment of the Bonds, this Ordinance may accordingly be adopted as if an emergency now exists, and may become effective at any time when an emergency ordinance of the County may go into effect. Consequently, pursuant to NRS 271.308, 271.475 and 244.095 through 244.115, final action shall be taken immediately, and this Ordinance shall be in effect from and after its publication by title and collateral statement as provided in this Ordinance. After this Ordinance is signed by the Chairman and attested and sealed by the Clerk, this Ordinance shall be published twice by title only, together with the names of the Board members voting for or against its passage, such publication to be made in a newspaper published and having a general circulation in the County, and such publication to be in substantially the following form:

(Form of Publication)

BILL NO. \_\_\_\_\_

ORDINANCE NO. \_\_\_\_\_

(of Washoe County, Nevada)

**AN ORDINANCE AUTHORIZING THE ISSUANCE AND SALE BY WASHOE COUNTY OF ITS SPECIAL ASSESSMENT DISTRICT NO. 23 (ARROWCREEK) SENIOR LOCAL IMPROVEMENT REFUNDING BONDS, 2003 SERIES A, AND SUBORDINATE LOCAL IMPROVEMENT REFUNDING BONDS, 2003 SERIES B IN THE COMBINED MAXIMUM AGGREGATE PRINCIPAL AMOUNT OF \$9,846,538 TO REFUND CERTAIN OUTSTANDING BONDS ISSUED FOR ARROWCREEK, A PLANNED COMMUNITY DEVELOPMENT IN SOUTHWEST RENO; PROVIDING FOR ITS ADOPTION AS IF AN EMERGENCY EXISTS; AND PROVIDING THE EFFECTIVE DATE OF THE ORDINANCE.**

**PUBLIC NOTICE IS HEREBY GIVEN** that typewritten copies of the above-numbered and entitled Ordinance are available for inspection by the interested parties at the office of the County Clerk of Washoe County, Nevada, at her office at the County Courthouse, Virginia and Court Streets, Reno, Nevada; and that said Ordinance was proposed by Commissioner \_\_\_\_\_ on September 16, 2003, and following a public hearing, was passed and adopted without amendment at a regular meeting held not more than 35 days after the close of the hearing, i.e., at the regular meeting on September 16, 2003, by the following vote of the Board of County Commissioners:

STATE OF NEVADA     )  
                                  ) ss.  
COUNTY OF WASHOE    )

I, Amy Harvey, am the duly chosen and qualified Clerk of Washoe County, and in the performance of my duties as Clerk do hereby certify:

1. The foregoing pages are a full and correct copy of an Ordinance adopted on September 16, 2003 which relates to Special Assessment District No. 23 (ArrowCreek). Such copy of such ordinance is a true, correct, compared copy of the original proposed and adopted at such meeting.

2. All members of the Board were given due and proper notice of such meetings, and the members of the Board voted on such ordinance as set forth in the ordinance.

3. Public notice of such meeting was given and such meetings were held and conducted in full compliance with the provisions of NRS § 241.020. Pursuant to NRS § 241.020, written notice of such meeting was given by 9:00 a.m. at least three working days before the meeting:

- (a) By mailing a copy of the notice to each member of the Board,
- (b) By posting a copy of the notice at the principal office of the

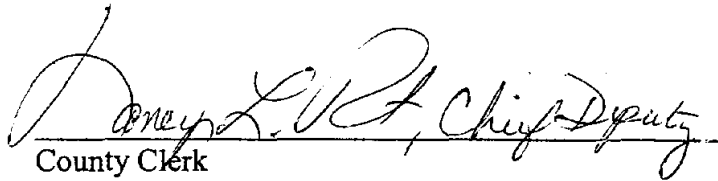

Board, or if there is no principal office, at the building in which the meeting was held, and at least three other separate, prominent places within the jurisdiction of the Board, to wit:

- 1. Washoe County Administration Complex  
1001 East Ninth Street  
Reno, Nevada
- 2. Washoe County Courthouse  
Virginia and Court Streets  
Reno, Nevada
- 3. Washoe County Library  
301 South Center Street  
Reno, Nevada

4. Justice Court  
630 Greenbrae Drive  
Sparks, Nevada

(c) By mailing a copy of the notice to each person, if any, who had requested notice of the meetings of the Board in the same manner in which notice is required to be mailed to a member of the Board.

**IN WITNESS WHEREOF**, I have hereunto set my hand and the seal of Washoe County, Nevada, this September 16, 2003.

AGENDA

MEETING OF

WASHOE COUNTY BOARD OF COMMISSIONERS

COMMISSION CHAMBERS - 1001 E. 9th Street, Reno, Nevada

September 16, 2003

**NOTE:** Items on the agenda without a time designation may not necessarily be considered in the order in which they appear on the agenda. Items may be moved to the Consent Agenda at the beginning of the Board Meeting.

The Washoe County Commission Chambers are accessible to the disabled. If you require special arrangements for the meeting, please call the County Manager's Office, 328-2000, 24-hours prior to the meeting.

An Agenda CAUCUS Meeting will be held in the Commission Caucus Room (1001 E. 9<sup>th</sup> St., 2<sup>nd</sup> Floor, Reno) on MONDAY, September 15, 2003 at 1:30 p.m. in order to review agenda items for the regular meeting of the Washoe County Board of Commissioners as described below. Said review, if requested by the Commission, is limited to brief staff presentation of issue and may include review of background information and questions to be answered at the regular meeting. The Commission, at the Caucus Meeting, may also consider possible items for placement on the September 23, 2003 Commission Agenda.

Public Comment: Limited to three minutes per person and limited to matters other than the agenda items that will be heard at the Commission Meeting. Persons are invited to submit comments in writing on agenda items and/or attend and make comment on that item at the Commission Meeting.

Pursuant to NRS 241.020, the Agenda for the Commission Meeting has been posted at the following locations: Washoe County Administration Building (1001 E. 9<sup>th</sup> Street), Washoe County Courthouse-Clerk's Office (Court and Virginia Streets), Washoe County Central Library (301 South Center Street) and Sparks Justice Court (630 Greenbrae Drive). At the meeting, after salute to the flag and roll call, the Board of County Commissioners may vote on the following items as the Board and, ex-officio, as the Board of Fire Commissioners for the Truckee Meadows Fire Protection District, the Board of Fire Commissioners for the Sierra Forest Fire Protection District and/or the Board of Trustees of either the Lawton/Verdi or South Truckee Meadows General Improvement Districts.

Support documentation for items on the agenda, provided to the Washoe County Board of Commissioners, is available to members of the public at the County Manager's Office (1001 E. 9<sup>th</sup> St., 2nd Floor, Reno, Nevada) and on the County's website at [www.co.washoe.nv.us](http://www.co.washoe.nv.us).

Unless otherwise indicated by asterisk (\*), all items on the agenda are action items upon which the Board of County Commissioners will take action.

21. Introduction and adoption of an Ordinance authorizing the issuance and sale by Washoe County of its Special Assessment District No. 23 (Arrowcreek) Senior Local Improvement Refunding Bonds, 2003 Series A, and Subordinate Local Improvement Refunding Bonds, 2003 Series B in the combined maximum aggregate principal amount of \$9,846,538 to refund certain outstanding bonds issued for Arrowcreek, a planned community development in Southwest Reno; providing for its adoption as if an emergency exists; and providing the effective date of the Ordinance.
  
22. Emergency Items.

### GENERAL INFORMATION SUMMARY

**APPLICANT:** Dingman Investments

**REQUESTED ACTION:** To develop a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center and a commercial village center. The total acreage of the project is  $\pm 3,171.6$  acres. The project entrance is proposed west of the intersection of Zolezzi Lane and Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN:49-010-04, 49-010-10 and 41-030-12)

### WCPC RECOMMENDATIONS/FINDINGS

At its regular meeting of January 18, 1994, the Washoe County Planning Commission considered the above referenced case and, following a public hearing, recommended approval of Development Agreement Case No. DA9-1-93. This recommendation is based upon the following findings:

1. That this request conforms to the goals and policies of the adopted Southwest Truckee Meadows Area Plan;
2. That the requested subdivision is consistent with the density provisions and lot size regulations of the Washoe County Development Code;
3. The requested development agreement is consistent with the provisions of Section 814 of the Washoe County Development Code;
4. The physical design of the project and the manner in which the design does make adequate provision for public services;
5. The site is particularly suitable for the density and type of residential development proposed;

6. The amount, purpose and location of common open space provided in the proposed project is adequate as related to the proposed density and type of residential development;
7. The proposed maintenance and conservation of common open space is adequate to serve the proposed project;
8. The terms and conditions of this development agreement are sufficient to protect the interests of the public, residents, and the owners of the land subject to the development agreement in the integrity of the plan;
9. The conditions of approval ensure consideration of the items cited in NRS 278.349; and
10. That the Commissioners gave reasoned consideration to the information contained within the staff report and information received during the meeting.

Ayes: Johnson, Metcalf, Oakes, Preku, Reddicks, Rock,  
Nays: Strobel  
Abstained: None  
Absent: None

Mike Harper introduced Agenda Item 4. He advised that the Commission's action this evening would be a recommendation to the Washoe County Commission. Four of the seven members present must approve the recommendation.

Jeff Murphree summarized the staff report dated January 11, 1994 recommending approval with conditions. Since the last meeting on this subject, notices of this public hearing had been sent to the residents of the Government Tract and to those along Zolezzi Lane.

Mr. Murphree noted the areas where the staff and the applicant had not agreed and required direction from the Planning Commission. First, the applicant has revised the concept plan which now shows Whites Creek Road as the only primary access to the development with a gated emergency access along Zolezzi Lane. Construction traffic would use Zolezzi Lane ingress only, until such time as Whites Creek Lane is completed. Based on previous Commission actions, staff is recommending, he said, a second access to the property through Welcome Way and that access be constructed to County local street standards. Other developments in the immediate area where a second access had been required were: Whites Creek Unit 2, Wedge Parkway, Saddlehorn, and Montreux.

Mr. Murphree noted that the residents of the Field Creek Subdivision directly adjacent to where Whites Creek Lane is to be constructed are concerned, claiming that when they purchase their homes they were not informed that the road would be built. He noted that the alignment had been on the area plan since 1984.

The second area of disagreement had to do with the need for a flood detention facility proposed to be constructed along Thomas Creek. Both proposed sites are located on the Southwest Point property where the school and park sites are proposed. Staff is recommending that the southerly

site be reserved for a period of five years, and if the facility is constructed, the property be dedicated to the County. Given the size and impact of the facility on the project, the applicant would prefer that it not be located there, and if it is constructed, that the County pay fair market value for the land.

Public responses were summarized by Mr. Murphree. They were received from the City of Reno, Thomas Creek Estates Home Owners Association, resident Jack Crowley, the Forest Service and the Washoe Tribe of Nevada and California. These written communications are on file with the Department of Development Review. Mr. Murphree also noted a call from Bob Howard who does not want Thomas Creek Road to be used for construction but does support the application.

Mr. Murphree reminded the Commission and audience that, if the development agreement is approved this evening, it must then be presented to the Board of Commissioners then to the Truckee Meadows Regional Planning Agency.

Brita Tryggvi, CFA, Inc., representing the applicant, present with Jeff Dingman and Rick Gardner of Dingman Investments, and Jerry Smith with the Redfield Land Company, the property owner, Alex Fittinghoff with CFA and Paul Solaegui, traffic engineer, briefly gave an overview of the project. Ms. Tryggvi directed the Commission's attention to a letter dated January 18, 1994, in which two amended conditions (traffic and drainage) and one additional condition (open space) are proposed. This letter is on file with the Department of Development Review. The primary issue with this application, she said, is traffic. The applicant believes it has come up with the solution. It is proposing a special assessment district be created consisting of the Redfield Land Company, the developers of Pinetree Ranch property, the developers of the Wedge Meadows subdivision and possibly the Dorostkars. Additionally, the School District would also be a participant. Preliminary meetings with County staff and the Board of County Commissioners received this idea in a positive manner, she said. The benefit to the County is that virtually all the remaining roadway improvements in the southwest will be constructed as a whole rather than piecemeal. Existing residents will benefit from the reduction of increased traffic and it puts the construction traffic as well as that generated by the applicant's development onto Whites Creek Lane. Should the special assessment district not be created, staff has added Condition No. 20, which would require the developer to construct Whites Creek Lane to Wedge Parkway.

With regard to the concerns of the fourteen residents abutting Whites Creek Lane, the developer has and is willing to meet and work with those residents to discuss their individual circumstances, whether fencing or landscaping. These types of things can easily be included in the assessment district.

Ms. Tryggvi stated that there are two items in the staff report with which the developer disagrees. The first item, construction of secondary residential access to Zolezzi Lane. The developers had designed their project to avoid all access to Zolezzi Lane. Instead they were proposing, with the construction of Whites Creek Lane, four lanes with a 30-foot median, with all utilities under one side of the road. If there were an accident, the other side of the road could be turned into two way traffic. She said she had spoken with the Truckee Meadows Fire Protection District who agreed that the emergency access to Zolezzi Lane and the government tracts in addition to Whites Creek Road was sufficient for their purposes.

The second item of disagreement is the Thomas Creek detention basin. In the developer's opinion, the basin has absolutely no benefit to Southwest Pointe because the flooding occurs some distance downstream. She noted that the County had submitted the project to the Corps of Engineers for funding and was denied because it was economically infeasible. The cost would be approximately \$5.5 million with only eighty-two affected structures presently downstream, about

\$70,000 per structure. She asked that the Planning Commission delete this Condition. The school district desires to construct a middle school on the site and the detention basin would eliminate that site as well as the site for the proposed neighborhood park. If the Planning Commission should choose not to delete this Condition, she suggested the language in her January 18, 1994 memorandum, specifically that the County pay fair market value for the property.

Commissioner Metcalf referred to the letter from the Washoe Tribe of Nevada and California and asked about the request for a survey. Ms. Trygvvi responded that the County has a standard condition, appearing on page 21 of the staff report. Mr. Harper stated that the key difference in what is being required with this development and what is being asked for by the Tribe is a request that not only a study be done but that a program for possible excavation and preservation be required. He added that there is some question about the extent of that requirement by the Regional Plan.

Commissioner Preku asked if the possibility of small ponds instead of one large retention facility had been investigated. Ms. Tryggvi stated that the County staff would need to respond to the question. However, something more aesthetic, if feasible, would be of greater benefit to the community as a whole.

Leonard Crowe, Natural Resource Planner, Department of Comprehensive Planning and Acting Flood Control Manager, submitted copies of the flood insurance maps for the area in question. The Southwest Pointe project had decided to control its runoff onsite with small detention facilities. The issue is flooding that occurs currently downstream from the project and is due to the basin as a whole. He illustrated that area of flooding. He explained that in this instance the county watershed flows into the existing urban areas of the City of Reno and there is no ability to create channels to carry the waters. The consultant had determined two feasible sites for a flood detention facility, the first straddling Thomas Creek at an estimated \$7 million and a second off-line facility at an estimated cost of \$5 million. The Army Corps of Engineers rejected this project primarily because it currently benefits only eight-two structures. However, he noted there will not always be so few structures. It is an urbanizing area. At some point in the future the problem will be worse because of the number of structure that will be there and the project will become more feasible. The County would like to pursue the feasibility of forming a special assessment district with the downstream property owners.

Commissioner Reddicks asked about the possibility of creating a usable lake and the impact on water rights downstream. He added that he was thinking about a retention situation creating a benefit to the community for recreational purposes and function like Boca reservoir. He said his concern is that a structure will be built and a hundred years may pass before the facility realizes a beneficial use. Mr. Crowe stated that a detention facility would tend to increase the value of water rights.

In response to Commissioner Preku, Mr. Crowe stated that the last major flood on the Whites Creek was in 1964 or 1965.

Chairman Preku then opened the public hearing.

Pat Powell, 13440 Field Creek Lane, Reno, stated she had lived in the Field Creek subdivision for about one year. She said she came to this hearing angry because she had just recently become aware that her backyard will be abutting a four-lane highway that will have construction traffic for fifteen years. She said she had done a lot of research in deciding to purchase her home and the deciding factor was the quality of life and view. Her husband, she said, talked to the County and Toiyabe National Forest. They had been informed that there would be no significant impacts on

their view of Mt. Rose. She stated that, although staff said that homeowners had been notified, she and her husband had not received one. She said that she felt "ripped off" and was appalled at the cavalier attitude in a sensitive area in regard to flooding and the native artifacts. She said she would assume those types of studies would be done long before the County considered a project like this. She said it was her retirement money and investment that was being impacted. In addition to the ineptitude of the County with regard to its misinformation, Mrs. Powell stated that they had been misled by the developer who said it would be a two-lane road which would not be constructed for six or seven years. She did not realize that this would be a construction route, that would be off Mt. Rose Highway.

Karen Faust, 14285 Windriver East, Reno, in the Saddlehorn development, stated that when the project was first brought to attention of her neighborhood it was done by the developer. However there had been considerable changes since that time. The traffic plan is off base. She could not see anyone using the circuitous routes it dictates when they could stay on Thomas Creek to Mt. Rose and east to the freeway. She said she did not see how the developer can control where contractors and subcontract will be taking their construction vehicles. In addition, she said, there is still construction in the Saddlehorn and Field Creek developments. She said she felt that her development would also see a reduction in property values. Even though the amended area plan indicates Whites Creek Road there was nothing to say that it could not be amended based on what is happening now, rather than what happened in 1989. Southwest Pointe should have its own access off of Mt. Rose Highway and not ask the people of the Shadow Ridge, Field Creek and Thomas Creek subdivisions to take on their problems.

Doug Powell, 13440 Field Creek Lane, confirmed what his wife said about the difficulty in obtaining information from County staff. He relied on their representations in making his financial investment and he felt there was some responsibility on the part of the County. He said he understood the different arguments against the different accesses for this development and he had looked at the reasons for not having a north/south road from Lakeside and Plumas in the Plan. They are all equally applicable. He recommended Mt. Rose as access for Southwest Pointe. He expressed concern regarding the relationship between developer and staff. The conditions noted at the last hearing had been watered down considerably, particularly those relating to the archeological study. He recommended that any decision be delayed due to the way he and his neighbors had been misled.

Bruno Menicucci, 13405 Field Creek Lane, Reno, stated he heartily agreed with the previous speakers. The individual owners of Field Creek have never been notified that there is a roadway proposed. None of the developer's maps show any indication of Whites Creek. He said, from what he could gather, none of the County staff had known that the road was being proposed. He asked that the Commission ask staff to reconsider the area plan. In the 1980's a tremendous amount of pressure came upon the County to eliminate a north/south roadway in the area. Today, however, the demographics are very different than what they were in the 1980's. The key would be an extension to Mt. Rose. Mr. Menicucci also informed the Commission of the possibility of a class action suit because of the lack of disclosure on the part of the developer.

Mr. Harper noted that one speaker referred to an archeological survey. He stated that there is a condition that requires an archeological survey prior to ground breaking. Regarding Whites Creek Lane, the speakers are correct that they would not have been notified about the roadway because it was dedicated prior to any lots being created. That one-hundred foot right of way was negotiated with the applicant at the time the subdivision was proposed. He read from the Field Creek Subdivision staff report in which the dedication was noted. He said that street had been on the streets and highways master plan since 1984.

Randy Heuer, 13470 Field Creek, Reno, stated that no one is saying they do not want growth, it is inevitable. The developers have the right to develop their land and the residents have rights also. The citizens rights include a quality of life free of noise and pollution and to protect their investments and property values. What is unfair here, he said, is that Southwest Pointe's development and the County staff want the existing residents to bare all the impact of a thirty-one acre project. What would be fair is to devise a plan that would equally distribute the byproduct of Southwest Pointe to all areas of the master plan. He asked that the citizens as current taxpayers be given as much or more consideration than the developers.

Louis Muller, 13530 Field Creek Lane, Reno, added that when the staff originally negotiated the easement there was no economic reality. Today there are about twenty-five homes in Field Creek which will be devalued. The homes in Saddlehorn will be devalued. Perhaps, he suggested, the developers would consider a special assessment district to mitigate the impact. It appears that the current residents are victims of the past and that the circumstances of a decade ago no longer apply. He joined with others how asked the Commission to iniate a study to find an alternative to Whitescreek Lane.

Anne Shrake, 13540 Field Creek Lane, Reno, stated she felt compelled to state her opposition to the construction of Whitescreek Lane. The construction of the road will destroy the qualities that lead the residents to construct their homes: open space, beautiful views and room for their children to explore. The area is rural in nature construction of the road will put an end to the bicycling, jogging, equestrians, and children out having adventures. The purchase of a home is a family's biggest and most important investment. There will be major decreases in property values as will as the impact on lifestyles. In order to serve Southwest Pointe, the construction of Whitescreek Lane will sacrifice both the environment and financial well-being of the residents of Field Creek and Saddlehorn only to further enrich the developers of Southwest Pointe. If the subdivision is approved access via Whitescreek is inappropriate. Not only the residents of Field Creek believe Mt. Rose will serve as a better access, but also the Sheriff and the Division of Forestry recommend a north/south access in appropriate.

David Brody, 13460 Field Creek Lane, Reno, stated that his one of the homes that abut up to the Whites Creek right-of-way. He asked that the commissioners not only understand that the residents of the existing community not only have a substantial investment but they placed their future in the quality of life that community afforded. With the potential loss there is the question of safety. He said the thoroughfare will soon be thirty-five feet from his back porch. The that this project will cause needs to be addressed. He asked that the Commission look at a justified stance: There are existing homes there today, Thomas Creek Lane is there today, and Whites Creek Lane is not. The Whites Creek Lane project should, therefore, he claimed, be stopped or reevaluated. Develop what is best for the community, giving precedence to the people who are already there as opposed to what is proposed.

Brad Swenson, 13550 Field Creek Lane, Reno, agreed with his predecessors in opposition to Whites Creek Lane. He said he just did not want that traffic in his backyard. He moved to the area to get away from traffic. Also, the traffic through the subdivisions have not been addressed. It was his fear that much of the additional traffic generated from Southwest Pointe would use Zolezzi through Edmunds and Foothill to head north to town. He proposed an alternate route, preferably to the Mt. Rose Highway from the intersection of Thomas Creek Road, less than one mile. He said he was not opposed to the subdivision, unless the road is the subdivision.

Paula Berkley, Berkley and Associates, 908 Nixon Avenue, Reno, representing the Washoe Tribe of Nevada and California, noted the letter dated January 18, 1993, wherein the Tribe noted the subject site is in a known culturally sensitive area and had requested that a condition of approval

be added requiring a full archeological plan to be approved by the Tribe as required by the Regional Plan. Ms. Berkley stated that the Tribe would like to work with the developer as soon as possible.

Jack Crowley, 12920 Thomas Creek Road, representing the Thomas Creek Estates Homeowners Association, noted its letter of January 14, 1994. He said the Association does not oppose using Thomas Creek Road from Whites Creek Lane to Mt. Rose Highway as an access. Currently the residents of Thomas Creek Estates, one hundred and sixty-eight homes, has borne ten years of truck traffic. Saddlehorn and Field Creek traffic has already devalued their properties. The Association favors the current proposed Southwest Pointe plan. It opposes the use of Welcome Way to Zolezzi Lane as an access to the subdivision. The people on Zolezzi Lane have already experienced a tremendous amount of traffic. The Association does take issue with the timing of the completion of Whites Creek Road. Instead of tying the completion of Whites Creek to the 85th building permit, the Association would like the condition to require a time for completion of one year from the date of the first ground breaking and that all construction traffic be required to use that road when completed.

Cory Kristie, 2060 Rockhaven Drive, Reno, stated that he was a resident of Thomas Creek Estates and was Vice President of the homeowners association added his support to the statements of Mr. Crowley before him.

Richard Heikka, 5650 Mt. Rose Highway, Reno, said he had lived in the government tract for seventeen years and his neighbor had lived their for forty years. He said it is easy for people to suggest that the north/south road be moved to the government tract area removing it from their backyard, but it places it in his backyard. He said he had spent personally \$10,000 maintaining the private roads in the government tract. He personally got the fire station built and the built the culvert on Mountain Ranch Road to provide access to the subdivision. The only public right-of-way that exists is 700 feet of Mountain Ranch Road. The remainder is private. There are no easements. There is no way to get from Southwest Pointe to Mt. Rose Highway.

Rob Nichols, 4185 Wild Eagle Terrace, Reno, representing Saddlehorn Management, stated that he and his partners were not opposed to the project as a whole and the representative the developer had worked with them in negating the concerns they did have. He reminded the Commissioners of the conditions that were placed on Saddlehorn. First they were required to build a construction haul road off of Mt. Rose Highway. He agreed with a previous speaker that it is difficult to control where each and every construction truck goes. Saddlehorn Development Company was then required to build the entire Thomas Creek Road to 100 percent completion on their own. He said if you compare that with the cost of Whites Creek Lane,, the cost per lot is almost identical. Thomas Creek was designed as a pretty road and Mr. Nichols was concerned that Thomas Creek not be destroyed by construction haul road traffic. He felt it was important that the Commission be consistent in applying conditions to the various subdivisions. In summary, he asked that an alternative be found for construction traffic and. if Whites Creek is approved, that it swing out to the north and bermed as it is proposed for Field Creek.

Cynthia Edwards, 13180 Thomas Creek Road, Reno, stated that traffic currently is unacceptable and additional traffic would be devastating. She said the Sheriff's Department does what it can in the area and the citizens have petitioned and received two stop signs. Some other method must be devised and the people on Thomas Creek should not be sacrificed for this project.

Randy Jackson, 13160 Thomas Creek Road, Reno, noted that staff had make recommendations that should be considered. He said access to the development from Zolezzi Lane through Welcome Lane is unacceptable. Zolezzi Lane is already overworked and Zolezzi as emergency

access only is a good alternative. He said he agreed with the north/south road alternatives. It is important that the Commission chose the decision that will have the least amount of impact.

Marilee Robertson, 16055 Edmunds Drive, Reno, stated her area is already impacted by a great deal of traffic. She was surprised to learn that the people abutting Whites Creek Road did not know that it would be constructed because when their subdivision was being proposed it was on the map. This, she said, was the reason she and many of her neighbors did not oppose Field Creek. She expressed her concern that the golf course will be built before there is a road. This together with the construction traffic will have serious impacts. Another of her concerns was for the flood control issue. In the 1986 flooding, she lost part of her driveway to flooding.

Elaine Walker, 13200 Thomas Creek Road, Reno, reported that she purchased her home in 1984. They had watched the development of Saddlehorn and Field Creek and appreciate the appreciation of her home due to the development of those homes above her. She said she felt the community should stick together, to work on speed limits and their roads. In 1984 she was aware of the proposed developments. She is a golfer and was excited about the golf course proposed below her which has not materialized. She said she was aware of the proposed Whites Creek Lane and looked forward to its construction to alleviate the traffic on Thomas Creek Road. She asked the Commission to stick with the plan as it is.

Ted Sindlinger, 12935 Thomas Creek Road, Reno, reiterated his fellow neighbors had said. He said the real issue is the traffic problem complicated by extra abuse of more construction traffic. He said he sympathized with those speakers who had spoken of aesthetics, property values and concern for their children. However, there is no way to illustrate his anxiety when his children have to cross Thomas Creek Road. He said they resident cannot tolerate more traffic. The president of the homeowners association had been rear ended while stopped at a stop sign.

Steven T. Walther, 8895 Lakeside Drive, Reno, former member of the Southwest Citizens Advisory Board and resident since 1948, gave a history from the years 1982-84, the first time that a land use and transportation plan was proposed for the area. All of the citizens were deeply involved. The question at the time was how to deal with a piece of property as large as the Redfield property. There was no doubt, he said, that whatever resulted from the development of that property would drive the success of the whole plan. What ultimately resulted was that it did not make sense to build a road through the top of the foothills when a freeway going to be constructed to serve north/south traffic. Whites Creek Lane became a compromise. It was to be between four and six lanes of traffic because of the density being proposed at the time by Redfield including a forty-acre node of commercial property. The only way the plan would work was if the freeway was built. A number of private citizens flew to Washington, D.C., to determine if the freeway would be built in time to serve the Redfield development. There has been a line drawn indicating that road since February, 1983.

Tim Howsley, 4335 Wild Eagle Terrace, Reno, indicated that when he originally bought his house he went to the Planning Department and asked what was proposed behind this property and was told "absolutely nothing." Later they heard CFA who indicated there would be a minor road up to the Southwest Pointe subdivision. They agreed with that provided it was placed 200 feet out, was depressed and bermed. Now it's become a four lane highway. He suggested that it be placed 400 feet away. He added that there was a major problem with the drop in elevation and that trucks would not be able to stop.

Rob Young, 13500 Field Creek Lane, Reno, reiterated the statements of previous property owners on Field Creek Lane. A very serious look at a north/south route should be undertaken.

**Washoe County Board of County Commissioners**

**Re: DA9-1-93 (Southwest Pointe)**

**January 26, 1994--Page 9**

Carol Young, 13500 Field Creek Lane, Reno, stated that she and her husband were the first owners there. They have a concern for the safety of their child. She said they have not built a fence behind their property because they like the view and that will be spoiled with the construction of the road.

John Zidich, 13480 Field Creek Lane, Reno, asked to correct one statement. It is not fourteen lots in the Field Creek subdivision who are affected, but 500 lots. Everyone spoke about quality of life, safety, and property values. Everyone is saying basically one thing: We are all impacted negatively by traffic generated by this project. It is not just the road, its the project. He asked the Commission to consider all the neighborhoods as one group.

Tom Casazza, 12930 Field Creek, Reno, said he was frustrated because although he knew from having served on the citizens advisory board that Whites Creek Lane was proposed, he had been told by realtors that road would never be built. When he was on the board, he pointed out that there was a need for a north/south road. At the time the plan as approved, there were very few people there. Whites Creek Lane is a good road is a good plan but it will not solve the problem. He agreed that the plan should be revisited and the possibility of a north/south road be investigated.

Carlo Giufurta, 14120 Saddlebow Drive, Reno, agree with the majority of speakers in opposition to Whites Creek Lane.

Craig Pinneo, 13190 Welcome Way, Reno, asked to be placed on record in agreement with those in opposition to the construction traffic problems. He wanted the Commission to consider the issue of the water detention basin. This, he said, would be a 70-foot high dam within 500 feet of the back of his home. It definitely effects him, he added, and he had never been notified about it. One other issue he noted was that schools are not generally built along electric lines. The school sites being proposed by the developer is in the area of a 25,000 volt distribution line.

Chair Preku recessed the meeting at 9:25 p.m.

Chair Preku reconvened the meeting at 9:45 p.m., noting that all Commissioners were present.

Peter Etchart, 14250 Wind River Lane, Reno. noted that clustering is referred to as 1/3 acre, and he noted 12,000 per acre. He said he would like to see 15,000 square foot lots.

Patricia DeBunch, 13050 Fellowship and 1325 Brush Lane, Reno, said there are already problems with traffic, particularly due to students of Galena High School. She said she would like to see the schools being proposed by the developer inside the subdivision, and the buffer be between schools and current residents. In 1986 outside her home there was six inches of water flowing across her property. She asked that the Commission consider the recommendations regarding the flood detention basin. Ms. DeBunch stated that she was an archeologist and would like to see that not only a good survey be done of the area but that there be an appropriate plan for valid recovery. If there is none, a lot of history will be lost..

John Gulick, 13435 Evening Song, Reno, agreed with those persons who spoke in opposition before him. Mr. Gulick was especially concerned about air pollution in the Truckee Meadows, stating that traffic that is requires to stop and idle creates more pollution than traffic that is able to keep moving. The south end of Southwest Pointe is very close to Mt. Rose. If he lived there, he would like to go to Mt. Rose, and from there to Reno, Carson City, Virginia City without stopping. He asked the Commission to consider that as a major part of its decision.

Patty Beers, 13055 Welcome Way, Reno, stated that she had lived at that address for eight years. She felt sorry for the homeowners of Field Creek who had been misinformed about the construction of Whites Creek Lane. She said that same developer had told the existing residents that the golf course would be constructed first before any homes, as well as equestrian trails. None of that has happened. She said she and her neighbors had been very patient with the traffic on Thomas Creek Road and it was time it stopped. Mt. Rose appeared to her to be the only accessible access.

William E. Hunt, 14220 Prairie Flower Court, Reno, proposed that there was an alternative to the proposed development and that was to not allow it as proposed and require houses on 1-1/2 acre lots.

Bruce Arkell, 4725 Britney Court, Reno, indicated that he had been involved with the roads in the area for a long time. The arguments being presented tonight are essentially the same as those of ten years ago--development is fine but there should be no roads to it. What has happened, however, is that the City of Reno and Washoe County has moved to implement the plan. Right of way to widen Thomas Creek has been returned to the property owners. The City of Reno approved the Bartley Ranch development which closed one of the possible north/south accesses and another west of Windy Hill. There is essentially one corridor at the top of the foothills and that is not feasible. The network was very carefully crafted, he said, to see about the level of development that has taken place. The County is now faced with the last piece of the puzzle. If the Commission decides to revisit the road network, Mr. Arkell cautioned that all of the options that were available ten years ago no longer exist.

Gene Sullivan, Director, Washoe County Parks Department, advised that Parks does not recommend for or against development, but if approved, is extremely interested in the 1,500 acres that has been proposed for open space. The property will preserve a deer wintering range, preserve a stream corridor and provide public access to land with trails. He was present to show interest in the open space.

Lyn McWilliams, 12510 Creek Crest Drive, Reno, stated that the people on Thomas Creek Road had put up with a tremendous amount of traffic and should not be made to endure that any longer. It was Mr. McWilliams opinion that there needs to be another route into Southwest Pointe and that the project is too large. He said he felt one golf course would be adequate and mentioned the amount of water required.

The following persons were present wishing to go on record in favor of the proposed development: Robert B. Archie, 13155 Thomas Creek Road, Reno; and Mike Raifaesen, 12995 Thomas Creek Road, Reno.

The following persons were present wishing to go on record in opposition to the proposed development: Caroline Fiufurta, 14120 Saddlebow Drive, Reno; David and Shirley Epperson, 12325 Field Creek Road, Reno; Elaine and Steve Gajewski, 12410 Field Creek Lane, Reno; Loni and Mark Ditsworth, 50 Margarita Court, Reno; Ronald and Jean Starr, 55 Margarita Court, Reno; Pam Zidich, 13480 Field Creek, Reno; Ron Centire, 13505 Field Creek Lane, Reno; Mark Campbell, 13360 Field Creek Lane, Reno; Elizabeth Wright, 85 Day Lily Court, Reno; Anna Menicucci, 13405 Field Creek Lane, Reno; Naomi and Tom Coffee, 13510 Field Creek Lane, Reno; Linda and Joseph Leyba, 13520 Field Creek Lane, Reno; Tom Danson, 2513 Springland Drive, Sparks (a purchaser of property on Welcome Way); and Richard and Deborah Cofer, 13430 Field Creek Lane, Reno.

Janice Pixley, 4200 Saddlehorn Drive, Reno, also was present but had to leave early. Her questions were: (1) Why aren't there going to be four lanes down to Wedge Parkway from

Thomas Creek? There are many children and residents who use Thomas Creek, cross to the park and walk or bike to the market. Thomas Creek through Saddlehorn will take on too much traffic. (2) What will the speed limit be on Whites Creek Lane? (3) Why can't Zolezzi Lane, Whites Creek and Mt. Rose be access roads into the project since its boundaries reach as far north and south as Zolezzi and Mt. Rose?

There being no others wishing to testify either in favor or opposition to the proposed development agreement, the Chair declared the public hearing closed.

Commissioner Stroble stated it was his feeling that the road system should have been designed first. He said traffic would be extremely bad and he would like to see the master plan revisited, particularly regarding transportation, before the Commission makes its decision.

Commissioner Preku asked the developer's representative how many lots can be developed under the area plan. Ms. Tryggvi responded that the zoning and area plan for this area is almost identical. They would be allowed 1,090 units, one unit per three acres, contrary to an earlier comment.

Commissioner Reddicks asked the ownership of those parcels on the south side of proposed White Creek Lane. He asked if it would be possible to acquire some of that right of way in order that the road be built as far south and away from the residences as possible. Ms. Tryggvi indicated that there had been some discussion about this. There is a thirty-three foot easement that exists along those properties. Deputy District Attorney Nash indicated that it is unclear whether rights of way along that area are to the benefit of private citizens or to the public. Mr. Reddicks encouraged Ms. Tryggvi to contact those private owners to determine their willingness to allow that property to be used for the roadway. Mr. Harper stated that this issue was brought up during the discussion of the special assessment district on this property, and the Commission encouraged investigating this, the road should be kept as far away of the Field Creek residents as possible.

Commissioner Reddicks stated that the Commission had worked long and hard for the benefit of those who might have arrived recently and are now living in this area. As to the Commission's cavalier attitude, he said he took exception. The road network has been decided upon by endless, endless, painful hours of public hearing and input from every sector. Through that process the Commission arrived a traffic plan with the RTC and State and everybody working together. This road plan was established long before the approvals of Saddlehorn or Field Creek. It is unfortunate the developer and his realtors were remiss in not telling the purchasers of the roadway going behind this subdivision. There is every reason for the residents to be furious. However, it is not the County, the Planning Commission or the people who worked for years for this road network that they should be angry at. He said he felt the people of Thomas Creek who had come out tonight to discuss the issue have had their lifestyle changed because of the newer subdivisions in the area.

Commissioner Reddicks continued by saying that the County has a land use plan and an area plan with roads. The developer has the zoning, approved through multitudes of hearings. The network is there for the specific purpose of serving applicants as the one before the Commission tonight who has made their application based on the zoning and transportation plan that was in place when it agreed to purchase the property. It would be unfair, after all the years and work engineering and planning this project, to decide to revisit the transportation plan. He said the County has made its decisions, it ought to live with them and they are not bad. Based on the developer's Genoa Lake development, he felt Southwest Pointe would enhance the area and said he was very much in favor of the project.

Commissioner Johnson stated she concurred with Commissioner Reddicks.

Commissioner Metcalf said he would like to reemphasize what Commissioner Reddicks had said. He personally had spent a thousand hours working on the road network in the southwest and that he admitted he is selfish about it. Things had change, but they had changed to the point that there is no longer a north/south alternative. He reminded the Commission and audience that there are 2016 signatures still on file stating "no north/south corridor", and there would not be a freeway as far south as it is today, if there had not been caring people who fought for it.

In response to Commissioner Metcalf regarding Condition No. 51, Ms. Tryggvi responded that the developer was planning to dedicate open space in phases. There was considerable discussion of the possibilities of hindering both the developer and the County in being to specific in its requirement. However, Mr. Harper indicated that may be a means of handling this in the development agreement. Mr. Murphree noted that Condition No. 93 in the staff report, requiring an open space plan and map prior to the final approval of the development agreement.

Commissioner Metcalf said he was not in favor of the staff's recommendation for an access at the top of Zolezzi Lane. He added that he also had *problems with the seventy-foot berm* being proposed for the retention basin. He expressed a fear should such a facility be damaged in the future.

Commission Rock stated that he would like to see the staff have the five years to look at the design, etc. of a flood control facility and whether the people have an appetite to invest in one.

Commissioner Rock moved, seconded by Commissioner Oakes, that the Commission recommend approval of Development Agreement Case No. DA9-1-93, subject to the conditions and findings in the staff's report dated December 3, 1993, excluding the requirement of a secondary access through Welcome Way, and that the approval included the applicant's requested amendments to those conditions, as contained in its memorandum dated January 18, 1994.

Commissioner Strobel stated that he realized that he was fairly new to the Commission and there had been a lot of time spent on this subject. However, he felt it was not too late to revisit the issue, perhaps there were still other alternatives. Also regarding the statements early in the hearing about representations made by the developer.

The motion passed by the following vote: Ayes: Commissioners Johnson, Metcalf, Oakes, Preku, Rock and Reddicks; Nays: Commissioner Strobel; In Abstention: None; Absent: None.

In the event of an appeal and in accordance with Chapter 110 of the Washoe County Code, it will be necessary that the Washoe County Board of County Commissioners hold a public hearing on this case, notice of which must be published at least ten (10) days prior to the date of said hearing.

#### STAFF REPORT DATED JANUARY 11, 1994

##### ISSUES

##### STREETS/TRAFFIC

Two roads shown in the Southwest Area Plan will be used by the applicant to access the project. Zolezzi Lane is shown as a collector street and Whites Creek Lane as a minor arterial. Whites Creek Lane will be constructed by the applicant from the project site to Thomas Creek Road before the first residential building permit is issued and will be extended to Wedge Parkway prior to the

85th building permit. The design of Southwest Pointe has been revised to direct all the projected traffic to use Whites Creek Lane as the primary road serving the project. Except for a gated emergency access along Zolezzi Lane, the applicant is proposing Whites Creek Lane being the only road providing access to the site. It has been the County's position in other applications that at least two separate means of ingress/egress, to County public road standards, be provided for every development.

The applicant is proposing a unique design for Whites Creek Lane to meet the intent of having two means of access into the site. The applicant is proposing that Whites Creek Lane be four lanes with two 29 1/2'-cartways and a thirty foot landscaped median from Thomas Creek Road into the project. A multi-purpose pedestrian/bicycle path would be provided outside of the right-of-way.

Staff does not believe this design meets the intent and purpose of having two separate means of access for a subdivision. The large size of this project amplifies the need for two separate roads serving the project. The purpose of having more than one access is for the safety for the residents. In the event that the primary access becomes blocked, an alternate means of entering or leaving the site is provided. The applicant is proposing Zolezzi Lane be used for emergency purposes only, gated and designed to emergency standards.

Another reason for having two separate means of access is to distribute traffic and reduce the projected traffic volumes from being concentrated on a single road. Zolezzi Lane is identified as a collector in the adopted area plan. Staff recommends that a second access be provided into the site using Zolezzi Lane. The new design of the project directs almost all of the projected traffic to use Whites Creek Lane and not Zolezzi Lane. Staff recommends that the internal loop road be extended to Welcome Way to provide a second access that is constructed to County local street standards.

If a road connection is made to Zolezzi Lane, the design of Whites Creek Lane, as proposed by the applicant, would only be for the on-site portion of the road. The remaining section, connecting to Thomas Creek Road, would only be constructed to County standards, without the landscaped median.

#### **Construction Haul Route**

The developer is proposing to use Thomas Creek Road, from the Mt. Rose Highway to Whites Creek Lane, as the construction haul route for the first 85 dwelling units. A traffic analysis and an intersection design for Thomas Creek Road/Whites Creek Lane would have to be prepared by a licensed Nevada Civil Engineer, as improvements will have to be made to Thomas Creek Road by the applicant to use this route. Prior to the 85th residential building permit being issued, Zolezzi Lane may be used to bring empty construction equipment, that is necessary to grade the golf course and install necessary utilities, onto the site. The primary construction haul route will become Whites Creek Lane once it is connected to Wedge Parkway.

Any haul route will need to be approved by the County Engineer and improvements made to his satisfaction. All individual home builders will be required to use the approved haul route.

#### **REGIONAL STORMWATER DETENTION**

The 1990 Kennedy/Jenks/Chilton report and the 1993 COE Thomas Creek Reconnaissance Investigation report state the need for a flood detention facility to be constructed along Thomas Creek for protecting existing and future developments near South Virginia Street. Two sites are

proposed for the construction of a detention facility. Both of the sites are located on the Southwest Pointe property where the school and park sites are proposed.

As the Utility Division has indicated that the southern site is the more likely to be utilized, staff is recommending it be reserved for period of five years, and if constructed, be dedicated to the County. Should the flood detention facility be constructed, the middle school site and park location would not be offered for dedication by the applicant. If the Kennedy/Jenks/Chilton report is not adopted by the County, or if other suitable alternative solutions are found to reduce the downstream flooding, this site should be offered for dedication for the school and park uses.

#### **CITIZEN INPUT**

Staff has received numerous inquiries from residents who live in the Field Creek subdivision. Many of these resident's homes are adjacent to the proposed Whites Creek Lane. As part of the Field Creek development, a 100' right-of-way was dedicated to the County for this road. Many of the residents are concerned with the noise and other impacts that a new road will create. Staff and the applicant's agent met with these homeowners to discuss their concerns.

None of the affected homes were created when Whites Creek Lane was included in the adopted area plan. The residents feel they were not notified about the future road being located behind their homes and they would like the road alignment to be relocated to the south. Some residents would like to see a north-south road be constructed through the Southwest Pointe development to relieve some of the projected traffic demand projected on Whites Creek Lane.

#### **ANALYSIS**

Since the December 7, 1993 public hearing held by the Planning Commission concerning Southwest Pointe, the applicant has substantially revised the concept plan to reflect most of staff's recommendations. This report will address only the remaining issues that staff and the applicant cannot agree on and which require direction from the Planning Commission. The issues, findings and recommendations contained in the December 3, 1993 staff report still reflect staff's position concerning this application.

#### **STAFF REPORT DATED DECEMBER 3, 1993**

#### **ANALYSIS**

#### **DEVELOPMENT AGREEMENT PROCESS**

The development agreement consists of two steps as presented in the Washoe County Development Code. The first step in the process is the preliminary development agreement which consists of a document which describes the project and either a concept plan or a site plan. The applicant for Southwest Pointe has submitted a concept plan for the entire project along with a site plan for phase I development.

The applicant may also choose to submit other applications concurrently with the preliminary development agreement. As part of Southwest Point, for example, a tentative map application for phase I and accompanying special use permits for a water storage system, a child care facility, a village commercial center, two golf courses, driving range and recreation facilities, and an

equestrian center have also been submitted for review. It is anticipated these subsequent applications will be heard after the preliminary development agreement has been approved by the Planning Commission.

The Planning Commission has until March 15, 1994 to take action on the preliminary development agreement application. If the preliminary development agreement is approved by the Planning Commission, a public hearing shall be scheduled before the Washoe County Board of County Commissioners within 30 days of the approval date. If the County Commissioners choose to modify the development agreement, the modification shall be referred to the Planning Commission for consideration.

As this project exceeds the threshold for the amount of housing units, need for waste water treatment and water usage, and amount of traffic generated, the proposed development is considered to be a project of regional significance. Once the Board of County Commissioners approves the preliminary development agreement, the Truckee Meadows Regional Planning Commission will review it to determine whether it complies with the Truckee Meadows Regional Plan.

The Director of Development Review shall review and find the final development agreement is the same development agreement as approved by Washoe County and the Truckee Meadows Regional Planning Commission. The Washoe County Board of County Commissioners shall execute the final document.

No development of the project may begin until the final development agreement has been approved and filed for recordation with the County.

#### **PROJECT DESCRIPTION/DESIGN**

The proposed development consists of  $\pm$ 3,272 acres and is located in the southwest truckee meadows area. The subject property is located west of Zolezzi Lane and Thomas Creek Road and is north of the Mount Rose Highway. The Toiyabe National Forest is located along the west property line. Both Thomas Creek and Dry Creek cross the property. Also located on the site are two water tanks that were constructed by the South Truckee Meadows General Improvement District, and an easement for a 120 Kilovolt electrical transmission line that bisects the site in a north/south direction. A vicinity map is attached.

The proposed development consists of 1,090 single family residences, two 18-hole golf courses, a recreational center with tennis courts and a driving range, an equestrian center and a day care facility.

The residential component of this project will consist of lot sizes that range from one acre and larger lots (approximately 45 percent of residential units), 15 percent will be a minimum 1/2 acre lots and the remaining 40 percent will be a minimum of 12,000 square feet. The percentage of varying lot sizes is intended to be flexible in the concept plan. The exact proportion will be incorporated into the site plan for each phase to be included in the final development agreement. The proposed density and lot sizes are consistent with the adopted Southwest Truckee Meadows Area Plan.

The proposed 20,000 square foot neighborhood commercial use is permitted as a special use permit. This use is consistent with the goals and policies of the Comprehensive Plan and is compatible with the overall design of the project. By locating the neighborhood commercial use in a central location, it will internalize many pedestrian and vehicular trips within the project. The

relatively small size of the use is not large enough to generate a large number of vehicle trips from outside the project.

The proposed golf courses add to the rural atmosphere that many area residents have supported. Care must be taken, however, to ensure that any runoff does not negatively impact the water quality in the area.

#### **PHASING**

The project shall be developed in three phases. Phase I includes a tentative map for 410 lots, an 18-hole golf course, the village center and driving range. Phase II will include an additional nine holes, the equestrian center and a tentative map for approximately 230 dwelling units. Phase III includes the remaining 450 lots and the last nine holes of golf.

#### **STREETS/TRAFFIC**

The following policies from the Washoe County Comprehensive Plan relating to traffic are relevant to this application:

**LUT.2.4 REQUIRE THAT ROADWAY FACILITIES BE MAINTAINED AND CONSTRUCTED AS NEEDED TO ENSURE HIGH QUALITY AND SAFE TRAVEL.**

LUT.2.4.1 The minimum acceptable Level of Service (LOS) for all County maintained roadway facilities shall be LOS C.

**LUT.2.5 DEVELOP FINANCIAL PLANS TO ENSURE MAXIMUM COLLECTION AND EFFICIENT EXPENDITURES OF TRANSPORTATION IMPROVEMENT FUNDS.**

LUT. 2.5.3 The financial responsibility for providing all local internal roads and all collector roads needed to connect new development to the regional arterial roadway network should be borne by the development(s) which benefit from their construction. Impact program fee credits shall not be provided for any roadway that does not provide a regional benefit beyond serving the development or developments for which it was originally constructed.

The following policies from the Southwest Truckee Meadows Area Plan relating to traffic are relevant to this application:

**SWTM.4.1 ENSURE THAT CONSTRUCTION OF ROADWAY IMPROVEMENTS ARE ACCOMPLISHED IN A FASHION THAT SUPPORTS THE TRAFFIC EXPECTED ON OPENING DAY. IN THE CASE OF FACILITIES THAT CAN BE CONSTRUCTED TO A LOWER CLASSIFICATION TO SUPPORT THE OPENING DAY TRAFFIC (E.G. COLLECTOR VS. MINOR ARTERIAL), THE LOWER CLASSIFICATION FACILITY SHALL BE CONSTRUCTED.**

**SWTM.4.2 REQUIRE ANY DEVELOPMENT PROPOSAL THAT MUST HAVE ACCESS TO WHITES CREEK ROAD TO MEET THE FOLLOWING CONDITIONS WHEN APPROPRIATE:**

**A. CONTRIBUTE TO CONSTRUCTION OF THE WHITES CREEK ROAD.**

**B. TIME CONSTRUCTION OF THE DEVELOPMENT WITH COMPLETION OF THE APPROPRIATE PORTION OF THE WHITES CREEK ROAD NEEDED FOR THAT DEVELOPMENT.**

The proposed project, beginning with phase I, will need to be served by two roads, Zolezzi Lane and Whites Creek Lane. Zolezzi currently stops near the Reno Christian Fellowship and Whites Creek Lane does not extend to the site. The applicant is proposing to extend Zolezzi Lane to their property line, and construct Whites Creek Lane from Thomas Creek Lane to their property line, connecting them with an internal loop road. The applicant is proposing to dedicate the loop road to the County when it is completed.

**Zolezzi Lane**

The applicant is proposing to extend Zolezzi Lane to their site. Zolezzi Lane is identified as a collector in the Southwest Truckee Meadows Area Plan. As a collector, the Area Plan requires that two through-lanes be provided with sufficient road width for a turning lane for a minimum of 60 foot right-of-way (r.o.w.). In order to maintain the adopted County standard for a level-of-service "C" (LOS C) the maximum daily trips cannot exceed 9,580 along Zolezzi Lane. Although the Area Plan states the need to upgrade Zolezzi Lane to a minor arterial by the year 2007, there is insufficient r.o.w. to expand this road. Further, the Area Plan policy recommends that, when possible, roads should be constructed to the lower classification.

Although there is existing capacity in Zolezzi lane to accommodate additional trips, most of this available capacity will be absorbed by approved/unbuilt development. The applicant for Southwest Pointe is requesting to use the remaining capacity to serve phase I (410 dwelling units) of the development. The Regional Transportation Commission (RTC) has reviewed this application and concurs that the trips generated from phase I could leave Zolezzi Lane operating at LOS C, but the traffic generated from existing approved/unbuilt projects in the area would greatly exceed the remaining capacity when they are constructed. Should traffic along Zolezzi Lane exceed its available capacity, one of two options would need to be completed to accommodate the additional demand.

One option would be to upgrade Zolezzi Lane to a minor arterial classification. Four lanes of roadway would be needed. The current design of Southwest Pointe will cause Zolezzi Lane to fall below the County standard LOS C. If the current design is approved, the applicant will need to apply for an amendment to the Comprehensive Plan to upgrade Zolezzi Lane from a collector to a minor arterial.

Zolezzi Lane is shown on the area plan as a two lane collector (60 foot ROW) and, therefore, would not have the capacity for the build out traffic volumes expected (13,421 ADT for Southwest Pointe alone) using the County adopted LOS C. Presently, the right-of-way for Zolezzi Lane is a mixture of 60, 70 and 80 feet. There are a number of existing homes that front on Zolezzi Lane, which arterial standards do not permit, and several existing residential streets, that are spaced closer than what is allowed by arterial standards, provide access for the surrounding developments. These constraints would make it very difficult to upgrade Zolezzi Lane to a minor arterial standard, which is needed to carry the anticipated traffic volumes. Staff does not recommend approval of the current design of Southwest Pointe or the upgrading of Zolezzi Lane.

The second option would be to construct Whites Creek Lane from Thomas Creek Road to Wedge Parkway and eventually South Virginia Street. Although many projects in the area are dependent on using Zolezzi Lane, traffic from Southwest Pointe can be directed towards Whites Creek Lane, which would eliminate the need to upgrade Zolezzi Lane.

The RTC estimates that with all of the approved/unbuilt development in the area that will have to use Zolezzi Lane, there would be sufficient capacity remaining to accommodate an additional 1,000 trips from Southwest Pointe. This is equivalent to approximately ten percent (100 dwelling units) from Southwest Pointe.

Staff and RTC recommend the design of Southwest Pointe be revised to allow a maximum 109 dwelling units to access Zolezzi Lane. Additionally, a monitoring program should be initiated by RTC, as part of phase I development, in order that annual counts be made to determine when Zolezzi Lane reaches a LOS C. Once this threshold has been reached, no further building permits in the Southwest Pointe development would be issued until Whites Creek Lane is constructed from the project site to its terminus at South Virginia street.

### **Whites Creek Lane**

In the preliminary development agreement, the applicant is proposing to construct Whites Creek as an emergency access from their project to Thomas Creek Lane. The absence of Whites Creek Lane will contribute to the congestion of Thomas Creek Road. The Area Plan identifies Whites Creek Lane as a minor arterial with a 100 foot r.o.w. Staff recommends that Whites Creek Lane be constructed to County standards by the applicant as a two lane street from the project site, through the U.S. Forest Service property, and connect to Thomas Creek Road as part of phase I construction. The intersection design of Thomas Creek Road and Whites Creek Lane will need to be approved by the County Engineer. To accommodate the remaining 90 percent of the traffic generated by the project, Whites Creek Lane will need to be constructed to four lanes from Thomas Creek Road to its intersection with the secondary loop road.

The developer is proposing to use the monies collected from the County interim fee program to pay for the construction of Whites Creek Lane from Thomas Creek Road to Wedge Parkway. The following street improvement projects are listed in the FY 1992-97 Washoe County Capital Improvements Program:

- Construct new arterial (Wedge Parkway) from the Mt. Rose Highway to Zolezzi Lane.
- Construct Whites Creek Road from Thomas Creek Road east to the new arterial (Wedge Parkway) connecting the Mt. Rose Highway and Zolezzi Lane.

Prior to the approval of the final development an "area wide" Transportation Study be performed by to assess the offsite roadway requirements of this project. The study should consider (a) the effects of all existing development, (b) effect of all possible future developments, (c) an analysis of the operation of the existing intersections affected by this project, and (d) a design of the Wedge Parkway/Zolezzi Lane intersection including an alignment study for Wedge Parkway between Whites Creek Lane and Zolezzi Lane. The objective of the study is to determine the cumulative effects of development in the study area. The applicant shall pay their fairshare cost for the "area wide" Transportation Study.

### **Internal Streets/Project Design**

To ensure that Whites Creek Lane is the preferred means of access for future residents of Southwest Pointe for all but ten percent of future dwelling units, the concept plans and subsequent tentative maps will need to be revised to direct traffic towards this road. These revisions should include, but not be limited to:

1. relocation of the day care center near the proposed elementary school, relocate both schools to the north of Whites Creek Lane;
2. design of the school sites to avoid having a "reduced speed zone" along Whites Creek Lane;
3. construction of an all weather pedestrian and bicycle improvements should be made along Whites Creek Lane and the two loop roads;
4. redirection of streets and entrances in the concept plans towards Whites Creek Lane; and
5. development and submittal of a pedestrian circulation plan as part of the final development agreement.
6. elimination of the access of the secondary loop road to Zolezzi Lane between the equestrian center and the driving range.

### **Construction Haul Route**

The developer is proposing to use Thomas Creek Road to the Whites Creek Lane (west of Thomas Creek Lane) as the construction haul route for the entire project. Improvements will have to be made to Thomas Creek Lane by the applicant to use this route. A traffic analysis and an intersection design for Thomas Creek Road/Whites Creek Lane would have to be prepared by licensed Nevada Civil Engineer. An analysis of Thomas Creek Road/Mt. Rose Highway intersection would also be needed. The primary construction haul route will become Whites Creek Lane once it is connected to Wedge Parkway.

Another possible alternative for construction haul route would have the applicant construct a alternative access to the site, possibly using the existing maintenance road for the power line that bisects the site.

Staff does not recommend Zolezzi Lane be used for construction traffic as this street currently functions as a residential collector and would be unsafe as a haul route, especially over a 15 year build-out period.

Any haul route will need to be approved by the County Engineer and improvements made to his satisfaction. All individual home builders should be required to use the approved haul route.

### **PARKING/STREET DESIGN**

In order to maintain a rural character, the applicant is proposing to have "rural roads" and "rural cul-de-sacs" which do not allow on-street parking. While the absence of on-street parking adds to the rural character of the neighborhoods, staff is concerned about the lack of space for additional parking. The applicant is proposing to add areas for additional parking at a ratio of one space per three homes. Staff concurs with this idea with the understanding that auxiliary parking areas not be located farther than 300 feet from surrounding homes and that parking lots be screened and landscaped.

In addition to the off-site parking, staff recommends that additional space be provided for storage within garages of homes on 12,000 square foot lots. This would help homeowners use the garage for parking their cars and not as a storage room.

According Chapter 85 Washoe County Code, all private and public streets must have a minimum 50 foot right-of-way and be improved to Washoe County Public Works standards. The developer is proposing to construct some of the streets that have a 41 foot right-of-way.

### **Golf Course Crossing**

No "at-grade" crossings for golf carts will be allowed along the primary loop road as this will become a County collector street. Golf cart crossings will have to be underground or by a bridge over the street. Staff recommends a tunnel crossing be used to avoid the appearance of a large structure that a bridge would create. The design for cart-crossings on the private streets shall be reviewed and approved by the County Engineer.

### **North-South Road**

During the review process, TMS/Tessa expressed their concern about the proposed traffic circulation plan around Southwest Pointe. This developer would like to see a road constructed that would connect the Mt. Rose Highway to either Zolezzi Lane or Whites Creek Lane. A north-south connection was not considered by the applicant of Southwest Point or by staff since it is not proposed in the adopted Area Plan.

### **OPEN SPACE/CONSERVATION**

As part of the project design, approximately 1,575 acres of natural open space would be provided in addition to a 10-acre park site, six-acres of regional trails and one-acre trail head. The concept plan concentrates most of the development in the center of the site and is surrounded by an open space buffer.

The following policy from the Washoe County Comprehensive Plan concerning wildlife habitat is relevant to this application:

#### **C.2.15 PROTECT KEY WILDLIFE HABITATS; HABITATS OF THREATENED, ENDANGERED OR RARE SPECIES; AND KEY MIGRATION ROUTES.**

The Nevada Division of Wildlife (NDW) has reviewed this application. This project is located in the critical winter range for the mule deer that inhabit the Carson Range. Mule deer migrate to these lower elevations to escape deep snow and to forage. The NDW supports the "mitigative zoning and buffer aspects" of the project, but note that special efforts to maintain browse shrubs within the buffer and fire protection zones should be included in the development. The NDW also notes its concern about the proposed golf course and their attraction by Canada geese. The developer should continue to work with the NDW throughout the construction of the project to address these issues.

The following policy from the Washoe County Comprehensive Plan concerning archaeological preservation is relevant to this application:

#### **C.1.3 DO NOT KNOWINGLY ALLOW DESTRUCTION OR LOSS OF A CULTURAL OR SCENIC RESOURCE THROUGH A DISCRETIONARY ACTION (E.G. LAND USE PLANNING) OR ADMINISTRATIVE ACTIONS (E.G. ISSUANCE OF BUILDING PERMITS) UNLESS: (A) THE SITE OR RESOURCE HAS BEEN REVIEWED BY THE DIVISION OF HISTORIC PRESERVATION AND ARCHEOLOGY AND THE APPROPRIATE LOCAL GOVERNMENT AND HAS BEEN FOUND TO BE OF INSIGNIFICANT VALUE, OR (B) THERE IS AN OVERRIDING PUBLIC BENEFIT FROM THE PROJECT AND MITIGATION MEASURES TO OFFSET THE LOSS ARE MADE PART OF THE PROJECT.**

- C.1.3.1 The Washoe County Department of Development Review will request an archeological/historical survey during the planning stages of a project if the project is located in an area of high archaeological sensitivity that has not been previously surveyed.
- C.1.3.2 The Washoe County Department of Development Review will request project design guidelines (e.g. clustering of buildings visual or aesthetic standards, and buffering) in areas found to have cultural and/or scenic value in order to avoid loss or degradation of the resource.

The Nevada State Historic Preservation Office (SHPO) has reviewed the proposed project and a number of archaeological sites are present within the subject property. The SHPO recommends that a cultural resources survey be conducted for previously unsurveyed areas and that previously recorded, unevaluated sites be evaluated for their significance (National Register Eligibility).

A preliminary wetlands investigation was prepared by the applicant and three types of waters/wetlands were found. Most of these areas are located along streams and creeks. A final wetlands delineation, and approval by the Army Corps of Engineers, shall be included as part of the final development agreement.

The following policy from the Washoe County Comprehensive Plan concerning protection of riparian vegetation is relevant to this application:

**C.2.4 REGULATE DEVELOPMENT IN ORDER TO PROTECT THE RIPARIAN VEGETATION ASSOCIATED WITH THE TRUCKEE RIVER AND THE STREAMS, CREEKS AND WETLANDS OF THE REGION.**

- C.2.4.1 In order to protect vegetation along streams and the Truckee River, the Washoe County Department of Development Review will require the following, as appropriate, during development review:
  - a. Establishment of setbacks from the top of the bank.
  - b. Regulation of the removal of trees and other vegetation.
- C.2.4.2 As appropriate, the Washoe County Department of Development Review will direct the design of new roads, housing, subdivisions, and other land uses in streamside areas so that riparian vegetation is retained and the streams remain open and unfenced.
  - a. When roads must be constructed parallel to a stream, they should be built with a wide separation of the road from the stream and no homesites placed between the road and the stream. The land between the road and the stream should remain as open space and could include planned trails or bicycle paths.
  - b. Free movement and access to the stream and to the riparian areas shall be permitted.

There are two areas within the project that have riparian vegetation. Some of the proposed development is adjacent to these areas. Special attention must be given to buffer these areas from

any site disturbances. Buffers shall be provided in the design of future subdivision and golf course development.

Pursuant to section 110.408.45 of the Development Code, provisions for the common open space development shall be conditioned upon approval of the tentative subdivision. Provisions shall be made to monitor and maintain, for a period of three-years regardless of ownership, a maintenance plan for the common open space area. The maintenance plan for the common open space area shall, as a minimum, address the following:

- (1) Vegetation management;
- (2) Watershed management;
- (3) Debris and litter removal;
- (4) Fire access and suppression;
- (5) Maintenance of public access and/or maintenance of limitations to public access; and
- (6) Other factors deemed necessary by the Planning Commission or the Board of County Commissioners.

Prior to the approval of the final development agreement, a maintenance plan shall be prepared and submitted to Development Review staff for review. Provisions shall be made for the permanent preservation and ongoing maintenance of the common open space and other common areas. CC&R's (with the County as an interested party) are generally utilized as the legal instrument for enforcement.

A deed restriction should stipulate what uses will be permitted in the common open space and prohibit future sale of properties without the consent of the County.

An open space management plan and map should be prepared that identifies the ownership of all open space and who will be responsible for maintaining these areas. The common area located within the development shall be identified as equal fractional ownership between all lots in this development and any maintenance shall be perpetually funded and privately maintained by the homeowner's association.

## **RECREATION**

### **C.2.19 ENCOURAGE SUBURBAN RESIDENTIAL SUBDIVISIONS TO INCLUDE LANDSCAPING WITH TRAILS, AND BIKE PATHS IN THE DESIGN OF ALL BUFFERS AND OPEN SPACE.**

As previously stated, a 10-acre park site is offered for dedication to the County. A sketch plan has been submitted, which conceptually approved by the County, should be included in the final development agreement. The applicant is proposing to enter into an agreement with Washoe County where the developer would construct the recreational facilities in the park. The developer would then be reimbursed for the cost of the construction from the Residential Construction Tax. The applicant is also proposing that the homeowner's association would be responsible for maintaining the park.

As part of project, approximately six miles of trails will be located in the common open space to be dedicated to the County or other public body. The developer will work together with staff from the Department of Parks and Recreation to locate the regional, public trails to the satisfaction of Washoe County and the developer.

## **AIR QUALITY**

The District Health Department has reviewed this application and is concerned about the amount of dust that will be created from the large amount of grading needed for this project. The area in question is subject to gusty wind conditions, especially during the spring and summer months. Prior to a grading permit being issued, a detailed dust control plan must be submitted to, and approved by, Air Quality Management, for each phase of development.

## **DRAINAGE/STORMWATER MANAGEMENT**

- PSF.3.8. CONTROL STORMWATER RUNOFF FROM NEW DEVELOPMENTS TO:**
- A. PREVENT SILTATION AND POLLUTION OF LAKES, RIVERS AND STREAMS.**
  - B. PREVENT EROSION, FLOODING AND OTHER SURFACE WATER DAMAGE.**
  - C. PREVENT INCREASES IN DOWNSTREAM PEAK FLOWS.**
  - D. PRESERVE AND ENHANCE THE REGION'S WATER RESOURCES.**

PSF.3.8.2 The Washoe County Department of Development Review will ensure that new development provides on-site detention and drainage facilities as needed to make sure that development of the site does not adversely impact downstream properties and is consistent with the wetlands protection policies.

Properties downstream in Thomas Creek and Dry Creek are currently subject to flood damages during 100-year flood events. The project will require control of post-development 100-year runoff rates from on-site activities to pre-development conditions.

Thomas Creek is to become a major source of drinking water for the South Truckee Meadows. The storm water and urban drainage from this project cannot be allowed to degrade the water quality in Thomas Creek. The storm water and urban drainage from this project will require treatment prior to discharge into Thomas Creek to control sediment, oils, grease, nutrients and other chemicals that are used on landscaping.

The project design proposes on-site detention ponds are to be incorporated into the project design. All detention basins shall be maintained by the developer, and eventually the home owners association. The detention facilities will need to be designed to incorporate control of the above mentioned contaminants, and include operation and maintenance schedules and periodic water quality sampling. In addition to detention facilities, systematic cleaning of the streets, parking lots and catch basins, and control of salt and sanding activities need to be delineated. All of these activities should be included into an storm water and urban drainage management plan that will be incorporated into the final development agreement.

Dry Creek is not anticipated to become a source of drinking water but does flow, in many locations, into Steamboat Ditch which will become a source of drinking water for the South Truckee Meadows. The stormwater discharges from this project that flow to Dry Creek will need to be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. Drainage structures under Steamboat Ditch should also be provided that would pass the 10-year frequency storm event.

The proposed golf courses will need to be designed to prevent direct discharge of surface water runoff to Thomas Creek. A golf course management plan will need to be prepared and included in the final development agreement, that documents how the migration of fertilizers, pesticides, herbicides and fungicides to surface and ground waters will be prevented. A surface and ground water sampling program will also need to be implemented to demonstrate that migration is not occurring, and commits to modifying practices in the event that any of the above materials are detected.

The proposed equestrian center's drainage, unless properly designed, could contain significant quantities of bacteria, nutrients, and other animal waste products. These animal wastes, if discharged into Thomas Creek, would be very detrimental. An animal waste management plan for the equestrian center should be prepared and submitted prior to any permits being issued for this use.

Construction of this project without the imposition of erosion and sediment controls during construction would negatively impact Thomas Creek and Steamboat Ditch. A construction management plan with erosion and sediment controls, and operation and maintenance schedules along with sampling of Thomas Creek above and below the project, will need to be prepared and included in to final development agreement.

Snow storage areas are needed for this project and need to be shown on the tentative maps.

#### **REGIONAL STORMWATER DETENTION**

The 1990 Kennedy/Jenks/Chilton report and the 1993 COE Thomas Creek Reconnaissance Investigation report state the need for a flood detention facility to be constructed along Thomas Creek for protecting existing and future developments near South Virginia Street. Two sites are proposed for the construction of a detention facility. Both of the sites are located on the Southwest Pointe property where the school and park sites are proposed.

It is staff's recommendation that the off-site location be reserved for period of five years. If the Kennedy/Jenks/Chilton report is not adopted by the County, or if other suitable alternative solutions are found to reduce the downstream flooding, this site should be used for the school and park uses.

#### **EMERGENCY RESPONSE**

The Washoe County Comprehensive Plan recommends that a maximum 10 to 15 minute response time for police be provided for residential development. According to the Washoe County Sheriff's office, the current response time for emergency calls in this area is approximately 14 minutes and 20 minutes for non-emergency calls. Although the Sheriff's office will be able to serve this project by using Zolezzi Lane, there will be an increase to the overall response time. To reduce response for this project and other development in the area, the Sheriff's office recommends that a north/south arterial be constructed thorough this subdivision.

The following policy from the Washoe County Comprehensive Plan relating to fire protection is relevant to this application:

- C.2.6            ENCOURAGE NEW AND EXISTING DEVELOPMENT IN OUTLYING AREAS TO ESTABLISH FIREBREAKS, AND RELOCATE AND/OR MAINTAIN FIRE ROADS WHEN SUCH ROADS ARE IMPACTED BY THE DEVELOPMENT.**

The Washoe County Comprehensive Plan recommends that a maximum 5 to 10 minute response time for fire protection be provided for residential development. This project is located within the boundaries of the Sierra Fire Protection District, Galena area and would be served by the existing station located approximately two miles west of the Mt. Rose Highway/Thomas Creek Road intersection. The Nevada Division of Forestry (NDF) is requiring that at least two 24 foot wide emergency access roads be provided from public right-of-ways. The NDF agrees with the Sheriff's office that a north/south road be provide from Callahan Ranch Road. As a minimum, Whites Creek Lane should be extended from the project site to Thomas Creek Lane as part of phase I.

The NDF is also requiring that perimeter road, at least 30 feet wide, be provided around the project to serve as access for emergency vehicles and as a fuel break for fire suppression. One possible method of providing a fuel break along the western project boundary is to locate the golf fairways between homes and the foothills. The developer is proposing to dedicate a one-acre site for a fire station along Whites Creek Lane near the proposed schools.

The Southwest Pointe Project is adjacent to the Truckee Meadows Fire Protection District (TMFPD). There has been some discussion about the project site being annexed by the TMFPD. Should this annexation occur, the developer will need to comply with the TMFPD requirements. Southwest Pointe should be designed to address the concerns of the fire protection agency that has jurisdiction of the project at the time of the final development agreement.

#### **PUBLIC SERVICES AND FACILITIES**

The following policy from the Washoe County Comprehensive Plan relating to water quality is relevant to this application:

**PSF.1.20 ENSURE WATER QUALITY STANDARDS ARE MAINTAINED CONSISTENT WITH THE SAFE DRINKING WATER ACT AND IN COMPLIANCE WITH THE NEVADA WATER POLLUTION CONTROL LAW AND UNDERGROUND INJECTION PROGRAM.**

PSF.1.20.1 The Washoe County Department of Development Review, in conjunction with other appropriate agencies, shall evaluate potential groundwater quality impacts for any project meeting the criteria for a Project of Regional Significance. A mitigation plan shall be developed and approved for those projects which are determined to have significant impacts on groundwater quality.

The proposed the method of water supply is by the development of a new water system. Washoe County has drilled a series of test holes in the vicinity of the proposed development. It appears there are areas where there is a high likelihood of finding water sufficient in quantity and quality to serve this project. Additional testing of the wells Continued access to the existing monitoring wells must be provided or new wells should be provided by the applicant.

It is anticipated that Thomas Creek will eventually contribute to a surface water treatment plant. The Utility Division is concerned with activities occurring within this watershed. Development plans within the area of any well will be looked at carefully from the perspective of wellhead and groundwater protection.

A master plan for the phasing of dedication of water rights should be included in the final development agreement. Sufficient water rights will needed to serve the 1,090 homes, two golf courses, village center, school sites and park facility.

Southwest Pointe will be served by the South Truckee Meadows Wastewater treatment plant. Evidence that sufficient capacity to serve this project shall be provided to staff prior to final map approval.

The following policy from the Washoe County Comprehensive Plan relating to water quantity is relevant to this application:

**PSF.1.24 REDUCE WATER DEMAND THROUGH XERISCAPE LANDSCAPING, RECLAMATION, AND REUSE OF WASTEWATER FOR PARKS, MEDIANS, GOLF COURSES, AND OTHER APPROPRIATE APPLICATION USES.**

To reduce groundwater irrigation, the developer is proposing to utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. The developer should install the necessary infrastructure as part of the initial construction to utilize this resource when it becomes available.

**SCHOOLS/EDUCATION**

Children in the southwest attend the Galena High School, Pine Middle School and either the Elizabeth Lenz or Brown Elementary Schools. The following policy from the Washoe County Comprehensive Plan relating to education is relevant to this application:

**PSF.7.1 PROVIDE AN ADEQUATE LEVEL OF SCHOOL SERVICES FOR WASHOE COUNTY RESIDENTS IN RESPONSE TO GROWTH IN WASHOE COUNTY**

PSF.7.1.2 The Washoe County School District, in conjunction with the Washoe County Department of Comprehensive Planning, will determine the need and location of future school facilities to satisfy projected enrollment.

The applicant is offering to dedicate a 25-acre site for a new middle school and 10-acre site for an elementary school as part of the development agreement. The Washoe County School District supports both of these locations. As previously stated, however, these sites are the location for the dam sites proposed in the Kennedy/Jenks/Chilton report. Should the County choose not to reserve these sites for the flood detention facilities, or if an acceptable alternative is presented to address down stream flooding, it is recommended the proposed sites be dedicated to the County for the two schools. The location of the two schools should, however, be located to the north of Whites Creek Lane as shown in a sketch plan of the area.

**GEOLOGIC HAZARDS**

The Engineering Division is concerned about the location fault lines that are located within the right-of-ways of several streets. The following policy from the Washoe County Comprehensive Plan relating to geologic hazards is relevant to this application:

**C.2.9 ENSURE THAT TECHNICAL INFORMATION ON GEOLOGIC HAZARDS IS INCORPORATED INTO THE LAND USE PLANNING AND DEVELOPMENT PROCESS.**

- C.2.9.3 Prior to the approval of a development proposal, the Washoe County Department of Development Review will require geologic reports that identify potential hazards.. In areas where geologic hazards are identified, extensive soil, hydrology, and engineering studies must clearly demonstrate that the proposed development will not result in avoidable public costs and will not pose significant risk of earthquake, landslide, erosion, sedimentation and drainage problems.

The project was designed so that streets are parallel to the faults and not perpendicular. Fault lines will also be located outside the cub face.

#### **LANDSCAPING/ARCHITECTURE/PROJECT DESIGN**

The following landscaping policies from the Washoe County Comprehensive Plan are relevant to this application:

**LUT.1.16 ENCOURAGE LANDSCAPING THAT ENHANCES THE NATURAL ENVIRONMENT, COMPLEMENTS THE SURROUNDING ARCHITECTURAL STYLE, AND UTILIZES XERIC PRINCIPLES.**

- PSF.1.23.4 The Washoe County Department of Comprehensive Planning will attach conditions to all subdivision approvals mandating installation of conservation devices.

A landscaping and irrigation plan that complies with section 110.412.35 of the Washoe County Development Code should be included with future development applications. These landscaping plans should include proposed streetscapes, the village center/clubhouse, the equestrian center and common open space areas. This plan should also address maintenance responsibilities. It is recommended these plans be reviewed and approved by the Design Review Committee prior to the approval of the final development agreement.

The applicant is proposing to construct a meandering path system along most of the streets. The Engineering Division is concerned about the maintenance of these improvements since they extend outside of the right-of-way in some areas. Staff recommends the meandering pedestrian path design only if the developer, and eventually the home owners association, agree to perpetually maintain these areas.

#### **CITIZEN INPUT**

The Southwest Truckee Meadows CAB reviewed this application at their October and November meetings. It was the consensus of the CAB that they like the project design and that traffic is their primary concern. It is the CAB's recommendation that monies collected from County's Interim Fee program be used for the construction of roads (e.g. Whites Creek Lane and/or Wedge Parkway) that are needed to serve this development.

APPLICABLE REGULATIONS

Nevada Revised Statutes Chapter 278; Washoe County Code Chapter 110.

**GENERAL CONDITIONS**  
for  
**DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**  
for  
**SOUTHWEST POINTE**

(As recommended by the Washoe County Planning Commission at its  
January 18, 1994 meeting)

COMPLIANCE WITH THE CONDITIONS OF THIS DEVELOPMENT AGREEMENT IS THE RESPONSIBILITY OF THE DEVELOPER, ITS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY AND THEIR SUCCESSORS IN INTEREST.

A COPY OF ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL BE FILED WITH THE DEVELOPMENT REVIEW STAFF.

GENERAL CONDITIONS

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The recorded final development agreement shall be effective for a period not-more-than 15 years. An extension of this approval may be granted if mutually agreed to by the developer and Washoe County.
4. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's office and the development review staff. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. Said CC&Rs shall specifically address the potential for liens against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement, of the following items, at a minimum:
  - a. Private roads within the subdivision.
  - b. Equestrian center.
  - c. Staffing of maintenance and security forces.
  - d. Common area landscaping.
  - e. Entrance gates.
  - f. Snow removal and storage areas.
  - g. Landscaping along streets.
  - h. Fire and fuelbreaks on open space.

- i. Detention basins and the accumulated sediment.
- j. Equestrian/pedestrian trails.
- k. Bicycle and pedestrian paths.
- l. Private streets and utilities.
- m. Golf cart crossings.
- n. Off-site residential parking areas.
- o. Public park center.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
  - b. Specifications on the limitation of turf area for single family homes.
  - c. Notice of requirement to pay future sewer user fees
  - d. Minimum defensible space requirements.
  - e. Snow storage areas.
  - f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
  - g. Potential for conservation easements or dedication of open space.
  - h. Prohibition of motorized vehicles in open space.
  - i. Areas with potential for equestrian traffic.
  - j. Requirement of open space remaining open to pedestrian and bicycle traffic.
  - k. Notice of pedestrian easements to abutting properties.
5. Prior to ground disturbing activity, the developer shall provide an archaeological/historical survey for review by the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology.
6. The developer shall participate in any applicable General Improvement District or Special Assessment District formed by Washoe County to the satisfaction of the applicable division of Public Works.
7. All new utilities shall be placed underground to the satisfaction of the County Engineer.
8. Prior to final map approval, the developer is to provide written approval of the plans for the installation of mail delivery facilities from the US Postal Service. The system must be shown on the project construction plans and installed as part of the on-site improvements to the satisfaction of the County Engineer and the US Postal Service.
9. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
10. Prior to submittal to the Washoe County Board of County Commissioners, the final development agreement shall be reviewed and approved by the Washoe County District Attorney's Office.
11. Within six months of the approval of the preliminary development agreement, a draft final development agreement that conforms with the provisions of section 814 of the Washoe County Development Code shall be completed and submitted to the Washoe County Department of Development Review. Washoe County Department of Development Review will provide comments on the draft final agreement. The final development agreement will then be submitted to the Washoe County Board of County Commissioners within three months. Extensions of any of these time frames may be requested if mutually agreeable to Washoe County and the developer.

PHASING

12. The project shall be developed in three phases. Phase I includes a tentative map for 436 lots, an 18-hole golf course, the village center and driving range. Phase II will include an additional nine holes, the equestrian center and a tentative map for approximately 220 dwelling units. Phase III includes the remaining 434 lots and the last nine holes of golf. Modification to the proposed phasing plan may be made if mutually agreeable the developer and Washoe County. These modifications may include the commercial portion of the project and the second 18-hole golf course, which may be constructed during phase II or phase III.
13. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

14. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.

TRAFFIC

15. A LOS C, or the current Washoe County standard, shall be used as a basis for evaluating transportation needs and traffic impact mitigation requirements.
16. Prior to the issuance of the first building permit, two lanes of Whites Creek Lane shall be constructed, to two-lane minor arterial standards as a minimum, from Thomas Creek Road to the project site, to the satisfaction of the County Engineer.
17. Prior to the issuance of the first building permit, a second access shall be constructed to the project site to emergency standards to the satisfaction of the applicable fire protection agency.
18. Prior to the issuance of the 85th building permit, the following roadway improvements shall be constructed to the satisfaction of the County Engineer:
  - A. The remaining two lanes of Whites Creek Lane from Thomas Creek Road to the project site if warranted by projected traffic demands.
  - B. Two (2) lanes of Whites Creek Lane from Thomas Creek Road to Wedge Parkway with 100 feet of right-of-way. These two lanes will be constructed so that an additional two lanes may be added in the future if warranted by projected traffic volumes.

- C. Whites Creek Lane will be designed in a manner that minimizes any impacts on the adjacent homes to the north in Fieldcreek Ranch (e.g., fencing, berms, lowering the travel lanes).
19. The final development agreement shall not be approved until the right-of-way of all necessary off-site accesses from the project to Thomas Creek Road are obtained. A recorded right-of-way document shall be provided to the satisfaction of the County Engineer and the District Attorney's Office.
20. Prior to the final approval of the development agreement, the developer for Southwest Pointe shall petition the Washoe County Board of County Commissioners to create a Special Assessment District (SAD) for the purpose of financing the construction of Whites Creek Lane from the project site to Wedge Parkway and other roads as defined in the SAD agreement. In the event that a special assessment district is not created, the developer shall construct Whites Creek Lane, as outlined in Condition No.'s 16 and 18, from the project site to Wedge Parkway, to the satisfaction of the County Engineer.

Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

**NOTE**

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

21. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 85th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 85th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;

- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

- 22. Prior to approval of the final development agreement, the developer shall provide a street maintenance program to the satisfaction of the County Engineer and the Department of Development Review. Street maintenance of private streets shall be performed by the homeowner's association and shall be perpetually funded.
- 23. Prior to the approval of the final development agreement, a schematic pedestrian circulation plan. As part of each tentative map, a detailed pedestrian circulation plan will be submitted and approved by the Department of Development Review.
- 24. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
- 25. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
- 26. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of

pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

- C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
  - E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
  - F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29<sup>1</sup>/<sub>2</sub> foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
  - G. Public - 100 ROW major arterial street (more than 10,830 ADT).
27. Landscaped medians shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer, Washoe County Department of Development Review and the developer. Maintenance of median landscaping shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
28. Meandering asphalt paths will be acceptable provided:
- A. Pedestrian easements are included for portions of the paths located outside the County r.o.w.
  - B. Landscaping between the back of the curb and the path shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer.

- C. Maintenance of the asphalt paths and landscaping shall be the responsibility of the developer and, when created, by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
29. Proposed roadways (public or private) are not to be centered along fault lines. Faultlines shall be located behind the curbline, on the up-thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback excluding construction for buildings for human occupancy may be reduced, to the satisfaction of the County Engineer.
30. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded.
31. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement, to the satisfaction of the County Engineer.
32. Temporary County Standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street, to the satisfaction of the County Engineer.
33. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs that are longer than 500 feet to the satisfaction of the County Engineer and the applicable fire protection agency. These roads shall have a 30-foot access easement with a minimum 20-foot width of 6 inches of Type 2 Class B aggregate base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer.
34. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. The emergency access road shall be constructed within a 30 foot access easement to a minimum 20 foot width with 4 inches of Type 2 Class B aggregate base.
35. Street lights shall be installed at major intersections to the satisfaction of the County Engineer.
36. Unless otherwise stated in the final development agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided to the satisfaction of the County Engineer.
37. The minimum pavement structural section shall be 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector-classified streets and shall be 3 inches of asphalt over 6 inches of granular base for roadways for local streets to the satisfaction of the County Engineer.

38. The applicant shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required.
39. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater, to the satisfaction of the County Engineer. Where possible, crossings should be below the grade of public streets.
40. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
41. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
42. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
43. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.
44. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

#### AIR QUALITY MANAGEMENT

45. Prior to the approval of the final development agreement, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

#### DRAINAGE

46. Detention/retention facilities are to be maintained by a homeowner's association and perpetually funded unless the County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County.

47. A general concept level storm drain master plan shall be submitted and approved prior to acceptance of the final development agreement to the satisfaction of the County Engineer. The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities.
48. Prior to recordation of any final map, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.
49. A maintenance plan of all drainage facilities, to be owned by the homeowner's association, shall be provided prior to approval of the final development agreement. All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe county water treatment plant, and associated Steamboat Ditch conveyance system. All runoff from improved areas which runs into the Steamboat Ditch shall be pre-treated for silt and petrochemicals and shall be routed through a "wet" detention facility or approved alternative, to the satisfaction of the Utility Division and the Department of Development Review.
50. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.
51. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:
  - A. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - B. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within five (5) years of the approval of the final development agreement. If construction is not started within by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.

C. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.

D. If the detention basin is constructed, Washoe County shall pay fair market value for the property.

52. The increase in development-caused runoff from the 100 year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained On-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company, to the satisfaction of the County Engineer.

53. Prior to the approval of the final development agreement, a geotechnical report shall be prepared, which considers the effects of earthquake forces and faulting in the area, to the satisfaction of the County Engineer.

The siting and design of detention/retention facilities shall be addressed based on the findings and recommendations provided in the geotechnical report.

54. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.

55. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.

56. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.

57. The stormwater discharges from this development that flow to Dry Creek shall be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. The applicant shall provide drainage structures under Steamboat Ditch that would pass the 10-year frequency storm or demonstrate that there will not be any water quality degradation in Steamboat Ditch.

58. Prior to approval of the final map, the developer shall obtain a Stormwater Discharge Permit from the Nevada Division of Environmental Protection. If required, point discharge permit for each proposed detention pond will be obtained from the Nevada Division of Environmental Protection and copy submitted to the Engineering Division.

The applicant shall contact the Division of Water Resources, State of Nevada, to determine whether the proposed flood detention facilities will require a permit.

59. Prior to approval of the final development agreement, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.

**Washoe County Board of County Commissioners**

**Re: DA9-1-93 (Southwest Pointe)**

**January 26, 1994--Page 39**

60. Prior to approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
61. Prior to approval of the final development agreement, a golf course management plan shall be prepared that documents how the migration of fertilizers, pesticides, herbicides, and fungicides to surface and ground waters will be prevented. A service and ground water sampling program shall be implemented to demonstrate that migration is not occurring, and commits to modifying practices in the event that any of the above materials are detected.
62. An animal waste management plan for the equestrian center shall be prepared prior to the issuance of a building permit for that facility, that documents how the migration of bacteria, nutrients and other animal waste byproducts to surface and ground waters will be prevented.
63. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100 year flows and lined, to the satisfaction of the County Engineer.

WATER

64. Prior to the approval of the final development agreement, the applicant shall provide staff with a phasing schedule for the dedication of water rights. Permitted or certificated groundwater rights in the amount of 1.12 acre feet must be dedicated to Washoe County for each lot of a final map. Prior to acceptance, the water rights must be in good standing with the State of Nevada Division of Water Resources and must reflect a point of diversion, place and manner of use acceptable to the Utility Division.
65. Prior to the approval of the final map, the developer shall demonstrate how compliance with NRS 278.349, that requires the availability of water meet applicable health standards and is sufficient in quantity to serve the foreseeable needs of the subdivision, shall be met to the satisfaction of the District Health Department and Washoe County Department of Development Review.
66. Prior to the approval of the final development agreement, a complete water analysis from at least one monitoring well must be submitted to the District Health Office. The analysis must demonstrate the water conforms to the existing and proposed drinking water standards.
67. Prior to the approval of the final development agreement, a schematic water system plan for the referenced proposal must be submitted to the Utility Division and the District Health Department. Prior to final map approval, the plan must show that the water system will conform to the State of Nevada Water Supply Regulations, NAC Chapter 445, and the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, NAC 278.400 through 278.410.

**Washoe County Board of County Commissioners**

**Re: DA9-1-93 (Southwest Pointe)**

**January 26, 1994--Page 40**

68. Prior to final map approval, a letter of approval for the water rights serving this proposal must be submitted from the Division of Water Resources. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource to the satisfaction of the Utility Division.
69. The developer shall provide adequate assurance that the sewage, water and drainage systems will be satisfactorily maintained and operated
70. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters.
71. Water quality results from a State certified laboratory for new water sources shall be submitted to the Utility Division. The water quality sampling and testing shall be in compliance with the current State of Nevada Regulations for Public Water Systems, NAC 445.
72. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits.
73. Any wells on the property not in use for production or monitoring purposes, shall be properly abandoned in accordance with State Regulations governing Water Wells and Related Drilling.
74. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval. The water source shall meet both primary and secondary standards of the Safe Drinking Water Act.
75. The tentative maps shall show the maintenance roads for the existing and proposed water tanks. The location of these roads shall be mutually agreeable to Washoe County and the developer.
76. The developer shall provide access to the existing monitoring wells to the satisfaction of the Utility Division. In the event access is no longer available, the developer shall construct new wells to the satisfaction of the Utility Division.
77. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

WASTEWATER

78. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
79. The project shall be designed to accommodate a gravity flow sanitary sewer system within the boundaries of the subdivision. Such design shall be to the satisfaction of the Utility Division.
80. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.
81. All minor infrastructure for potable water distribution shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infrastructure design can be accomplished prior to the approval of the final map.
82. Responsibility for design of wells, pump structure, controls, telemetry, and appurtenances, storage tanks, and transmission lines to the edge of the subdivision, all necessary to provide water service to the project, will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
83. The sanitary sewer collection system and water system facilities must be offered for dedication to Washoe County.
84. The developer shall construct or provide the financial assurances for the construction of the water and sewer system facilities. The financial assurances must be in a form and amount that is satisfactory to the Utility Division.
85. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance to the satisfaction of the Utility Division.
86. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development.
87. Fees for plan checking and inspection shall be paid in accordance with Washoe County ordinance.

88. Easements for all water and sewer utilities shall be offered for dedication to the satisfaction of the Utility Division.

GRADING

89. The development shall comply with the requirements of the Hillside Development Ordinance, as applicable.

SCHOOLS

90. Should the proposed "off-stream" location for the flood detention facility proposed in the 1990 Kennedy/Jenks report not be dedicated for this purpose, a minimum ten acre site for an elementary school and a minimum 25 acre site for a middle school shall be offered for dedication.

If the "off-stream" flood control facility is dedicated to Washoe County, a 10 acre site for the elementary school shall be offered for dedication.

If the area for the "off-stream" facility is dedicated, but the County has not complied with Condition No. 51, the use for the area shall revert back to a school site and/or a park site (if requested by Washoe County) as proposed by the developer. If a school or park site is not requested by Washoe County, this area shall remain as an open space buffer.

FIRE PROTECTION

91. The plans submitted with a building permit application shall show evidence of compliance with the recommendations of the applicable fire protection agency. Those concerns are fire flows, fire hydrant number and location, access, sequential phasing of firebreaks during development, permanent firebreaks, minimum defensible space, use of fire resistant construction and/or roof material, sprinklering of structures, and spark arrestors in chimneys. Access and fire flows shall be addressed to the satisfaction of the fire protection agency prior to the introduction of any combustible materials to the site.
92. A minimum one-acre site shall be offered for dedication, if requested by the applicable fire protection agency, for a fire station. The developer shall enter into talks with the applicable fire protection agency for any other requirements, such as, a fire station site, manpower and equipment needs, or for coordination with other developments that have similar requirements.

PARKS/RECREATION/OPEN SPACE

93. Prior to the approval of the final development agreement, an open space management plan and map shall be prepared that specifies the ownership of open spaces, type of uses allowed and who is responsible for maintenance. This plan shall address the provisions of Section 110.408.45 of the Development Code. Common areas shall be maintained by the homeowner's association and provisions be made for perpetual funding for maintenance.

Prior to approval of the final development agreement, a government entity (e.g. United States Forest Service, Washoe County Parks Department, etc.) or a non-profit organization (e.g. Washoe Parks Foundation) shall be identified that will accept the dedication of the open space buffers identified on the Concept Plan, which consists of approximately 1,500 acres.

94. The final development agreement shall include a provision for the public open space that prohibits the sale of any open space without the consent of Washoe County.
95. Unless the off-stream site is dedicated to the County, a minimum 10-acre public park site shall be offered for dedication to the County. A sketch plan has been submitted, which if conceptually approved by the County, should be included in the final development agreement. The final park design shall be mutually agreeable to the County and the developer. The developer will construct the recreational facilities in the park and then be reimbursed for the cost of the construction from the Residential Construction Tax. The responsibility of park maintenance shall be negotiated by the developer and Washoe County prior to the approval of the final development agreement.
96. The developer will work together with staff from the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer.

#### LANDSCAPING/ARCHITECTURAL DESIGN

97. Prior to the approval of the final development agreement, the developer shall submit schematic landscaping and architectural design guidelines of the entire project to the Design Review Committee (DRC) for its review and approval. These guidelines shall address, but not be limited to, type and color of building material, general architectural design, fencing, landscaping material (if plant material: type, size at time of planting, maturation size at full growth, period of time between planting and full growth), landscaping location, landscaping irrigation system, and financial assurances that landscaping will be planted and maintained.  
  
The Design Review Committee shall also review the design of Whites Creek Lane, specifically to address Condition No. 18C.
98. The developer shall minimize grading to the maximum extent possible in the area around the critical mule deer habitat in order to preserve the existing browse shrubs.
99. Homes located on 12,000 square foot lots shall have a minimum 160 square foot storage space added in their garages, if only one garage space is provided.
100. A minimum 25 foot landscape buffer shall be installed between the homes and the collector and secondary loop streets. The homeowners association shall be required to perpetually maintain these areas.

OTHER

101. Prior to acceptance of the first final map, the telephone easement Doc. No. 415899, which runs through the middle of many lots, shall be realigned with appropriate abandonment and relocation easements, or the proposed lots realigned, to the satisfaction of the County Engineer.

**TENTATIVE MAP CONDITIONS**  
for  
**DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**  
for  
**SOUTHWEST POINTE**

(As recommended by Development Review Staff and attached to Staff  
Report dated December 3, 1993)

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

4. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.
5. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.

**Washoe County Board of County Commissioners**

**Re: DA9-1-93 (Southwest Pointe)**

**January 26, 1994--Page 46**

6. The roadway structural sections for the proposed 80 foot public right-of-way shall have as a minimum 5 inches of asphalt on 8 inches of aggregate base. A final geotechnical report must be prepared, however, prior to final map approval to determine if additional structural capacity above the minimum is required. On-site construction haul route traffic and school traffic is to be considered in the pavement analysis. The proposed on-site private road right-of-way widths are acceptable as shown for the tentative map of Phase 1.
7. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
  - E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot asphalt meandering one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.

**Washoe County Board of County Commissioners**

**Re: DA9-1-93 (Southwest Pointe)**

**January 26, 1994--Page 47**

- F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 1/2 foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
  - G. Public - 100 ROW major arterial street (more than 10,830 ADT).
8. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater, to the satisfaction of the County Engineer. Where possible, crossings should be below the grade of public streets.
  9. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
  10. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
  11. Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

NOTE

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.
  12. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
  13. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.
  14. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

AIR QUALITY MANAGEMENT

15. Prior to the approval of the final development agreement, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

DRAINAGE

17. Detention/retention facilities are to be maintained by a homeowner's association and perpetually funded unless the County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County.

The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.

18. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:
  - A. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - B. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within five (5) years of the approval of the final development agreement. If construction is not started within by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - C. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - D. If the detention basin is constructed, the property shall be dedicated to Washoe County.

**Washoe County Board of County Commissioners**

**Re: DA9-1-93 (Southwest Pointe)**

**January 26, 1994--Page 49**

17. The increase in development-caused runoff from the 100 year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained On-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company, to the satisfaction of the County Engineer.
19. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
20. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.
21. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable by Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.
22. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100 year flows and lined, to the satisfaction of the County Engineer.

WASTEWATER

23. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.

PARKS AND RECREATION

24. The developer will work together with staff from the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer.

LANDSCAPING

25. A minimum 25 foot landscape buffer shall be installed between the homes and the collector and secondary loop streets. The homeowners association shall be required to perpetually maintain these areas.

OTHER

26. All new utilities shall be placed underground to the satisfaction of the County Engineer.

**FINAL MAP CONDITIONS**  
**for**  
**DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**  
**for**  
**SOUTHWEST POINTE**

(As recommended by Development Review Staff and attached to Staff  
Report dated December 3, 1993)

ALL CONDITIONS MUST BE MET OR FINANCIAL ASSURANCES SHALL BE PROVIDED IN AN APPROPRIATE FORM AND AMOUNT, TO THE SATISFACTION OF THE PUBLIC WORKS DEPARTMENT PRIOR TO RECORDATION OF THE FINAL MAP, UNLESS OTHERWISE STATED.

PRIOR TO FILING A FINAL MAP FOR RECORDATION, THE DEVELOPER SHALL MEET WITH THE ENGINEERING DIVISION AND THE DEVELOPMENT REVIEW STAFF AT LEAST FOUR (4) WEEKS BEFORE THE ANTICIPATED RECORDATION DATE TO REVIEW REQUIREMENTS, FINAL CONSTRUCTION DRAWINGS, AND DOCUMENTATION NECESSARY TO ADEQUATELY COMPLY WITH THE CONDITIONS OF APPROVAL.

A REQUEST FOR AN EXTENSION OF TIME FOR THE RECORDING OF A FINAL MAP, WHICH PERMITS THE ADDITION, DELETION, OR AMENDMENT OF CONDITIONS, MUST BE SUBMITTED TO THE DEVELOPMENT REVIEW STAFF AT LEAST 60 DAYS PRIOR TO THE EXPIRATION DATE OF THE TENTATIVE SUBDIVISION MAP; SAID EXPIRATION BEING ONE YEAR FROM THE DATE OF THE BOARD OF COUNTY COMMISSIONERS APPROVAL OF THE TENTATIVE MAP OR A SUBSEQUENT FINAL MAP.

GENERAL CONDITIONS

1. Unless specifically stated in the final development agreement, final maps and final construction drawings shall comply with all applicable statutes, ordinances, rules, regulations, and policies in effect at the time of approval of the final map or any subsequent extension date.
2. Final maps shall be in substantial compliance with all plans and documents submitted with and made part of this tentative map request, as may be amended by action of the final approving authority. All documentation necessary to satisfy the conditions noted below shall accompany the final map when submitted to the Engineering Division and the development review staff.
3. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's office and the development review staff. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. Said CC&Rs shall specifically address the potential for liens against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement of the following items, at a minimum:
  - a. Private roads within the subdivision.
  - b. Equestrian center.
  - c. Staffing of maintenance and security forces.
  - d. Common area landscaping.
  - e. Entrance gates.
  - f. Snow removal and storage areas.
  - g. Landscaping along streets.
  - h. Fire and fuelbreaks on open space.

- i. Detention basins and the accumulated sediment.
- j. Equestrian/pedestrian trails.
- k. Bicycle and pedestrian paths.
- l. Private streets and utilities.
- m. Golf cart crossings.
- n. Off-site residential parking areas.
- o. Public park center.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
  - b. Specifications on the limitation of turf area for single family dwellings.
  - c. Notice of requirement to pay future sewer user fees
  - d. Minimum defensible space requirements.
  - e. Snow storage areas.
  - f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
  - g. Potential for conservation easements or dedication of open space.
  - h. Prohibition of motorized vehicles in open space.
  - i. Areas with potential for equestrian traffic.
  - j. Requirement of open space remaining open to pedestrian and bicycle traffic.
  - k. Notice of pedestrian easements to abutting properties.
4. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.
- If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.
- The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.
5. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.
6. A note shall be placed on all construction drawings stating:
- NOTE**
- Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.
7. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada, when field conditions mandate construction other than that shown in the original drawing.

8. The final map shall designate faults, by distance and bearings, that have been active during the Holocene epoch of geological time and shall contain the following note to the satisfaction of the development review staff:

**NOTE**

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time. The faults have been located by Civil Engineer Registered in Nevada and experienced in Geotechnical Engineering and field surveyed by a Nevada Registered Land Surveyor.

9. A complete set of construction improvement drawings, including an on-site grading plan, shall be submitted to the Engineering Division for approval prior to finalization of any portion of the subdivision. Grading shall comply with best management practices and shall include detailed plans for grading and drainage on each lot, erosion control, slope stabilization, mosquito abatement. Placement or disposal of any excavated material shall be indicated on the grading plan.
10. All soil boring logs must be included as part of the construction drawings to the satisfaction of the County Engineer.
11. All new utilities shall be placed underground to the satisfaction of the County Engineer.
12. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
13. The Washoe County Planning Commission certificate on the final map shall be to the satisfaction of the County Engineer and the Department of Development Review.

**TRAFFIC**

14. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 85th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 85th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;

- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

- 15. Prior to approval of the final development agreement, the developer shall provide a street maintenance program to the satisfaction of the County Engineer and the Department of Development Review. Street maintenance of private streets shall be performed by the homeowner's association and shall be perpetually funded.
- 16. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
- 17. The roadway structural sections for the proposed 80 foot public right-of-way shall have as a minimum 5 inches of asphalt on 8 inches of aggregate base. However, a final geotechnical report must be prepared prior to final map approval to determine if additional structural capacity above the minimum is required. On-site construction haul route traffic and school traffic is to be considered in the pavement analysis. The proposed on-site private road right-of-way widths are acceptable as shown for the tentative map of Phase 1. Public right-of-way will not be evaluated until the recommended transportation study is completed.
- 18. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
- 19. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or

locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

- B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
  - E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
  - F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29<sup>1</sup>/<sub>2</sub> foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
  - G. Public - 100 ROW major arterial street (more than 10,830 ADT).
20. Medians shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer. Maintenance of median landscaping shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.

21. Meandering asphalt paths are acceptable provided pedestrian easements are included in portions of the paths located outside the County right-of-way. Landscaping between the back of the curb and the paths shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer. Maintenance of median landscaping and pedestrian paths shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
22. Proposed roadways (public or private) are not to be centered along fault lines. Faultlines shall be located behind the curblines, on the up-thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback, excluding construction for buildings for human occupancy, may be reduced to the satisfaction of the County Engineer.
23. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded.
24. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement, to the satisfaction of the County Engineer.
25. Temporary County Standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street, to the satisfaction of the County Engineer.
26. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs serving ten or more lots to the satisfaction of the County Engineer. These roads shall have a 30-foot access easement with a minimum 20-foot width of 6 inches of Type 2 Class B aggregate base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer.
27. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. The emergency access road shall be constructed within a 30 foot access easement to a minimum 20 foot width with 4 inches of Type 2 Class B aggregate base.
28. Street lights shall be installed at major intersections to the satisfaction of the County Engineer.
29. Unless specifically stated in the final development agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided to the satisfaction of the County Engineer.
30. The minimum pavement structural section shall be 4 inches of asphalt over 6 inches of granular base for roadways (public and private) with a right-of-way of 60 feet in width and shall be 3 inches of asphalt over 6 inches of granular base for roadways with a right-of-way of 50 feet in width to the satisfaction of the County Engineer.

31. The applicant shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required.
32. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
33. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
34. Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

**NOTE**

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

35. Project streets that are designed with security gates at points intersecting shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
36. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.

**DRAINAGE**

37. Prior to recordation of any portion of the subdivision, a final, detailed hydrology/hydraulic report for that phase, prepared by a registered engineer, shall be submitted to the County Engineer for approval. The report shall include the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both the site and off-site areas and the methods for handling those flows. The report shall include all storm drain pipe and ditch sizing calculations and a discussion of and mitigation measures for any impacts on existing off-site drainage facilities and properties.

**Washoe County Board of County Commissioners**

**Re: DA9-1-93 (Southwest Pointe)**

**January 26, 1994--Page 57**

38. Prior to recordation of any final map, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.
39. The 100-year floodplain boundaries and flood elevations shall appear on each final map to the satisfaction of the County Engineer. If the floodplain boundary has been changed by a Federal Emergency Management Agency (FEMA) Conditional Letter of Map Amendment or Conditional Letter of Map Revision, the date of that letter and a note to that effect shall appear on the final map to the satisfaction of the County Engineer. Grading or building permits shall not be issued for areas currently shown as "A" zones on the FEMA floodplain maps until a Letter of Map Amendment or Revision is submitted or until conformance with Washoe County flood construction standards is determined by the County Engineer.
40. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts to the satisfaction of the District Health Department and the County Engineer.
40. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.

WATER

41. Prior to the approval of a final map by the District Health Department, the production wells that will serve any phase of this development must be constructed, pump tested and sampled to ensure the proposed water system has sufficient quality and quantity.
42. Before approval of the final map will be considered, a letter from the water purveyor committing adequate water service to this proposal must be submitted District Health Department.
43. Prior to final map approval, a letter of approval for the water rights serving this proposal must be submitted from the Division of Water Resources. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource to the satisfaction of the Utility Division.
44. The developer shall provide adequate assurance that the sewage, water and drainage systems will be satisfactorily maintained and operated
45. Pursuant to Section 278.340 of the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, no grading permit shall be issued prior to District Health Department approval of the referenced final map. This condition does not apply to the construction of production wells required in condition Number 48.

The applicant may seek relief from the District Board of Health for this requirement or may choose to create a separate parcel for the first 18-hole golf course.

46. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters.
47. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits.
48. A letter, which can be a will-serve letter, from the appropriate provider committing water service must be submitted to the District Health Department and Utility Division. This letter shall indicate that the facility will not be brought beyond its permitted capacity by this service.
49. The final map shall contain the following note to the satisfaction of the development review staff:

NOTE

No Certificate of Occupancy shall be issued until the water facilities have been completed and accepted by resolution of the Board of County Commissioners.

50. The developer shall provide access to the existing monitoring wells to the satisfaction of the Utility Division. In the event access is no longer available, the developer shall construct new wells to the satisfaction of the Utility Division.
51. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

WASTEWATER

52. Proper easements shall be shown for off-site sewage and drainage systems to the satisfaction of the Utility Division and the County Engineer.
53. The Nevada Division of Environmental Protection must submit a letter to the District Health Department certifying their approval of the final map.
54. All minor infrastructure for sewer collection shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division.
55. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.

56. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.
57. All hookup fees for the area within the final map will be paid to the satisfaction of the Utility Division.
58. The developer shall deposit with the Utility Division the sum of \$50.00 per lot prior to recordation of all or part of the final map. This fee shall represent the development's prorated share of the completed water and wastewater facilities plan for the south Truckee Meadows .
59. Prior to final map approval, a letter, which can be a will-serve letter, from the Utility Division committing sewer service, must be submitted to the District Health Department. This letter shall indicate that the treatment facility will not be brought beyond its permitted capacity by this service.
60. All minor infrastructure for potable water distribution shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infrastructure design can be accomplished prior to the approval of the final map.
61. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development.

GRADING

62. Prior to approval of the first final map, an erosion control/soil stabilization plan and grading plan shall be approved by the Washoe-Storey Conservation District. A copy of the approval shall be submitted to the District Health Department, Department of Development Review and Washoe County Engineer.

LANDSCAPING

63. Detailed landscaping and irrigation plans for the village commercial center, club house, golf courses, golf driving range and equestrian center shall be submitted prior to the issuance of a building permit for the particular use.

**SPECIAL USE PERMIT APPLICATION CONDITIONS**  
for  
**DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**  
for  
**SOUTHWEST POINTE**

(As recommended by Development Review Staff and attached to Staff  
Report dated December 3, 1993)

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
4. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
5. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
6. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or

locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

- B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
- F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29<sup>1</sup>/<sub>2</sub> foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
- G. Public - 100 ROW major arterial street (more than 10,830 ADT).

#### DRAINAGE

- 7. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.

**Washoe County Board of County Commissioners**

**Re: DA9-1-93 (Southwest Pointe)**

**January 26, 1994--Page 62**

8. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
9. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.
10. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.

**SPECIAL USE PERMIT CONSTRUCTION CONDITIONS**  
for  
**DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**  
for  
**SOUTHWEST POINTE**

(As recommended by Development Review Staff and attached to Staff  
Report dated December 3, 1993)

GENERAL CONDITIONS

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. A note shall be placed on all construction drawings stating:

**NOTE**

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.
4. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada, when field conditions mandate construction other than that shown in the original drawing.
5. The final map shall designate faults that have been active during the Holocene epoch of geological time and shall contain the following note to the satisfaction of the development review staff:

**NOTE**

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time.
6. All new utilities shall be placed underground to the satisfaction of the County Engineer.

TRAFFIC

7. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 85th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 85th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

8. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
9. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.

DRAINAGE

10. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts to the satisfaction of the District Health Department and the County Engineer.

GRADING

11. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.

WATER

12. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

LANDSCAPING

13. Detailed landscaping and irrigation plans for the village commercial center, club house, golf courses, golf driving range and equestrian center shall be submitted prior to the issuance of a building permit for the particular use.

**WASHOE COUNTY DEPARTMENT OF DEVELOPMENT REVIEW  
STAFF REPORT**

To: Washoe County Planning Commission  
Re: Amendment Request for Development Agreement Case No. DA9-1-93  
Date: September 13, 1994 Prepared By: JVM

**GENERAL INFORMATION SUMMARY**

**Applicant:** Dingman Investments

**Requested Action:** To amend the preliminary development agreement that facilitates the development of a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center and a commercial village center. The amendment would allow the applicant to begin preliminary grading of the golf course and to install infrastructure along Zolezzi Lane prior to the approval of the final development agreement. The total acreage of the project is  $\pm 3,171.6$  acres. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN: 49-010-04, 49-010-10 and 41-030-12)

**STAFF RECOMMENDATION/FINDINGS**

Based upon the staff analysis and the comments received, staff recommends approval of the request and offers the following motion for your consideration:

The Washoe County Planning Commission approves amendment request for Development Agreement Case No. DA9-1-93 for Southwest Pointe subject to the amended conditions which modify the attached Washoe County Board of County Commissioners Clerk's Order No. 94-86, having made the findings that the conditions of approval ensure consideration of the items enumerated in NRS 278.349 and that the circumstances have not appreciably changed since the original approval.

**ANALYSIS**

The draft development agreement for Southwest Pointe was approved by Washoe County in February 1994 and by the Regional Planning Commission in March 1994. The developer is requesting an amendment to the preliminary development agreement in order to begin the rough grading of the first golf course and to install underground utilities along Zolezzi Lane.

Through the conditions of approval, the preliminary development agreement stipulates that construction may not begin until the final development agreement is approved. At its August 2, 1994 meeting, the Planning Commission approved an amendment of the preliminary development agreement that grants an extension on the submittal of the final development agreement. The applicant is currently trying to acquire access through the US Forest Service property. As this acquisition process may take some time to complete, the applicant does not want to lose a construction season for grading the golf course.

The applicant has provided staff with revised conditions that would allow the applicant to begin grading the first golf course and to install underground utilities along Zolezzi Lane prior to the approval of the final development agreement. Staff has revised the necessary conditions that need to be amended for the golf course grading to proceed.

**Amended Conditions:**

Additions are underlined and deletions are ~~struck through~~.

19. The final development agreement shall not be approved until the right-of-way of all necessary off-site accesses from the project to Thomas Creek Road are obtained. Provided however, that preliminary golf course and roadway grading may commence before such approval has been obtained so long as such construction is done in accordance with Condition No. 21. A recorded right-of-way document shall be provided to the satisfaction of the County Engineer and the District Attorney's Office.
  
45. Prior to the ~~approval of the final development agreement~~ issuance of a grading permit or approval of a final map, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.
  
47. A general concept level storm drain master plan shall be submitted and approved prior to acceptance of the final development agreement to the satisfaction of the County Engineer. The general concept level storm drain master plan shall address in general terms proposed methods for handling the existing and increased flows for the 10- and 100- year storms including detention and other proposed mitigation measures for both on- and off-site areas. This master plan shall include a drawing which shows the existing drainage basins within the development and indicate how they may be impacted. After approval of the final development agreement, and prior to approval of the tentative map for each phase or approval of any special use permit, a preliminary hydrology report shall be submitted and approved to the satisfaction of the County Engineer. This preliminary hydrology report shall be prepared in accordance with County requirements for tentative maps, in conformance with the general concept level storm drain master plan, and be applicable to the specific tentative map or special use permit being approved.

The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities.

washoe county development review

48. ~~Prior to reoordation of any final map, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer.~~ Prior to the submittal of any final map or issuance of any grading permit, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.

Prior to the issuance of a grading permit, the applicant shall provide a letter granting a blanket drainage and construction easement to the Southwest Pointe Subdivision that allows the subdivision to drain onto the golf course and to construct detention facilities necessary to accommodate the subdivision-generated stormwaters in mutually agreed upon locations to the satisfaction of the County Engineer. The easement shall be submitted with the plans for the final golf course improvements.

59. ~~Prior to approval of the final development agreement~~ issuance of a grading permit for the golf course and/or final map, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.
60. Prior to the issuance of a grading permit for the golf course or approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
61. Prior to the issuance of a grading permit for the golf course ~~approval of the final development agreement~~, a golf course management plan shall be prepared that documents how the migration of fertilizers, pesticides, herbicides, and fungicides to surface and ground waters will be prevented. A service and ground water sampling program shall be implemented to demonstrate that migration is not occurring, and commits to modifying practices in the event that any of the above materials are detected.

#### Agency Comments

**Engineering:** The County Engineer recommends that as a new condition of approval, the applicant provide letter granting a blanket drainage and construction easement to the Southwest Pointe Subdivision that allows the subdivision to drain onto the golf course and to construct detention facilities necessary to accommodate the subdivision-generated stormwaters in mutually agreed upon locations. The easement should be submitted with the plans for the final golf course improvements. This recommendation has been added to Condition No. 48.

Staff believes the reason cited for the amendment and the fact that the revised conditions have not substantially changed the intent of the approved preliminary development agreement, provide sufficient cause to justify approval of the amendment. If this request is approved, the applicant will be submitting a special use permit for a golf course grading plan to the Planning Commission this fall.

WASHOE COUNTY DEPARTMENT OF DEVELOPMENT REVIEW  
STAFF REPORT

To: Washoe County Planning Commission

Re: Extension Request for Development Agreement Case No. DA9-1-93

Date: July 25, 1994

Prepared By: JVM

GENERAL INFORMATION SUMMARY

**Applicant:** Dingman Investments

**Requested Action:** Amendment of the Development Agreement timeline to allow an additional 18 months to prepare the draft document. The Development Agreement facilitates development of a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities and a commercial village center. The total acreage of the project is  $\pm 3,171.6$  acres. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) in the Southwest Truckee Meadows Area Plan and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN: 49-010-04, 49-010-10 and 41-030-12)

STAFF RECOMMENDATION/FINDINGS

Based upon the staff analysis and the comments received, staff recommends approval of the request and offers the following motion for your consideration:

The Washoe County Planning Commission approves the 18 month Extension Request for Development Agreement Case No. DA9-1-93 for Southwest Pointe subject to the conditions in the attached Washoe County Board of County Commissioners Clerk's Order No. 94-86, having made the findings that the conditions of approval ensure consideration of the items enumerated in NRS 278.349 and that the circumstances have not appreciably changed since the original approval.

ANALYSIS

The draft development agreement for Southwest Pointe was approved by Washoe County in February 1994 and by the Regional Planning Commission in March 1994. Condition No. 11 of the Clerk's Order requires a draft final development agreement that conforms with the provisions of Section 814 of the Washoe County Development Code be completed and submitted to the Department of Development Review within six months of the approval of the preliminary development agreement.

**Washoe County Planning Commission**  
**re: Extension Request for DA9-1-93 (Southwest Pointe)**  
**July 25, 1994 – page 2**

The developer is requesting an extension (see attached letter) because of delays in acquiring access through the US Forest Service Property. Staff believes the reason cited in the attached request letter and the fact that the circumstances have not substantially changed provide sufficient cause to justify approval of an extension.

LEONARD WOODS

**TO:** Regional Planning Commission  
**FROM:** Kris Schenk, Executive Director  
**DATE:** March 23, 1994  
**SUBJECT:** SOUTHWEST TRUCKEE MEADOWS AREA DEVELOPMENT PROJECT CONFORMANCE (AGENDA ITEM IV-1)

**INTRODUCTION**

The Southwest Pointe development proposal consists of 100 residential units ranging from 12,000 square foot to 1.0 acre lots, on approximately 2,271 acres located west of and adjacent to the National Forest, east of Thomas Creek Road and north of the McRae Highway. In addition to the residential units, the development also contains two 18 hole golf courses, a golf driving range, an equestrian center, two school sites, a fire station site, 1,575 acres of open space and a village center for retail and service uses. The development would increase traffic by not less than an average of 6,250 trips daily and is therefore destined to be a Project of Regional Significance. Thus the development must be reviewed by the Regional Planning Commission (RPC) to establish its conformance with policies of the Truckee Meadows Regional Plan.

The Southwest Pointe development will take an estimated 15 years in three phases for its ultimate construction and build out. The RPC should review this proposal in its entirety for conformance with the Regional Plan. As the Regional Planning Commission, you must determine whether a development proposal of this type and character conforms with the goals, objectives and policies of the Regional Plan. As defined in NRS 278.0278, you must focus your review and decisions on the Southwest Pointe development project as it might affect the cultural and natural resources, public services and facilities and land use form of the entire region, rather than on "the merits or deficiencies of a project" as it relates to local planning or design issues. The Washoe County Planning Commission and the Board of County Commissioners have the more specific responsibility of considering the project design, its merits or deficiencies, with respect to Washoe County's Comprehensive Plan, specifically the Southwest Truckee Meadows Area Plan, Washoe County Development Code and other pertinent development regulations.

The agenda materials, project application (prepared by CFA, Inc.) and various staff reports that have been given to you prior to tonight's regular meeting should provide you with sufficient detailed information. Analyses of the project have been prepared by the applicant's consultants, Regional Transportation Commission and Washoe County planning staff. That information along with public input is the basis for this regional staff report and recommendation.

**REGIONAL PLANNING COMMISSION - AGENDA ITEM IV-1****MARCH 23, 1994****PAGE 2****REGIONAL ISSUES**

Policy 30r describes five criteria that should be used to evaluate and determine the consistency of a development proposal with the Regional Plan. To find the project in conformance with the Regional Plan, the RPC must be satisfied that these five criteria have been adequately addressed, mitigated in the project design or appropriately conditioned in Washoe County's approval.

*30r. A development proposal is consistent with a conforming Master Plan and with the Regional Plan if:*

- 1. Land use is consistent with the Regional Plan, as further defined in a conforming Master Plan;*
- 2. Density or intensity of use is consistent, or can be conditioned to be consistent with, the Regional Plan's Regional Land Use Diagram as further defined in a conforming Master Plan;*
- 3. The project is consistent with criteria governing Projects of Regional Significance, as of the project's application date;*
- 4. Adequate public facilities are, or will be, actually available or fully funded in the current capital improvement program for construction within two years of date of project approval at levels established in a consistent Master Plan by the time of development; and*
- 5. Environmental and other site-specific standards established in the consistent Master Plan can be met by the time of development*

**Land Use**

The current designation of the project in the Washoe County Area Plan is a mix of residential uses including low density suburban (1 du/ac), high density rural (1 du/2.5 ac), medium density rural (1 du/5 ac), low density rural (1 du/10 ac) and general rural (1 du/40 ac). Based on calculations prepared by Washoe County planning staff the project is allowed a density of 1,090 dwelling units on 3,272 acres which averages approximately one dwelling unit for every three acres. These designations, as reflected in the Washoe County Comprehensive Plan, were found in conformance with the broad Regional Planning land use designations of Suburban, Rural and Rural Reserve. Policies 2n, 2r and 2s generally define the range of uses and densities expected within the regional land use designations within the project.

*2n. Suburban Communities are intended for development in the general range of one to three single family residential units per acre, although there may be some small areas within these communities designated for higher or lower density residential development. Non-residential development should also occur in these communities to provide local-serving commercial services, to create employment opportunities for community residents, and to provide a reasonable balance between jobs and residents for all communities within the Region. Specific land use designations which apply within these Suburban Communities shall be found in the Washoe County Area Plans.*

**REGIONAL PLANNING COMMISSION - AGENDA ITEM IV-1****MARCH 23, 1994****PAGE 3**

*2r. Rural development areas are shown on the Regional Land Use Diagram. These areas are generally intended for residential development on greater than one to ten acre lots, and for supporting non-residential uses. This rural character should be maintained in these areas to give Regional residents the opportunity for this lifestyle. These areas shall be planned to provide continuing opportunities for rural development, agricultural enterprises and other rural activities. Urban and suburban development is not intended to occur in these areas, and urban and suburban level public services will not be provided to them. Plan implementation should emphasize strategies to reduce urban pressures on these areas and support non-urban activities. Specific land use designations which apply within rural areas shall be found in the Washoe County Area Plans or in the City Master Plans.*

*2s. Areas shown as "Rural Reserve" are those areas which have potential environmental constraints to future development, (such as hillsides, floodplains or wetlands) which are not served (or planned for service within the Plan timeframe) at urban or suburban standards, which are in remote locations, or which may contain possible natural resources of regional significance. Development in these areas should generally occur at large lot sizes, such as 40 acre parcels. Specific land use designations which apply within Rural Reserve areas shall be found in the appropriate Washoe County Area Plan, City Master Plan or Joint Planning Area Plan.*

The design of Southwest Pointe has taken advantage of clustering and master planning concepts as a mitigation measure in reducing its impact upon the cultural and natural resources, in addition to other constraints, in the area. Policy 2z outlines the guidelines for using clustering. Regional Planning staff believes that, along with the Development Agreement, this property and the region benefits from combining the rural reserve, rural and suburban land use designations into a unified master planned development. Existing adjacent residential areas are buffered with natural open space or golf courses. Nearly half of the site will be left in a natural, undeveloped condition. Policy 2y describes the intent and process of using master planning concepts with developments of large tracts of land.

*2z. The Region supports the use of clustering as a planning technique. Clustering is supported for development proposals within Rural areas (areas planned for over 1 to 10 acre lots) when: 1) the cluster development project is consistent with the goals, objectives and policies of the Regional Plan; 2) clusters are located so any areas of urban or suburban density within the development project are compatible with adjacent rural areas; and 3) the proposal is consistent with adopted Service and Facility Plans, will not require any public expenditures for service extensions, and will not negatively impact the adopted Regional Form. Proposals for cluster development shall be made through the development review process of the appropriate local government. Appeals of local government decisions regarding rural clusters shall be considered in accordance with policies in the Intergovernmental Coordination Element of this Regional Plan.*

*2y. The Region supports the use of master planned developments in order to address the unique needs and opportunities represented by large areas within the Region proposed for a mix of urban and/or suburban uses as part of a single unified development proposal.*

**REGIONAL PLANNING COMMISSION - AGENDA ITEM IV-1****MARCH 23, 1994****PAGE 4**

*Master planned developments are encouraged to use an appropriate local government application process (planned development, planned unit development, Specific Plan, etc.) for such proposals. Within such planned developments residential densities may be averaged in order to provide open space, protect wetlands, encourage good design or accomplish other planning objectives. Master planned developments shall not increase overall land use density above the range shown by the Regional Land Use Diagram; shall not be used to effect a significant transformation in the planned character of an area, as defined by the goals and policies of the county area plan or the city master or neighborhood plan; and shall incorporate buffers or blended densities and land uses to achieve compatibility with adjacent residential development.*

**Transportation**

A major issue associated with this project and throughout the Southwest Truckee Meadows is its traffic impact and access through existing surrounding residential areas. Traffic and transportation issues have been discussed and mitigated by Washoe County staff in consultation with the Regional Transportation Commission. Washoe County applies a policy that Level of Service (LOS) "C" shall be used in evaluating and approving the transportation needs and traffic impact mitigation requirements. The LOS is described by the "1985 Highway Capacity Manual," Transportation Research Board, as "a qualitative measure describing operational conditions within a traffic stream,..." Policy 21e defines the LOS for minor arterial and collector roadway classifications.

*21e. With the exception of those roadway segments listed in Exhibit 8 Minor Arterial and Collector facilities shown on the Regional Transportation System Map shall be planned to provide Level of Service "C" or better.*

The impact on traffic and circulation has been mitigated with the consolidation and redesign of the primary access to the project. The project was originally designed to have two access points, Zolezzi Lane and Whites Creek Lane. Further studies by the project's consultants and the Regional Transportation Commission (RTC) staff indicated a potential negative impact to the LOS for Zolezzi Lane (see attached.) The RTC staff recommend that Whites Creek Lane be the primary access point to the project, with only limited access from Zolezzi Lane. Final design and County approval conditions of the project show Whites Creek Lane being the only access to the project with Zolezzi Lane providing only gated emergency access. The concern of having only one access entrance for ingress / egress for Southwest Pointe residents was mitigated by providing a four lane road with a 30 foot median separation. This satisfied Washoe County Planning Commission, Board of County Commissioners and RTC staff with regards to having a single access entrance.

In addition, the project has been conditioned in order to phase the construction of area roadway system improvements, both inside and outside the project, to be made in conjunction with or prior to the development of Southwest Pointe. The design of Whites Creek Lane, from Southwest Pointe to Wedge Parkway, and a portion of Thomas Creek Lane, south of Whites Creek Lane, as minor arterials is consistent with the Land Use and Transportation element of the Southwest Truckee Meadows Area Plan. The area land use and transportation system has gone through extensive public debate and review during the development of the Southwest Truckee Meadows Area Plan. It appears that the adopted area plan was a compromise on the major issues and concerns involving each of the surrounding neighborhoods. The project has been conditioned to create a Special

**REGIONAL PLANNING COMMISSION - AGENDA ITEM IV-1****MARCH 23, 1994****PAGE 5**

Assessment District of property owners for financing improvements that will use and benefit the area's roadways impacted by this project. Prior to final approval the developer has been conditioned to provide a pedestrian circulation plan, especially addressing student activity on Whites Creek Lane. According to the project's traffic consultant, with the concurrence of the RTC staff, the surrounding streets and intersections will continue operating at a LOS "C".

**Public Safety**

The project consultant has received input and recommendations from both Truckee Meadows Fire Protection District and the Nevada Division of Forestry. Currently the property is within the jurisdiction of the Nevada Division of Forestry, Sierra Fire Protection District. It has not been determined which fire protection agency would best serve the residents of Southwest Pointe, therefore Washoe County has conditioned the project to satisfy the concerns and requirements of the applicable fire protection agency prior to final adoption of the Development Agreement.

**Conservation**

A preliminary wetlands assessment has been prepared and potential impacts to wetlands appear to be mitigated in the project design. A detailed wetlands determination will be required by Washoe County and must be approved by the Army Corps of Engineers. The consultant should at some time seek a definition of Regionally Significant Hydrologic Resources (RSHR) as outlined in Exhibit 3 of the Regional Plan. Policy 11c defines the intent of preserving the region's wetlands. The requirement to preserve wetlands is encourage through policy 11j.

*11c. The Region's development should be planned so it does not result in a net loss of Federally Significant Hydrologic Resources (FSHR's) or Regionally Significant Hydrologic Resources (RSHR's) in the Region, in terms of acreage or significance.*

*11j. Master Plans developed to implement this Regional Plan should use land use designation, density transfers, transfer of development rights and other planning and regulatory techniques to discourage new urban development directly in areas identified as wetlands, stream environments, playas, spring fed riparian and small aquatic habitats or to ensure that appropriate mitigation will be provided for development occurring in these areas.*

Open Space shall be dedicated to an appropriate entity for the future management of this public resource. The project has been conditioned to develop an open space management plan along with a map designating approximately 1500 acres as open space. Currently, Washoe County is preparing the final version of the Regional Open Space Program for adoption. The project has been conditioned to coordinate with the appropriate agency in designing its open space management plan. Policy 18b describes the intent of the regional open space system.

*18b. Areas designated for inclusion in the Open Space System shall be planned, developed, operated and maintained in order to provide the Region with a permanent and accessible open space network. Prior to inclusion in the Public Open Space System, the specific land use designations which apply within these Open Space areas shall be found in the Master Plan of the*

**REGIONAL PLANNING COMMISSION - AGENDA ITEM IV-1****MARCH 23, 1994****PAGE 6**

*appropriate governmental entity as designated in the Growth Management and Land Use Element of this Regional Plan.*

Policy 17h of the Regional Plan, along with Resolution 93-2 (RPC), require local governments to develop an archaeological program that will protect the area's cultural resources which may be adversely affected by development activity. In the absence of an adopted archaeological program, the developer is required to follow the mitigation measures of an archaeological program approved by the affected Native American tribe and the State Division of Historic Preservation and Archeology.

*17h. Local governments and affected entities shall adopt an Archaeological Program, or similar regulations to ensure that significant archaeological, cultural and historical resources, structures, and sites are identified and protected prior to the occurrence of development activities. An Archaeological Program should contain the following elements:*

- local agency review procedures that will systematically identify projects and sites that may contain cultural, archaeological or historical resources*
- evaluation, excavation, documentation and/or protection of possible resources or sites by qualified individuals prior to the development approval and prior to the initiation of development activities*
- notification and consultation with appropriate affected agencies and groups, including the Nevada Division of Historic Preservation and Archeology, and affected or nearest, Indian Tribal Councils in the region*
- incorporation of mitigation conditions to ensure compatibility of projects with identified cultural, archaeological, or historical resources*
- assignment of responsibility to the project applicant to fulfill the mitigation conditions and to demonstrate that inventory, documentation and/or protection measures are completed consistent with the schedule of development activities*
- protection of the exact location and description of identified resources in situations where the disclosure of such information could present a threat to the safety and integrity of those resources*

The applicant has indicated that they are planning to comply with these archeological and cultural resource guidelines.

**RECOMMENDATION**

After reviewing the information which has been submitted by the project consultants and Washoe County planning staff, Regional Planning staff has concluded that the Southwest Pointe development conforms with the goals, objectives and policies of the Truckee Meadows Regional Plan. It appears that potential regional issues have been properly addressed and mitigated in the proposal and through the findings and conditions of the county's approval of the project. An analysis prepared by Washoe County Development Review staff has reviewed the conformance of the proposal with the Southwest Truckee Meadows Area Plan and found that it is consistent with that plan.

The Regional Planning staff review has focused on the conformance of the Southwest Pointe Project of Regional Significance with the policies of the Truckee Meadows Regional Plan. The Regional Planning

**REGIONAL PLANNING COMMISSION - AGENDA ITEM IV-1****MARCH 23, 1994****PAGE 7**

Commission should verify that the Southwest Pointe development does not in any reasonable way obstruct the attainment of the goals, objectives and policies of the Regional Plan. In staff's judgment, the Southwest Pointe Project of Regional Significance does conform with the goals, objectives and policies of the Regional Plan.

It is therefore **RECOMMENDED** that the Regional Planning Commission make a determination that the Southwest Pointe Project of Regional Significance is in conformance with NRS 278.026 through 278.029, inclusive, and with the policies of the Truckee Meadows Regional Plan, based on the following specific findings:

1. The project is proposed at an overall residential density of approximately one unit per three acres, which falls within the density ranges depicted on the Regional Land Use Diagram and the Southwest Truckee Meadows Area Plan and further defined in policies 2n, 2i, 2s.
2. The project is a master planned community as described in policy 2y of the Regional Plan, which provides for the protection of open space, wetlands, cultural resources and encourages other prudent planning objectives including clustering development, as defined in policy 2z, in less sensitive areas.
3. The project is consistent with the criteria governing Projects of Regional Significance by its objective of identifying and mitigating adverse impacts to hillsides and other environmental resources.
4. The project has been conditioned to achieve conformance with transportation, fire protection and other regional infrastructure requirements prior to finalizing the Development Agreement with Washoe County.
5. The project will be designed to protect Federally Significant Hydrologic Resources (FSHR's) and Regionally Significant Hydrologic Resources (RSHR) and is therefore consistent with policy 11c and 11j of the Regional Plan.
6. The project is consistent with policy 18b and has been conditioned to protect valuable natural resources by designating approximately 1500 acres of undeveloped land through an open space management plan with future integration into the Regional Open Space Program.
7. Prior to finalizing the Development Agreement and any ground disturbance the developer will include provisions in the Development Agreement to implement a cultural resources program, as outlined in policy 17h and Resolution 93 2 (RPC).

**APPROVAL WITH  
CONDITIONS**

**WASHOE COUNTY PLANNING COMMISSION  
STAFF REPORT**

To: Members of the Washoe County Planning Commission

Re: Development Agreement Case No. DA9-1-93

Date: January 11, 1994

Prepared By: JVM

**GENERAL INFORMATION SUMMARY**

**Applicant:** Dingman Investments

**Requested Action:** To develop a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center and a commercial village center. The total acreage of the project is  $\pm 3,171.6$  acres. The project entrance is proposed west of the intersection of Zolezzi Lane and Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN:49-010-04, 49-010-10 and 41-030-12)

**ANALYSIS**

Since the December 7, 1993 public hearing held by the Planning Commission concerning Southwest Pointe, the applicant has substantially revised the concept plan to reflect most of staff's recommendations. This report will address only the remaining issues that staff and the applicant cannot agree on and which require direction from the Planning Commission. The issues, findings and recommendations contained in the December 3, 1993 staff report still reflect staff's position concerning this application.

**OUTSTANDING ISSUES**

**STREETS/TRAFFIC**

Two roads shown in the Southwest Area Plan will be used by the applicant to access the project. Zolezzi Lane is shown as a collector street and Whites Creek Lane as a minor arterial. Whites Creek Lane will be constructed by the applicant from the project site to Thomas Creek Road before the first residential building permit is issued and will be extended to Wedge Parkway prior to the 85th building permit. The design of Southwest Pointe has been revised to direct all the projected

traffic to use Whites Creek Lane as the primary road serving the project. Except for a gated emergency access along Zolezzi Lane, the applicant is proposing Whites Creek Lane being the only road providing access to the site. It has been the County's position in other applications that at least two separate means of ingress/egress, to County public road standards, be provided for every development.

The applicant is proposing a unique design for Whites Creek Lane to meet the intent of having two means of access into the site. The applicant is proposing that Whites Creek Lane be four lanes with two 29<sup>1</sup>/<sub>2</sub>'-cartways and a thirty foot landscaped median from Thomas Creek Road into the project. *A multi-purpose pedestrian/bicycle path would be provided outside of the right-of-way.*

Staff does not believe this design meets the intent and purpose of having two separate means of access for a subdivision. The large size of this project amplifies the need for two separate roads serving the project. The purpose of having more than one access is for the safety for the residents. In the event that the primary access becomes blocked, an alternate means of entering or leaving the site is provided. The applicant is proposing Zolezzi Lane be used for emergency purposes only, gated and designed to emergency standards.

Another reason for having two separate means of access is to distribute traffic and reduce the projected traffic volumes from being concentrated on a single road. Zolezzi Lane is identified as a collector in the adopted area plan. Staff recommends that a second access be provided into the site using Zolezzi Lane. *The new design of the project directs almost all of the projected traffic to use Whites Creek Lane and not Zolezzi Lane.* Staff recommends that the internal loop road be extended to Welcome Way to provide a second access that is constructed to County local street standards.

If a road connection is made to Zolezzi Lane, the design of Whites Creek Lane, as proposed by the applicant, would only be for the on-site portion of the road. The remaining section, connecting to Thomas Creek Road, would only be constructed to County standards, without the landscaped median.

#### **Construction Haul Route**

The developer is proposing to use Thomas Creek Road, from the Mt. Rose Highway to Whites Creek Lane, as the construction haul route for the first 85 dwelling units. A traffic analysis and an intersection design for Thomas Creek Road/Whites Creek Lane would have to be prepared by a licensed Nevada Civil Engineer, as improvements will have to be made to Thomas Creek Road by the applicant to use this route. Prior to the 85th residential building permit being issued, Zolezzi Lane may be used to bring empty construction equipment, that is necessary to grade the golf course and install necessary utilities, onto the site. The primary construction haul route will become Whites Creek Lane once it is connected to Wedge Parkway.

Any haul route will need to be approved by the County Engineer and improvements made to his satisfaction. All individual home builders will be required to use the approved haul route.

#### **REGIONAL STORMWATER DETENTION**

The 1990 Kennedy/Jenks/Chilton report and the 1993 COE Thomas Creek Reconnaissance Investigation report state the need for a flood detention facility to be constructed along Thomas Creek for protecting existing and future developments near South Virginia Street. Two sites are

washoe county development review

proposed for the construction of a detention facility. Both of the sites are located on the Southwest Pointe property where the school and park sites are proposed.

As the Utility Division has indicated that the southern site is the more likely to be utilized, staff is recommending it be reserved for period of five years, and if constructed, be dedicated to the County. Should the flood detention facility be constructed, the middle school site and park location would not be offered for dedication by the applicant. If the Kennedy/Jenks/Chilton report is not adopted by the County, or if other suitable alternative solutions are found to reduce the downstream flooding, this site should be offered for dedication for the school and park uses.

**CITIZEN INPUT**

Staff has received numerous inquiries from residents who live in the Field Creek subdivision. Many of these resident's homes are adjacent to the proposed Whites Creek Lane. As part of the Field Creek development, a 100' right-of-way was dedicated to the County for this road. Many of the residents are concerned with the noise and other impacts that a new road will create. Staff and the applicant's agent met with these homeowners to discuss their concerns.

None of the affected homes were created when Whites Creek Lane was included in the adopted area plan. The residents feel they were not notified about the future road being located behind their homes and they would like the road alignment to be relocated to the south. Some residents would like to see a north-south road be constructed through the Southwest Pointe development to relieve some of the projected traffic demand projected on Whites Creek Lane.

**APPLICABLE REGULATIONS**

Nevada Revised Statutes Chapter 278; Washoe County Code Chapter 110.

JVM(DA193S2)

**WASHOE COUNTY PLANNING COMMISSION  
STAFF REPORT**

To: Members of the Washoe County Planning Commission  
Re: Development Agreement Case No. DA9-1-93  
Date: December 3, 1993  
Prepared By: JVM

**GENERAL INFORMATION SUMMARY**

**Applicant:** Dingman Investments  
  
**Requested Action:** To develop a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center and a commercial village center. The total acreage of the project is ±3,171.6 acres. The project entrance is proposed west of the intersection of Zolezzi Lane and Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN:49-010-04, 49-010-10 and 41-030-12)

**RECOMMENDATION/FINDINGS**

Based upon the staff analysis, comments received, and the site inspection, staff recommends approval of the request with conditions and offers the following motion for your consideration:

The Washoe County Planning Commission recommends approval of Development Agreement Case No. DA9-1-93 (Southwest Pointe) with the attached conditions, having made the findings:

1. That this request conforms to the goals and policies of the adopted Southwest Truckee Meadows Area Plan;
2. That the requested subdivision is consistent with the density provisions and lot size regulations of the Washoe County Development Code;
3. The requested development agreement is consistent with the provisions of Section 814 of the Washoe County Development Code;
4. The physical design of the project and the manner in which the design does make adequate provision for public services;
5. The site is particularly suitable for the density and type of residential development proposed;

6. The amount, purpose and location of common open space provided in the proposed project is adequate as related to the proposed density and type of residential development;
7. The proposed maintenance and conservation of common open space is adequate to serve the proposed project;
8. The terms and conditions of this development agreement are sufficient to protect the interests of the public, residents, and the owners of the land subject to the development agreement in the integrity of the plan;
9. The conditions of approval ensure consideration of the items cited in NRS 278.349; and
10. That the Commissioners gave reasoned consideration to the information contained within the staff report and information received during the meeting.

## ANALYSIS

### DEVELOPMENT AGREEMENT PROCESS

The development agreement consists of two steps as presented in the Washoe County Development Code. The first step in the process is the preliminary development agreement which consists of a document which describes the project and either a concept plan or a site plan. The applicant for Southwest Pointe has submitted a concept plan for the entire project along with a site plan for phase I development.

The applicant may also choose to submit other applications concurrently with the preliminary development agreement. As part of Southwest Point, for example, a tentative map application for phase I and accompanying special use permits for a water storage system, a child care facility, a village commercial center, two golf courses, driving range and recreation facilities, and an equestrian center have also been submitted for review. It is anticipated these subsequent applications will be heard after the preliminary development agreement has been approved by the Planning Commission.

The Planning Commission has until March 15, 1994 to take action on the preliminary development agreement application. If the preliminary development agreement is approved by the Planning Commission, a public hearing shall be scheduled before the Washoe County Board of County Commissioners within 30 days of the approval date. If the County Commissioners choose to modify the development agreement, the modification shall be referred to the Planning Commission for consideration.

As this project exceeds the threshold for the amount of housing units, need for waste water treatment and water usage, and amount of traffic generated, the proposed development is considered to be a project of regional significance. Once the Board of County Commissioners approves the preliminary development agreement, the Truckee Meadows Regional Planning Commission will review it to determine whether it complies with the Truckee Meadows Regional Plan.

The Director of Development Review shall review and find the final development agreement is the same development agreement as approved by Washoe County and the Truckee Meadows Regional Planning Commission. The Washoe County Board of County Commissioners shall execute the final document.

No development of the project may begin until the final development agreement has been approved and filed for recordation with the County.

#### PROJECT DESCRIPTION/DESIGN

The proposed development consists of  $\pm 3,272$  acres and is located in the southwest truckee meadows area. The subject property is located west of Zolezzi Lane and Thomas Creek Road and is north of the Mount Rose Highway. The Toiyabe National Forest is located along the west property line. Both Thomas Creek and Dry Creek cross the property. Also located on the site are two water tanks that were constructed by the South Truckee Meadows General Improvement District, and an easement for a 120 Kilovolt electrical transmission line that bisects the site in a north/south direction. A vicinity map is attached.

The proposed development consists of 1,090 single family residences, two 18-hole golf courses, a recreational center with tennis courts and a driving range, an equestrian center and a day care facility.

The residential component of this project will consist of lot sizes that range from one acre and larger lots (approximately 45 percent of residential units), 15 percent will be a minimum 1/2 acre lots and the remaining 40 percent will be a minimum of 12,000 square feet. The percentage of varying lot sizes is intended to be flexible in the concept plan. The exact proportion will be incorporated into the site plan for each phase to be included in the final development agreement. The proposed density and lot sizes are consistent with the adopted Southwest Truckee Meadows Area Plan.

The proposed 20,000 square foot neighborhood commercial use is permitted as a special use permit. This use is consistent with the goals and policies of the Comprehensive Plan and is compatible with the overall design of the project. By locating the neighborhood commercial use in a central location, it will internalize many pedestrian and vehicular trips within the project. The relatively small size of the use is not large enough to generate a large number of vehicle trips from outside the project.

The proposed golf courses add to the rural atmosphere that many area residents have supported. Care must be taken, however, to ensure that any runoff does not negatively impact the water quality in the area.

#### PHASING

The project shall be developed in three phases. Phase I includes a tentative map for 410 lots, an 18-hole golf course, the village center and driving range. Phase II will include an additional nine holes, the equestrian center and a tentative map for approximately 230 dwelling units. Phase III includes the remaining 450 lots and the last nine holes of golf.

#### STREETS/TRAFFIC

The following policies from the Washoe County Comprehensive Plan relating to traffic are relevant to this application:

**LUT.2.4 REQUIRE THAT ROADWAY FACILITIES BE MAINTAINED AND CONSTRUCTED AS NEEDED TO ENSURE HIGH QUALITY AND SAFE TRAVEL.**

LUT.2.4.1 The minimum acceptable Level of Service (LOS) for all County maintained roadway facilities shall be LOS C.

washoe county development review

**LUT.2.5 DEVELOP FINANCIAL PLANS TO ENSURE MAXIMUM COLLECTION AND EFFICIENT EXPENDITURES OF TRANSPORTATION IMPROVEMENT FUNDS.**

LUT. 2.5.3 The financial responsibility for providing all local internal roads and all collector roads needed to connect new development to the regional arterial roadway network should be borne by the development(s) which benefit from their construction. Impact program fee credits shall not be provided for any roadway that does not provide a regional benefit beyond serving the development or developments for which it was originally constructed.

The following policies from the Southwest Truckee Meadows Area Plan relating to traffic are relevant to this application:

**SWTM.4.1 ENSURE THAT CONSTRUCTION OF ROADWAY IMPROVEMENTS ARE ACCOMPLISHED IN A FASHION THAT SUPPORTS THE TRAFFIC EXPECTED ON OPENING DAY. IN THE CASE OF FACILITIES THAT CAN BE CONSTRUCTED TO A LOWER CLASSIFICATION TO SUPPORT THE OPENING DAY TRAFFIC (E.G. COLLECTOR VS. MINOR ARTERIAL), THE LOWER CLASSIFICATION FACILITY SHALL BE CONSTRUCTED.**

**SWTM.4.2 REQUIRE ANY DEVELOPMENT PROPOSAL THAT MUST HAVE ACCESS TO WHITES CREEK ROAD TO MEET THE FOLLOWING CONDITIONS WHEN APPROPRIATE:**

- A. CONTRIBUTE TO CONSTRUCTION OF THE WHITES CREEK ROAD.**
- B. TIME CONSTRUCTION OF THE DEVELOPMENT WITH COMPLETION OF THE APPROPRIATE PORTION OF THE WHITES CREEK ROAD NEEDED FOR THAT DEVELOPMENT.**

The proposed project, beginning with phase I, will need to be served by two roads, Zolezzi Lane and Whites Creek Lane. Zolezzi currently stops near the Reno Christian Fellowship and Whites Creek Lane does not extend to the site. The applicant is proposing to extend Zolezzi Lane to their property line, and construct Whites Creek Lane from Thomas Creek Lane to their property line, connecting them with an internal loop road. The applicant is proposing to dedicate the loop road to the County when it is completed.

**Zolezzi Lane**

The applicant is proposing to extend Zolezzi Lane to their site. Zolezzi Lane is identified as a collector in the Southwest Truckee Meadows Area Plan. As a collector, the Area Plan requires that two through-lanes be provided with sufficient road width for a turning lane for a minimum of 60 foot right-of-way (r.o.w.). In order to maintain the adopted County standard for a level-of-service "C" (LOS C) the maximum daily trips cannot exceed 9,580 along Zolezzi Lane. Although the Area Plan states the need to upgrade Zolezzi Lane to a minor arterial by the year 2007, there is insufficient r.o.w. to expand this road. Further, the Area Plan policy recommends that, when possible, roads should be constructed to the lower classification.

Although there is existing capacity in Zolezzi lane to accommodate additional trips, most of this available capacity will be absorbed by approved/unbuilt development. The applicant for Southwest Pointe is requesting to use the remaining capacity to serve phase I (410 dwelling units) of the development. The Regional Transportation Commission (RTC) has reviewed this application and concurs that the trips generated from phase I could leave Zolezzi Lane operating at LOS C, but the traffic generated from existing approved/unbuilt projects in the area would greatly exceed

washoe county development review

the remaining capacity when they are constructed. Should traffic along Zolezzi Lane exceed its available capacity, one of two options would need to be completed to accommodate the additional demand.

One option would be to upgrade Zolezzi Lane to a minor arterial classification. Four lanes of roadway would be needed. The current design of Southwest Pointe will cause Zolezzi Lane to fall below the County standard LOS C. If the current design is approved, the applicant will need to apply for an amendment to the Comprehensive Plan to upgrade Zolezzi Lane from a collector to a minor arterial.

Zolezzi Lane is shown on the area plan as a two lane collector (60 foot ROW) and, therefore, would not have the capacity for the build out traffic volumes expected (13,421 ADT for Southwest Pointe alone) using the County adopted LOS C. Presently, the right-of-way for Zolezzi Lane is a mixture of 60, 70 and 80 feet. There are a number of existing homes that front on Zolezzi Lane, which arterial standards do not permit, and several existing residential streets, that are spaced closer than what is allowed by arterial standards, provide access for the surrounding developments. These constraints would make it very difficult to upgrade Zolezzi Lane to a minor arterial standard, which is needed to carry the anticipated traffic volumes. Staff does not recommend approval of the current design of Southwest Pointe or the upgrading of Zolezzi Lane.

The second option would be to construct Whites Creek Lane from Thomas Creek Road to Wedge Parkway and eventually South Virginia Street. Although many projects in the area are dependent on using Zolezzi Lane, traffic from Southwest Pointe can be directed towards Whites Creek Lane, which would eliminate the need to upgrade Zolezzi Lane.

The RTC estimates that with all of the approved/unbuilt development in the area that will have to use Zolezzi Lane, there would be sufficient capacity remaining to accommodate an additional 1,000 trips from Southwest Pointe. This is equivalent to approximately ten percent (100 dwelling units) from Southwest Pointe.

Staff and RTC recommend the design of Southwest Pointe be revised to allow a maximum 109 dwelling units to access Zolezzi Lane. Additionally, a monitoring program should be initiated by RTC, as part of phase I development, in order that annual counts be made to determine when Zolezzi Lane reaches a LOS C. Once this threshold has been reached, no further building permits in the Southwest Pointe development would issued until Whites Creek Lane is constructed from the project site to its terminus at South Virginia street.

#### **Whites Creek Lane**

In the preliminary development agreement, the applicant is proposing to construct Whites Creek as an emergency access from their project to Thomas Creek Lane. The absence of Whites Creek Lane will contribute to the congestion of Thomas Creek Road. The Area Plan identifies Whites Creek Lane as a minor arterial with a 100 foot r.o.w. Staff recommends that Whites Creek Lane be constructed to County standards by the applicant as a two lane street from the project site, through the U.S. Forest Service property, and connect to Thomas Creek Road as part of phase I construction. The intersection design of Thomas Creek Road and Whites Creek Lane will need to be approved by the County Engineer. To accommodate the remaining 90 percent of the traffic generated by the project, Whites Creek Lane will need to be constructed to four lanes from Thomas Creek Road to its intersection with the secondary loop road.

The developer is proposing to use the monies collected from the County interim fee program to pay for the Construction of Whites Creek Lane from Thomas Creek Road to Wedge Parkway. The following street improvement projects are listed in the FY 1992-97 Washoe County Capital Improvements Program:

washoe county development review

- Construct new arterial (Wedge Parkway) from the Mt. Rose Highway to Zolezzi Lane.
- Construct Whites Creek Road from Thomas Creek Road east to the new arterial (Wedge Parkway) connecting the Mt. Rose Highway and Zolezzi Lane.

Prior to the approval of the final development an "area wide" Transportation Study be performed by to assess the offsite roadway requirements of this project. The study should consider (a) the effects of all existing development, (b) effect of all possible future developments, (c) an analysis of the operation of the existing intersections affected by this project, and (d) a design of the Wedge Parkway/Zolezzi Lane intersection including an alignment study for Wedge Parkway between Whites Creek Lane and Zolezzi Lane. The objective of the study is to determine the cumulative effects of development in the study area. The applicant shall pay their fairshare cost for the "area wide" Transportation Study.

#### **Internal Streets/Project Design**

To ensure that Whites Creek Lane is the preferred means of access for future residents of Southwest Pointe for all but ten percent of future dwelling units, the concept plans and subsequent tentative maps will need to be revised to direct traffic towards this road. These revisions should include, but not be limited to:

1. relocation of the day care center near the proposed elementary school, relocate both schools to the north of Whites Creek Lane;
2. design of the school sites to avoid having a "reduced speed zone" along Whites Creek Lane;
3. construction of an all weather pedestrian and bicycle improvements should be made along Whites Creek Lane and the two loop roads;
4. redirection of streets and entrances in the concept plans towards Whites Creek Lane; and
5. development and submittal of a pedestrian circulation plan as part of the final development agreement.
6. elimination of the access of the secondary loop road to Zolezzi Lane between the equestrian center and the driving range.

#### **Construction Haul Route**

The developer is proposing to use Thomas Creek Road to the Whites Creek Lane (west of Thomas Creek Lane) as the construction haul route for the entire project. Improvements will have to be made to Thomas Creek Lane by the applicant to use this route. A traffic analysis and an intersection design for Thomas Creek Road/Whites Creek Lane would have to be prepared by licensed Nevada Civil Engineer. An analysis of Thomas Creek Road/Mt. Rose Highway intersection would also be needed. The primary construction haul route will become Whites Creek Lane once it is connected to Wedge Parkway.

Another possible alternative for construction haul route would have the applicant construct a alternative access to the site, possibly using the existing maintenance road for the power line that bisects the site.

Staff does not recommend Zolezzi Lane be used for construction traffic as this street currently functions as a residential collector and would be unsafe as a haul route, especially over a 15 year build-out period.

Any haul route will need to be approved by the County Engineer and improvements made to his satisfaction. All individual home builders should be required to use the approved haul route.

washoe county development review

## **PARKING/STREET DESIGN**

In order to maintain a rural character, the applicant is proposing to have "rural roads" and "rural cul-de-sacs" which do not allow on-street parking. While the absence of on-street parking adds to the rural character of the neighborhoods, staff is concerned about the lack of space for additional parking. The applicant is proposing to add areas for additional parking at a ratio of one space per three homes. Staff concurs with this idea with the understanding that auxiliary parking areas not be located farther than 300 feet from surrounding homes and that parking lots be screened and landscaped.

In addition to the off-site parking, staff recommends that additional space be provided for storage within garages of homes on 12,000 square foot lots. This would help homeowners use the garage for parking their cars and not as a storage room.

According Chapter 85 Washoe County Code, all private and public streets must have a minimum 50 foot right-of-way and be improved to Washoe County Public Works standards. The developer is proposing to construct some of the streets that have a 41 foot right-of-way.

## **Golf Course Crossing**

No "at-grade" crossings for golf carts will be allowed along the primary loop road as this will become a County collector street. Golf cart crossings will have to be underground or by a bridge over the street. Staff recommends a tunnel crossing be used to avoid the appearance of a large structure that a bridge would create. The design for cart-crossings on the private streets shall be reviewed and approved by the County Engineer.

## **North-South Road**

During the review process, TMS/Tessa expressed their concern about the proposed traffic circulation plan around Southwest Pointe. This developer would like to see a road constructed that would connect the Mt. Rose Highway to either Zolezzi Lane or Whites Creek Lane. A north-south connection was not considered by the applicant of Southwest Point or by staff since it is not proposed in the adopted Area Plan.

## **OPEN SPACE/CONSERVATION**

As part of the project design, approximately 1,575 acres of natural open space would be provided in addition to a 10-acre park site, six-acres of regional trails and one-acre trail head. The concept plan concentrates most of the development in the center of the site and is surrounded by an open space buffer.

The following policy from the Washoe County Comprehensive Plan concerning wildlife habitat is relevant to this application:

### **C.2.15 PROTECT KEY WILDLIFE HABITATS; HABITATS OF THREATENED, ENDANGERED OR RARE SPECIES; AND KEY MIGRATION ROUTES.**

The Nevada Division of Wildlife (NDW) has reviewed this application. This project is located in the critical winter range for the mule deer that inhabit the Carson Range. Mule deer migrate to these lower elevations to escape deep snow and to forage. The NDW supports the "mitigative zoning and buffer aspects" of the project, but note that special efforts to maintain browse shrubs within the buffer and fire protection zones should be included in the development. The NDW also notes its concern about the proposed golf course and their attraction by Canada geese. The developer should continue to work with the NDW throughout the construction of the project to address these issues.

washoe county development review

The following policy from the Washoe County Comprehensive Plan concerning archaeological preservation is relevant to this application:

**C.1.3 DO NOT KNOWINGLY ALLOW DESTRUCTION OR LOSS OF A CULTURAL OR SCENIC RESOURCE THROUGH A DISCRETIONARY ACTION (E.G. LAND USE PLANNING) OR ADMINISTRATIVE ACTIONS (E.G. ISSUANCE OF BUILDING PERMITS) UNLESS: (A) THE SITE OR RESOURCE HAS BEEN REVIEWED BY THE DIVISION OF HISTORIC PRESERVATION AND ARCHEOLOGY AND THE APPROPRIATE LOCAL GOVERNMENT AND HAS BEEN FOUND TO BE OF INSIGNIFICANT VALUE, OR (B) THERE IS AN OVERRIDING PUBLIC BENEFIT FROM THE PROJECT AND MITIGATION MEASURES TO OFFSET THE LOSS ARE MADE PART OF THE PROJECT.**

C.1.3.1 The Washoe County Department of Development Review will request an archeological/historical survey during the planning stages of a project if the project is located in an area of high archaeological sensitivity that has not been previously surveyed.

C.1.3.2 The Washoe County Department of Development Review will request project design guidelines (e.g. clustering of buildings visual or aesthetic standards, and buffering) in areas found to have cultural and/or scenic value in order to avoid loss or degradation of the resource.

The Nevada State Historic Preservation Office (SHPO) has reviewed the proposed project and a number of archaeological sites are present within the subject property. The SHPO recommends that a cultural resources survey be conducted for previously unsurveyed areas and that previously recorded, unevaluated sites be evaluated for their significance (National Register Eligibility).

A preliminary wetlands investigation was prepared by the applicant and three types of waters/wetlands were found. Most of these areas are located along streams and creeks. A final wetlands delineation, and approval by the Army Corps of Engineers, shall be included as part of the final development agreement.

The following policy from the Washoe County Comprehensive Plan concerning protection of riparian vegetation is relevant to this application:

**C.2.4 REGULATE DEVELOPMENT IN ORDER TO PROTECT THE RIPARIAN VEGETATION ASSOCIATED WITH THE TRUCKEE RIVER AND THE STREAMS, CREEKS AND WETLANDS OF THE REGION.**

C.2.4.1 In order to protect vegetation along streams and the Truckee River, the Washoe County Department of Development Review will require the following, as appropriate, during development review:

- a. Establishment of setbacks from the top of the bank.
- b. Regulation of the removal of trees and other vegetation.

C.2.4.2 As appropriate, the Washoe County Department of Development Review will direct the design of new roads, housing, subdivisions, and other land uses in streamside areas so that riparian vegetation is retained and the streams remain open and unfenced.

washoe county development review

- a. When roads must be constructed parallel to a stream, they should be built with a wide separation of the road from the stream and no homesites placed between the road and the stream. The land between the road and the stream should remain as open space and could include planned trails or bicycle paths.
- b. Free movement and access to the stream and to the riparian areas shall be permitted.

There are two areas within the project that have riparian vegetation. Some of the proposed development is adjacent to these areas. Special attention must be given to buffer these areas from any site disturbances. Buffers shall be provided in the design of future subdivision and golf course development.

Pursuant to section 110.408.45 of the Development Code, provisions for the common open space development shall be conditioned upon approval of the tentative subdivision. Provisions shall be made to monitor and maintain, for a period of three-years regardless of ownership, a maintenance plan for the common open space area. The maintenance plan for the common open space area shall, as a minimum, address the following:

- (1) Vegetation management;
- (2) Watershed management;
- (3) Debris and litter removal;
- (4) Fire access and suppression;
- (5) Maintenance of public access and/or maintenance of limitations to public access; and
- (6) Other factors deemed necessary by the Planning Commission or the Board of County Commissioners.

Prior to the approval of the final development agreement, a maintenance plan shall be prepared and submitted to Development Review staff for review. Provisions shall be made for the permanent preservation and ongoing maintenance of the common open space and other common areas. CC&R's (with the County as an interested party) are generally utilized as the legal instrument for enforcement.

A deed restriction should stipulate what uses will be permitted in the common open space and prohibit future sale of properties without the consent of the County.

An open space management plan and map should be prepared that identifies the ownership of all open space and who will be responsible for maintaining these areas. The common area located within the development shall be identified as equal fractional ownership between all lots in this development and any maintenance shall be perpetually funded and privately maintained by the homeowner's association.

**RECREATION**

**C.2.19 ENCOURAGE SUBURBAN RESIDENTIAL SUBDIVISIONS TO INCLUDE LANDSCAPING WITH TRAILS, AND BIKE PATHS IN THE DESIGN OF ALL BUFFERS AND OPEN SPACE.**

As previously stated, a 10-acre park site is offered for dedication to the County. A sketch plan has been submitted, which conceptually approved by the County, should be included in the final development agreement. The applicant is proposing to enter into an agreement with Washoe County where the developer would construct the recreational facilities in the park. The developer would then be reimbursed for the cost of the construction from the Residential Construction Tax.

The applicant is also proposing that the homeowner's association would be responsible for maintaining the park.

As part of project, approximately six miles of trails will be located in the common open space to be dedicated to the County or other public body. The developer will work together with staff from the Department of Parks and Recreation to locate the regional, public trails to the satisfaction of Washoe County and the developer.

#### **AIR QUALITY**

The District Health Department has reviewed this application and is concerned about the amount of dust that will be created from the large amount of grading needed for this project. The area in question is subject to gusty wind conditions, especially during the spring and summer months. Prior to a grading permit being issued, a detailed dust control plan must be submitted to, and approved by, Air Quality Management, for each phase of development.

#### **DRAINAGE/STORMWATER MANAGEMENT**

- PSF.3.8. CONTROL STORMWATER RUNOFF FROM NEW DEVELOPMENTS TO:**
- A. PREVENT SILTATION AND POLLUTION OF LAKES, RIVERS AND STREAMS.**
  - B. PREVENT EROSION, FLOODING AND OTHER SURFACE WATER DAMAGE.**
  - C. PREVENT INCREASES IN DOWNSTREAM PEAK FLOWS.**
  - D. PRESERVE AND ENHANCE THE REGION'S WATER RESOURCES.**

**PSF.3.8.2** The Washoe County Department of Development Review will ensure that new development provides on-site detention and drainage facilities as needed to make sure that development of the site does not adversely impact downstream properties and is consistent with the wetlands protection policies.

Properties downstream in Thomas Creek and Dry Creek are currently subject to flood damages during 100-year flood events. The project will require control of post-development 100-year runoff rates from on-site activities to pre-development conditions.

Thomas Creek is to become a major source of drinking water for the South Truckee Meadows. The storm water and urban drainage from this project cannot be allowed to degrade the water quality in Thomas Creek. The storm water and urban drainage from this project will require treatment prior to discharge into Thomas Creek to control sediment, oils, grease, nutrients and other chemicals that are used on landscaping.

The project design proposes on-site detention ponds are to be incorporated into the project design. All detention basins shall be maintained by the developer, and eventually the home owners association. The detention facilities will need to be designed to incorporate control of the above mentioned contaminants, and include operation and maintenance schedules and periodic water quality sampling. In addition to detention facilities, systematic cleaning of the streets, parking lots and catch basins, and control of salt and sanding activities need to be delineated. All of these activities should be included into an storm water and urban drainage management plan that will be incorporated into the final development agreement.

Dry Creek is not anticipated to become a source of drinking water but does flow, in many locations, into Steamboat Ditch which will become a source of drinking water for the South Truckee Meadows. The stormwater discharges from this project that flow to Dry Creek will need to be controlled to pre-development flow conditions and will be controlled to prevent water quality

washoe county development review

degradation of Steamboat Ditch. Drainage structures under Steamboat Ditch should also be provided that would pass the 10-year frequency storm event.

The proposed golf courses will need to be designed to prevent direct discharge of surface water runoff to Thomas Creek. A golf course management plan will need to be prepared and included in the final development agreement, that documents how the migration of fertilizers, pesticides, herbicides and fungicides to surface and ground waters will be prevented. A surface and ground water sampling program will also need to be implemented to demonstrate that migration is not occurring, and commits to modifying practices in the event that any of the above materials are detected.

The proposed equestrian center's drainage, unless properly designed, could contain significant quantities of bacteria, nutrients, and other animal waste products. These animal wastes, if discharged into Thomas Creek, would be very detrimental. An animal waste management plan for the equestrian center should be prepared and submitted prior to any permits being issued for this use.

Construction of this project without the imposition of erosion and sediment controls during construction would negatively impact Thomas Creek and Steamboat Ditch. A construction management plan with erosion and sediment controls, and operation and maintenance schedules along with sampling of Thomas Creek above and below the project, will need to be prepared and included in to final development agreement.

Snow storage areas are needed for this project and need to be shown on the tentative maps.

#### **REGIONAL STORMWATER DETENTION**

The 1990 Kennedy/Jenks/Chilton report and the 1993 COE Thomas Creek Reconnaissance Investigation report state the need for a flood detention facility to be constructed along Thomas Creek for protecting existing and future developments near South Virginia Street. Two sites are proposed for the construction of a detention facility. Both of the sites are located on the Southwest Pointe property where the school and park sites are proposed.

It is staff's recommendation that the off-site location be reserved for period of five years. If the Kennedy/Jenks/Chilton report is not adopted by the County, or if other suitable alternative solutions are found to reduce the downstream flooding, this site should be used for the school and park uses.

#### **EMERGENCY RESPONSE**

The Washoe County Comprehensive Plan recommends that a maximum 10 to 15 minute response time for police be provided for residential development. According to the Washoe County Sheriff's office, the current response time for emergency calls in this area is approximately 14 minutes and 20 minutes for non-emergency calls. Although the Sheriff's office will be able to serve this project by using Zolezzi Lane, there will be an increase to the overall response time. To reduce response for this project and other development in the area, the Sheriff's office recommends that a north/south arterial be constructed thorough this subdivision.

The following policy from the Washoe County Comprehensive Plan relating to fire protection is relevant to this application:

- C.2.6      ENCOURAGE NEW AND EXISTING DEVELOPMENT IN OUTLYING AREAS TO ESTABLISH FIREBREAKS, AND RELOCATE AND/OR MAINTAIN FIRE ROADS WHEN SUCH ROADS ARE IMPACTED BY THE DEVELOPMENT.**

washoe county development review

The Washoe County Comprehensive Plan recommends that a maximum 5 to 10 minute response time for fire protection be provided for residential development. This project is located within the boundaries of the Sierra Fire Protection District, Galena area and would be served by the existing station located approximately two miles west of the Mt. Rose Highway/Thomas Creek Road intersection. The Nevada Division of Forestry (NDF) is requiring that at least two 24 foot wide emergency access roads be provided from public right-of-ways. The NDF agrees with the Sheriff's office that a north/south road be provide from Callahan Ranch Road. As a minimum, Whites Creek Lane should be extended from the project site to Thomas Creek Lane as part of phase I.

The NDF is also requiring that perimeter road, at least 30 feet wide, be provided around the project to serve as access for emergency vehicles and as a fuel break for fire suppression. One possible method of providing a fuel break along the western project boundary is to locate the golf fairways between homes and the foothills. The developer is proposing to dedicate a one-acre site for a fire station along Whites Creek Lane near the proposed schools.

The Southwest Pointe Project is adjacent to the Truckee Meadows Fire Protection District (TMFPD). There has been some discussion about the project site being annexed by the TMFPD. *Should this annexation occur, the developer will need to comply with the TMFPD requirements.* Southwest Pointe should be designed to address the concerns of the fire protection agency that has jurisdiction of the project at the time of the final development agreement.

#### **PUBLIC SERVICES AND FACILITIES**

The following policy from the Washoe County Comprehensive Plan relating to water quality is relevant to this application:

**PSF.1.20 ENSURE WATER QUALITY STANDARDS ARE MAINTAINED CONSISTENT WITH THE SAFE DRINKING WATER ACT AND IN COMPLIANCE WITH THE NEVADA WATER POLLUTION CONTROL LAW AND UNDERGROUND INJECTION PROGRAM.**

PSF.1.20.1 The Washoe County Department of Development Review, in conjunction with other appropriate agencies, shall evaluate potential groundwater quality impacts for any project meeting the criteria for a Project of Regional Significance. A mitigation plan shall be developed and approved for those projects which are determined to have significant impacts on groundwater quality.

The proposed method of water supply is by the development of a new water system. Washoe County has drilled a series of test holes in the vicinity of the proposed development. It appears there are areas where there is a high likelihood of finding water sufficient in quantity and quality to serve this project. Additional testing of the wells Continued access to the existing monitoring wells must be provided or new wells should be provided by the applicant.

It is anticipated that Thomas Creek will eventually contribute to a surface water treatment plant. The Utility Division is concerned with activities occurring within this watershed. Development plans within the area of any well will be looked at carefully from the perspective of wellhead and groundwater protection.

A master plan for the phasing of dedication of water rights should be included in the final development agreement. Sufficient water rights will needed to serve the 1,090 homes, two golf courses, village center, school sites and park facility.

washoe county development review

Southwest Pointe will be served by the South Truckee Meadows Wastewater treatment plant. Evidence that sufficient capacity to serve this project shall be provided to staff prior to final map approval.

The following policy from the Washoe County Comprehensive Plan relating to water quantity is relevant to this application:

**PSF.1.24 REDUCE WATER DEMAND THROUGH XERISCAPE LANDSCAPING, RECLAMATION, AND REUSE OF WASTEWATER FOR PARKS, MEDIANS, GOLF COURSES, AND OTHER APPROPRIATE APPLICATION USES.**

To reduce groundwater irrigation, the developer is proposing to utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. The developer should install the necessary infrastructure as part of the initial construction to utilize this resource when it becomes available.

#### **SCHOOLS/EDUCATION**

Children in the southwest attend the Galena High School, Pine Middle School and either the Elizabeth Lenz or Brown Elementary Schools. The following policy from the Washoe County Comprehensive Plan relating to education is relevant to this application:

**PSF.7.1 PROVIDE AN ADEQUATE LEVEL OF SCHOOL SERVICES FOR WASHOE COUNTY RESIDENTS IN RESPONSE TO GROWTH IN WASHOE COUNTY**

PSF.7.1.2 The Washoe County School District, in conjunction with the Washoe County Department of Comprehensive Planning, will determine the need and location of future school facilities to satisfy projected enrollment.

The applicant is offering to dedicate a 25-acre site for a new middle school and 10-acre site for an elementary school as part of the development agreement. The Washoe County School District supports both of these locations. As previously stated, however, these sites are the location for the dam sites proposed in the Kennedy/Jenks/Chilton report. Should the County choose not to reserve these sites for the flood detention facilities, or if an acceptable alternative is presented to address down stream flooding, it is recommended the proposed sites be dedicated to the County for the two schools. The location of the two schools should, however, be located to the north of Whites Creek Lane as shown in a sketch plan of the area.

#### **GEOLOGIC HAZARDS**

The Engineering Division is concerned about the location fault lines that are located within the right-of-ways of several streets. The following policy from the Washoe County Comprehensive Plan relating to geologic hazards is relevant to this application:

**C.2.9 ENSURE THAT TECHNICAL INFORMATION ON GEOLOGIC HAZARDS IS INCORPORATED INTO THE LAND USE PLANNING AND DEVELOPMENT PROCESS.**

C.2.9.3

Prior to the approval of a development proposal, the Washoe County Department of Development Review will require geologic reports that identify potential hazards. In areas where geologic hazards are identified, extensive soil, hydrology, and engineering studies must clearly demonstrate that the proposed development will not result in avoidable public costs and will not pose significant risk of earthquake, landslide, erosion, sedimentation and drainage problems.

The project was designed so that streets are parallel to the faults and not perpendicular. Fault lines will also be located outside the cub face.

#### LANDSCAPING/ARCHITECTURE/PROJECT DESIGN

The following landscaping policies from the Washoe County Comprehensive Plan are relevant to this application:

**LUT.1.16 ENCOURAGE LANDSCAPING THAT ENHANCES THE NATURAL ENVIRONMENT, COMPLEMENTS THE SURROUNDING ARCHITECTURAL STYLE, AND UTILIZES XERIC PRINCIPLES.**

PSF.1.23.4 The Washoe County Department of Comprehensive Planning will attach conditions to all subdivision approvals mandating installation of conservation devices.

A landscaping and irrigation plan that complies with section 110.412.35 of the Washoe County Development Code should be included with future development applications. These landscaping plans should include proposed streetscapes, the village center/clubhouse, the equestrian center and common open space areas. This plan should also address maintenance responsibilities. It is recommended these plans be reviewed and approved by the Design Review Committee prior to the approval of the final development agreement.

The applicant is proposing to construct a meandering path system along most of the streets. The Engineering Division is concerned about the maintenance of these improvements since they extend outside of the right-of-way in some areas. Staff recommends the meandering pedestrian path design only if the developer, and eventually the home owners association, agree to perpetually maintain these areas.

#### CITIZEN INPUT

The Southwest Truckee Meadows CAB reviewed this application at their October and November meetings. It was the consensus of the CAB that they like the project design and that traffic is their primary concern. It is the CAB's recommendation that monies collected from County's Interim Fee program be used for the construction of roads (e.g. Whites Creek Lane and/or Wedge Parkway) that are needed to serve this development.

#### APPLICABLE REGULATIONS

Nevada Revised Statutes Chapter 278; Washoe County Code Chapter 110.

**washoe county development review**

**GENERAL CONDITIONS**  
for  
**DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**  
for  
**SOUTHWEST POINTE (REVISED 1/12/94)**

(As recommended by Development Review Staff and attached to Staff Reports dated December 3, 1993 and January 11, 1994)

COMPLIANCE WITH THE CONDITIONS OF THIS DEVELOPMENT AGREEMENT IS THE RESPONSIBILITY OF THE DEVELOPER, ITS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY AND THEIR SUCCESSORS IN INTEREST.

A COPY OF ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL BE FILED WITH THE DEVELOPMENT REVIEW STAFF.

GENERAL CONDITIONS

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The recorded final development agreement shall be effective for a period not-more-than 15 years. An extension of this approval may be granted if mutually agreed to by the developer and Washoe County.
4. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's office and the development review staff. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. Said CC&Rs shall specifically address the potential for liens against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement, of the following items, at a minimum:
  - a. Private roads within the subdivision.
  - b. Equestrian center.
  - c. Staffing of maintenance and security forces.
  - d. Common area landscaping.
  - e. Entrance gates.
  - f. Snow removal and storage areas.
  - g. Landscaping along streets.
  - h. Fire and fuelbreaks on open space.
  - i. Detention basins and the accumulated sediment.
  - j. Equestrian/pedestrian trails.
  - k. Bicycle and pedestrian paths.
  - l. Private streets and utilities.

- m. Golf cart crossings.
- n. Off-site residential parking areas.
- o. Public park center.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
  - b. Specifications on the limitation of turf area for single family homes.
  - c. Notice of requirement to pay future sewer user fees
  - d. Minimum defensible space requirements.
  - e. Snow storage areas.
  - f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
  - g. Potential for conservation easements or dedication of open space.
  - h. Prohibition of motorized vehicles in open space.
  - i. Areas with potential for equestrian traffic.
  - j. Requirement of open space remaining open to pedestrian and bicycle traffic.
  - k. Notice of pedestrian easements to abutting properties.
5. Prior to ground disturbing activity, the developer shall provide an archaeological/historical survey for review by the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology.
  6. The developer shall participate in any applicable General Improvement District or Special Assessment District formed by Washoe County to the satisfaction of the applicable division of Public Works.
  7. All new utilities shall be placed underground to the satisfaction of the County Engineer.
  8. Prior to final map approval, the developer is to provide written approval of the plans for the installation of mail delivery facilities from the US Postal Service. The system must be shown on the project construction plans and installed as part of the on-site improvements to the satisfaction of the County Engineer and the US Postal Service.
  9. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
  10. Prior to submittal to the Washoe County Board of County Commissioners, the final development agreement shall be reviewed and approved by the Washoe County District Attorney's Office.
  11. Within six months of the approval of the preliminary development agreement, a draft final development agreement that conforms with the provisions of section 814 of the Washoe County Development Code shall be completed and submitted to the Washoe County Department of Development Review. Washoe County Department of Development Review will provide comments on the draft final agreement. The final development agreement will then be submitted to the Washoe County Board of County Commissioners within three months. Extensions of any of these time frames may be requested if mutually agreeable to Washoe County and the developer.

washoe county development review

PHASING

12. The project shall be developed in three phases. Phase I includes a tentative map for 436 lots, an 18-hole golf course, the village center and driving range. Phase II will include an additional nine holes, the equestrian center and a tentative map for approximately 220 dwelling units. Phase III includes the remaining 434 lots and the last nine holes of golf. Modification to the proposed phasing plan may be made if mutually agreeable the developer and Washoe County. These modifications may include the commercial portion of the project and the second 18-hole golf course, which may be constructed during phase II or phase III.
13. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

14. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.

TRAFFIC

15. A LOS C, or the current Washoe County standard, shall be used as a basis for evaluating transportation needs and traffic impact mitigation requirements.
16. Prior to the issuance of the first building permit, two lanes of Whites Creek Lane shall be constructed, to two-lane minor arterial standards as a minimum, from Thomas Creek Road to the project site, to the satisfaction of the County Engineer.
17. Prior to the issuance of the first building permit, a second access shall be constructed to the project site to emergency standards to the satisfaction of the applicable fire protection agency.
18. Prior to the issuance of the 85th building permit, the following roadway improvements shall be constructed to the satisfaction of the County Engineer:
  - A. The remaining two lanes of Whites Creek Lane from Thomas Creek Road to the project site if warranted by projected traffic demands;
  - B. As a minimum, two (2) lanes of Whites Creek Lane from Thomas Creek Road to Wedge Parkway with 100 feet of right-of-way, or four (4) lanes if warranted by projected traffic volumes; and
  - C. Two lanes, connecting the interior loop road to Welcome Way, to public local street standards.

19. The final development agreement shall not be approved until the right-of-way of all necessary off-site accesses from the project to Thomas Creek Road are obtained. A recorded right-of-way document shall be provided to the satisfaction of the County Engineer and the District Attorney's Office.
20. Prior to the final approval of the development agreement, the developer for Southwest Pointe shall petition the Washoe County Board of County Commissioners to create a Special Assessment District (SAD) for the purpose of financing the construction of Whites Creek Lane from the project site to Wedge Parkway and other roads as defined in the SAD agreement. In the event that a special assessment district is not created, the developer shall construct Whites Creek Lane, as outlined in Condition No.'s 16 and 18, from the project site to Wedge Parkway, to the satisfaction of the County Engineer.

Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

NOTE

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

21. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 85th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 85th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

22. Prior to approval of the final development agreement, the developer shall provide a street maintenance program to the satisfaction of the County Engineer and the Department of Development Review. Street maintenance of private streets shall be performed by the homeowner's association and shall be perpetually funded.
23. Prior to the approval of the final development agreement, a schematic pedestrian circulation plan. As part of each tentative map, a detailed pedestrian circulation plan will be submitted and approved by the Department of Development Review.
24. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
25. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
26. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or

washoe county development review

locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

- D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the *Pedestrian Circulation Plan to the satisfaction of the County Engineer*. No residential driveway access will be allowed.
  - E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
  - F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 1/2 foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
  - G. Public - 100 ROW major arterial street (more than 10,830 ADT).
27. *Landscaped medians shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer, Washoe County Department of Development Review and the developer. Maintenance of median landscaping shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.*
28. *Meandering asphalt paths will be acceptable provided:*
- A. *Pedestrian easements are included for portions of the paths located outside the County r.o.w.*
  - B. *Landscaping between the back of the curb and the path shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer.*
  - C. *Maintenance of the asphalt paths and landscaping shall be the responsibility of the developer and, when created, by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.*
29. *Proposed roadways (public or private) are not to be centered along fault lines. Faultlines shall be located behind the curbline, on the up-thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback excluding construction for buildings for human occupancy may be reduced, to the satisfaction of the County Engineer.*

washoe county development review

30. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded.
31. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement, to the satisfaction of the County Engineer.
32. Temporary County Standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street, to the satisfaction of the County Engineer.
33. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs that are longer than 500 feet to the satisfaction of the County Engineer and the applicable fire protection agency. These roads shall have a 30-foot access easement with a minimum 20-foot width of 6 inches of Type 2 Class B aggregate base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer.
34. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. The emergency access road shall be constructed within a 30 foot access easement to a minimum 20 foot width with 4 inches of Type 2 Class B aggregate base.
35. Street lights shall be installed at major intersections to the satisfaction of the County Engineer.
36. Unless otherwise stated in the final development agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided to the satisfaction of the County Engineer.
37. The minimum pavement structural section shall be 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector-classified streets and shall be 3 inches of asphalt over 6 inches of granular base for roadways for local streets to the satisfaction of the County Engineer.
38. The applicant shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required.
39. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater, to the satisfaction of the County Engineer. Where possible, crossings should be below the grade of public streets.
40. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.

41. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
42. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
43. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.
44. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

#### AIR QUALITY MANAGEMENT

45. Prior to the approval of the final development agreement, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

#### DRAINAGE

46. Detention/retention facilities are to be maintained by a homeowner's association and perpetually funded unless the County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County.
47. A general concept level storm drain master plan shall be submitted and approved prior to acceptance of the final development agreement to the satisfaction of the County Engineer. The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities.
48. Prior to recordation of any final map, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.

49. A maintenance plan of all drainage facilities, to be owned by the homeowner's association, shall be provided prior to approval of the final development agreement. All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe county water treatment plant, and associated Steamboat Ditch conveyance system. All runoff from improved areas which runs into the Steamboat Ditch shall be pre-treated for silt and petrochemicals and shall be routed through a "wet" detention facility or approved alternative, to the satisfaction of the Utility Division and the Department of Development Review.
50. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.
51. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:
- A. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
- B. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within five (5) years of the approval of the final development agreement. If construction is not started within by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
- C. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
- D. If the detention basin is constructed, the property shall be dedicated to Washoe County.
52. The increase in development-caused runoff from the 100 year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained On-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company, to the satisfaction of the County Engineer.
53. Prior to the approval of the final development agreement, a geotechnical report shall be prepared, which considers the effects of earthquake forces and faulting in the area, to the satisfaction of the County Engineer.

The siting and design of detention/retention facilities shall be addressed based on the findings and recommendations provided in the geotechnical report.

54. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
55. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.
56. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be *mutually agreeable to Washoe County and the developer*. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.
57. The stormwater discharges from this development that flow to Dry Creek shall be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. The applicant shall provide drainage structures under Steamboat Ditch that would pass the 10-year frequency storm or demonstrate that there will not be any water quality degradation in Steamboat Ditch.
58. Prior to approval of the final map, the developer shall obtain a Stormwater Discharge Permit from the Nevada Division of Environmental Protection. If required, point discharge permit for each proposed detention pond will be obtained from the Nevada Division of Environmental Protection and copy submitted to the Engineering Division.

The applicant shall contact the Division of Water Resources, State of Nevada, to determine whether the proposed flood detention facilities will require a permit.

59. Prior to approval of the final development agreement, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.
60. Prior to approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
61. Prior to approval of the final development agreement, a golf course management plan shall be prepared that documents how the migration of fertilizers, pesticides, herbicides, and fungicides to surface and ground waters will be prevented. A service and ground water sampling program shall be implemented to demonstrate that migration is not occurring, and commits to modifying practices in the event that any of the above materials are detected.
62. An animal waste management plan for the equestrian center shall be prepared prior to the issuance of a building permit for that facility, that documents how the migration of bacteria, nutrients and other animal waste byproducts to surface and ground waters will be prevented.
63. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100 year flows and lined, to the satisfaction of the County Engineer.

WATER

64. Prior to the approval of the final development agreement, the applicant shall provide staff with a phasing schedule for the dedication of water rights. Permitted or certificated groundwater rights in the amount of 1.12 acre feet must be dedicated to Washoe County for each lot of a final map. Prior to acceptance, the water rights must be in good standing with the State of Nevada Division of Water Resources and must reflect a point of diversion, place and manner of use acceptable to the Utility Division.
65. Prior to the approval of the final map, the developer shall demonstrate how compliance with NRS 278.349, that requires the availability of water meet applicable health standards and is sufficient in quantity to serve the foreseeable needs of the subdivision, shall be met to the satisfaction of the District Health Department and Washoe County Department of Development Review.
66. Prior to the approval of the final development agreement, a complete water analysis from at least one monitoring well must be submitted to the District Health Office. The analysis must demonstrate the water conforms to the existing and proposed drinking water standards.
67. Prior to the approval of the final development agreement, a schematic water system plan for the referenced proposal must be submitted to the Utility Division and the District Health Department. Prior to final map approval, the plan must show that the water system will conform to the State of Nevada Water Supply Regulations, NAC Chapter 445, and the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, NAC 278.400 through 278.410.
68. Prior to final map approval, a letter of approval for the water rights serving this proposal must be submitted from the Division of Water Resources. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource to the satisfaction of the Utility Division.
69. The developer shall provide adequate assurance that the sewage, water and drainage systems will be satisfactorily maintained and operated
70. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters.
71. Water quality results from a State certified laboratory for new water sources shall be submitted to the Utility Division. The water quality sampling and testing shall be in compliance with the current State of Nevada Regulations for Public Water Systems, NAC 445.
72. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits.
73. Any wells on the property not in use for production or monitoring purposes, shall be properly abandoned in accordance with State Regulations governing Water Wells and Related Drilling.
74. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval. The water source shall meet both primary and secondary standards of the Safe Drinking Water Act.

washoe county development review

75. The tentative maps shall show the maintenance roads for the existing and proposed water tanks. The location of these roads shall be mutually agreeable to Washoe County and the developer.
76. The developer shall provide access to the existing monitoring wells to the satisfaction of the Utility Division. In the event access is no longer available, the developer shall construct new wells to the satisfaction of the Utility Division.
77. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

#### WASTEWATER

78. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
79. The project shall be designed to accommodate a gravity flow sanitary sewer system within the boundaries of the subdivision. Such design shall be to the satisfaction of the Utility Division.
80. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.
81. All minor infrastructure for potable water distribution shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infrastructure design can be accomplished prior to the approval of the final map.
82. Responsibility for design of wells, pump structure, controls, telemetry, and appurtenances, storage tanks, and transmission lines to the edge of the subdivision, all necessary to provide water service to the project, will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
83. The sanitary sewer collection system and water system facilities must be offered for dedication to Washoe County.

84. The developer shall construct or provide the financial assurances for the construction of the water and sewer system facilities. The financial assurances must be in a form and amount that is satisfactory to the Utility Division.
85. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance to the satisfaction of the Utility Division.
86. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development.
87. Fees for plan checking and inspection shall be paid in accordance with Washoe County ordinance.
88. Easements for all water and sewer utilities shall be offered for dedication to the satisfaction of the Utility Division.

#### GRADING

89. The development shall comply with the requirements of the Hillside Development Ordinance, as applicable.

#### SCHOOLS

90. Should the proposed "off-stream" location for the flood detention facility proposed in the 1990 Kennedy/Jenks report not be dedicated for this purpose, a minimum ten acre site for an elementary school and a minimum 25 acre site for a middle school shall be offered for dedication.

If the "off-stream" flood control facility is dedicated to Washoe County, a 10 acre site for the elementary school shall be offered for dedication.

If the area for the "off-stream" facility is dedicated, but the County has not complied with Condition No. 51, the use for the area shall revert back to a school site and/or a park site (if requested by Washoe County) as proposed by the developer. If a school or park site is not requested by Washoe County, this area shall remain as an open space buffer.

#### FIRE PROTECTION

91. The plans submitted with a building permit application shall show evidence of compliance with the recommendations of the applicable fire protection agency. Those concerns are fire flows, fire hydrant number and location, access, sequential phasing of firebreaks during development, permanent firebreaks, minimum defensible space, use of fire resistant construction and/or roof material, sprinklering of structures, and spark arrestors in chimneys. Access and fire flows shall be addressed to the satisfaction of the fire protection agency prior to the introduction of any combustible materials to the site.
92. A minimum one-acre site shall be offered for dedication, if requested by the applicable fire protection agency, for a fire station. The developer shall enter into talks with the applicable fire protection agency for any other requirements, such as, a fire station site, manpower and equipment needs, or for coordination with other developments that have similar requirements.

washoe county development review

PARKS/RECREATION/OPEN SPACE

93. Prior to the approval of the final development agreement, an open space management plan and map shall be prepared that specifies the ownership of open spaces, type of uses *allowed and who is responsible for maintenance*. This plan shall address the provisions of Section 110.408.45 of the Development Code. Common areas shall be maintained by the homeowner's association and provisions be made for perpetual funding for maintenance.
94. The final development agreement shall include a provision for the public open space that prohibits the sale of any open space without the consent of Washoe County.
95. Unless the off-stream site is dedicated to the County, a minimum 10-acre public park site shall be offered for dedication to the County. A sketch plan has been submitted, which if conceptually approved by the County, should be included in the final development agreement. The final park design shall be mutually agreeable to the County and the developer. The developer will construct the recreational facilities in the park and then be reimbursed for the cost of the construction from the Residential Construction Tax. The responsibility of park maintenance shall be negotiated by the developer and Washoe County prior to the approval of the final development agreement.
96. The developer will work together with staff from the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer.

LANDSCAPING/ARCHITECTURAL DESIGN

97. Prior to the approval of the final development agreement, the developer shall submit schematic landscaping and architectural design guidelines of the entire project to the Design Review Committee (DRC) for its review and approval. These guidelines shall address, but not be limited to, type and color of building material, general architectural design, fencing, landscaping material (if plant material: type, size at time of planting, maturation size at full growth, period of time between planting and full growth), landscaping location, landscaping irrigation system, and financial assurances that landscaping will be planted and maintained.
98. The developer shall minimize grading to the maximum extent possible in the area around the critical mule deer habitat in order to preserve the existing browse shrubs.
99. Homes located on 12,000 square foot lots shall have a minimum 160 square foot storage space added in their garages, if only one garage space is provided.
100. A minimum 25 foot landscape buffer shall be installed between the homes and the collector and secondary loop streets. The homeowners association shall be required to perpetually maintain these areas.

OTHER

101. Prior to acceptance of the first final map, the telephone easement Doc. No. 415899, which runs through the middle of many lots, shall be realigned with appropriate abandonment and relocation easements, or the proposed lots realigned, to the satisfaction of the County Engineer.

**TENTATIVE MAP CONDITIONS**  
for  
**DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**  
for  
**SOUTHWEST POINTE**

(As recommended by Development Review Staff and attached to Staff  
Report dated December 3, 1993)

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

*If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.*

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

4. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.
5. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
6. The roadway structural sections for the proposed 80 foot public right-of-way shall have as a minimum 5 inches of asphalt on 8 inches of aggregate base. A final geotechnical report must be prepared, however, prior to final map approval to determine if additional structural capacity above the minimum is required. On-site construction haul route traffic and school traffic is to be considered in the pavement analysis. The proposed on-site private road right-of-way widths are acceptable as shown for the tentative map of Phase 1.

washoe county development review

7. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
- A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - C. Private - 50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
  - E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot asphalt meandering one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
  - F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 1/2 foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
  - G. Public - 100 ROW major arterial street (more than 10,830 ADT).
8. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater, to the satisfaction of the County Engineer. Where possible, crossings should be below the grade of public streets.

washoe county development review

9. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
10. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.
11. Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

NOTE

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

12. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
13. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.
14. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

AIR QUALITY MANAGEMENT

15. Prior to the approval of the final development agreement, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

DRAINAGE

17. Detention/retention facilities are to be maintained by a homeowner's association and perpetually funded unless the County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County.

- The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.
18. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:
    - A. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
    - B. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within five (5) years of the approval of the final development agreement. If construction is not started within by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
    - C. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
    - D. If the detention basin is constructed, the property shall be dedicated to Washoe County.
  17. The increase in development-caused runoff from the 100 year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained On-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company, to the satisfaction of the County Engineer.
  19. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
  20. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.
  21. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable by Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.
  22. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100 year flows and lined, to the satisfaction of the County Engineer.

WASTEWATER

23. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.

PARKS AND RECREATION

24. The developer will work together with staff from the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer.

LANDSCAPING

25. A minimum 25 foot landscape buffer shall be installed between the homes and the collector and secondary loop streets. The homeowners association shall be required to perpetually maintain these areas.

OTHER

26. All new utilities shall be placed underground to the satisfaction of the County Engineer.

*washoe county development review*

**FINAL MAP CONDITIONS**  
for  
**DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**  
for  
**SOUTHWEST POINTE**

(As recommended by Development Review Staff and attached to Staff  
Report dated December 3, 1993)

ALL CONDITIONS MUST BE MET OR FINANCIAL ASSURANCES SHALL BE PROVIDED IN AN APPROPRIATE FORM AND AMOUNT, TO THE SATISFACTION OF THE PUBLIC WORKS DEPARTMENT PRIOR TO RECORDATION OF THE FINAL MAP, UNLESS OTHERWISE STATED.

PRIOR TO FILING A FINAL MAP FOR RECORDATION, THE DEVELOPER SHALL MEET WITH THE ENGINEERING DIVISION AND THE DEVELOPMENT REVIEW STAFF AT LEAST FOUR (4) WEEKS BEFORE THE ANTICIPATED RECORDATION DATE TO REVIEW REQUIREMENTS, FINAL CONSTRUCTION DRAWINGS, AND DOCUMENTATION NECESSARY TO ADEQUATELY COMPLY WITH THE CONDITIONS OF APPROVAL.

A REQUEST FOR AN EXTENSION OF TIME FOR THE RECORDING OF A FINAL MAP, WHICH PERMITS THE ADDITION, DELETION, OR AMENDMENT OF CONDITIONS, MUST BE SUBMITTED TO THE DEVELOPMENT REVIEW STAFF AT LEAST 60 DAYS PRIOR TO THE EXPIRATION DATE OF THE TENTATIVE SUBDIVISION MAP; SAID EXPIRATION BEING ONE YEAR FROM THE DATE OF THE BOARD OF COUNTY COMMISSIONERS APPROVAL OF THE TENTATIVE MAP OR A SUBSEQUENT FINAL MAP.

GENERAL CONDITIONS

1. Unless specifically stated in the final development agreement, final maps and final construction drawings shall comply with all applicable statutes, ordinances, rules, regulations, and policies in effect at the time of approval of the final map or any subsequent extension date.
2. Final maps shall be in substantial compliance with all plans and documents submitted with and made part of this tentative map request, as may be amended by action of the final approving authority. All documentation necessary to satisfy the conditions noted below shall accompany the final map when submitted to the Engineering Division and the development review staff.
3. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's office and the development review staff. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. Said CC&Rs shall specifically address the potential for liens against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement of the following items, at a minimum:
  - a. Private roads within the subdivision.
  - b. Equestrian center.
  - c. Staffing of maintenance and security forces.
  - d. Common area landscaping.
  - e. Entrance gates.
  - f. Snow removal and storage areas.
  - g. Landscaping along streets.
  - h. Fire and fuelbreaks on open space.
  - i. Detention basins and the accumulated sediment.
  - j. Equestrian/pedestrian trails.
  - k. Bicycle and pedestrian paths.
  - l. Private streets and utilities.

washoe county development review

- m. Golf cart crossings.
- n. Off-site residential parking areas.
- o. Public park center.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
- b. Specifications on the limitation of turf area for single family dwellings.
- c. Notice of requirement to pay future sewer user fees
- d. Minimum defensible space requirements.
- e. Snow storage areas.
- f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
- g. Potential for conservation easements or dedication of open space.
- h. Prohibition of motorized vehicles in open space.
- i. Areas with potential for equestrian traffic.
- j. Requirement of open space remaining open to pedestrian and bicycle traffic.
- k. Notice of pedestrian easements to abutting properties.

- 4. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

- 5. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started.
- 6. A note shall be placed on all construction drawings stating:

NOTE

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.

- 7. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada, when field conditions mandate construction other than that shown in the original drawing.
- 8. The final map shall designate faults, by distance and bearings, that have been active during the Holocene epoch of geological time and shall contain the following note to the satisfaction of the development review staff:

washoe county development review

washoe county development review

NOTE

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time. The faults have been located by Civil Engineer Registered in Nevada and experienced in Geotechnical Engineering and field surveyed by a Nevada Registered Land Surveyor.

9. A complete set of construction improvement drawings, including an on-site grading plan, shall be submitted to the Engineering Division for approval prior to finalization of any portion of the subdivision. Grading shall comply with best management practices and shall include detailed plans for grading and drainage on each lot, erosion control, slope stabilization, mosquito abatement. Placement or disposal of any excavated material shall be indicated on the grading plan.
10. All soil boring logs must be included as part of the construction drawings to the satisfaction of the County Engineer.
11. All new utilities shall be placed underground to the satisfaction of the County Engineer.
12. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
13. The Washoe County Planning Commission certificate on the final map shall be to the satisfaction of the County Engineer and the Department of Development Review.

TRAFFIC

14. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 85th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 85th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and

- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

- 15. Prior to approval of the final development agreement, the developer shall provide a street maintenance program to the satisfaction of the County Engineer and the Department of Development Review. Street maintenance of private streets shall be performed by the homeowner's association and shall be perpetually funded.
- 16. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
- 17. The roadway structural sections for the proposed 80 foot public right-of-way shall have as a minimum 5 inches of asphalt on 8 inches of aggregate base. However, a final geotechnical report must be prepared prior to final map approval to determine if additional structural capacity above the minimum is required. On-site construction haul route traffic and school traffic is to be considered in the pavement analysis. The proposed on-site private road right-of-way widths are acceptable as shown for the tentative map of Phase 1. Public right-of-way will not be evaluated until the recommended transportation study is completed.
- 18. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
- 19. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of

washoe county development review

pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

- C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
  - D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
  - E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
  - F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 1/2 foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
  - G. Public - 100 ROW major arterial street (more than 10,830 ADT).
20. Medians shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer. Maintenance of median landscaping shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
21. Meandering asphalt paths are acceptable provided pedestrian easements are included in portions of the paths located outside the County right-of-way. Landscaping between the back of the curb and the paths shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer. Maintenance of median landscaping and pedestrian paths shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement.
22. Proposed roadways (public or private) are not to be centered along fault lines. Faultlines shall be located behind the curbline, on the up-thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback, excluding construction for buildings for human occupancy, may be reduced to the satisfaction of the County Engineer.

23. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded.
24. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement, to the satisfaction of the County Engineer.
25. Temporary County Standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street, to the satisfaction of the County Engineer.
26. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs serving ten or more lots to the satisfaction of the County Engineer. These roads shall have a 30-foot access easement with a minimum 20-foot width of 6 inches of Type 2 Class B aggregate base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer.
27. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. The emergency access road shall be constructed within a 30 foot access easement to a minimum 20 foot width with 4 inches of Type 2 Class B aggregate base.
28. Street lights shall be installed at major intersections to the satisfaction of the County Engineer.
29. Unless specifically stated in the final development agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided to the satisfaction of the County Engineer.
30. The minimum pavement structural section shall be 4 inches of asphalt over 6 inches of granular base for roadways (public and private) with a right-of-way of 60 feet in width and shall be 3 inches of asphalt over 6 inches of granular base for roadways with a right-of-way of 50 feet in width to the satisfaction of the County Engineer.
31. The applicant shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required.
32. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer.
33. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer.

34. Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

NOTE

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.

35. Project streets that are designed with security gates at points intersecting shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
36. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.

washoe county development review

DRAINAGE

37. Prior to recordation of any portion of the subdivision, a final, detailed hydrology/hydraulic report for that phase, prepared by a registered engineer, shall be submitted to the County Engineer for approval. The report shall include the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both the site and off-site areas and the methods for handling those flows. The report shall include all storm drain pipe and ditch sizing calculations and a discussion of and mitigation measures for any impacts on existing off-site drainage facilities and properties.
38. Prior to recordation of any final map, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.
39. The 100-year floodplain boundaries and flood elevations shall appear on each final map to the satisfaction of the County Engineer. If the floodplain boundary has been changed by a Federal Emergency Management Agency (FEMA) Conditional Letter of Map Amendment or Conditional Letter of Map Revision, the date of that letter and a note to that effect shall appear on the final map to the satisfaction of the County Engineer. Grading or building permits shall not be issued for areas currently shown as "A" zones on the FEMA floodplain maps until a Letter of Map Amendment or Revision is submitted or until conformance with Washoe County flood construction standards is determined by the County Engineer.
40. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts to the satisfaction of the District Health Department and the County Engineer.
40. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.

WATER

41. Prior to the approval of a final map by the District Health Department, the production wells that will serve any phase of this development must be constructed, pump tested and sampled to ensure the proposed water system has sufficient quality and quantity.
42. Before approval of the final map will be considered, a letter from the water purveyor committing adequate water service to this proposal must be submitted District Health Department.
43. Prior to final map approval, a letter of approval for the water rights serving this proposal must be submitted from the Division of Water Resources. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource to the satisfaction of the Utility Division.
44. The developer shall provide adequate assurance that the sewage, water and drainage systems will be satisfactorily maintained and operated

45. Pursuant to Section 278.340 of the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, no grading permit shall be issued prior to District Health Department approval of the referenced final map. This condition does not apply to the construction of production wells required in condition Number 48.

The applicant may seek relief from the District Board of Health for this requirement or may choose to create a separate parcel for the first 18-hole golf course.

46. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters.
47. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits.
48. A letter, which can be a will-serve letter, from the appropriate provider committing water service must be submitted to the District Health Department and Utility Division. This letter shall indicate that the facility will not be brought beyond its permitted capacity by this service.
49. The final map shall contain the following note to the satisfaction of the development review staff:

**NOTE**

No Certificate of Occupancy shall be issued until the water facilities have been completed and accepted by resolution of the Board of County Commissioners.

50. The developer shall provide access to the existing monitoring wells to the satisfaction of the Utility Division. In the event access is no longer available, the developer shall construct new wells to the satisfaction of the Utility Division.
51. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

**WASTEWATER**

52. Proper easements shall be shown for off-site sewage and drainage systems to the satisfaction of the Utility Division and the County Engineer.
53. The Nevada Division of Environmental Protection must submit a letter to the District Health Department certifying their approval of the final map.
54. All minor infrastructure for sewer collection shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division.

**washoe county development review**

55. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
56. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.
57. All hookup fees for the area within the final map will be paid to the satisfaction of the Utility Division.
58. The developer shall deposit with the Utility Division the sum of \$50.00 per lot prior to recordation of all or part of the final map. This fee shall represent the development's prorated share of the completed water and wastewater facilities plan for the south Truckee Meadows .
59. Prior to final map approval, a letter, which can be a will-serve letter, from the Utility Division committing sewer service, must be submitted to the District Health Department. This letter shall indicate that the treatment facility will not be brought beyond its permitted capacity by this service.
60. All minor infrastructure for potable water distribution shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infrastructure design can be accomplished prior to the approval of the final map.
61. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development.

washoe county development review

GRADING

62. Prior to approval of the first final map, an erosion control/soil stabilization plan and grading plan shall be approved by the Washoe-Storey Conservation District. A copy of the approval shall be submitted to the District Health Department, Department of Development Review and Washoe County Engineer.

LANDSCAPING

63. Detailed landscaping and irrigation plans for the village commercial center, club house, golf courses, golf driving range and equestrian center shall be submitted prior to the issuance of a building permit for the particular use.

**washoe county development review**

**SPECIAL USE PERMIT APPLICATION CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE**

(As recommended by Development Review Staff and attached to Staff  
Report dated December 3, 1993)

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
4. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
5. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.
6. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
  - A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

washoe county development review

- B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
- F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29 1/2 foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
- G. Public - 100 ROW major arterial street (more than 10,830 ADT).

DRAINAGE

- 7. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.
- 8. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
- 9. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building Code Section 7011 amended.

10. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation.

**washoe county development review**

**SPECIAL USE PERMIT CONSTRUCTION CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE**

(As recommended by Development Review Staff and attached to Staff  
Report dated December 3, 1993)

GENERAL CONDITIONS

1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.
2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.
3. A note shall be placed on all construction drawings stating:

**NOTE**

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.
4. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada, when field conditions mandate construction other than that shown in the original drawing.
5. The final map shall designate faults that have been active during the Holocene epoch of geological time and shall contain the following note to the satisfaction of the development review staff:

**NOTE**

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time.
6. All new utilities shall be placed underground to the satisfaction of the County Engineer.

*washoe county development review*

TRAFFIC

7. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zioezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 85th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 85th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

8. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.
9. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.

DRAINAGE

10. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts to the satisfaction of the District Health Department and the County Engineer.

GRADING

11. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.

WATER

12. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

LANDSCAPING

13. Detailed landscaping and irrigation plans for the village commercial center, club house, golf courses, golf driving range and equestrian center shall be submitted prior to the issuance of a building permit for the particular use.

110.814.95	Amendment or Cancellation of Development Agreement

**Section 110.814.00 Purpose.** The purpose of this article, Article 814, Development Agreements, is to allow for any person having a legal or equitable interest in land to enter into an agreement with Washoe County concerning the development of that land, as provided in NRS 278.

**Section 110.814.05 Applicability.** A development agreement may be approved by ordinance for land which is to be developed as a single entity provided that the development, including uses and development standards, is consistent with the Comprehensive Plan, including the area plans, and any specific plan, if applicable.

**Section 110.814.10 Requirements for Application.** A development agreement may be initiated by the property owner or by the property owner's authorized agent. Applications for a development agreement shall be filed with the Department of Development Review.

**Section 110.814.15 Allowed Uses, Densities and Standards.**

- (a) **Laws in Effect.** The allowed uses, densities and standards of the land subject to the development agreement shall be those in effect at the time the agreement is made, provided that all such uses, densities and standards are consistent with the Comprehensive Plan, including the area plans, and any specific plan, if applicable.

- (b) Subsequent Actions. A development agreement shall not prevent the County, in subsequent actions applicable to the property, from adopting new ordinances, resolutions or regulations that conflict with those ordinances, resolutions and regulations in effect at the time the development agreement is made, except that any subsequent action by the County shall not prevent the development of the land as set forth in the development agreement.
- (c) Emergency Situations. The County may suspend the issuance of building permits for the development project after a noticed public hearing if it finds in good faith that a clear and present emergency requires the suspension.
- (d) State or Federal Restrictions. In the event that state or federal laws or regulations enacted after a development agreement has been entered into, prevent or preclude compliance with one (1) or more of the provisions of the development agreement, such provisions shall be modified or suspended as may be necessary to comply with the new state or federal laws or regulations. Any such action shall be taken by the Board of County Commissioners after a noticed public hearing.

**Section 110.814.20 Review and Approval Process.** The development agreement process consists of two steps as set forth in this section. Under no circumstances shall development of the land subject to the development agreement be allowed to proceed until after the final development agreement has been approved and filed for record pursuant to this article.

- (a) Step One: Preliminary Development Agreement. The applicant shall submit the text of the proposed development agreement accompanied by either a concept plan or a site plan and other information required by this article. The applicant has the option of submitting either plan and the Director of Development Review may request a site plan.
- (b) Step Two: Final Development Agreement. Subsequent to approval of the preliminary development agreement, the applicant shall submit a final development agreement for approval as set forth herein.
  - (1) If a site plan was approved at the first step of the process, the final development agreement shall contain a final site plan.
  - (2) If a concept plan was approved at the first phase of the process, the final development agreement shall include the site plan.
  - (3) The submittal shall include other information as required by this article.
  - (4) The site plan and other applicable materials from the final development agreement shall be recorded pursuant to this article.

**Section 110.814.25 Concurrent Processing of Other Approvals.** Applications for all discretionary approvals may accompany the preliminary development agreement or may be substituted at a later date. If they are submitted at a later date, the conditions, terms, restrictions and requirements for subsequent actions on these approvals shall be included in the preliminary development agreement.

**Section 110.814.30 Professional Assistance.** Preparation of the preliminary development agreement and final development agreement shall require, at a minimum, the services of a Nevada civil engineer who is a registered professional engineer, or registered land surveyor.

Depending on the complexity of the development, the services of an American Institute of Certified Planners (AICP) recognized planner, a licensed architect, and a Nevada registered landscape architect may also be required by the Director of Development Review.

**Section 110.814.35 Contents of Preliminary Development Agreement.** The application shall include the provisions of this section.

- (a) **Development Agreement.** A development agreement containing the following:
  - (1) A legal description of the land subject to the development agreement;
  - (2) The proposed duration of the development agreement;
  - (3) The permitted uses of the land;
  - (4) The density and/or intensity of uses;
  - (5) The maximum height and size of the proposed buildings;
  - (6) Any provisions for the dedication of any portion of the land for public use;
  - (7) A provision that the materials listed in this article under "Contents of Final Development Agreement" are automatically incorporated into the development agreement by reference when these materials are approved by the Planning Commission; and
  - (8) A provision that the development agreement does not bind the parties, or their successors in interest, until such time as the development agreement is recorded pursuant to this article.
- (b) **Interest in Land.** The nature of the landowner's and the applicant's legal interest in the land proposed for development in the application.
- (c) **Open Space Management.** The form and name, if available, of the organization proposed to own and maintain any common open space.
- (d) **Use Ratio.** The ratios of the land areas in residential to land areas in nonresidential uses and the ratio of square feet of residential to nonresidential uses.
- (e) **Utilities.** The proposed system, including a feasibility analysis, for disposition of sanitary waste and storm water.
- (f) **Circulation.** The plan for vehicular traffic, pedestrian traffic and transit facilities. This plan shall include the provisions for parking of vehicles and the location and width of proposed streets and public rights-of-way.
- (g) **Modifications.** The listing of required modifications to the standards imposed by other articles of this Development Code.
- (h) **Plan.** A concept plan prepared pursuant to this article, or a site plan prepared pursuant to this article.

- (i) **Legal Agreements.** The substance of covenants, grants or easements, or other restrictions proposed to be imposed upon the use of the land, buildings and structures, including proposed easements or grants for public utilities.
- (j) **Schedule.** A schedule showing:
  - (1) The proposed times within which the final development agreement must be filed; and
  - (2) The proposed times within which all other applications for final approval of all portions of the land subject to the development agreement are intended to be filed, or in the case of a plan which provides for development over a period of years, the periods within which application for final approval of each part thereof is intended to be filed.

**Section 110.814.40 Concept Plan.** A concept plan shall include the information required by this section.

- (a) Name of project, boundary, and vicinity maps showing the location and acreage of the land subject to the development agreement, date, north arrow and scale of plan.
- (b) All existing lot lines, easements and rights-of-way.
- (c) Proposed land uses, including areas proposed to be dedicated or reserved as common open spaces or for public or semi-public uses, with estimates of the acreage for each type of land use, the densities and/or intensities of development, and the general allocation of the densities and/or intensities of development to the various parts of the site.
- (d) Approximate location and arrangement of all structures or outlines of areas within which buildings or structures may be located.

**Section 110.814.45 Site Plan.** A site plan and supporting maps, if applicable, shall include the information required by this subsection.

- (a) Name of project, boundary, and vicinity maps showing the location and acreage of the land subject to the development agreement, date, north arrow and scale of plan.
- (b) Name and address of the owner of record, developer, planner and seal of the engineer, architect or landscape architect.
- (c) Existing and proposed topography at a two (2) foot contour interval, or at a contour interval appropriate for the site, as determined by the Director of Development Review. All elevations shall refer to the nearest United States Coastal and Geodetic Bench Mark. If any portion of the land subject to the development agreement is within the 100-year floodplain, the area will be shown and base flood elevations given. Indicate areas within the site and within fifty (50) feet of its perimeter boundary, where ground removal or filling is required.
- (d) Regulatory zone boundaries within five hundred (500) feet of the perimeter of the land subject to the development agreement.

- (e) The location and use of structures within three hundred (300) feet of the perimeter of the land subject to the development agreement.
- (f) All existing lot lines, easements and rights-of-way within the land subject to the development agreement, and within those parcels within five hundred (500) feet of the perimeter of the land subject to the development agreement.
- (g) Proposed traffic flow patterns, entrances and exits, loading and unloading areas, emergency access areas, and curb cuts on the site.
- (h) The location of all present and proposed public and private ways, parking areas, driveways, ramps, curbs, walls, fences, bicycle and pedestrian ways, and landscaping. If determined appropriate by the Director of Development Review, proposed locations of the listed facilities and features may be indicated by typical locations.
- (i) Proposed land uses, including areas proposed to be dedicated or reserved as common open spaces or for public or semi-public uses, with estimates of the acreage for each type of land use, the densities and/or intensities of development, and the general allocation of the densities and/or intensities of development to the various parts of the site.
- (j) Approximate arrangement of individual lots.
- (k) Approximate location and arrangement of all structures or outlines of areas within which buildings or structures may be located.
- (l) Preliminary elevations and/or perspective drawings of all typical proposed buildings or other structures, including proposed maximum heights and floor areas.
- (m) A general landscaping plan.
- (n) A general grading plan.

**Section 110.814.50 Optional Contents.** In addition to the required contents of a development agreement, as set forth in this article under "Contents of Preliminary Development Agreement", the development agreement may contain the provisions listed in this section.

- (a) **Key Dates.** A date upon which construction must commence and a date when the project or any phase of the project must be complete. If either date is specified, a process for extension of the date shall be included.
- (b) **Financing.** Terms and conditions relating to applicant financing of necessary public facilities with or without subsequent reimbursement over time.
- (c) **Assignability.** Restrictions on the assignability of the agreement by the applicant and, if assignable, provisions ensuring that the successor in interest assumes the obligations under the development agreement.
- (d) **Minor Modifications.** Provisions for minor modifications of the development agreement.

- (e) Other. Other terms and conditions related to the proposed project, including any of the materials required by Section 110.814.75 with the exception of the final site plan, which are mutually agreeable to the parties.

**Section 110.814.55 Planning Commission Review of Preliminary Development Agreement.** The preliminary development agreement shall be reviewed by the Planning Commission and final action shall be taken by the Board of County Commissioners. Approval of a preliminary development agreement does not authorize development or the issuance of any building permits.

- (a) General Provisions. The Planning Commission shall conduct at least one (1) public hearing relative to the application within ninety (90) days from the date the complete application was accepted. Notice shall be provided as set forth in this article.
- (b) Time Period for Action. The Planning Commission may take action on the proposed development agreement at the conclusion of the public hearing, but shall take action no later than one hundred and eighty (180) days after the complete application was accepted. An extension of time for Planning Commission action may be granted if mutually agreed upon between the applicant and the Director of Development Review.
- (c) Failure to Act. Failure of the Planning Commission to hold a public hearing or take action within the time frames provided in Subsections (a) and (b) of this section shall constitute a recommendation of approval.
- (d) Planning Commission Action. Following the conclusion of the public hearing, the Planning Commission shall take one of the following actions:
- (1) Recommend approval of the development agreement and accompanying plan;
  - (2) Recommend approval subject to specified conditions not included in the agreement and plan as submitted; or
  - (3) Deny approval of the development agreement and accompanying plan. Denial of either of these items shall constitute denial of the preliminary development agreement.
- (e) Findings. The recommendation of approval or the denial of the preliminary development agreement shall be accompanied by findings on the degree the development agreement or accompanying plan would or would not be in the public interest including, but not limited to, findings on the provisions of this subsection.
- (1) The extent to which the accompanying plan is consistent with the Comprehensive Plan policies and the area plan(s).
  - (2) The reasons why departures from Development Code regulations are or are not deemed to be in the public interest.
  - (3) The purpose, location and amount of the common open space in the proposed project, the reliability of the proposals for maintenance and conservation of the common open space, and the adequacy or

inadequacy of the amount and purpose of the common open space as related to the proposed density and type of residential development.

- (4) The physical design of the project and the manner in which the design does or does not make adequate provision for public services.
  - (5) The relationship, beneficial or adverse, of the proposed project to the neighborhood in which it is proposed to be established.
  - (6) In the case of a development agreement and accompanying plan which propose development over a period of years, the sufficiency of the terms and conditions intended to protect the interests of the public, residents and owners of the land subject to the development agreement in the integrity of the plan.
- (f) Effect of Planning Commission Denial. In the event the Planning Commission denies a preliminary development agreement, that action is final unless appealed to the Board of County Commissioners pursuant to this article.
- (g) Planning Commission Report. Within forty (40) days of the action by the Planning Commission, a report describing the discussion at the public hearing, and recommendation and vote of the Planning Commission, along with a copy of the preliminary development agreement, shall be transmitted to the Board of County Commissioners. If the Planning Commission does not recommend approval, it should state why it could not make the findings in Subsection (e) of this section.

**Section 110.814.60 Notice.** Notice for all public hearings required by this article shall be given in accordance with the provisions of this section.

- (a) Notice of Property Owners by Mail. A notice setting forth the time, place, purpose of hearing, and map or physical description of the land involved shall be sent by mail at least ten (10) days before the meeting to the following persons:
- (1) All owners of real property that are the subject of the development agreement;
  - (2) Advisory boards created by the Board of County Commissioners for the area in which the property that is the subject of the development agreement is located;
  - (3) All owners of real property within three hundred (300) feet of the property which is the subject of the development agreement;
  - (4) All tenants of any mobile home park that is located within three hundred (300) feet of the property which is the subject of the development agreement; and
  - (5) All General Improvement Districts (GID) for the area in which the property that is the subject of the development agreement is located.
- (b) Number of Notices. If the number of notices sent pursuant to this section does not total thirty (30) or more, the County shall send out additional notices to make the total number at least thirty (30). These notices shall be sent to owners of

real property that are closest to the property in question, not including those owners provided notice pursuant to Subsection (a) of this section.

- (c) Notice in the Newspaper. A notice setting forth the date, time and place of the public hearing shall be published in a newspaper of general circulation in Washoe County not less than ten (10) days prior to the public hearing date.

**Section 110.814.65 Appeal of Denial.** A denial action of the Planning Commission may be appealed in accordance with the provisions of this section.

- (a) Appeal Period. An appeal of the Planning Commission's denial of a preliminary development agreement may be made to the Board of County Commissioners within fifteen (15) days after the date of the decision. If the end of the appeal period falls on a non-business day, the appeal period shall be extended to include the next business day.
- (b) Who Can Appeal. Appeals may be filed by the Board of County Commissioners, applicant, or applicant's authorized agent.
- (c) Appeal by Applicant or Applicant's Agent. An appeal by the applicant or the applicant's authorized agent shall be filed with the Director of Development Review, accompanied by a filing fee. The appeal shall be in writing and state the basis of the appeal by citing the inadequacy of the findings made by the Planning Commission. Such reasons shall be based upon the evidence presented to the Planning Commission at the original hearing. Failure of the appellant to present such reasons shall be deemed cause for denial of the appeal.
- (d) Action on Appeal. The appeal of the Planning Commission's denial of a preliminary development agreement shall be processed pursuant to this article.

**Section 110.814.70 Action by Board.** The Board of County Commissioners shall review a preliminary development agreement in accordance with the provisions of this section.

- (a) Time Period for Hearing. The Clerk of the Board of County Commissioners shall schedule a public hearing before the Board of County Commissioners on the appeal of a denial or recommendation of approval by the Planning Commission within thirty (30) days of the filing of the appeal or receipt of the Planning Commission's action.
- (b) Notice of Hearing. The public hearing shall be noticed as required by this article.
- (c) Actions to be Taken by Board. The Board shall take action on the development agreement and accompanying plan provided, however, that the development agreement shall not be adopted prior to adoption of the accompanying plan and tentative subdivision map, if required.
- (d) Board of County Commissioners' Action.
  - (1) If the Board of County Commissioners is considering an appeal from a denial of a preliminary development agreement, it may use the record and any additional evidence relative to the application and may confirm or reverse the denial based upon its interpretation of the findings required and the evidence submitted.

- (2) If the Board of County Commissioners is considering a recommendation of approval, it may take action to approve the preliminary development agreement as recommended by the Planning Commission if no modification of the Planning Commission's recommendation is proposed.
- (3) If the Board of County Commissioners proposes to modify the recommendation of approval from the Planning Commission, the proposed modification shall be referred to the Planning Commission for consideration. The Planning Commission shall not be required to hold a public hearing on the modification. The Planning Commission shall submit a report on the proposed modification to the Board of County Commissioners within ninety (90) days from the date of referral by the Board of County Commissioners. Failure to report shall be deemed a recommendation of approval. Prior to making a final decision, the Board of County Commissioners shall be required to conduct a public hearing and notice this hearing pursuant to this article.

**Section 110.814.75 Contents of Final Development Agreement.** The final development agreement shall include, but shall not be limited to, the information as required by this section. If a site plan was approved as part of the development agreement, the final development agreement shall consist of a final site plan which substantially complies with the adopted site plan. If a site plan was not included as part of the development agreement, a site plan prepared pursuant to this article shall be required. If any of the other information required by this section was adopted as part of the preliminary development agreement pursuant to this article, it shall be included in the final development agreement as approved therein.

- (a) **Development Agreement.** The development agreement as described in this article under "Contents of a Preliminary Development Agreement," and approved pursuant to this article under "Action by Board".
- (b) **Legal Agreements.** The substance of covenants, grants or easements, or other restrictions proposed to be imposed upon the use of the land, buildings and structures, including proposed easements or grants for public utilities approved pursuant to this article.
- (c) **Plan.** A final site plan that is consistent with the approved site plan or, if no site plan has been approved, an original site plan, either of which shall comply with the provisions of this article.
- (d) **Installation and Maintenance.** A program for the installation and maintenance of parking areas, lighting, landscaping, infrastructure, utilities and recreational facilities.
- (e) **Open Space Resources.** A program for the protection of open space resources.
- (f) **Development Schedule.** A development schedule indicating:
  - (1) The approximate date for the start of construction; and
  - (2) The phases, if any, in which the land subject to the development agreement will be built and the approximate dates for the completion of each phase.

- (g) Development Standards Handbook. A development standards handbook that provides development standards for the following:
- (1) Architectural style;
  - (2) Energy supply and conservation;
  - (3) Land grading, erosion and flood control;
  - (4) Natural hazards;
  - (5) Fire protection, security services and medical services;
  - (6) Housing supply;
  - (7) Water supply, treatment, storage, conservation and reuse;
  - (8) Wastewater treatment;
  - (9) Maintenance and enhancement of air quality;
  - (10) Wildlife and fisheries preservation;
  - (11) Historic, cultural and archaeological resources preservation;
  - (12) Recreational amenities;
  - (13) Open space provision and maintenance;
  - (14) Financial assurances for the development of the property and provision of services;
  - (15) Phasing of development;
  - (16) Procedures for the implementation of the development standards and amendment of the development standards handbook;
  - (17) Documentation verifying the development agreement approval, including reductions of all maps/drawings approved by the Board of County Commissioners as part of the approval of the preliminary development agreement; and
  - (18) Such other information which may be required by the Director of Development Review.
- (h) Other. Any optional contents included in the preliminary development agreement pursuant to this article, and any additional material required pursuant to any terms or conditions of approval of the preliminary development agreement.

**Section 110.814.80 Approval Procedures for Final Development Agreement.** The final development agreement shall be approved in accordance with this section. In order to approve a final application, the Director of Development Review shall find that the final development agreement is in substantial compliance with the approved preliminary development agreement.

If it is not in substantial compliance, the proposed final development agreement must be modified to bring it into compliance or the development agreement shall be amended pursuant to this article. The Director of Development Review shall find that the development agreement required in Section 110.814.80(a) is the same development agreement as approved pursuant to Section 110.814.70 and has not changed.

- (a) **Application.** An application for final development agreement approval may be submitted for all the land included in a development agreement or for a portion of the land, if so provided in the approved preliminary development agreement. The application must be completed and submitted to the Department of Development Review within the time limit established as part of the approval of the preliminary development agreement.
- (b) **Process.** The final development agreement shall be reviewed by the Director of Development Review and executed by the Board of County Commissioners. Any action by the Director of Development Review may be appealed pursuant to this article.
- (c) **Plan in Substantial Compliance.** If the applicant submits a final development agreement containing a site plan purporting to be in substantial compliance with the approved site plan, the Director of Development Review shall determine if it is in substantial compliance with the site plan in the approved preliminary development agreement. In making this determination, the following criteria shall be used to determine if the second site plan is in substantial compliance with the approved site plan:
  - (1) The proposed gross residential density or intensity of use is not changed;
  - (2) The proposed ratio of residential to nonresidential use is not changed;
  - (3) The area set aside for common open space is not reduced or the area is not substantially relocated;
  - (4) The floor area proposed for nonresidential use is not increased;
  - (5) The total ground area covered by buildings and the height of buildings is not increased; and
  - (6) The plan provisions are consistent with the adopted preliminary development agreement.

**Section 110.814.85 Recordation of Approved Final Documents.** A final development agreement which has been given approval by the County shall be certified without delay by the County and filed in the Office of the County Recorder before any development occurs in accordance therewith. Upon recordation, the development agreement binds all parties and their successors in interest for the duration of the agreement.

**Section 110.814.90 Periodic Review.** The Director of Development Review shall cause the development agreement to be reviewed every twenty-four (24) months on the anniversary date of its adoption, until such time as the development is complete. A more frequent review may be undertaken at the direction of the Planning Commission or Board of County Commissioners.

- (a) Good Faith Compliance. As part of the review, the applicant or successor in interest shall be required to demonstrate good faith compliance with the terms of the development agreement.
- (b) Termination or Modification. If the County finds and determines, on the basis of substantial evidence, that the applicant or successor in interest has not complied in good faith with the terms and/or conditions of the development agreement, the County may take action to terminate or modify the development agreement.
  - (1) Action to terminate or modify a development agreement may be initiated only by the Planning Commission or Board of County Commissioners.
  - (2) No action to terminate or modify a development agreement shall be taken without a public hearing noticed pursuant to this article.

**Section 110.814.95 Amendment or Cancellation of Development Agreement.** A development agreement may be amended or canceled, in whole or in part, by mutual consent of the parties to the agreement or their successors in interest, as set forth in this section.

- (a) Notice of Intention. Notice of intention to amend or cancel any portion of the development agreement must be published in a newspaper of general circulation in Washoe County.
- (b) Approval of Amendment or Cancellation. The Board of County Commissioners may approve an amendment to the development agreement by ordinance if the amendment is consistent with the Comprehensive Plan, including the area plans. The Board of County Commissioners may approve a cancellation of a development agreement if it determines that to do so is in the best interests of the County.
- (c) Recordation of Amendment or Cancellation. The original of the amendment or cancellation shall be certified without delay by the County and filed in the Office of the County Recorder.

## MEMORANDUM

**TO:** Washoe County Board of County Commissioners  
**FROM:** Washoe County Planning Commission  
**RE:** Amendment of Development Agreement Case No. DA9-1-93  
**DATE:** October 21, 1994

Initialed By: SK

## GENERAL INFORMATION SUMMARY

**APPLICANT:** SOUTHWEST POINTE/DINGMAN INVESTMENTS

**REQUESTED ACTION:** To amend the preliminary development agreement that facilitates the development of a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center and a commercial village center. The amendment would allow the applicant to begin preliminary grading of the golf course and installation of infrastructure along Zolezzi Lane prior to the approval of the final development agreement. The total acreage of the project is  $\pm 3,171.6$  acres. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN: 49-010-04, 49-010-10 and 41-030-12)

## WCPC RECOMMENDATIONS/FINDINGS

At its regular meeting of September 20, 1994, the Washoe County Planning Commission considered the above-referenced case and, following a public hearing, recommended approval for Amendment of Development Agreement Case No. DA9-1-93. This recommendation is based upon the following findings:

1. That the proposed amendment to the preliminary development agreement would not have a substantive impact on the original preliminary development agreement approval;
2. That circumstances have not substantially changed since the approval of the draft development agreement; and

3. That the Commissioners gave reasoned consideration to the information contained within the staff report and information received during the meeting.

Ayes:	Johnson, Metcalf, Meagher, Oakes, Preku, Rock, Strobel
Nays:	None
Abstained:	None
Absent:	None

Jeff Murphree reviewed the staff report, dated September 13, 1994, and brought the history of the subdivision up to date stating that County Commission had approved in February, 1994, Regional Planning Commission in March, 1994 and the Planning Commission had granted an extension for completion in August, 1994 in order to allow the necessary time for negotiations to be complete for access through U.S. Forest Service land. He stated the applicant had provided revised conditions which were amended by staff. If the requested amendment were approved, the applicant would be required to apply for a special use permit before work on the golf course could begin. The purpose of the application was to enable applicant to begin grading work on the golf course so as not to lose the entire construction season. Mr. Murphree stated he had received one phone call from a resident of Saddlehorn who had concern for the water drawdown. Mr. Murphree stated there is a condition in the preliminary development agreement requiring the applicant to dedicate water in phases. The applicant will be required to dedicate the appropriate amount of water rights for the golf course.

Brita Tryggvi, CFA, representing the applicant, was present to answer questions.

Commissioner Strobel questioned Ms. Tryggvi about the source of dedicated water and how water dedication worked.

Ms. Tryggvi explained that there were several monitoring wells in place on the parcel, some of them being monitored by the Washoe County Utility Division. Some were better than others and the better ones would be those used. She stated there would be a temporary tap for dust control during preparation of the golf course.

Commissioner Strobel stated that a property owner in the North Valleys had expressed a concern for the aquifer and wondered how the problem of depleting the water supply was being addressed.

Mr. Murphree stated the aquifer was monitored by the State Engineer.

Mike Harper addressed Commissioner Strobel stating that he had asked a very complex question. He stated the State Engineer was responsible for determining the impact of wells on the aquifer and it was a safe assumption that some drawdown would occur. The definition used by the engineer's office was "reasonable and safe drawdown." It had been an issue for a number of years with the County and the Utility Division had not addressed the issue. He stated that it would be reasonable to bring this issue to the water workshop to be conducted sometime in October. He agreed there needed to be a uniform guideline set for water use based on what is "acceptable and safe."

Commissioner Strobel stated he wanted to go on record as expressing great concern for the need for the problem to be addressed at the earliest possible time.

The public hearing was opened.

Kathy Busch, Chair of the Southwest Citizens Advisory Board, addressed the Commission stating the CAB supports the project and has found the applicant to be very cooperative. No one else was present to testify, therefore, the public hearing was closed.

Commissioner Rock moved to approve the amendment request for Development Agreement Case No. DA9-1-93 subject to the amended conditions, as stated in the September 13, 1994 staff report, which modify Washoe County Board of County Commissioners Clerk's Order No. 94-86. The motion was seconded by Commissioner Johnson. The motion passed by a vote of seven (7) in favor, none (0) opposed and none (0) absent.

### GENERAL INFORMATION SUMMARY

**APPLICANT:** SOUTHWEST POINTE/DINGMAN INVESTMENTS

**REQUESTED ACTION:** Amendment of a development agreement timeline and thereby grant an 18 month extension to finalize the document. The development agreement facilitates construction of a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities and a commercial village center. The total acreage of the project is +3,171.6 acres. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) and is situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26 and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN: 49-010-04, 49-010-10 and 41-030-12)

### WCPC RECOMMENDATIONS/FINDINGS

At its regular meeting of August 2, 1994, the Washoe County Planning Commission considered the above referenced case and, following a public hearing, recommended approval for Amendment of Development Agreement Case No. DA9-1-93. This recommendation is based upon the following findings:

1. That the proposed amendment to the preliminary development agreement and the resultant extension would not have a substantive impact on the original preliminary development agreement approval;
2. That circumstances have not substantially changed since the approval of the draft development agreement; and
3. That the Commissioners gave reasoned consideration to the information contained within the staff report and information received during the meeting.

**Washoe County Board of County Commissioners**  
**Re: Amendment of DA9-1-93 (Southwest Pointe/Dingman Investments)**  
**August 15, 1994--Page 2**

Ayes:	Johnson, Metcalf, Meagher, Oakes, Preku, Rock, Strobel
Nays:	None
Abstained:	None
Absent:	None

Mike Harper announced that an affirmative vote of four (4) of the seven (7) Commissioners present would be required for approval and introduced Jeff Murphree who reviewed the staff report, dated July 25, 1994. He explained that the extension was needed by the applicant to allow time for them to acquire the 120-acre parcel, which is located east of Southwest Pointe and is owned by the US Forest Service, since Whites Creek Lane will go through the subject parcel and will become the main access to the Southwest Pointe property. This was outlined in a letter from Brita Tryggvi which was made a part of the staff report.

Alex Fittinghoff, CFA, Inc., addressed the Commission and advised that it could take from six (6) to twelve (12) months for the applicant to accomplish the purchase.

The public hearing was opened, however there was no one who wished to testify and Chair Metcalf closed the public hearing.

Commissioner Rock moved, seconded by Commissioner Oakes to approve Amendment of Development Agreement Case No. DA9-1-93, and the motion passed by a vote of seven (7) in favor, none (0) opposed and none (0) absent.

**ANALYSIS**

The draft development agreement for Southwest Pointe was approved by Washoe County in February 1994 and by the Regional Planning Commission in March 1994. Condition No. 11 of the Clerk's Order requires a draft final development agreement that conforms with the provisions of Section 814 of the Washoe County Development Code be completed and submitted to the Department of Development Review within six months of the approval of the preliminary development agreement.

The developer is requesting an extension (see attached letter) because of delays in acquiring access through the US Forest Service Property. Staff believes the reason cited in the attached request letter and the fact that the circumstances have not substantially changed provide sufficient cause to justify approval of an extension.

Re: ArrowCreek Open Space  
DA 9-1-93 Compliance File

Jennifer:

Here are the final open space donation documents for ArrowCreek. As with previous incremental open space dedications, there are three documents, which are pre-approved forms:

1. Restrictive Covenant;
2. Grant, Bargain And Sale Deed; and
3. Easement For Drainage And Utilities.

After execution by a county representative, these documents must be recorded in the order specified above.

This transfer of open space completes the master developer's obligation under its Final Development Agreement (Case No. DA 9-1-93) to transfer open space to the county. If you have any questions or comments, please contact me.

Sincerely,

ROBERT M. SADER, Esq.

### RESTRICTIVE COVENANT

THIS RESTRICTIVE COVENANT ("Covenant") is made as of this \_\_\_\_\_ day of \_\_\_\_\_, 2007 by **SOUTHWEST POINTE ASSOCIATES, L.L.C.**, a Delaware limited liability company, ("SPA").

#### 1. GENERAL.

1.1 SPA is the master developer of certain real property located in Washoe County, Nevada known as ArrowCreek (ArrowCreek is described in Washoe County Case No. DA9-1-93), including certain land more particularly described in Exhibit "A", attached hereto and incorporated herein, (the "Restricted Parcel").

1.2 SPA intends hereby to restrict any owner's or occupant's right to use all or any portion of the Restricted Parcel as specified herein.

1.3 The covenants and restrictions on the Restricted Parcel specified herein are for the benefit of SPA personally and for the owners of property in ArrowCreek, as represented by the ArrowCreek Homeowners Association, a Nevada nonprofit corporation, ("HOA") and ArrowCreek Golf Holdings, L.L.C. ("AGH"), owner of the golf courses. The right to enforce this Restrictive Covenant shall be granted only to AGH, SPA or HOA, or a successor by an express assignment, recorded against Exhibit "A", of SPA's, AGH's or HOA's rights hereunder.

1.4 SPA intends in the future to convey all its right, title and interest in the Restricted Parcel to Washoe County, a political subdivision of the State of Nevada, ("County"). County agrees, by accepting this Covenant, to comply as the owner of the Restricted Parcel with all use restrictions specified herein, as well as other provisions hereof.

2. **USE RESTRICTIONS.**

2.1 Use of the Restricted Parcel shall be restricted, except as otherwise provided in this Section 2, to only those uses allowed in the Open Space land use regulatory zone of the Washoe County Development Code; provided that no above-ground structures other than those allowed in Subsection 2.2 and 2.3 shall be allowed; and provided further that no paved public street shall be constructed and used for public access.

2.2 Notwithstanding the foregoing, installation and maintenance of utility facilities and utility access roads thereto necessary for the development of ArrowCreek (e.g., sewer, water, gas, telephone, electric, storm drainage, cable TV) and the creation and maintenance of any firebreaks required by state or local agencies shall be allowed, as well as any ancillary or associated uses relating to ArrowCreek allowed by County.

2.3 Limited use of the Restricted Parcel for two public trails is allowed, Thomas Creek Trail and the Mackay/Fair Trail, as delineated on the Washoe County Regional Trail And Park Plan, provided the use of each trail is limited to the following activities:

- (a) Construction, repair and maintenance of a trail for recreational uses, including, but not limited to, public hiking, bicycle riding, jogging, horseback riding and other pedestrian and equestrian uses. Motorized vehicles of all kinds shall be prohibited and blocked from using the trail, except for County-authorized vehicles used for construction, maintenance or repair of the trail area.
- (b) Use of the trail by the general public for recreational purposes, subject to any regulations of public use imposed by County, however, common park facilities shall not be allowed, including, but not limited to, community or neighborhood parks, children's playgrounds, ballfields, tennis courts, basketball courts, group picnic access, swimming pools, and other active recreational uses other than fishing and use of the walking-jogging-equestrian path or trail.
- (c) Installation, maintenance and repair of landscaping, benches, turf or gardens, if any.

3. **RESTRICTIONS RUN WITH THE LAND.**

The use restrictions on the Restricted Parcel set forth in this Covenant shall be burdens on the Restricted Parcel and shall run with the land.

4. **SUCCESSORS AND ASSIGNS.**

This Covenant and the restrictions created hereby shall be binding upon any party owning any interest in all or any portion of the Restricted Parcel, its heirs, personal representatives, successors and assigns; provided, however, that if any such party transfers all or any portion of its interest in such Restricted Parcel, such party shall thereupon be released and discharged from any and all obligations as owner in connection with the interest transferred by it arising under this Covenant after the transfer.

5. **INJUNCTIVE OR ENFORCEMENT RELIEF.**

In the event of any violation or threatened violation by any person of any of the restrictions contained in this Covenant, those parties entitled to enforce this Covenant shall have the right to enjoin such violation or threatened violation or otherwise enforce the provisions hereof in a court of competent jurisdiction. The right of injunction shall be in addition to all other remedies set forth in this Covenant or provided by law.

6. **MODIFICATION AND TERMINATION.**

This Covenant may not be modified in any respect whatsoever or terminated, in whole or in part, except with the written consent of SPA, AGH and HOA, as specified in Subsection 1.3 above, which consent must be recorded in the office of the Recorder of Washoe County.

7. **WAIVER.**

The failure to insist upon strict performance of any of the restrictions or other terms and conditions contained herein shall not be deemed a waiver of any rights or remedies, and shall not be deemed a waiver of any subsequent breach or default in the performance of any of the restrictions, or other terms and conditions contained herein.

8. **ATTORNEY'S FEES.**

In the event a party entitled to enforce this Covenant initiates or defends any legal action or proceeding to enforce or interpret any of the terms of this Covenant, the prevailing party in any such action or proceeding shall be entitled to recover from the losing party in any such action or proceeding its reasonable costs and attorney's fees (including its reasonable costs and attorney's fees on any appeal).

9. **SEVERABILITY.**

If any term or provision of this Covenant or the application of it to any person or circumstance shall to any extent be invalid or unenforceable, the remainder of this Covenant or the application of such term or provision to persons or circumstances, other than those as to which it is

invalid or unenforceable, shall not be affected thereby, and each term and provision of this Covenant shall be valid and shall be enforced to the extent permitted by law.

10. **CAPTIONS AND HEADINGS.**

The captions and headings in this Covenant are for reference only and shall not be deemed to define or limit the scope or intent of any of the terms, covenants, conditions or agreements contained herein.

11. **CONSTRUCTION.**

In construing the provisions of this Covenant and whenever the context so requires, the use of a gender shall include all other genders, the use of the singular shall include the plural, and the use of the plural shall include the singular.

12. **RECORDATION.**

This Covenant shall be recorded against the Restricted Parcel in the office of the Washoe County Recorder.

EXECUTED as of the day and year first above written.

**EASEMENT FOR DRAINAGE AND UTILITIES**

THIS GRANT OF EASEMENT is made and entered into this \_\_\_\_ day of \_\_\_\_\_, 2007 by the **COUNTY OF WASHOE**, a political subdivision of the State of Nevada, hereinafter referred to as "Grantor"; to **SOUTHWEST POINTE ASSOCIATES, L.L.C.**, a Delaware limited liability company, **ARROWCREEK HOMEOWNERS ASSOCIATION**, a Nevada nonprofit corporation, and **ARROWCREEK GOLF HOLDINGS, L.L.C.**, a Delaware limited liability company, hereinafter referred to collectively as "Grantees".

**W I T N E S S E T H :**

For and in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, receipt is hereby acknowledged, Grantor hereby grants to Grantees a blanket easement for drainage of storm waters and utility facilities (gas, sewer, water, electric, cable TV and telephone) upon, over, across and through the land herein described, including the right of access upon said land for the purpose of construction and maintenance of improvements for said drainage and utility facilities.

The easement hereby granted is situated in the County of Washoe, State of Nevada, more particularly described in Exhibit "A" attached hereto and by this reference made a part hereof.

This is a nonexclusive Grant of Easement and to the extent that other uses do not interfere

with the use of said easement by Grantees as permitted herein, Grantor, its successors and assigns, shall be permitted to use the same for any purpose it may desire.

The covenants herein contained shall inure to the benefit of and shall be binding upon the executors, administrators, heirs, successors and assigns of the parties and shall be, and are, covenants running with the land binding upon said property of Grantor and for the benefit of Grantee.

TO HAVE AND TO HOLD said easement unto the Grantees and unto their successors and assigns forever.

IN WITNESS WHEREOF, Grantor hereto has executed this Grant of Easement the day and year first above written.

**GRANTOR:**

**COUNTY OF WASHOE, a political  
subdivision of the State of Nevada**

# Effort to save western foothills passes threshold, activist says

Marilyn Norton/Reno Gazette-Journal file

**ENCROACHMENT:** Houses hug the foothills at Ballardini Ranch in western Reno. A movement to preserve the 1,019-acre ranch has gained economic clout that could help save access to nearby forests and mountains.

## 600 acres to be transferred to Washoe County today

*This is one in an occasional series of stories on issues of open space and recreation in northern Nevada. Read the entire series online at RGJ.com.*

**By Jeff DeLong**  
RENO GAZETTE-JOURNAL

Preservationists say they're closer than ever to ensuring the Ballardini Ranch in Reno's western foothills remains protected as open land, although the property owners still are proceeding with plans to build an upscale subdivision there.

And just to the south at ArrowCreek, more than 600 acres of land are scheduled today to be deeded to Washoe County as perma-

nent open space — an important contribution to plans to ring the 1,090-home subdivision with undeveloped land and trails.

These areas are key to efforts to ensure that neighborhoods creeping up the foothills of southwest Reno don't block access to the forests and mountains.

The movement to preserve the 1,019-acre Ballardini Ranch received a major boost in November when Interior Secretary Gale Norton endorsed its \$15 million acquisition under the Southern Nevada Public Land Management Act. When that sum is coupled with \$4 million raised by the passage of a bond sale approved by Washoe County voters in

2000, preservationists say they now have the economic bargaining power to make the ranch's acquisition a reality.

"We've kind of passed the threshold," said Steve Walther, a Reno lawyer who has fought for 20 years to protect the western hills from development. "Until we had that commitment, we were not in a position to negotiate with money in hand."

Stephen Mollath, lawyer for ranch owners Evans Creek Ltd., said his clients are proceeding with scaled-back development plans for the southern portion of Ballardini. "There's always the possibility of public acquisition," he added.

The latest proposal calls for development of impor-

tant deer habitat and a landscape that many insist should be preserved, although it would include far fewer than the thousands of homes proposed in years past.

Evans Creek Ltd. proposes construction of Toiyabe Ranch Estates, a gated community with 43 homes on 600 acres, with an average lot size of 13 acres. Washoe County planners are expected to consider the project early this year.

With home densities far less than other nearby neighborhoods, residents of the area "should be very pleased" with the project now proposed, Mollath said.

# Open space/ Efforts praised

**From 1A**  
Ballardini — one of the last working ranches in the Truckee Meadows — has been under heavy scrutiny for years. In 1997, widespread public opposition helped persuade developers to withdraw plans to build more than 2,000 homes on the ranch.

Evans Creek Ltd., which bought the ranch for \$8.5 million in May 1998, later proposed about 1,000 homes on 411 acres just southwest of McCarran Boulevard. Regional planners denied a needed change in land-use designation needed for the project in February 2000.

Recent debate focused on the possibility of public acquisition.

Ballardini Ranch was one of only two proposed land acquisitions that made the final list for round three of the Southern Nevada Public Land Management Act. At the urging of Sen. John Ensign, R-Nev., Norton pulled many other proposed acquisitions in northern Nevada from the list amid concern that too little southern Nevada land had been targeted.

The fact Ballardini remained demonstrates its importance, Walther said.

"To me it was quite significant she didn't do what she did with some of the other properties," he said.

Walther said he's hopeful negotiations can result in successful acquisition of the entire ranch before Evans Creek Ltd. develops the 43-lot subdivision in the southern portion.

Others involved in the Ballardini preservation effort said a critical juncture in time has arrived.

"The entire character of the southwest area is at stake," said Herb Rubenstein of Protect Our Washoe, a citizens group that successfully battled plans in the

1980s to route the U.S. 395 extension through the southwest foothills.

"You can always pave the forest, but you can never unpave it," Rubenstein said. "You'd be changing the area forever."

South of Ballardini Ranch, plans to surround the upscale ArrowCreek subdivision with open space are nearing completion.

Today, the Washoe County Commission is scheduled to accept 608 acres as dedicated open space on ArrowCreek's western and northern boundaries adjoining U.S. Forest Service land. Some 570 acres to the south and east of the project were previously dedicated as open space.

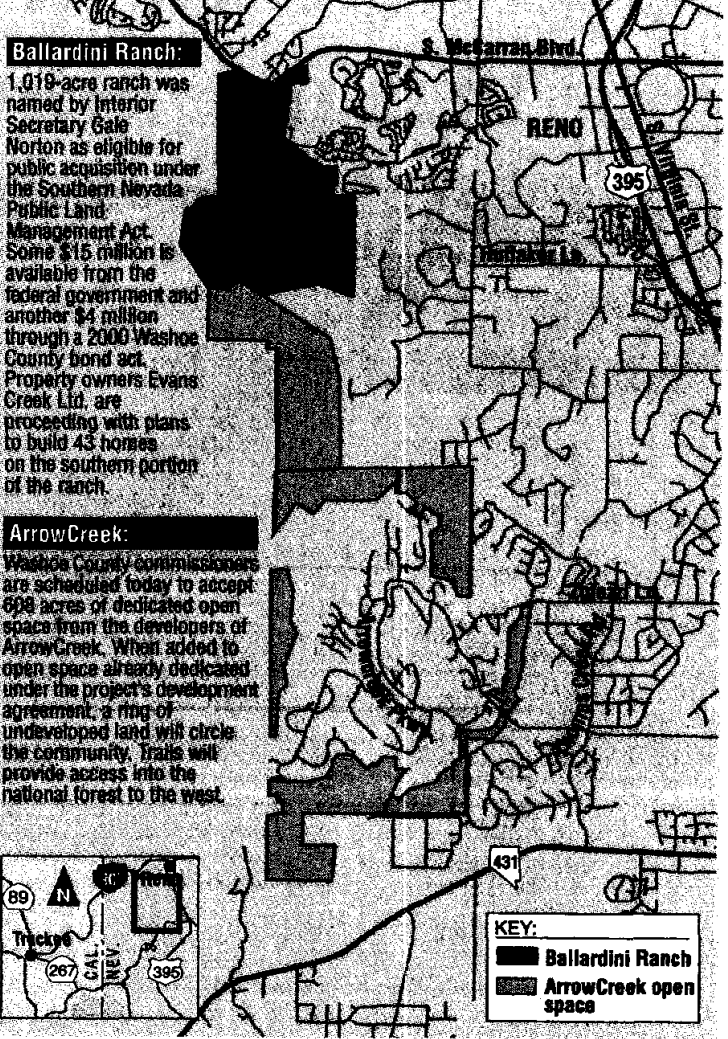

"The idea is to have a complete loop around the whole property," said Mike Boster, a planner with the county Parks and Recreation Department. "Basically it's access to the public lands that we want to protect. We want folks to be able to get from their residential neighborhoods and into these public lands."

Toward that end, trails are planned throughout the ring of open space. They would link to new trailheads being built at the mouths of Whites and Thomas creek canyons by the Forest Service.

"By working together with the county we can provide access to these perfectly beautiful mountains for people to enjoy," said Gary Schiff, chief ranger of the Carson Ranger District.

Although the Forest Service greatly increased its land holdings in the Carson Range over the past 40 years, good access points to that land continue to be lacking, Schiff said. The problem worsened as growth pushed more and more homes into the foothills abutting national forest land, with people often accessing public land via private lots.

## Protecting the foothills

S. Reich/Reno Gazette-Journal

Creation of a county-owned open space buffer between homes and the national forest also increases fire safety, reducing danger of wildfire spreading into neighborhoods or of a structure fire igniting a major wildland blaze, Schiff said.

Open space is a "very important component" of ArrowCreek and contrasts with some other developments in the area, said Dean Menante, the development's general manager.

"It's pretty good when you look at it compared to other developments," Menante said. "We've

tried to preserve the land and keep it in its natural state."

ArrowCreek has backed away from plans to swap another 120 acres of open space in return for permission to build an extra 42 homes on the northern edge of the development. Critics expressed concern some of the additional homes could impact Georgetta Springs, an important water source for mule deer.

"None of it is going to go into the springs," Menante said, adding that ArrowCreek has no intention of resurrecting that particular proposal.

# Marines/U.S. force could reach 250,000

**From 1A**  
Buildup of American military might in the Gulf region. About 50,000 troops already are in the area and Defense Secretary Donald Rumsfeld in recent days has signed orders for an additional 57,000, including about 20,000 Marines. Eventually the size of

of mass destruction in Iraq could take a year.

The administration has placed less and less emphasis on a Jan. 27 deadline — the date the inspectors are to present their first comprehensive report to the U.N. Security Council. U.S. officials last week characterized that date

A separate deployment of Marines aboard Navy ships, led by the amphibious assault ship USS Tarawa, left San Diego on Jan. 6. That group, with about 2,200 Marines from the 15th Marine Expeditionary Unit aboard, is on a regularly scheduled effort. A similar-sized unit led by the USS

which returned home to Norfolk, Va., just before Christmas, has been told that it should be prepared to head back to sea on short notice in case it also is needed.

The East Coast amphibious task force that has been ordered to the Gulf region already is under way. The amphibious transport ship

EXHIBIT "A"  
DESCRIPTION  
APN 152-020-30

A parcel of land being a portion of Parcel 4 of Parcel Map 3153, File Number 2064609, of the Official Records of Washoe County, Nevada, situated within Section 24, Township 18 North, Range 19 East, MDM, Washoe County, Nevada, being more particularly described as follows:

Beginning at the Southwest corner of said Parcel 4 from which the Southwest corner of said Section 24 bears North 89°56'17" West a distance of 884.69 feet;  
thence along the Southerly boundary of said Parcel 4 South 89°56'17" East a distance of 1742.50 feet to the Southeast corner of said Parcel 4;  
thence along the Easterly boundary of said Parcel 4 North 00°37'20" East a distance of 149.07 feet to a point on the Southerly boundary of Deed of Dedication Document Number 2151423, of said Official Records;  
thence along said Southerly boundary North 89°45'53" West a distance of 246.81 feet;  
thence along a tangent circular curve to the right with a radius of 920.00 feet and a central angle of 52°04'10" an arc length of 836.08 feet;  
thence North 37°41'43" West a distance of 58.00 feet;  
thence North 71°34'32" West a distance of 134.54 feet;  
thence North 37°41'43" West a distance of 49.00 feet to a point on the Westerly boundary of said Parcel 4;  
thence along said Westerly boundary South 31°56'15" West a distance of 372.78 feet;  
thence South 50°25'19" West a distance of 496.72 feet to the Point of Beginning.

Said parcel contains an area of approximately 11.21 acres.

BASIS OF BEARINGS: Said Parcel Map 3153.

U. S. Mail:

Re: ArrowCreek Open Space Documents

Dear Mike:

Enclosed are two deeds, two restrictive covenants and an easement for the transfer of more open space in ArrowCreek. There are no changes in language on these documents from those previously approved by the District Attorney and the Risk Manager, except that the restrictive covenant has been expanded to prohibit paved streets (to address concerns of "Protect Our Washoe" regarding a future north-south arterial), and the easement has been expanded to allow grading of the "presumed public road" realignment. After execution, the order of recording for these documents is:

1. Restrictive Covenants;
2. Deeds; and
3. Easement.

It is imperative that the documents be recorded in the proper order. Please supply me conformed copies immediately after recording. Thank you for your cooperation.

Sincerely,

ROBERT M. SADER

**RESTRICTIVE COVENANT**

THIS RESTRICTIVE COVENANT ("Covenant") is made as of this \_\_\_\_\_ day of \_\_\_\_\_, 2002, by SOUTHWEST POINTE ASSOCIATES, L.L.C., a Delaware limited liability company, ("SPA").

1. **GENERAL.**

1.1 SPA is the master developer of certain real property located in Washoe County, Nevada known as ArrowCreek (ArrowCreek is described in Washoe County Case No. DA9-1-93).

1.2 A portion of ArrowCreek owned by SPA is certain land more particularly described in Exhibit "A", attached hereto and incorporated herein, (the "Restricted Parcel").

1.3 SPA intends hereby to restrict any owner's or occupant's right to use all or any portion of the Restricted Parcel as specified herein.

1.4 The covenants and restrictions on the Restricted Parcel specified herein are for the benefit of SPA personally and for the owners of property in ArrowCreek, as represented by the ArrowCreek Homeowners Association, a Nevada nonprofit corporation, ("HOA"), and ArrowCreek Golf Holdings, L.L.C., ("AGH") owner of the golf courses. The right to enforce this Restrictive Covenant shall be granted only to AGH, SPA or HOA, or a successor by an express assignment, recorded against Exhibit "A", of SPA's, AGH's or HOA's rights hereunder.

1.5 SPA intends to convey all its right, title and interest in the Restricted Parcel to Washoe County, a political subdivision of the State of Nevada, ("County"). County agrees, by accepting this Covenant, to comply with all use restrictions specified herein, as well as other provisions hereof.

2. **USE RESTRICTIONS.**

2.1 Use of the Restricted Parcel shall be restricted, except as otherwise provided in this Section 2, to only those uses allowed in the Open Space land use regulatory zone of the Washoe County Development Code; provided that no above-ground structures other than those allowed in

Subsection 2.2 and 2.3 shall be allowed; and provided further that no paved public street shall be constructed and used for public access.

2.2 Notwithstanding the foregoing, installation and maintenance of utility facilities and utility access roads thereto necessary for the development of ArrowCreek (e.g., sewer, water, gas, telephone, electric, storm drainage, cable TV) and the creation and maintenance of any firebreaks required by state or local agencies shall be allowed, as well as any ancillary or associated uses relating to ArrowCreek allowed by County.

2.3 Limited use of the Restricted Parcel for two public trails is allowed, Thomas Creek Trail and the Mackay/Fair Trail, as delineated on the Washoe County Regional Trail And Park Plan, provided the use of each trail is limited to the following activities:

- (a) Construction, repair and maintenance of a trail for recreational uses, including, but not limited to, public hiking, bicycle riding, jogging, horseback riding and other pedestrian and equestrian uses. Motorized vehicles of all kinds shall be prohibited and blocked from using the trail, except for County-authorized vehicles used for construction, maintenance or repair of the trail area.
- (b) Use of the trail by the general public for recreational purposes, subject to any regulations of public use imposed by County, however, common park facilities shall not be allowed, including, but not limited to, community or neighborhood parks, children's playgrounds, ballfields, tennis courts, basketball courts, group picnic access, swimming pools, and other active recreational uses other than fishing and use of the walking-jogging-equestrian path or trail.
- (c) Installation, maintenance and repair of landscaping, benches, turf or gardens, if any.

### 3. RESTRICTIONS RUN WITH THE LAND.

The use restrictions on the Restricted Parcel set forth in this Covenant shall be burdens on the Restricted Parcel and shall run with the land.

### 4. SUCCESSORS AND ASSIGNS.

This Covenant and the restrictions created hereby shall be binding upon any party owning any interest in all or any portion of the Restricted Parcel, its heirs, personal representatives, successors and assigns; provided, however, that if any such party transfers all or any portion of its interest in such Restricted Parcel, such party shall thereupon be released and discharged from any and all obligations as owner in connection with the interest transferred by it arising under this Covenant after the transfer.

5. **INJUNCTIVE OR ENFORCEMENT RELIEF.**

In the event of any violation or threatened violation by any person of any of the restrictions contained in this Covenant, those parties entitled to enforce this Covenant shall have the right to enjoin such violation or threatened violation or otherwise enforce the provisions hereof in a court of competent jurisdiction. The right of injunction shall be in addition to all other remedies set forth in this Covenant or provided by law.

6. **MODIFICATION AND TERMINATION.**

This Covenant may not be modified in any respect whatsoever or terminated, in whole or in part, except with the written consent of SPA, AGH and HOA, as specified in Subsection 1.4 above, which consent must be recorded in the office of the Recorder of Washoe County.

7. **WAIVER.**

The failure to insist upon strict performance of any of the restrictions or other terms and conditions contained herein shall not be deemed a waiver of any rights or remedies, and shall not be deemed a waiver of any subsequent breach or default in the performance of any of the restrictions, or other terms and conditions contained herein.

8. **ATTORNEY'S FEES.**

In the event a party entitled to enforce this Covenant initiates or defends any legal action or proceeding to enforce or interpret any of the terms of this Covenant, the prevailing party in any such action or proceeding shall be entitled to recover from the losing party in any such action or proceeding its reasonable costs and attorney's fees (including its reasonable costs and attorney's fees on any appeal).

9. **SEVERABILITY.**

If any term or provision of this Covenant or the application of it to any person or circumstance shall to any extent be invalid or unenforceable, the remainder of this Covenant or the application of such term or provision to persons or circumstances, other than those as to which it is invalid or unenforceable, shall not be affected thereby, and each term and provision of this Covenant shall be valid and shall be enforced to the extent permitted by law.

10. **CAPTIONS AND HEADINGS.**

The captions and headings in this Covenant are for reference only and shall not be deemed to define or limit the scope or intent of any of the terms, covenants, conditions or agreements contained herein.

11. CONSTRUCTION.

In construing the provisions of this Covenant and whenever the context so requires, the use of a gender shall include all other genders, the use of the singular shall include the plural, and the use of the plural shall include the singular.

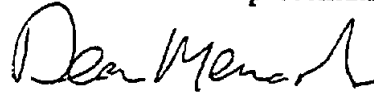

12. RECORDATION.

This Covenant shall be recorded against the Restricted Parcel in the office of the Washoe County Recorder.

EXECUTED as of the day and year first above written.

DESCRIPTION  
APN 152-850-01 &  
A PORTION OF APN 152-611-03

Two parcels of land situated within Section 22, Township 18 North, Range 19 East, MDM, Washoe County, Nevada, being more particularly described as follows:

Parcel A of Subdivision Tract Map 4100, File Number 2705678, of the Official Records of Washoe County, Nevada.

TOGETHER WITH, a portion of Lot 2603 of Subdivision Tract Map 4100, File Number 2705678, of the Official Records of Washoe County, Nevada, being further described as follows:

Beginning at the Southerly corner of Parcel B of said Subdivision Tract Map 4100, also being on the boundary of said Lot 2603, from which the North Quarter corner of said Section 22 bears North 07°42'57" West a distance of 2945.23 feet;  
thence along said boundary South 44°13'16" West a distance of 19.82 feet;  
thence along a tangent circular curve to the left with a radius of 320.00 feet and a central angle of 27°31'10" an arc length of 153.70 feet;  
thence South 16°42'06" West a distance of 133.24 feet;  
thence along a tangent circular curve to the left with a radius of 1210.00 feet and a central angle of 13°28'28" an arc length of 284.56 feet;  
thence with a non-tangent line South 73°34'53" East a distance of 50.81 feet;  
thence North 43°58'56" East a distance of 62.17 feet;  
thence North 64°33'19" East a distance of 74.37 feet;  
thence North 86°59'23" East a distance of 91.27 feet;  
thence North 25°28'55" East a distance of 111.50 feet;  
thence North 82°30'37" West a distance of 126.31 feet;  
thence along a tangent circular curve to the right with a radius of 100.00 feet and a central angle of 99°12'43" an arc length of 173.16 feet;  
thence North 16°42'06" East a distance of 90.30 feet;  
thence along a tangent circular curve to the right with a radius of 290.00 feet and a central angle of 27°31'10" an arc length of 139.29 feet;  
thence North 44°13'16" East a distance of 19.16 feet;  
thence departing said boundary North 44°30'35" West a distance of 30.01 feet to the Point of Beginning.

Said parcels contain an area of approximately 41.07 acres.

APNs: 152-010-36 and 152-010-37

**RESTRICTIVE COVENANT**

THIS RESTRICTIVE COVENANT ("Covenant") is made as of this \_\_\_\_\_ day of \_\_\_\_\_, 2002, by HELEN JEANE JONES, KENNETH G. WALKER and GERALD C. SMITH, as trustees under the provisions of that certain NELL J. REDFIELD Revocable Trust Agreement dated May 21, 1980, "Redfield".

**1. GENERAL.**

1.1 Southwest Pointe Associates, L.L.C. ("SPA") is the master developer of certain real property located in Washoe County, Nevada known as ArrowCreek (ArrowCreek is described in Washoe County Case No. DA9-1-93).

1.2 A portion of ArrowCreek owned by Redfield is certain land more particularly described in Exhibit "A", attached hereto and incorporated herein, (the "Restricted Parcel").

1.3 Redfield intends hereby to restrict any owner's or occupant's right to use all or any portion of the Restricted Parcel as specified herein.

1.4 The covenants and restrictions on the Restricted Parcel specified herein are for the benefit of SPA personally and for the owners of property in ArrowCreek, as represented by the ArrowCreek Homeowners Association, a Nevada nonprofit corporation, ("HOA"), Redfield, and ArrowCreek Golf Holdings, L.L.C., ("AGH") owner of the golf courses. The right to enforce this Restrictive Covenant shall be granted only to AGH, SPA or HOA, or a successor by an express assignment, recorded against Exhibit "A", of SPA's, AGH's or HOA's rights hereunder.

1.5 Redfield intends to convey all its right, title and interest in the Restricted Parcel to Washoe County, a political subdivision of the State of Nevada, ("County"). County agrees, by accepting this Covenant, to comply with all use restrictions specified herein, as well as other provisions hereof.

**2. USE RESTRICTIONS.**

2.1 Use of the Restricted Parcel shall be restricted, except as otherwise provided in this Section 2, to only those uses allowed in the Open Space land use regulatory zone of the Washoe

County Development Code; provided that no above-ground structures other than those allowed in Subsection 2.2 and 2.3 shall be allowed; and provided further that no paved public street shall be constructed and used for public access.

2.2 Notwithstanding the foregoing, installation and maintenance of utility facilities and utility access roads thereto necessary for the development of ArrowCreek (e.g., sewer, water, gas, telephone, electric, storm drainage, cable TV) and the creation and maintenance of any firebreaks required by state or local agencies shall be allowed, as well as any ancillary or associated uses relating to ArrowCreek allowed by County.

2.3 Limited use of the Restricted Parcel for two public trails is allowed, Thomas Creek Trail and the Mackay/Fair Trail, as delineated on the Washoe County Regional Trail And Park Plan, provided the use of each trail is limited to the following activities:

- (a) Construction, repair and maintenance of a trail for recreational uses, including, but not limited to, public hiking, bicycle riding, jogging, horseback riding and other pedestrian and equestrian uses. Motorized vehicles of all kinds shall be prohibited and blocked from using the trail, except for County-authorized vehicles used for construction, maintenance or repair of the trail area.
- (b) Use of the trail by the general public for recreational purposes, subject to any regulations of public use imposed by County, however, common park facilities shall not be allowed, including, but not limited to, community or neighborhood parks, children's playgrounds, ballfields, tennis courts, basketball courts, group picnic access, swimming pools, and other active recreational uses other than fishing and use of the walking-jogging-equestrian path or trail.
- (c) Installation, maintenance and repair of landscaping, benches, turf or gardens, if any.

3. RESTRICTIONS RUN WITH THE LAND.

The use restrictions on the Restricted Parcel set forth in this Covenant shall be burdens on the Restricted Parcel and shall run with the land.

4. SUCCESSORS AND ASSIGNS.

This Covenant and the restrictions created hereby shall be binding upon any party owning any interest in all or any portion of the Restricted Parcel, its heirs, personal representatives, successors and assigns; provided, however, that if any such party transfers all or any portion of its interest in such Restricted Parcel, such party shall thereupon be released and discharged from any and all obligations as owner in connection with the interest transferred by it arising under this Covenant after the transfer.

5. **INJUNCTIVE OR ENFORCEMENT RELIEF.**

In the event of any violation or threatened violation by any person of any of the restrictions contained in this Covenant, those parties entitled to enforce this Covenant shall have the right to enjoin such violation or threatened violation or otherwise enforce the provisions hereof in a court of competent jurisdiction. The right of injunction shall be in addition to all other remedies set forth in this Covenant or provided by law.

6. **MODIFICATION AND TERMINATION.**

This Covenant may not be modified in any respect whatsoever or terminated, in whole or in part, except with the written consent of SPA, AGH and HOA, as specified in Subsection 1.4 above, which consent must be recorded in the office of the Recorder of Washoe County.

7. **WAIVER.**

The failure to insist upon strict performance of any of the restrictions or other terms and conditions contained herein shall not be deemed a waiver of any rights or remedies, and shall not be deemed a waiver of any subsequent breach or default in the performance of any of the restrictions, or other terms and conditions contained herein.

8. **ATTORNEY'S FEES.**

In the event a party entitled to enforce this Covenant initiates or defends any legal action or proceeding to enforce or interpret any of the terms of this Covenant, the prevailing party in any such action or proceeding shall be entitled to recover from the losing party in any such action or proceeding its reasonable costs and attorney's fees (including its reasonable costs and attorney's fees on any appeal).

9. **SEVERABILITY.**

If any term or provision of this Covenant or the application of it to any person or circumstance shall to any extent be invalid or unenforceable, the remainder of this Covenant or the application of such term or provision to persons or circumstances, other than those as to which it is invalid or unenforceable, shall not be affected thereby, and each term and provision of this Covenant shall be valid and shall be enforced to the extent permitted by law.

10. **CAPTIONS AND HEADINGS.**

The captions and headings in this Covenant are for reference only and shall not be deemed to define or limit the scope or intent of any of the terms, covenants, conditions or agreements contained herein.

11. CONSTRUCTION.

In construing the provisions of this Covenant and whenever the context so requires, the use of a gender shall include all other genders, the use of the singular shall include the plural, and the use of the plural shall include the singular.

12. RECORDATION.

This Covenant shall be recorded against the Restricted Parcel in the office of the Washoe County Recorder.

EXECUTED as of the day and year first above written.

**EASEMENT FOR DRAINAGE AND UTILITIES  
AND ROAD GRADING**

THIS GRANT OF EASEMENT, made and entered into this \_\_\_\_ day of \_\_\_\_\_, 2002, by and between the **COUNTY OF WASHOE**, a political subdivision of the State of Nevada, hereinafter referred to as "Grantor"; and **SOUTHWEST POINTE ASSOCIATES, L.L.C.**, a Delaware limited liability company, **ARROWCREEK HOMEOWNERS ASSOCIATION**, a Nevada nonprofit corporation, and **ARROWCREEK GOLF HOLDINGS, L.L.C.**, a Delaware limited liability company, hereinafter referred to collectively as "Grantees".

**WITNESSETH:**

For and in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, receipt is hereby acknowledged, Grantor hereby grants to Grantees a blanket easement for drainage of storm waters and utility facilities (gas, sewer, water, electric, cable TV and telephone), together with an easement to grade an unpaved road for purposes of relocation of a "presumed public road" upon, over, across and through the land herein described, including the right of access upon said land for the purpose of construction and maintenance of improvements for said drainage, utility and road facilities.

The easement hereby granted is situated in the County of Washoe, State of Nevada, more particularly described in Exhibit "A" attached hereto and by this reference made a part hereof.

This is a nonexclusive Grant of Easement and to the extent that other uses do not interfere with the use of said easement by Grantees as permitted herein, Grantor, its successors and assigns, shall be permitted to use the same for any purpose it may desire.

The covenants herein contained shall inure to the benefit of and shall be binding upon the executors, administrators, heirs, successors and assigns of the parties and shall be, and are, covenants running with the land binding upon said property of Grantor and for the benefit of Grantee.

TO HAVE AND TO HOLD, said easement unto the Grantees and unto their successors and assigns forever.

IN WITNESS WHEREOF, Grantor hereto has executed this Grant of Easement the day and year first above written.

**GRANTOR:**

# SPECIFIC DISCLOSURE INFORMATION FOR THE CUSTOM LOT PURCHASER IN ARROWCREEK

Date: August 15, 2002

## INTRODUCTION

This Specific Disclosure Information is provided to buyers of ArrowCreek custom home sites in order to provide information about this particular subdivision, and to meet disclosure requirements of Nevada law. ArrowCreek is both a "common-interest community" and a "planned community" under applicable Nevada law (Nevada Revised Statutes Chapter 116). This Specific Disclosure Information is also a Public Offering Statement required by NRS 116.4101 to 412.

## SUBDIVISION/SELLER.

ArrowCreek is a subdivision located in Washoe County, Nevada, on ArrowCreek Parkway south of Zolezzi Lane, west of South Virginia Street and north of the Mount Rose Highway. The seller of custom lots and the master developer is Southwest Pointe Partners, L.L.C., a Delaware limited liability company. The principal mailing address and telephone numbers for both the seller and subdivision are:

10385 Tewa Court  
Reno, Nevada 89511  
(Tel.) (775) 850-4488  
(Fax) (775) 850-4489

ArrowCreek is being developed pursuant to a Final Development Agreement approved by Washoe County (Case No. DA9-1-93) and subsequent tentative maps for phases of the subdivision. Government approvals for ArrowCreek were formerly in the name of Southwest Pointe. The two names refer to the same subdivision. More information on development approvals for ArrowCreek can be obtained from the Washoe County Department of Community Development (tel. 328-6100).

ArrowCreek is a detached single family dwelling community composed of a maximum of 1,090 residential lots. The maximum number of lots may be increased, subject to Washoe County approval. Approximately 610 lots are currently planned to be sold as custom home sites, meaning a lot developed with utilities and streets, ready for the buyer to construct a custom home on the lot after issuance of a building permit by Washoe County and approval of the buyer's construction plans by the ArrowCreek Design Review Committee. Approximately 480 lots are currently planned to be sold to subdivision tract builders ("Builders") who will construct homes on the lots for sale to homebuyers. These Builders are not agents of the seller, and are solely, independently responsible for their own activities. The mix of custom home sites and subdivision tract lots may change, depending on sales activities and market demand.

Some of the homes built by Builders may have separate amenities (e.g., recreation facilities, gates, security), which are limited to benefitting those homes, and which are paid for entirely by the

homeowners benefitted. Lot sizes in ArrowCreek vary in three categories: (1) 12,000 sq. ft. to 21,780 sq. ft. (40%); (2) 21,680 sq. ft. to 43,559 sq. ft. (35%); and (3) over 43,559 sq. ft. (25%).

The seller anticipates that between 50 and 150 homes will be constructed each year in ArrowCreek, from 1999 until buildout. Substantial buildout should occur within 7 to 15 years.

Two 18-hole golf courses, a clubhouse and associated golf amenities part of the ArrowCreek project and have been completed. The golf courses are not amenities of ArrowCreek lot owners. Membership and play privileges are separate from lot ownership and a private membership is required in order to play the golf courses.

The golf courses owner pays a portion of the expenses of the ArrowCreek Homeowners Association ("Association") in proportion to its use of the private roads, security and other Association services, and receives voting rights as a member of the Association in proportion to its assessment obligation. The formula for calculating the proportionate share of Association expenses and voting rights for the golf courses is more fully described in the ArrowCreek Declaration of Covenants, Conditions And Restrictions (CC&Rs), which was recorded on October 17, 1997 as Document No. 2145699 in the office of the Recorder of Washoe County, Nevada.

The Swim and Tennis Club is a private recreation amenity of the Association, available for use by ArrowCreek lot owners. Construction of the Swim and Tennis Club is completed and the club is open to members. Private and any public use of the club is regulated by decisions of the Association Board of Directors.

An equestrian center was originally planned as a private recreation amenity for ArrowCreek, but will not be built. An RV-boat storage facility for lot owner use is allowed to be built (but is not required to be built) in a latter phase of the subdivision, subject to fees to be determined by the Association. The Association Board of Directors will decide whether such a storage facility is built, subject to Washoe County approval, and there are no current plans for construction. A small retail commercial center is allowed to be built in the vicinity of the Swim and Tennis Club, in a latter phase of subdivision development, but may not be built.

Other amenities of ArrowCreek include common area landscaping, open space, private streets and controlled, gated private access, as more fully described in the CC&Rs. The main gate has been installed and security personnel are on duty during a portion of the day. The association controls main gate access and security personnel. Streets within the subdivision will be constructed as needed for lot access. All streets within ArrowCreek are designed to be private.

### **SALES AGENT.**

The real estate broker for custom lots in ArrowCreek is ArrowCreek Realty. The sales agent staff handles most of the marketing, sales and escrow matters for the seller. The sales office can be reached at (775) 850-4444 (fax: (775) 850-4445).

Sales for Builders may not be handled by ArrowCreek Realty. If so, any questions regarding sales of Builders' homes should be directed to the Builders' sales staff.

## DECLARATION OF COVENANTS, CONDITIONS & RESTRICTIONS (CC&Rs).

Title to each lot within this subdivision will be conveyed subject to title exceptions, some of which are certain easements, reservations, covenants, conditions, architectural controls, liens, assessments and charges set forth in the CC&Rs, all for the purpose of maintaining, enhancing and protecting the value and attractiveness of ArrowCreek.

The CC&Rs provide for the establishment of the ArrowCreek Homeowners Association, membership in which is mandatory for each owner of a residential lot within the subdivision, including Builder's lots. Other provisions of the CC&Rs control various aspects of the use of each lot, including the regulation by a Design Review Committee of dwellings, improvements or additions which a buyer desires to construct on the buyer's lot after close of escrow.

The Association is a Nevada non-profit corporation and is charged with certain duties as defined in the CC&Rs. Briefly, the Association will be responsible for the ownership of common area, including the recreation amenities, streets and gates; maintenance and repair of landscaping and open space, some (but not all) fuel modification and fuelbreak areas, permanent storm water detention areas and certain drainage ditches that will serve the subdivision; and enforcement of restrictions as provided in the CC&Rs. Private Association security and gates will restrict access to subdivision streets. The Association may provide private security for the gate. The Association is not authorized to represent owners on land use or growth matters.

The seller will construct, at its expense, the recreational amenities, private streets, drainage facilities, landscaping and other initial improvements on common areas. The seller has also funded the expense to create the Association ( incorporation costs, legal documents drafting, etc.), and has provided a subsidy to defray start-up expenses. Once sales in each new phase start to occur, assessments for all lots improved by streets and utilities in that phase which have not been purchased by others will be paid by the seller (or other owner).

There are no judgments or pending suits against the Association and there are no pending suits of any kind material to ArrowCreek of which the seller is aware.

The costs to maintain the recreational amenities, private streets, gates, landscape areas, drainage facilities and other common areas, and to operate the Association, are funded by lot owner assessments collected from each lot owner on a monthly basis that, if not paid, become a lien against an owner's property. The assessments are subject to annual review and may increase or decrease based on many factors, such as the amount of common area landscaping, maintenance costs, and management costs.

In the early phases of ArrowCreek the Board of Directors of the Association was appointed by the seller, and the seller controlled a majority of appointments to the Board of Directors until most of the lots in the subdivision were sold. The majority of Association director positions are now elected by ArrowCreek lot owners. Membership meetings will take place at least once a year. Board of Director meetings take place at least quarterly. The membership must ratify the Association's budget at least annually, which controls the income and expenses of the Association.

The most current approved budget is attached as Exhibit "A". It includes a reserve for repairs and replacement, as well as the monthly assessment for common expenses. All finished lots within ArrowCreek subject to assessment are assessed at the same amount. Homebuyers will pay the prorated monthly assessment at close of escrow for the month of closing, then be billed monthly for assessments after closing of a lot purchase. In addition, a transfer fee of \$100.00, or as otherwise set by the Board of Directors, is charged at close of escrow to the transferee. No other initial or special

fee related to the Association is charged at closing between the seller and the first buyer of an improved lot.

The Board of Directors will set any special fees or charges to be paid by homeowners for use of Association facilities. No such fees currently exist. Any such fees must be charged on a fair, just and equitable basis.

### **ASSOCIATION MANAGER.**

The Association has hired a management firm to administer the provisions of the CC&Rs, including membership data, meeting notices, assessments, liens, accounts and records, enforcement of restrictions, and supervision of maintenance and repair of common area.

This management firm is:

Gaston & Wilkerson Management Group  
3500 Lakeside Court, Suite 150  
Reno, Nevada 89509  
Facsimile: (775) 828-7496  
Telephone: (775) 828-1911

All inquires regarding enforcement of restrictions of the CC&Rs, assessments, etc. should be referred directly to the management firm.

### **UNPAVED PUBLIC ROAD ACCESS.**

While the CC&Rs general prohibit operation of motorized vehicles in open space or common areas in ArrowCreek, Washoe County recognizes the existence of an unpaved presumed public road pursuant to Section 405.191 and 405.195 of the Nevada Revised Statutes near the western boundary of ArrowCreek on open space or common area land. In addition, public access on U.S. Forest Service land adjacent to ArrowCreek on the west is allowed, including the use of motorized vehicles. A portion of the unpaved presumed public road referenced above traverses this U.S. Forest Service land. Neither the Association nor the seller can control, prohibit or restrict public motorized travel on a public road.

### **LOT DRAINAGE.**

Custom home site buyers are encouraged to carefully review the grading plans of the seller to determine how the lot will ultimately drain. Close of escrow will signify that the buyer has viewed and walked the lot and accepted the final grading plan. The buyer may not alter the drainage patterns created by the seller's final grading plan.

### **LANDSCAPING.**

The seller will not be landscaping individual lots within this subdivision. No topsoil, lawn hydroseeding, or sodding will be offered. Landscaping will be the buyer's responsibility, and landscaping of all lots is required by the CC&Rs. The CC&Rs contain restrictions on the maximum area of turf and irrigated landscaping which is allowed. These restrictions are imposed to conserve water usage, particularly on larger lots.

## EASEMENTS.

Numerous easements exist in ArrowCreek, including snow storage, signage, fencing, drainage and utility easements. Specific easements for each lot are shown on the final map for each unit in ArrowCreek, which can be inspected at the seller's office. In addition the CC&Rs create easements which affect owner's lots in the subdivision, including common area landscaping and pathway easements on some lots.

## UTILITY FACILITIES.

Many lots within the subdivision have electric transformers, electric distribution boxes, fire hydrants, street lights and signs located within the right of way adjacent to a lot or within an easement located in a side or front yard. The utility provider reserves the right to modify the placement of its facilities.

## SLOPES.

Some lots within this subdivision may have engineered slopes on them that run along the front side or rear of the lots. Most slopes are constructed are 3:1 (1 foot vertical change for every 3 feet horizontal). The seller encourages buyers to plant or seed slopes as soon as possible to stabilize them and prevent erosion. If any lot has 2:1 slopes which have been stabilized with rock rip-rap, buyers must take no action that will remove, dislocate, wash out, cover up, or in any other way disturb or interfere with the proper functioning of installation of this rock rip rap.

## SIDEWALKS.

The seller has a map available for inspection showing the location of all sidewalks or paths within the buyer's unit. The buyer is advised that there may a portion of street right of way behind the curb and gutter or sidewalk, and there are utility easements behind most curbs and gutters.

## WILDLIFE.

This subdivision is near substantial Bureau of Land Management and U.S. Forrest Service acreage and other open space. The presence of coyotes, snakes, rodents and other wildlife should be anticipated. Buyers should take precautions against natural predators.

## CONSTRUCTION NUISANCES.

Undeveloped portions of the subdivision will be used for construction related activities, such as water storage, dirt screening, equipment and material storage, for an undetermined period of time during construction in the subdivision, the golf courses and Association amenities. ArrowCreek streets will be used for construction-related traffic. Construction activities may occur early in the morning, late into the evening, and on weekends or holidays. Dust from construction activities or from areas disturbed by construction will occur. Noise from construction activities is unavoidable.

## SCHOOLS.

The Washoe County School District opened Huffaker Elementary School adjacent to ArrowCreek September, 1997. Adjacent to the elementary school is a private middle school, Sage Ridge School (grades 6-12), which opened in the fall of 1998. The school district solely controls the timing of new public school construction. While the seller hopes other schools will be built in future,

no representation or warranty is given by the seller that the school district will construct new schools in the future in the vicinity of ArrowCreek.

### **PARKS.**

Adjacent to ArrowCreek on the south side of ArrowCreek Parkway is a 10 acre public park which the seller has constructed for Washoe County. The park is open to the public, including ArrowCreek lot owners.

### **OPEN SPACE COMMON AREA/TRAILS.**

ArrowCreek lots are surrounded by approximately 1500 acres of open space which is part of the project, and will be dedicated in phases to Washoe County to be retained as open space. Certain improvements can be constructed in the open space (water tanks, wells, pipe lines, access roads, etc.) which are necessary for development of ArrowCreek. Private trails for ArrowCreek residents may be constructed in certain areas. The Association will be responsible for maintaining certain other open space as common area (primarily between subdivision units). Motorized vehicles (e.g., dirt bikes, four wheel drive cars, trucks, etc.) are not allowed to use any public or Association open space for recreational purposes.

Two public trails are planned to be constructed within open space dedicated to Washoe County, the first along Thomas Creek, on the east and south side of ArrowCreek, and the second around the subdivision area on the north side of ArrowCreek. Both trails are part of the county regional trail program, providing access to greenbelts, open space and public lands for the community. The county is solely responsible for construction and maintenance of these public trails. The public must be provided reasonable access into ArrowCreek for trail use, once the trails are constructed.

In addition, bike paths have been constructed in or adjacent to some major streets. The public will also be allowed access to bike paths.

### **PLANNED GROWTH IN THE SOUTHWEST TRUCKEE MEADOWS.**

Although ArrowCreek lots are surrounded by open space, as mentioned above, major areas of the Southwest Truckee Meadows are planned to be developed for future growth. Some areas around ArrowCreek which are not currently planned for development may receive land use changes allowing growth in the future. For more details on land use, zoning and planned development, please contact the Washoe County Department of Community Development at 328-6100.

### **ARROWCREEK SPECIAL ASSESSMENT DISTRICT 23.**

Washoe County's Special Assessment District 23 ("ASAD 23") is a joint effort between Washoe County and ArrowCreek to finance and construct certain "infrastructure" which benefits the southwest Truckee Meadows in general and ArrowCreek in particular. This infrastructure includes portions of ArrowCreek Parkway (the main entry road), a portion of the ArrowCreek domestic community water system (wells, storage tanks and pipelines) and the water irrigation system (pump station, pipeline and storage tank) for the golf courses and common areas of ArrowCreek.

ASAD 23 infrastructure has been built by ArrowCreek's developer and financed by one or more special obligation bonds issued by Washoe County. The bonds will be paid off over a 20-year period beginning in 1998 by assessments on land within ArrowCreek.

When each homeowner purchases a lot, the homeowner will assume a proportionate share of the assessments. This proportionate share is at this time \$9,078.96 per lot. Principal and interest installments on this sum amortized over 20 years are payable twice a year. The current installment is \$452.14. If the home is sold, the assessment obligation is transferred to the new owner. The developer also pays assessments on unsold land. The golf course pays assessments as well. Homeowners who do not want to pay assessments over time can pay them off in a lump sum with an additional prepayment fee of 3%.

In simple terms, assessments from ASAD 23 are just another way to finance the infrastructure necessary to provide ArrowCreek residents their home sites. People who purchase homes in a community without an ASAD pay their shares of the costs of necessary improvements in the price of the home sites. In ArrowCreek, with ASAD 23, a homeowner pays for these improvements separately through the special assessment.

### **FAULT ZONES.**

Like many places in the Truckee Meadows, several fault lines traverse ArrowCreek. The subdivision is designed to avoid the occurrence of faults under house building pads. In some cases, streets and other improvements may be built above fault lines or cross them. The Truckee Meadows is a region prone to earthquakes, and areas around faults often experience more frequent or more severe earthquake activity.

### **WIND.**

Very high winds can occur at ArrowCreek. Prior to construction, buyers are encouraged to review building plans for structures to insure adequate engineering design for high winds. County minimum standards may not be sufficient

### **NONPOTABLE IRRIGATION WATER.**

ArrowCreek is designed to use nonpotable water for irrigation of the golf courses and common area landscaping. In the near future this water will be primarily untreated creek water mixed with effluent from the county's sewer treatment plant. As more effluent is available, a higher concentration of the irrigation water supplied by the county will be effluent, until untreated creek water is entirely phased out.

All nonpotable water must pass federal, state and local laws and regulations in order to be used. No lots will use nonpotable water for irrigation purposes. Water for indoor and outdoor use on residences will be supplied from the county community domestic water system.

### **SNOW REMOVAL AND STORAGE.**

Since ArrowCreek's streets are private, snow removal will be performed by the Association. Snow storage easements have been granted on lots adjacent to streets for berms of snow plowed from the streets. A private contractor will be retained by the Association to perform snow removal from streets. Driveways will not be cleared.

## **SECURITY.**

Any level of private, contract security in ArrowCreek will be set by the Association Board of Directors, based on the desires of the membership and the costs involved. The seller makes no representation or warranty that contract security personnel, either at the main gate or elsewhere in ArrowCreek, will be supplied by the Association.

## **FUEL AND FIREBREAKS/FIRE PROTECTION.**

The Nevada Forestry Division supplies fire protection to ArrowCreek. A site near the main entrance has been set aside by the seller for a fire station, but the state has provided no promises or assurances regarding the construction of fire station facilities.

Fuel and firebreaks may be required on lots or adjacent to lots on open space, in order to provide protection against rangeland fires. A firebreak must generally be cleared of native, nonirrigated vegetation in order to retard the spread of fire. Details on fire resistant construction materials, sprinklering of structures and spark arrestors on chimneys can be obtained from the Washoe County Building and Safety Division (328-2020).

## **DETENTION BASINS AND FLOOD CONTROL CHANNELS.**

ArrowCreek is designed to retain flood flows caused by development in the event of a 100-year flood. Flood flows from off-site areas are designed to pass through ArrowCreek without flooding residential dwellings. Detention basins and flood channels are common area, owned and maintained by the Association.

## **GOLF CART CROSSINGS.**

Some streets in areas near the golf courses have crossings for golfers and golf carts. ArrowCreek residents may experience speed zones, speed bumps, stop signs and other controls relating to these crossings.

## **ON STREET PARKING.**

Parking on ArrowCreek streets is restricted or prohibited. Conveniently placed guest parking spaces are designed for residents' visitors in areas where guest parking is not otherwise available. All ArrowCreek residents are expected at all times to park their vehicles in driveways, garages or other areas designed for parking on lots.

## **ERRANT GOLF BALLS.**

Owners of homes in the vicinity of the golf courses can expect golf balls to be hit onto their home sites. Neither the seller nor the golf course owner/operator are responsible for errant golf balls. If golf balls cause damage, homeowners must identify the responsible golfer and obtain compensation from him or her.

## **FEEES TO UTILITY OR GOVERNMENT ENTITIES.**

Utility providers and government entities charge a variety of standard fees when a house is constructed. In ArrowCreek, these fees include without limitation: water connection fee; sewer connection fee; park construction tax; building permit fees; inspection fees; traffic impact fee; and electric, gas, cable TV and telephone turn-on fees. All of these fees are the responsibility of home

site buyers, not the seller, however, a full credit of the traffic impact fee is provided at the time of building permit issuance for a custom home.

### **PERSONAL INSPECTION.**

Each home site buyer or his/her agent must personally inspect the lot purchased prior to close of escrow, and verify this inspection in writing. Unless the buyer or his/her agent has personally inspected the lot, the buyer may cancel, by written notice, the contract for purchase of the lot until midnight of the fifth calendar day following the date of execution of the contract.

### **WARRANTIES.**

Although all warranties, express or implied, are expressly hereby excluded by seller, and all custom home site lots are sold "as is" by the seller, the following statutory implied warranties of quality may apply to custom home sites (but not to dwelling structures or other improvements constructed after close of escrow by others). In the terminology below, the seller is the "declarant".

#### **NRS 116.4114 Implied warranties of quality.**

1. A declarant and any dealer warrant that a unit will be in at least as good condition at the earlier of the time of the conveyance or delivery of possession as it was at the time of contracting, reasonable wear and tear excepted.
2. A declarant and any dealer impliedly warrant that a unit and the common elements in the common-interest community are suitable for the ordinary uses of real estate of its type and that any improvements made or contracted for by him, or made by any person before the creation of the common-interest community, will be:
  - (a) Free from defective materials; and
  - (b) Constructed in accordance with applicable law, according to sound standards of engineering and construction, and in a workmanlike manner.
3. In addition, a declarant and any dealer warrant to a purchaser of a unit that may be used for residential use that an existing use, continuation of which is contemplated by the parties, does not violate applicable law at the earlier of the time of conveyance or delivery of possession.

### **PUBLIC OFFERING STATEMENT REQUIREMENTS.**

In order to comply with certain provisions of Nevada law regarding public offering statements for planned communities (specifically, NRS 116.4104), the seller makes no representations or assurances regarding the development rights reserved by seller or otherwise on the following matters:

1. restrictions on use;
2. the extent to which any buildings or other improvements that may be erected pursuant to any development rights in any part of ArrowCreek will be compatible with existing buildings and improvements in ArrowCreek in terms of architectural style, quality of construction, and size;

3. other improvements that may be made and limited common elements that may be created within any part of ArrowCreek pursuant to any development right reserved by seller;
4. any limitations as to the locations of any building or other improvement that may be constructed or made within any part of ArrowCreek pursuant to a development right reserved by seller;
5. any limited common elements created pursuant to any developmental right reserved by seller being of the same general types and sizes as the limited common elements within other parts of ArrowCreek;
6. the proportion of limited common elements to units created pursuant to any development right reserved by the declarant being approximately equal to the proportion existing within other parts of ArrowCreek;
7. all restrictions in the declaration affecting use, occupancy and alienation of units applying to any units created pursuant to any developmental right reserved by the seller; and
8. the extent to which any assurances made pursuant to this section apply or do not apply if any development right is not exercised by the seller.

THIS PUBLIC OFFERING STATEMENT IS CURRENT AS OF AUGUST 15, 2002. RECENT DEVELOPMENTS REGARDING TOPICS DESCRIBED HEREIN, INCLUDING THE DESCRIPTION OF ARROWCREEK, THE ASSOCIATION AND COMMON AREA, THE BUDGET, ASSESSMENTS, AS WELL AS SERVICES AND SUBSIDIES PROVIDED BY SELLER, MAY NOT BE REFLECTED IN THIS STATEMENT.

**COPIES OF STATUTORY PROVISIONS.**

Upon signing a sales agreement with the initial buyer of a residential property, the seller is required to provide the buyer copies of NRS 11.202 to 11.206, NRS 40.600 to 40.695, sections 2 to 6 and 15 of Senate Bill 32, (Chapter 353, Statutes of Nevada, 1999, page 1446) and NRS 116.41095. These statutes are stated below and are a part of this Specific Disclosure Information.

**NRS 11.202 - 11.206**

**NRS 11.202** Actions for damages for injury or wrongful death caused by deficiency in construction of improvements to real property: Deficiencies resulting from willful misconduct; fraudulently concealed deficiencies.

1. An action may be commenced against the owner, occupier or any person performing or furnishing the design, planning, supervision or observation of construction, or the construction of an improvement to real property at any time after the substantial completion of such an improvement, for the recovery of damages for:

(a) Any deficiency in the design, planning, supervision or observation of construction or the construction of such an improvement which is the result of his willful misconduct or which he fraudulently concealed;

(b) Injury to real or personal property caused by any such deficiency; or

(c) Injury to or the wrongful death of a person caused by any such deficiency.

2. The provisions of this section do not apply in an action brought against:

(a) The owner or keeper of any hotel, inn, motel, motor court, boardinghouse or lodging house in this state on account of his liability as an innkeeper.

(b) Any person on account of a defect in a product.

(Added to NRS by 1983, 1238)

**NRS 11.203** Actions for damages for injury or wrongful death caused by deficiency in construction of improvements to real property: Known deficiencies.

1. Except as otherwise provided in NRS 11.202, no action may be commenced against the owner, occupier or any person performing or furnishing the design, planning, supervision or observation of construction, or the construction of an improvement to real property more than 10 years after the substantial completion of such an improvement, for the recovery of damages for:

(a) Any deficiency in the design, planning, supervision or observation of construction or the construction of such an improvement which is known or through the use of reasonable diligence should have been known to him;

(b) Injury to real or personal property caused by any such deficiency; or

(c) Injury to or the wrongful death of a person caused by any such deficiency.

2. Notwithstanding the provisions of NRS 11.190 and subsection 1 of this section, where injury occurs in the tenth year after the substantial completion of such an improvement, an action for damages for injury to property or person, damages for wrongful death resulting from such injury or damages for breach of contract may be commenced within 2 years after the date of such injury, irrespective of the date of death, but in no event may an action be commenced more than 12 years after the substantial completion of the improvement.

(Added to NRS by 1983, 1238)

**NRS 11.204** Actions for damages for injury or wrongful death caused by deficiency in construction of improvements to real property: Latent deficiencies.

1. Except as otherwise provided in NRS 11.202 and 11.203, no action may be commenced against the owner, occupier or any person performing or furnishing the design, planning, supervision or observation of construction, or the construction, of an improvement to real property more than 8 years after the substantial completion of such an improvement, for the recovery of damages for:

(a) Any latent deficiency in the design, planning, supervision or observation of construction or the construction of such an improvement;

(b) Injury to real or personal property caused by any such deficiency; or

(c) Injury to or the wrongful death of a person caused by any such

deficiency.

2. Notwithstanding the provisions of NRS 11.190 and subsection 1 of this section, where injury occurs in the eighth year after the substantial completion of such an improvement, an action for damages for injury to property or person, damages for wrongful death resulting from such injury or damages for breach of contract may be commenced within 2 years after the date of such injury, irrespective of the date of death, but in no event may an action be commenced more than 10 years after the substantial completion of the improvement.

3. For the purposes of this section, "latent deficiency" means a deficiency which is not apparent by reasonable inspection.

(Added to NRS by 1983, 1237)

**NRS 11.205** Actions for damages for injury or wrongful death caused by deficiency in construction of improvements to real property: Patent deficiencies.

1. Except as otherwise provided in NRS 11.202 and 11.203, no action may be commenced against the owner, occupier or any person performing or furnishing the design, planning, supervision or observation of construction, or the construction of an improvement to real property

more than 6 years after the substantial completion of such an improvement, for the recovery of damages for:

- (a) Any patent deficiency in the design, planning, supervision or observation of construction or the construction of such an improvement;
- (b) Injury to real or personal property caused by any such deficiency; or
- (c) Injury to or the wrongful death of a person caused by any such deficiency.

2. Notwithstanding the provisions of NRS 11.190 and subsection 1 of this section, where injury occurs in the sixth year after the substantial completion of such an improvement, an action for damages for injury to property or person, damages for wrongful death resulting from such injury or damages for breach of contract may be commenced within 2 years after the date of such injury, irrespective of the date of death, but in no event may an action be commenced more than 8 years after the substantial completion of the improvement.

3. For the purposes of this section, "patent deficiency" means a deficiency which is apparent by reasonable inspection.

(Added to NRS by 1965, 948; A 1983, 1230)

**NRS 11.206** Actions for damages for injury or wrongful death caused by deficiency in construction of improvements to real property: Limitation of actions not a defense in actions based on liability as innkeeper or for defect in product. The limitations respectively prescribed by NRS 11.203, 11.204 and 11.205 are not a defense in an action brought against:

1. The owner or keeper of any hotel, inn, motel, motor court, boardinghouse or lodging house in this state on account of his liability as an innkeeper.

2. Any person on account of a defect in a product.

(Added to NRS by 1983, 1238)

**NRS 11.207** Malpractice actions against attorneys and veterinarians.

1. An action against an attorney or veterinarian to recover damages for malpractice, whether based on a breach of duty or contract, must be commenced within 4 years after the plaintiff sustains damage or within 2 years after the plaintiff discovers or through the use of reasonable diligence should have discovered the material facts which constitute the cause of action, whichever occurs earlier.

2. This time limitation is tolled for any period during which the attorney or veterinarian conceals any act, error or omission upon which the action is founded and which is known or through the use of reasonable diligence should have been known to him.

(Added to NRS by 1981, 1023; A 1983, 473)

## **NRS 40.600 - 40.695**

**NRS 40.600** Definitions. As used in NRS 40.600 to 40.695, inclusive, unless the context otherwise requires, the words and terms defined in NRS 40.605 to 40.630, inclusive, have the meanings ascribed to them in those sections.

(Added to NRS by 1995, 2539; A 1997, 2710)

**NRS 40.605** "Appurtenance defined". "Appurtenance" means a structure, installation, facility or amenity that is appurtenant to a residence, but is not a part of the dwelling unit. The term includes, without limitation, the parcel of real property, including utilities, golf courses, walls, sidewalks, driveways, landscaping and other structures, installations, facilities and amenities associated with a residence.

(Added to NRS by 1995, 2539; A 1997, 2716)

**NRS 40.610 "Claimant" defined.** "Claimant" means an owner of a residence or appurtenance or a representative of a homeowner's association that is responsible for a residence or appurtenance and is acting within the scope of his duties pursuant to chapter 116 or 117 of NRS.

(Added to NRS by 1995, 2539; A 1997, 2717)

**NRS 40.613 "Complex matter" defined.** "Complex matter" means a claim:

1. In which the claimant is a representative of a homeowner's association that is responsible for a residence or for an appurtenance and is acting within the scope of his duties pursuant to chapter 116 or 117 of NRS; or
2. That involves five or more separate residences at the time the action is commenced or at any time during the subsequent action.

(Added to NRS by 1997, 2715)

**NRS 40.615 "Constructional defect" defined.** "Constructional defect" includes a defect in the design, construction, manufacture, repair or landscaping of a new residence, of an alteration of or addition to an existing residence, or of an appurtenance. The term includes physical damage to the residence, an appurtenance or the real property to which the residence or appurtenance is affixed that is proximately caused by a constructional defect.

(Added to NRS by 1995, 2539)

**NRS 40.620 "Contractor" defined.** "Contractor" means a person who, with or without a license issued pursuant to chapter 624 of NRS, by himself or through his agents, employees or subcontractors:

1. Develops, constructs, alters, repairs, improves or landscapes a residence, appurtenance or any part thereof;
2. Develops a site for a residence, appurtenance or any part thereof; or
3. Sells a residence or appurtenance, any part of which the person, by himself or through his agents, employees or subcontractors, has developed, constructed, altered, repaired, improved or landscaped.

(Added to NRS by 1995, 2539; A 1997, 2717)

**NRS 40.625 "Homeowner's warranty" defined.** "Homeowner's warranty" means a warranty or policy of insurance:

1. Issued or purchased by or on behalf of a contractor for the protection of a claimant; or
2. Purchased by a claimant pursuant to NRS 690B.100 to 690B.180, inclusive.

The term includes a warranty contract issued by a risk retention group that operates in compliance with chapter 695E of NRS and insures all or any part of the liability of a contractor for the cost to repair a constructional defect in a residence.

(Added to NRS by 1995, 2540; A 1997, 2717)

**NRS 40.630 "Residence" defined.** "Residence" means any dwelling in which title to the individual units is transferred to the owners.

(Added to NRS by 1995, 2540; A 1997, 2717)

**NRS 40.635 Applicability; effect on other defenses.** NRS 40.600 to 40.695, inclusive:

1. Apply to any claim that arises before, on or after July 1, 1995, as the result of a constructional defect, except a claim for personal injury or wrongful death, if the claim is the subject of an action commenced on or after July 1, 1995.
2. Prevail over any conflicting law otherwise applicable to the claim or cause of action.

3. Do not bar or limit any defense otherwise available except as otherwise provided in those sections.

4. Do not create a new theory upon which liability may be based.  
(Added to NRS by 1995, 2540; A 1997, 2717)

**NRS 40.640 Liability of contractor.** In a claim to recover damages resulting from a constructional defect, a contractor is liable for his acts or omissions or the acts or omissions of his agents, employees or subcontractors and is not liable for damages caused by:

1. The acts or omissions of a person other than the contractor or his agent, employee or subcontractor;
2. The failure of a person other than the contractor or his agent, employee or subcontractor to take reasonable action to reduce the damages or maintain the residence;
3. Normal wear, tear or deterioration;
4. Normal shrinkage, swelling, expansion or settlement; or
5. Any constructional defect disclosed to an owner before his purchase of the residence, if the disclosure was provided in language that is understandable and was written in underlined and boldfaced type with capital letters.

(Added to NRS by 1995, 2540; A 1997, 2717)

**NRS 40.645 Written notice to contractor of defects, damages or injuries; inspection by contractor; pursuit of claim under warranty; order of inspection; retaining relevant documents, photos and videotapes.** Except as otherwise provided in this section and NRS 40.670:

1. At least 60 days before a claimant commences an action against a contractor for damages arising from a constructional defect, the claimant must give written notice by certified mail, return receipt requested, to the contractor, at the contractor's last known address, specifying in reasonable detail the defects or any damages or injuries to such residence or each unit within a multiple-unit residence that is the subject of the claim. The notice must describe in reasonable detail the cause of the defects if the cause is known, and the nature and extent that is known of the damage or injury resulting from the defects. In a complex matter, an expert opinion concerning the cause of the defects and the nature and extent of the damage or injury resulting from the defects based on a representative sample of the residences or of the units in a multiple-unit residence involved in the action satisfies the requirements of this section. Within a reasonable period after the contractor receives the notice, on his written request, the contractor shall inspect the property that is the subject of the claim to determine the nature and cause of the defect, damage or injury and the nature and extent of repairs necessary to remedy the defect. The contractor shall, before making the inspection, provide reasonable notice of the inspection and must make the inspection at a reasonable time. The contractor may take reasonable steps to establish the existence of the defect.

2. If the residence is covered by a builder's warranty, a claimant must diligently pursue a claim under the warranty or contract.

3. Within 45 days after the contractor receives the notice, the contractor may make a written offer of settlement to the claimant. The offer must:

(a) Must be served to the claimant by certified mail, return receipt requested, at the claimant's last known address.

(b) Must respond to each communication set forth in the claimant's notice, and describe in reasonable detail the cause of the defect, the nature and extent of the damage or injury resulting from the defect, and, unless the offer is limited to a proposal for monetary compensation, the method, adequacy and estimated cost of the proposed repair.

(c) May include:

(1) A proposal for monetary compensation.

(2) If the contractor is bound to make the repairs, an agreement by the contractor to make the repairs.

(3) An agreement by the contractor to cause the repairs to be made, at the contractor's expense, by another contractor who is licensed to make the repairs, bonded and insured. The repairs must be made within 45 days after the contractor receives written notice of acceptance of the offer, unless completion is delayed by the claimant or by other events beyond the control of the contractor. The claimant and the contractor may agree in writing to extend the periods prescribed by this section.

4. The periods provided in subsections 1 and 2 must be extended by 60 days if the claim is a complex matter. The parties may stipulate to a further extension.

5. Not later than 15 days before the mediation required pursuant to NRS 40.680 and upon providing 15 day's notice, each party shall provide the other party, or shall make a reasonable effort to assist the other party to obtain, all relevant reports, photos, correspondence, plans, specifications, warranties, contracts, subcontracts, work orders for repair, videotapes and soil and other engineering reports that are not privileged.

6. If the claimant is a representative of a homeowner's association, the association shall submit any offer of settlement made by the contractor to each member of the association.

(Added to NRS by 1995, 2540; A 1997, 3718)

**NRS 40.650 Effect of rejecting reasonable offer of settlement or denying opportunity to repair defect; effect of payment under warranty; effect of failing to take certain actions; effect of bad faith denial of coverage under warranty.**

1. If a claimant unreasonably rejects a written offer of settlement made pursuant to NRS 40.645 or does not permit the contractor or independent contractor a reasonable opportunity to repair the defect pursuant to an accepted offer of settlement and thereafter commences an action governed by NRS 40.600 to 40.695, inclusive, the court in which the action is commenced may:

- (a) Deny the claimant's attorney's fees and costs; and
- (b) Award attorney's fees and costs to the contractor.

Any sums paid under a homeowner's warranty or other sum paid in satisfaction of claims that are collateral to any coverage issued to or by the contractor may not be deducted from any recovery.

2. If a contractor fails to:

- (a) Make an offer of settlement;
- (b) Make a good faith response to a written offer of settlement, including no liability;
- (c) Complete, in a good and workmanlike manner, the repairs specified in an accepted offer;

offer;

(d) Agree to a mediator or accept the appointment of a mediator pursuant to NRS 40.680; or

(e) Participate in mediation, the limitations on damages and defenses to liability provided in NRS 40.600 to 40.695, inclusive, do not apply. The claimant may commence an action without satisfying any other requirement of NRS 40.600 to 40.695, inclusive.

3. If coverage under a homeowner's warranty is denied by an insurer in bad faith, the homeowner and the contractor have a right to recover the amount that would have been paid if coverage had been provided, plus reasonable attorney's fees and costs.

(Added to NRS by 1995, 2541; A 1997, 3718)

**NRS 40.655 Limitation on recovery.**

1. Except as otherwise provided in NRS 40.650, in a claim governed by NRS 40.600 to 40.695, inclusive, the claimant may recover only the following damages to the extent proximately caused by a constructional defect:

- (a) Any reasonable attorney's fees;

(b) The reasonable cost of any repairs already made that were necessary and of any repairs yet to be made that are necessary to cure any constructional defect that the contractor failed to cure and the reasonable expenses of temporary housing reasonably necessary during the repair;

(c) The reduction in market value of the residence or accessory structure, if any, to the extent the reduction is because of structural failure;

(d) The loss of the use of all or any part of the residence;

(e) The reasonable value of any other property damaged by the constructional defect;

(f) Any additional costs reasonably incurred by the claimant, including, but not limited to, any costs and fees incurred for the retention of experts to:

(1) Ascertain the nature and extent of the constructional defects;

(2) Evaluate appropriate corrective measures to estimate the value of loss of use; and

(3) Estimate the value of loss of use, the cost of temporary housing and the reduction of market value of the residence;

(g) Any interest provided by statute.

2. The amount of any attorney's fees awarded pursuant to this section must be approved by the court.

3. If a contractor complies with the provisions of NRS 40.600 to 40.695, inclusive, the claimant may not recover from the contractor on a claim for a constructional defect, anything other than that which is provided pursuant to NRS 40.600 to 40.695, inclusive.

4. As used in this section, "structural failure" means physical damage to the load-bearing portion of a residence or appurtenance caused by a structural failure of the load-bearing portion of the residence or appurtenance.

(Added to NRS by 1995, 2541; A.S.B. 1997, 177)

**NRS 40.660 Nonacceptance of offer of settlement for constructional defect.** An offer of settlement that is not accepted within 25 days after the date the offer is made by the claimant is considered rejected if the offer contains a clear and understandable statement notifying the claimant of the consequences of his failure to respond or otherwise accept or reject the offer of settlement. An affidavit certifying rejection of an offer of settlement under this section may be filed with the court.

(Added to NRS by 1995, 2542)

**NRS 40.665 Settlement by repurchase of property.** If an offer of settlement deemed reasonable. In addition to any other method provided for in this section or pursuant to NRS 40.600 to 40.695, inclusive, a contractor may, pursuant to a written agreement entered into with a claimant, settle a claim by repurchasing the claimant's residence or appurtenance upon which it is located. The agreement may include provisions which relate to the following:

1. The market value of the residence or appurtenance if a constructional defect existed, except that if a residence is less than 2 years of age and was purchased from the contractor against whom the claim is brought, the market value is the price at which the residence was sold to the claimant;

2. The value of any improvements made to the property by a person other than the contractor;

3. Reasonable attorney's fees and fees for expert and

4. Any costs, including costs of appraisal, engineering and costs, points and fees for loans. Any offer of settlement made that complies with the provisions of this section shall be deemed reasonable for the purposes of subsection 1 of this section.

(Added to NRS by 1995, 2542; A.S.B. 1997, 177)

**NRS 40.670 Defect which creates imminent danger to health or safety: Duty of contractor to cure; effect of failure to cure; exceptions.**

1. A contractor who receives written notice of a constructional defect resulting from work performed by the contractor or his agent, employee or subcontractor which creates an imminent

threat to the health or safety of the inhabitants of the residence shall take reasonable steps to cure the defect as soon as practicable. The contractor shall not cure the defect by making any repairs for which he is not licensed or by causing any repairs to be made by a person who is not licensed to make those repairs. If the contractor fails to cure the defect in a reasonable time, the owner of the residence may have the defect cured and may recover from the contractor the reasonable cost of the repairs plus reasonable attorney's fees and costs in addition to any other damages recoverable under any other law.

2. A contractor who does not cure a defect pursuant to this section because he has determined, in good faith and after a reasonable inspection, that there is not an imminent threat to the health or safety of the inhabitants is not liable for attorney's fees and costs pursuant to this section, except that if a building inspector employed by a governmental body with jurisdiction certifies that there is an imminent threat to the health and safety of the inhabitants of the residence, the contractor is subject to the provisions of subsection 1.

(Added to NRS by 1995, 2542; A 1997, 2721)

#### NRS 40.675 Inspection of repairs.

1. A contractor who makes or provides for repairs under NRS 40.600 to 40.695, inclusive, may take reasonable steps to prevent further damage to the property and to have them inspected.

2. The provisions of NRS 40.675 to 40.677, inclusive, regarding inspection and repair are in addition to any rights of inspection and repair which may be provided by common law or by another statute.

(Added to NRS by 1995, 2542)

#### NRS 40.680 Mediation of matter required; procedure; appointment of special master; effect of failure to mediate in good faith.

1. Except as otherwise provided in this chapter, before an action based on a claim governed by NRS 40.600 to 40.695, including a claim for removal in court, the matter must be submitted to mediation, unless mediation is not required by the contractor and the claimant.

2. The claimant and contractor shall attempt to reach an agreement. If the claimant and contractor fail to agree upon a mediator, the mediator is first selected by the claimant, either party may petition the court for the appointment of the Nevada Arbitration Association, Nevada Dispute Resolution Center, or any other mediation service acceptable to the parties for the appointment of a mediator. A mediator so appointed may discover only those documents or records which are necessary to conduct the mediation. The mediator shall convene the mediation within 60 days after the matter is submitted to him, unless the parties agree to extend the time. Except in a complex matter, the claimant shall, before the mediation begins, deposit \$50 with the mediation service and the contractor shall deposit with the mediation service the remaining amount estimated by the mediation service for the mediator's fees and expenses of the mediator for the first session of mediation, and the contractor shall, within 10 days thereafter, deposit with the mediation service additional amounts demanded by the mediation service as incurred for the mediation. The mediator shall require each party to share equally in the deposits estimated by the mediator for the first session of mediation. If the mediator is not so appointed, the total fees for each day of mediation and the mediator's expenses shall be shared equally by the claimant and contractor.

3. If the parties do not reach an agreement during mediation or if the contractor fails to pay the required amount, the claimant may commence his action in court and:

(a) The reasonable costs and fees of the mediation are recoverable by the prevailing party as costs of the action.

(b) Either party may petition the court in which the action is commenced for the appointment of a special master.

4. A special master appointed pursuant to subsection 3(b) shall:

(a) Review all pleadings and motions filed with the court concerning the action.

(b) Coordinate the discovery of any books, records, papers or other documents by the parties, including the disclosure of witnesses and the taking of the deposition of any party.

(c) Order any inspections on the site of the property by a party and any consultants or experts of a party.

(d) Order settlement conferences and attendance at those conferences by any representative of the insurer of a party.

(e) Require any attorney representing a party to provide statements of legal and factual issues concerning the action.

(f) Refer to the judge who appoints a special master to the presiding judge of the court in which the action is commenced any matter requiring review from the court. The special master shall not, unless otherwise agreed by the parties, personally conduct any settlement conferences or engage in any ex parte meetings regarding the action.

5. Upon application by a party to the court in which the action is commenced, any decision or other action taken by a special master appointed pursuant to this section may be appealed to the court for a decision.

6. A report issued by a mediator or special master that indicates that either party has failed to appear before him or to make a statement or admission in the course of the action, but a statement or admission made by either party in the course of the action is admissible.

(Added to NRS by 1995, 2543; A.R.S. 1999, 10-1-10)

**NRS 40.685 Waiver or settlement agreement; effect of action; applicability; effect of failure to prevail.**

1. Except as otherwise provided in subsection 2, a written waiver or settlement agreement executed by a claimant after a contractor has completed or otherwise repaired a constructional defect does not bar a claim for damages if it is determined that the contractor failed to correct or repair the defect.

2. The provisions of subsection 1 do not apply to a written waiver or settlement agreement described in subsection 1, if:

(a) The claimant has not retained an expert concerning the constructional defect;

(b) The claimant has not provided the contractor with written notice of the defect pursuant to NRS 40.645 and a copy of the notice to the Department of Public Safety;

(c) The claimant and the contractor are not in compliance with the requirements for inspection and repair as provided in NRS 40.600 to 40.605, inclusive.

3. If a claimant does not prevail in any action which is not barred pursuant to this section, the court may:

(a) Deny the claimant's request for an expert witness or costs; and

(b) Award attorney's fees to the contractor.

(Added to NRS by 1995, 2543; A.R.S. 1999, 10-1-10)

**NRS 40.687 Disclosure of information concerning a settlement offer after action is commenced; disclosure of information concerning a settlement offer; compelled production of information. Notwithstanding any other law:**

1. A claimant shall, within 10 days after a settlement offer is made against a contractor, disclose to the contractor all information about any home owner's warranty that is applicable to the claim.

2. The contractor shall, no later than 10 days after a settlement offer is made pursuant to this chapter, disclose to the claimant all information concerning agreements that may be obtained by discovery pursuant to rules 26, 33 and 34 of the Rules of Civil Procedure. Such disclosure does not affect the admissibility of any information so disclosed.

3. Except as otherwise provided in this section, if a party fails to provide the information required pursuant to this section, the court may, if requested, the other party may

petition the court to compel production of the information. Upon receiving such a petition, the court may order the party to produce the required information and may award the petitioning party reasonable attorney's fees and costs incurred in petitioning the court pursuant to this subsection.

4. The parties may agree to an extension of time to produce the information required pursuant to this section.

5. For the purposes of this section, "information about insurance agreements" is limited to any declaration sheets, endorsements and contracts of insurance issued to the contractor from the commencement of construction of the realties of the claimant to the date on which the request for the information is made and does not include information relating to any disputes between the contractor and an insurer or information relating to the rights of an insurer.

(Added to NRS by 1997, 2716)

**NRS 40.689 Preference given to settlement of claims referred to senior judge; assessment of additional expenses.**

1. Upon petition by a party:

(a) The court shall give preference in setting a date for the trial of an action commenced pursuant to NRS 40.600 to 40.695, inclusive, to a senior judge.

(b) The court may assess reasonable expenses pursuant to NRS 40.600 to 40.695, inclusive, to a senior judge.

2. If the action is referred to a senior judge by a party:

(a) Any additional expenses incurred by the parties shall be borne equally by each party involved; or

(b) The judge may allocate the expenses among the parties as he deems appropriate.

(Added to NRS by 1997, 2716)

**NRS 40.690 Limitation on litigation claims during work of resolution; effect of settlement or failure to settle; third party may appear and participate in proceedings, other exceptions.**

1. A claim governed by NRS 40.600 to 40.695, inclusive, may not be brought by a claimant or contractor against any third party, including a governmental agency or political subdivision of a government, if the claimant or contractor is settling a construction defect is being settled, mediated or otherwise resolved pursuant to NRS 40.600 to 40.695, inclusive. The settlement of such a claim does not constitute a release of the claimant or contractor to the settlement, and the failure to settle does not constitute a release of the claimant or contractor in any way against a third party.

2. A contractor may require any third party, including an insurer, government, governmental agency or political subdivision of a government to appear and participate in proceedings pursuant to NRS 40.600 to 40.695, inclusive, as if the third party were a contractor.

(Added to NRS by 1995, 2743)

**NRS 40.695 Tolling of statutes of limitation for claims governed by this chapter.**

1. All statutes of limitation shall be tolled for a claimant or contractor on a construction defect governed by NRS 40.600 to 40.695, inclusive, from the date of the commencement of the claim is given, until 30 days after mediation or other resolution of the claim pursuant to NRS 40.680.

2. Tolling under this section shall not apply to a claimant or contractor if the party is required to appear in the proceedings pursuant to NRS 40.600 to 40.695, inclusive.

(Added to NRS by 1995, 2743)

**SECTIONS 2 - 6 AND 15 OF SENATE BILL 32  
(CHAPTER 353, STATUTES OF NEVADA 1999, PAGES 1435-1439 AND 1446)**

**CHAPTER 353**

**Sec. 2. Except as otherwise provided in this section and NRS 40.670:**

1. Notwithstanding the provisions of subsection 1 of NRS 40.680, a claimant may commence an action in district court in a complex matter. If the claimant commences an action in district court he shall:

(a) File and serve the summons and complaint as required by law; and

(b) At the same time and in the same manner as the claimant serves the summons and complaint upon the contractor, serve upon the contractor a written notice specifying in reasonable detail to the extent known the nature and extent of the injuries to each residence or appurtenance that is the subject of the claim and in reasonable detail each defect, the specific location of each defect, and the nature and extent that is known of the damage or injury resulting from each defect. If an expert opinion is required concerning the existence or extent of the defects, a written copy of the expert opinion shall be provided. An expert opinion that specifies each defect to the extent known, the nature and extent of the damage or injury resulting from each defect to the extent known, and the nature and extent that is known of the damage or injury resulting from each defect, based on a valid and reliable representative sample of the residences and appurtenances involved in the action, satisfies the requirements of this section.

2. The contractor shall file and serve the answer to the complaint as required by law.

3. Not later than 30 days after the filing of the complaint, the contractor and claimant shall meet to discuss the claims set forth in the complaint, the contractor shall:

(a) The contractor shall produce to the claimant, at the meeting, all relevant reports, photos, correspondence, photographs, videotapes, work orders for repair, videotapes, technical reports, and any other documents or materials relating to the claim.

(b) The contractor shall permit the claimant to inspect the residences and appurtenances to evaluate the defects set forth in the complaint, and to take photographs of the claimant's choice.

(c) The conduct of any test that is necessary to determine the nature and cause of a defect or any damages or injuries, and the nature and extent of repairs necessary to remedy a defect or any damages or injuries, shall be conducted in a manner that shall provide reasonable notice of the test to all other parties to the action.

4. At the meeting the contractor and claimant shall agree to the following, and contractor shall:

(a) Establish a schedule for the contractor to complete repairs to the complaint or to file any third-party complaint against the contractor, and the contractor shall be responsible for all or a portion of the defects set forth in the complaint.

(b) Under penalty of perjury, the contractor shall, in writing, select a mediator and proceed with mediation in accordance with the provisions of NRS 40.680; and

(c) If the claimant and contractor agree to jointly petition the court for his appointment pursuant to subsection 15.

5. Each party shall be responsible for the costs of mediation, when a third-party complaint is filed pursuant to subsection 4 shall be the responsibility of the contractor.

6. If the claimant or contractor files a third-party complaint or files a third-party complaint, then not later than 30 days after the filing of the complaint or paragraph (a) of subsection 4, the contractor shall file a third-party complaint against whom a third-party complaint is filed, and the contractor shall be responsible for the costs set forth in paragraphs (a), (b) and (c) of subsection 4.

7. If a special master is appointed by the court, the claimant or a party added to the complaint or against whom a third-party complaint is filed shall petition the court for the

appointment of a special master at any time after the meeting held pursuant to subsection 3. The special master may:

- (a) Take any action set forth in subsection 4 of NRS 40.680;
- (b) Exercise any power set forth in Rule 53 of the Nevada Rules of Civil Procedure; and
- (c) Subject to the provisions of NRS 40.680, if the parties fail to **establish a schedule or determine** a date as required by subsection 3, to **establish** the schedule or **determine** the date.

8. Unless the mediation required pursuant to subsection 4 of subsection 4 is **completed** or the contractor and claimant have agreed to **bring forward a claim pursuant to paragraph (b) of subsection 4**, a party shall not propound interrogatories or requests for admission, take a deposition or file a motion that is dispositive of the action except:

- (a) Upon agreement of the parties or
- (b) With the prior approval of the court or the special master.

9. If a residence or apartment is the subject of the claim is covered by a homeowner's warranty that is purchased in accordance with the provisions of NRS 690B.100 to 690B.180, inclusive, the contractor shall comply with the provisions of section 2 of this act.

10. Unless the parties agree to mediation before the date of the mediation pursuant to paragraph (b) of subsection 4, the contractor shall make a written response to the claimant that includes the following information pursuant to NRS 40.645.

11. If the claimant is a representative of a homeowners association, the association shall submit any response made by the contractor to each member of the association in writing not more than 30 days after the date the claimant receives the response.

12. The claimant shall cause the contractor to repair the defect of the contractor within 45 days after the response of the contractor is received by the claimant.

Sec. 3. If the contractor receives written notice of a construction defect or a claimant receives written notice of a claim within 1 year after the close of escrow of the real property, the contractor shall complete the repairs within 45 days after the contractor receives written notice of the claim by the claimant or by other events between the contractor and the claimant. If the contractor is unable to complete the repairs within the period prescribed by this section, the contractor shall be subject to discipline pursuant to NRS 624.300.

Sec. 4. If, after completion of the prescribed requirements of NRS 40.645 and 40.680, or section 2 of this act, the claimant is unable to recover for damages arising from a construction defect:

1. The claimant shall file a written complaint with the court in a principal complaint when the action is commenced and the contractor shall file a written response to the complaint within the requirements of NRS 40.645 or 40.680. The claimant shall also file a written complaint with the court that the claimant includes in an amendment to the principal complaint:

- (a) A copy of the written complaint;
- (b) A copy of the written response to the complaint; and
- (c) A written statement of the claimant stating that the claimant has made a good faith effort had been undertaken by the claimant.

2. The claimant is not required to give written notice of a defect pursuant to subsection 1 of NRS 40.645 or subsection 1 of section 2 of this act if the claimant is joined to or intervenes in the action as a party unless it is required to do so by another party to the action:

(a) For the purposes of subsection 1 of section 2 of this act or subsection 1 of section 2 of this act, the person shall be deemed to have given written notice to the claimant on the date on which the person has been joined to or intervenes in the action.

(b) The provisions of NRS 40.600 to 40.695, inclusive, and sections 2 to 6, inclusive, of this act apply to the person after that date.

**Sec. 5.**

1. Notwithstanding the provisions of NRS 40.600 to 40.695, inclusive, and sections 2, 3, 4 and 6 of this act, a claimant may not commence an action against a subdivider or master developer for a constructional defect in a residential appurtenance of the subdivider or master developer in a planned unit development if the appurtenance was constructed by or through a licensed general contractor, unless:

(a) The subdivider or master developer fails to provide to the claimant the name, address and telephone number of each contractor hired by the subdivider or master developer to construct the appurtenance within 30 days of the receipt by the subdivider or master developer of a request from the claimant for such information; or

(b) After the claimant has exhausted all legal remedies to obtain full recovery from the contractors hired by the subdivider or master developer to construct the appurtenance, the claimant has not obtained a full recovery.

2. All statutes of limitation applicable to a claimant's action governed by this section are tolled from the time the claimant commences an action against the subdivider or master developer of the claim until the claimant obtains a full recovery.

(a) A court determines whether a claimant has obtained a full recovery against those contractors; or

(b) The claimant provides notice that those contractors are bankrupt, insolvent or dissolved.

**Tolling pursuant to this section shall not apply to a subdivider or master developer. Notwithstanding any other provision of law, a claimant may commence an action against the subdivider or master developer of the claim at any time after the end of the tolling described in this subsection.**

3. Nothing in this section shall prevent a claimant from commencing an action against a subdivider or master developer for a constructional defect in an appurtenance constructed by or on behalf of the subdivider or master developer.

4. Nothing in this section prohibits a person other than a claimant from commencing an action against a subdivider or master developer for a constructional defect.

5. The provisions of this section shall not apply to a licensed general contractor or master developer who acts as a general contractor or master developer in the course of constructing the appurtenance that is the subject of the claim.

6. As used in this section, "planned unit development" means a planned unit development, including a residential development, in which the claimant has a current agreement pursuant to NRS 278A.060 to purchase a residential unit.

(1) "Current agreement" means an agreement entered into on or after July 1, 2005, pursuant to NRS 278A.065.

(2) "Residential unit" means a residential unit as defined in NRS 278A.085.

**Sec. 6.**

1. If a claimant attempts to sell a residence that is or has been the subject of a claim governed by NRS 40.600 to 40.695, inclusive, and sections 2 to 6 of this act, he shall disclose, in writing, the claim to the purchaser of the residence at least 30 days before the close of escrow for the sale of the residence. The claimant shall also disclose the claim to the purchaser of the residence at least 30 days after the execution of the sales agreement for the residence, if the sales agreement or, if a claim is initiated later than the sales agreement, the claimant's agreement providing written notice to the contractor of the claim is executed on or after the date of the execution of section 2 of this act:

(a) The claimant shall disclose the claim to the purchaser of the residence at least 30 days before the date of the sale of the residence to NRS 40.600 to 40.695, inclusive, and sections 2 to 6 of this act, if the claimant is the owner of the residence;

(b) All opinions the claimant has obtained from experts regarding a **constructional defect that is or has been the subject of the claim;**

(c) The terms of any contract, order or bid relating to the claim; and

(d) A detailed report of all repairs made to the residence by or on behalf of the **claimant as a result of a constructional defect that is or has been the subject of the claim.**

2. Before taking any action on a claim pursuant to NRS 11.200 to 11.205, inclusive, and sections 2 to 6, inclusive, of this act, the claimant shall file a written notice with the claimant in writing of the provisions of this section.

**Sec. 15.** Chapter 11 of NRS is amended by adding thereto a new section to read as follows:

1. Except as otherwise provided in this act and in the amendments of this section and NRS 11.202 to 11.205, inclusive, the provisions of NRS 11.200 to 11.205, inclusive, **revenue to real property shall be deemed to be:**

(a) The final building inspection of the local government board of health;

(b) A notice of completion is issued by the commissioner of labor;

(c) A certificate of completion is issued by the local government, which occurs **later.**

2. If none of the above conditions is met, the provisions of NRS 11.200 to 11.205, inclusive, shall apply to the **completion of an inspection of the property as required by the common law.**

**NRS 116.4177**

**BEFORE YOU PURCHASE A PROPERTY IN A COMMUNITY, YOU SHOULD KNOW WHAT YOUR COMMUNITY DID YOU KNOW . . .**

1. **YOU ARE AGREEING TO RESTRICT YOUR PROPERTY AND HOW YOU CAN USE YOUR PROPERTY?**

These restrictions are typically found in the Covenants, Conditions and Restrictions (CC&Rs) that you agree to when making your purchase. The CC&Rs are a set of rules that govern the use of the property and every future owner of the property. They are intended to protect the interests of the community. The CC&Rs, together with other documents (such as the deed, mortgage, and regulations), are intended to preserve the value of the property and to restrict what you can do to the property. By purchasing a property, you agree to be bound by the CC&Rs that could affect your lifestyle and freedom of use. You should review these governing documents before purchasing to make sure that there are no provisions that are not acceptable to you.

2. **YOU WILL HAVE TO PAY COMMON AREA MAINTENANCE FEES AS LONG AS YOU OWN YOUR PROPERTY?**

As an owner in a community, you will have to pay a share of the expenses relating to the maintenance and repair of the common areas of the operation of any homeowner's association. You will also have to pay a share of every future owner of the property. You will have to pay a share of the association and due monthly. You have the right to elect a representative to manage the property or spend the money. You will have the power to change and increase the amount of the common area maintenance fees against your property to meet extraordinary expenses. If the common area maintenance fees of the community such as roofs and private roads, which are not included in the deed, are not paid, the association

is not well managed or fails to maintain adequate reserves to repair, and replace and restore common elements, you may be required to pay large, special assessments to accomplish these tasks.

**3. IF YOU FAIL TO PAY OWNERS' ASSESSMENTS, YOU COULD LOSE YOUR HOME?**

If you do not pay these assessments when due, the association normally has the power to collect them by selling your property in a public auction. If you are delinquent, you may also be required to pay penalties and attorney's fees. Some assessments may become current. If you dispute the obligation or the amount of the assessment, your right to a loss of your home may be to file a lawsuit and ask a court to limit or eliminate the assessment.

**4. YOU MAY BECOME A MEMBER OF A HOMEOWNERS ASSOCIATION THAT HAS THE POWER TO AFFECT HOW YOU USE AND ENJOY YOUR PROPERTY?**

Many common-interest communities have a homeowner's association. In a new development, the association will usually be formed before most of the units have been sold. After the period of development is over, the association is called the property owners like yourself who own units in the community. The association has boards and committees formed by the members of the association. The association is responsible for assessing homeowners for the common elements of the community. Because homeowners sitting on the board of the association may not have the experience and training to carry out the responsibilities of the board, many associations hire a professional firm to carry out these responsibilities. Homeowners are expected to follow the principles. Some decisions require all homeowners to vote, some decisions are made by the executive board or other boards or committees. The actions of the association may affect your use and enjoyment of the property and other documents that govern the community. The actions of the association will affect the value of your property. The actions of the association may be even though the decisions are made by a few persons, they may reflect the view of the majority of the association, it may attempt to use the democratic process in the board or other governing bodies that are more representative of the association or its members. If persons controlling the association or its governing bodies are not acting in the best interests of its members, your remedy is typically to file a lawsuit. If the lawsuit is unsuccessful, file a lawsuit in mediation or arbitration. The actions of the association may affect your share of the association's assets and liabilities. This state that investigates and reports on the actions of the association.

**5. YOU ARE BUYING OR SELLING PROPERTY IN A COMMON-INTEREST COMMUNITY. YOU SHOULD KNOW THE CC&RS, ASSOCIATION BYLAWS, AND BUDGET BEFORE YOU BUY OR SELL YOUR PROPERTY.**

The law requires you to provide to a prospective purchaser of your property, before you enter into a purchase agreement, a copy of the CC&Rs, association bylaws, and budget. The law also requires you to provide to a prospective purchaser of your property, before you enter into a purchase agreement, a copy of the CC&Rs, association bylaws, and budget.

information regarding the amount of legal fees and other expenses, including the amount set aside for the payment of such expenses, and the following elements.

You are also required to inform prospective purchasers of any pending judgments or lawsuits pending against the association of title insurance owners. You are also required to provide a copy of the minutes from the most recent meeting of the board of directors to the prospective purchaser. For more information regarding these requirements, please refer to the attached document.

**6. YOU HAVE OBTAINED A COPY OF THE RECORDS OF THE BOARD IN A COMMON-INTEREST HOMEOWNERS ASSOCIATION BY THE STATE?**

- Pursuant to provisions of the California Civil Code, you are required to provide the following information:
- (a) To be notified of all meetings of the board of directors of the association, except in cases of emergency.
  - (b) To be notified of all meetings of the board of directors of the association, except in some cases where the association has a valid reason for not doing so.
  - (c) To receive a copy of the minutes of all meetings of the board of directors of the association, except in some cases where the association has a valid reason for not doing so.
  - (d) To receive a copy of the financial statements of the association, including the balance sheet and the income statement, of the association.
  - (e) To receive a copy of the records of the association, including the records and other actions by the association.

**7. QUESTIONS?**

Although they may be well-intentioned, you should be aware that the board and the documents that will control your purchase are not necessarily in your best interest. If you wish to ask your real estate agent for more information, please contact your agent. If you do not understand the information provided, please contact your agent. If you are a common-interest homeowner, please contact your agent.

Attn: Don Young

Dear Don,

Condition 27 of the Special Use Permit for the ArrowCreek golf courses required the establishment of a water quality monitoring program to detect any contaminants from the operation of the golf courses. This monitoring program has been in place since 1996. Southwest Pointe Associates, LLC contacted the Department of Water Resources earlier this year and requested that they be allowed to terminate the monitoring program since the data has indicated that there have been no significant impacts on the water shed as a result of the golf course operations. Mike Widmer provided a letter indicating that in his opinion the water shed isn't being impacted by the golf course operations. This letter was copied to you. Based upon our telephone conversation today, it is my understanding that Condition 27 has been satisfied and no additional monitoring will be required.

Thanks for your help.

Sincerely

Edward C Davis

Re: ArrowCreek Open Space Documents

Dear Mike:

Pursuant to George Fong's request, enclosed are the deed, restrictive covenant and easement for the transfer of more open space. There are no changes in language on these documents from those previously approved by the District Attorney and the Risk Manager, except the additional provision discussed with Don Young some time ago regarding Commission approval of the parcel map waiver (see the deed). After execution, the order of recording for these documents is:

1. Restrictive Covenant;
2. Deed; and
3. Easement.

It is imperative that the documents be recorded in the proper order. Please supply me conformed copies immediately after recording. Thank you for your cooperation.

Sincerely,

Robert M. Sader

**RESTRICTIVE COVENANT**

7 THIS RESTRICTIVE COVENANT ("Covenant") is made as of this \_\_\_\_\_ day of  
8 \_\_\_\_\_, 2002, by **ARROWCREEK GOLF HOLDINGS, L.L.C.**, a Delaware  
9 limited liability company ("AGH").

10 1. **GENERAL.**

11 1.1 AGH is the owner of certain real property located in Washoe County, Nevada known  
12 as a portion of ArrowCreek (ArrowCreek is described in Washoe County Case No. DA9-1-93).

13 1.2 A portion of ArrowCreek owned by AGH is certain land more particularly described  
14 in Exhibit "1", attached hereto and incorporated herein, (the "Restricted Parcel").

15 1.3 AGH intends hereby to restrict any owner's or occupant's right to use all or any  
16 portion of the Restricted Parcel as specified herein.

17 1.4 The covenants and restrictions on the Restricted Parcel specified herein are for the  
18 benefit of AGH personally and for the owners of property in ArrowCreek, as represented by the  
19 ArrowCreek Homeowner's Association, a Nevada nonprofit corporation ("HOA") and Southwest  
20 Pointe Associates, L.L.C. ("SPA"), the master developer of ArrowCreek. The right to enforce this  
21 Restrictive Covenant shall be granted only to AGH, SPA or HOA, or a successor by an express  
22 assignment, recorded against Exhibit "1", of SPA's, AGH's or HOA's rights hereunder.

23 1.5 AGH intends to convey all its right, title and interest in the Restricted Parcel to  
24 Washoe County, a political subdivision of the State of Nevada, ("County"). County agrees, by  
25 accepting this Covenant, to comply with all use restrictions specified herein, as well as other  
26 provisions hereof.

27 2. **USE RESTRICTIONS.**

28 2.1 Use of the Restricted Parcel shall be restricted, except as otherwise provided in this  
Section 2, to only those uses allowed in the Open Space land use regulatory zone of the Washoe  
County Development Code; provided that no above-ground structures other than those allowed in  
Subsection 2.2 and 2.3 shall be allowed.

29 2.2 Notwithstanding the foregoing, installation and maintenance of utility facilities and  
30 access roads thereto necessary for the development of ArrowCreek (e.g., sewer, water, gas,  
31 telephone, electric, storm drainage, cable TV) and the creation and maintenance of any firebreaks  
32 required by state or local agencies shall be allowed, as well as any ancillary or associated uses relating  
33 to ArrowCreek allowed by County.

34 2.3 Limited use of the Restricted Parcel for two public trails is allowed, Thomas Creek  
35 Trail and the Mackay/Fair Trail, as delineated on the Washoe County Regional Trail And Park Plan,  
36 provided the use of each trail is limited to the following activities:

- (a) Construction, repair and maintenance of a trail for recreational uses, including, but not limited to, public hiking, bicycle riding, jogging, horseback riding and other pedestrian and equestrian uses. Motorized vehicles of all kinds shall be prohibited and blocked from using the trail, except for County-authorized vehicles used for construction, maintenance or repair of the trail area.
- (b) Use of the trail by the general public for recreational purposes, subject to any regulations of public use imposed by County, however, common park facilities shall not be allowed, including, but not limited to, community or neighborhood parks, children's playgrounds, ballfields, tennis courts, basketball courts, group picnic access, swimming pools, and other active recreational uses other than fishing and use of the walking-jogging-equestrian path or trail.
- (c) Installation, maintenance and repair of landscaping, benches, turf or gardens, if any.

3. **RESTRICTIONS RUN WITH THE LAND.**

The use restrictions on the Restricted Parcel set forth in this Covenant shall be burdens on the Restricted Parcel and shall run with the land.

4. **SUCCESSORS AND ASSIGNS.**

This Covenant and the restrictions created hereby shall be binding upon any party owning any interest in all or any portion of the Restricted Parcel, its heirs, personal representatives, successors and assigns; provided, however, that if any such party transfers all or any portion of its interest in such Restricted Parcel, such party shall thereupon be released and discharged from any and all obligations as owner in connection with the interest transferred by it arising under this Covenant after the transfer.

5. **INJUNCTIVE OR ENFORCEMENT RELIEF.**

In the event of any violation or threatened violation by any person of any of the restrictions contained in this Covenant, those parties entitled to enforce this Covenant shall have the right to enjoin such violation or threatened violation or otherwise enforce the provisions hereof in a court of competent jurisdiction. The right of injunction shall be in addition to all other remedies set forth in this Covenant or provided by law.

6. **MODIFICATION AND TERMINATION.**

This Covenant may not be modified in any respect whatsoever or terminated, in whole or in part, except with the written consent of SPA, AGH and HOA, as specified in Subsection 1.4 above, which consent must be recorded in the office of the Recorder of Washoe County.

7. **WAIVER.**

The failure to insist upon strict performance of any of the restrictions or other terms and conditions contained herein shall not be deemed a waiver of any rights or remedies, and shall not be deemed a waiver of any subsequent breach or default in the performance of any of the restrictions, or other terms and conditions contained herein.

1 8. **ATTORNEY'S FEES.**

2 In the event a party entitled to enforce this Covenant initiates or defends any legal action or  
3 proceeding to enforce or interpret any of the terms of this Covenant, the prevailing party in any such  
4 action or proceeding shall be entitled to recover from the losing party in any such action or  
proceeding its reasonable costs and attorney's fees (including its reasonable costs and attorney's fees  
on any appeal).

5 9. **SEVERABILITY.**

6 If any term or provision of this Covenant or the application of it to any person or circumstance  
7 shall to any extent be invalid or unenforceable, the remainder of this Covenant or the application of  
8 such term or provision to persons or circumstances, other than those as to which it is invalid or  
unenforceable, shall not be affected thereby, and each term and provision of this Covenant shall be  
valid and shall be enforced to the extent permitted by law.

9 10. **CAPTIONS AND HEADINGS.**

10 The captions and headings in this Covenant are for reference only and shall not be deemed  
11 to define or limit the scope or intent of any of the terms, covenants, conditions or agreements  
contained herein.

12 11. **CONSTRUCTION.**

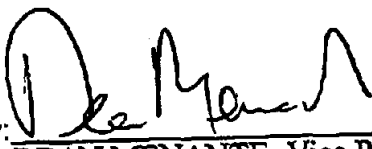

13 In construing the provisions of this Covenant and whenever the context so requires, the use  
14 of a gender shall include all other genders, the use of the singular shall include the plural, and the use  
of the plural shall include the singular.

15 12. **RECORDATION.**

16 This Covenant shall be recorded against the Restricted Parcel in the office of the Washoe  
County Recorder.

17 EXECUTED as of the day and year first above written.

## EXHIBIT "A"

## DESCRIPTION

A parcel of land situate within the west one-half of Section 24, T.18N., R.19E., M.D.M., being a portion of Parcel 2D of Survey Map 3571, as shown on the plat thereof, recorded March 1, 1999, as Document No. 2312176, Official Records of Washoe County, Nevada; more particularly described as follows:

Commencing at the northeast corner of said Parcel 2D; said point also being the north one-quarter corner of said Section 24;

thence along the easterly line of said Parcel 2D the following thirteen (13) courses and distances:

S 00°37'20" W, 15.12 feet to the Point of Beginning;

S 00°37'20" W, 556.44 feet;

S 80°45'00" W, 304.48 feet;

S 12°18'00" W, 392.00 feet;

S 17°47'00" W, 700.00 feet;

S 05°24'00" W, 450.00 feet;

S 17°39'00" E, 345.00 feet;

S 12°11'00" W, 740.00 feet;

S 23°18'00" W, 495.00 feet;

S 55°31'32" E, 160.00 feet;

S 34°28'28" W, 200.00 feet;

S 55°31'32" E, 150.00 feet;

S 34°28'28" W, 593.66 feet to a point on the northeasterly line of Arrowcreek Parkway;

thence along said northeasterly line, N 37°41'43" W, 189.00 feet;

thence N 30°54'37" E, 229.74 feet;

thence N 04°13'22" E, 425.32 feet;

thence N 14°11'11" E, 502.84 feet;

thence N 16°26'25" E, 609.35 feet;

thence N 00°24'50" E, 231.69 feet;

thence N 20°21'06" W, 291.67 feet;

thence N 05°25'50" E, 536.03 feet;

thence N 19°47'16" E, 953.29 feet;

thence N 29°22'30" E, 230.09 feet;

thence N 76°30'20" E, 238.85 feet;

thence N 30°50'54" E, 139.40 feet;

thence N 16°30'35" W, 259.62 feet;

thence N 89°32'44" E, 30.00 feet;

thence along the arc of a 115.00 foot radius curve to the left through a central angle of 32°30'00"

a distance of 65.23 feet;

thence N 57°02'44" E, 6.66 feet;

thence along the arc of a 85.00 foot radius curve to the right through a central angle of 31°29'12"

a distance of 46.71 feet to the point of beginning.

Containing 20.62 acres, more or less.

Basis of bearing is Nevada State Plane Coordinate System,  
West Zone Grid, NAD83/94.

**EASEMENT FOR DRAINAGE AND UTILITIES**

THIS GRANT OF EASEMENT, made and entered into this \_\_\_\_ day of \_\_\_\_\_, 2002, by and between the **COUNTY OF WASHOE**, a political subdivision of the State of Nevada, hereinafter referred to as "Grantor"; and **SOUTHWEST POINTE ASSOCIATES, L.L.C.**, a Delaware limited liability company, **ARROWCREEK HOMEOWNERS ASSOCIATION**, a Nevada nonprofit corporation, and **ARROWCREEK GOLF HOLDINGS, L.L.C.**, a Delaware limited liability company, hereinafter referred to collectively as "Grantees".

**WITNESSETH:**

For and in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, receipt is hereby acknowledged, Grantor hereby grants to Grantees a blanket easement for drainage of storm waters and utility facilities (gas, sewer, water, electric, cable TV and telephone) upon, over, across and through the land herein described, including the right of access upon said land for the purpose of construction and maintenance of improvements for said drainage and utility facilities.

The easement hereby granted is situated in the County of Washoe, State of Nevada, more particularly described in Exhibit "A" attached hereto and by this reference made a part hereof.

This is a nonexclusive Grant of Easement and to the extent that other uses do not interfere with the use of said easement by Grantees as permitted herein, Grantor, its successors and assigns, shall be permitted to use the same for any purpose it may desire.

The covenants herein contained shall inure to the benefit of and shall be binding upon the executors, administrators, heirs, successors and assigns of the parties and shall be, and are, covenants running with the land binding upon said property of Grantor and for the benefit of Grantee.

TO HAVE AND TO HOLD, said easement unto the Grantees and unto their successors and assigns forever.

IN WITNESS WHEREOF, Grantor hereto has executed this Grant of Easement the day and year first above written.

NOTES/COMMENTS:

Kristine-

Following are the copies of the bonds. I hope these will help in getting the releases and your search to find them. Thank you for all your help.

If you have any questions, please call.

Thank you.

Jim

11/14/00

Don,

These 2 bonds are not bonds that Engineering required or is holding. Panattoni took over for Nathan Construction and would like the bonds released. The bonds appear to be for landscaping and it looks like Nathan Const. was talking to Planning on these. (See letter pg 4.) Please see

PLEASE CALL IF YOU FAIL TO RECEIVE ALL PAGES OR IF THEY ARE ILLEGIBLE

if you have these and

contact Jim Szekeres about releasing them

Thanks. Ross

KNOW ALL MEN BY THESE PRESENTS: That we,

Nathan Construction, Inc.

(hereinafter called "Principal") as Principal, and The American Insurance Company a corporation organized and existing under the laws of the State of Nebraska and authorized to transact business in the State of Nevada (hereinafter called "Surety"), as Surety, are held firmly bound unto

County of Washoe

(hereinafter called "Obligee"), as Obligee, in the penal sum of

\*TWO HUNDRED TWENTY NINE THOUSAND EIGHT HUNDRED EIGHTY AND 40/100\*

Dollars (\$ 229,880.40 ), good and lawful money of the United States of America, for the payment of which, well and truly to be made, we bind ourselves, our heirs, administrators, executors, successors, and assigns, jointly and severally, firmly by these presents.

Signed, Sealed and Dated this 7th day of December, 19 98

Whereas, the above bounden Principal has entered into a certain written contract with the above-named Obligee, dated the day of 19 98 for Landscaping improvements at ArrowCreek Community Center, 2900 Arrowcreek Parkway, Reno, NV, Permit No. 974099

which contract is hereby referred to and made a part hereof as fully and to the same extent as if copied at length herein.

NOW, THEREFORE, THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, That if the above bounden Principal shall well and truly keep, do and perform, each and every, all and singular, the matters and things in said contract set forth and specified to be by the said Principal kept, done and performed at the time and in the manner in said contract specified, and shall pay over, make good and reimburse to the above-named Obligee, all loss and damage which said Obligee may sustain by reason of failure or default on the part of said Principal, then this obligation shall be void; otherwise to be and remain in full force and effect.

~~ATTN: RENE~~  
Dear Rene,

After talking with the County, they don't have any specific forms. Just in some form acceptable to them, and a bond would certainly be that. The specific planner for the Arrowcreek jobs is out sick today, but the guy I talked to typically thinks that 120% value of the work is what would be required. Therefore here is the information for the two(2) bonds I need:

ArrowCreek Community Center  
2900 Arrowcreek Parkway  
Reno, NV 89511  
Washoe County Permit # 974099  
Subcontract Value \$191567  
Nathan Construction Project # 297110

= \$ 229,880.<sup>40</sup> \$ 4,827.-

ArrowCreek Cart Storage Building  
2905B Arrowcreek Parkway  
Reno, NV 89511  
Washoe County Permit # 977226  
Subcontract Value \$248,304.00 (This includes both the Clubhouse & Cart Storage)  
Nathan Project # 297112

\$ 297,964.<sup>80</sup> 6,257.-

I appreciate your expeditious response to our needs. If possible, we need these by Wednesday December 9<sup>th</sup>

Thank You,

David Evans

Reno, NV 89520

**Subject: ArrowCreek (Case No. DA9-1-93)**

Dear Don:

This letter summarizes the modifications we would like to make to the building setbacks listed on page 3-1 of the Development Standards Handbook. We believe there are several benefits associated with the reduced front yard setback. First, the slopes along the back of the lot can be reduced because the house will be moved forward. Second, a larger, usable back yard can be created because of the reduced slope and setback. (Based on the currently approved setbacks, when the house is placed on the lot either the usable back yard area is reduced or the length of the disturbed slope is increased.) And third, typically a more interesting streetscape can be created when the setbacks can be varied and the garage doors are not dominating the view down the street.

- In Phases III and IV, front yard building setbacks may be reduced when the following conditions exist:
  - The street in front of the building is single loaded.
  - Garage doors are not dominating the street. To achieve this objective, several techniques may be employed including side entry garages and pushing other portions of the house forward and the garage back.
  - The driveway length will be sufficient for two cars.
- Reductions in the front yard setbacks shall apply as follows:
  - Lot size: 12,000 - <21,780 square feet  
The front yard setback may be reduced to 10 feet; however, no more than two homes with a 10-foot setback can be constructed in a row. Side entry garages are desirable but not required.

- Lot size: 21,780 - <43,560 square feet  
The front yard setback may be reduced to 10 feet; however, two homes with a 10-foot setback cannot be constructed next to one another. Side entry garages are required.

As you know, it was anticipated that the Development Agreement would periodically need to be amended and updated, and we provided examples of modifications that would be considered to be in substantial compliance with the overall character and design of the project. Such modifications can be approved by staff. Modifications to the building setbacks were among the changes that were considered to be in substantial compliance with the overall character of the project.

**RE: COMMON DRIVEWAY STANDARDS FOR TWO LOTS  
AMENDMENT TO ARROWCREEK DESIGN STANDARDS**

Dear Don and Kris:

This letter summarizes the modifications we would like to make to Condition #22(a). Deletions are ~~struck through~~ and additions are in ***bold and italic***.

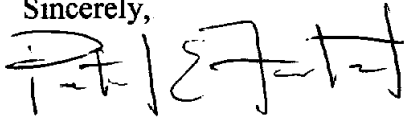

22. The following roadway sections shall be applicable to the public and private on site streets shown on the tentative map. A traffic report shall be submitted with each tentative map and shall identify the ultimate average daily traffic on each street and shall make recommendations for geometric design (e.g., left turn storage capacity, site distance minimum required turning radius, etc.). The County Engineer shall be responsible for determining compliance with this condition.
- a1. Private Common Driveways – Serving 3 to 4 or less lots, pavement width 20 feet; serving 5 or more lots, pavement width 22 feet; no parking either side. Curb returns shall have a minimum face of curb radius of 20 feet on local streets and 25 feet on collector streets. Private common driveway locations will be shown on all tentative maps. Private common driveways will line up with proposed street intersections where possible and will comply with street intersection offset requirements. Single lot driveway access will not be allowed onto streets on which the average daily traffic exceeds 2000 trips. (Refer to street sections.)
- a2. Private Common Driveways – Serving 2 lots, pavement width 16 feet; no parking either side. Apron flares per ITE standards. Access over the roll curb will be

*permitted. Common driveways will not be permitted on collectors with traffic over 1000 ADT. The common driveway, trash pads, and utility service extensions under or near the driveway will be constructed by the developer. Use by the lot owners will be insured by CC&R's or deed restriction. Maintenance will be performed jointly by the individual lot owners. (Refer to Figures 1 and 2.)*

The proposed road section was approved by Rich Riolo at the Nevada Division of Forestry. (See attached letter.) The purpose of this modification is to limit the amount of land disturbance on large lots where both grade and length of driveway are extensive.

If you are in agreement with the preceding modifications, please acknowledge by signing in the space provided. If you have any questions or need additional information, please contact me.

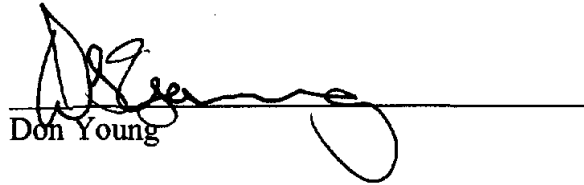

Sincerely,

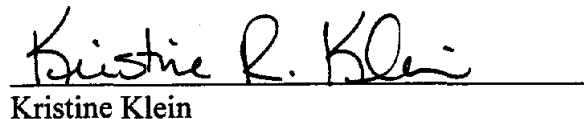

Patrick E. Fritchel, P.E.  
Principal

**Subject: ArrowCreek (Case No. DA9-1-93)**

Dear Don and Kris:

This letter summarizes the modifications to Condition #22(e), which we discussed at our meeting on April 7<sup>th</sup>. Deletions are ~~struck through~~ and additions are in **bold and italic**.

22. The following roadway sections shall be applicable to the public and private on site streets shown on the tentative map. A traffic report shall be submitted with each tentative map and shall identify the ultimate average daily traffic on each street and shall make recommendations for geometric design (e.g., left turn storage capacity, site distance minimum required turning radius, etc.). The County Engineer shall be responsible for determining compliance with this condition.

- e. Collector Private – ~~60~~ **29** foot minimum ROW (2000 ADT to 8000 ADT); minimum 24-foot pavement width with an additional 12-foot left turn lane at intersections where warranted; curb and gutter ~~or County Engineer approved concrete header with roadside ditch both sides (developer's discretion)~~; no parking on either side. A minimum 8-foot path on ~~both sides~~ **one side** of the street, **separated from the roadway improvements, or a minimum 5-foot path on both sides of the street constructed** of asphalt or decomposed will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this

condition. No residential driveway access will be allowed. Access for private common driveways will be allowed. (Refer to street sections.)

As you know, it was anticipated that the Development Agreement would periodically need to be amended and updated, and we provided examples of modifications that would be considered to be in substantial compliance with the overall character and design of the project. Such modifications can be approved by staff. Modifications to the street standards were among the changes that were considered to be in substantial compliance with the overall character of the project.

**RE: COMMON DRIVEWAY STANDARDS FOR TWO LOTS  
AMENDMENT TO ARROWCREEK DESIGN STANDARDS**

Dear Don and Kris:

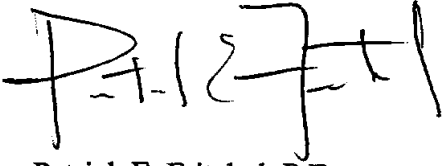

We are submitting our request to modify the standards for common driveways serving two lots (see figures 1 and 2). The road section as shown was approved by Rich Riolo, NDF (see attached letter). The purpose of this modification is to limit the amount of land disturbance on large lots where both grade and length of driveway are extensive.

The common driveway and utility service extensions under or near the driveway will be constructed by the developer. Use of the common driveway by the lot owners will be insured by CC&R's or deed restriction. Maintenance of the common driveway will be performed jointly by the individual lot owners.

Common driveways will have apron flares per ITE standards. Access over the roll curb will be permitted. Common driveways will not be permitted on collectors with traffic over 1000 ADT.

Please review and, if acceptable, sign below. Your response by 5/2/00 would be greatly appreciated

Sincerely,

GRANT OF EASEMENT

THIS GRANT OF EASEMENT, made this \_\_\_\_ day of \_\_\_\_\_, 200\_\_, between HELEN JEANE JONES, KENNETH G. WALKER and GERALD C. SMITH, as trustees under the provisions of that certain NELL J. REDFIELD Revocable Trust Agreement dated May 21, 1980, Party of the first part, hereinafter referred to as "Grantor" and the COUNTY OF WASHOE, a political subdivision of the State of Nevada, Party of the second part, hereinafter referred to as "Grantee";

WITNESSETH

*permanent and right-of-way*

That the Grantor, for and in consideration of the sum of one dollar (\$1.00), lawful money of the United States of America, to him in hand paid by the Grantee, and other good and valuable considerations, receipt whereof is hereby acknowledged, does by these presents grant, bargain, sell and convey unto Grantee, its successors and assigns, a non-exclusive easement for waterline and sanitary sewer facilities upon, over, across, through the land herein described, together with the perpetual right to enter upon said land to construct, reconstruct, maintain and repair said facilities and the further right to remove trees, bushes, undergrowth and other obstructions interfering with the location, construction and maintenance of said facilities over, across, and through a parcel of land located in the County of Washoe, State of Nevada, as described on the attached EXHIBIT "A".

This is a non-exclusive Grant of Easement and to the extent that other uses do not interfere with the use of said easement by Grantee as permitted herein, Grantor, his/her/their/its successors and assigns, shall be permitted to use the same for any purpose they may desire.

The covenants and agreements herein contained shall inure to the benefit of and shall be binding upon the executors, administrators, heirs, successors and assigns of the parties and shall be, and are, covenants running with the land binding upon said property of Grantor and for the benefit of Grantee.

IN WITNESS WHEREOF, the Grantor has caused these presents to be executed the day and year first above written.

HELEN JEANE JONES, KENNETH G. WALKER and GERALD C. SMITH, as trustees under the provisions of that certain NELL J. REDFIELD Revocable Trust Agreement dated May 21, 1980.

## EXHIBIT "A"

## DESCRIPTION

Easements situate within the Sections 22, 23 and 27, T18N, R19E, MDM; and being a portion of Parcel 4F of Survey Map 3653, recorded August 30, 1999, as Document No. 2375670, Official Records of Washoe County, Nevada; more particularly described as follows:

Easement 1:

An easement, twenty-nine (29) feet in width, the centerline of which is more particularly described as follows:

Beginning at the southerly terminus of the centerline of High Vista Drive, as shown on the plat of Arrowcreek Subdivision, Unit 3, recorded March 20, 1998, as Document No. 2190970, Official Records of Washoe County, Nevada;

thence S 25°05'59" W, 100.00 feet;

thence along the arc of a 300.00 foot radius curve to the right through a central angle of 136°56'43" a distance of 717.04 feet;

thence N 17°57'18" W, 276.71 feet;

thence along the arc of a 300.00 foot radius curve to the left through a central angle of 54°48'15" a distance of 286.95 feet;

thence N 72°45'33" W, 41.81 feet to a point on the east line of Parcel 1B of Survey Map 3294, as shown on the plat thereof, recorded August 26, 1997, as Document No. 2128435, Official Records of Washoe County, Nevada, the point of ending.

The sidelines of said easement are to be shortened or extended as to terminate on the property line of the grantor.

Easement 2:

An easement, varying in width, more particularly described as follows:

Commencing at the point of ending of Easement 1, as previously described;

thence N 72°45'33" W, 59.58 feet;

thence along the arc of a 300.00 foot radius curve to the right through a central angle of 28°17'43" a distance of 148.15 feet;

thence N 44°27'50" W, 267.70 feet;

thence along the arc of a 300.00 foot radius curve to the left through a central angle of 44°42'15" a distance of 234.07 feet to a point on the westerly line of said Parcel 1B, the Point of Beginning;

thence along said west line of Parcel 1B, S 18°19'10" W, 15.24 feet;

thence along the arc of a non-tangent 285.50 foot radius curve to the left from a tangent bearing S 89°54'46" W through a central angle of 49°14'33" a distance of 245.37 feet;

thence S 40°40'13" W, 163.15 feet;

thence along the arc of a 885.50 foot radius curve to the left through a central angle of 11°08'51" a distance of 172.28 feet;

thence S 29°31'23" W, 181.38 feet;

thence along the arc of a 685.50 foot radius curve to the left through a central angle of 11°39'29" a distance of 139.48 feet;

thence S 17°51'54" W, 894.37 feet;

thence along the arc of a 1164.50 foot radius curve to the right through a central angle of 08°38'17" a distance of 175.56 feet;

thence S 26°30'10" W, 605.56 feet;  
 thence along the arc of a 1585.50 foot radius curve to the left through a central angle of 15°19'06" a distance of 423.89 feet;  
 thence S 13°42'51" W, 19.85 feet;  
 thence along the arc of a non-tangent 1586.50 foot radius curve to the left from a tangent bearing S 10°28'06" W through a central angle of 04°30'38" a distance of 124.90 feet;  
 thence S 05°57'28" W, 122.37 feet;  
 thence along the arc of a 288.50 foot radius curve to the right through a central angle of 00°43'44" a distance of 3.67 feet to a point on the northerly line of Parcel 3A of Survey Map 3536, as shown on the plat thereof, recorded December 21, 1998, as Document No. 2287852, Official Records of Washoe County, Nevada;  
 thence along said northerly line N 68°39'35" W, 13.98 feet to its intersection with the centerline of this easement; said point designated as Point "A";  
 thence continuing along said northerly line N 68°39'35" W, 14.00 feet;  
 thence N 05°57'28" E, 118.62 feet;  
 thence along the arc of a 1613.50 foot radius curve to the right through a central angle of 04°30'38" a distance of 127.02 feet;  
 thence N 07°59'20" E, 20.20 feet;  
 thence along the arc of a non-tangent 1614.50 foot radius curve to the right from a tangent bearing N 11°11'05" E through a central angle of 15°19'06" a distance of 431.64 feet;  
 thence N 26°30'10" E, 605.56 feet;  
 thence along the arc of a 1135.50 foot radius curve to the left through a central angle of 08°38'17" a distance of 171.19 feet;  
 thence N 17°51'54" E, 894.37 feet;  
 thence along the arc of a 714.50 foot radius curve to the right through a central angle of 11°39'29" a distance of 145.38 feet;  
 thence N 29°31'23" E, 181.38 feet;  
 thence along the arc of a 914.50 foot radius curve to the right through a central angle of 11°08'51" a distance of 177.92 feet;  
 thence N 40°40'13" E, 163.15 feet;  
 thence along the arc of a 314.50 foot radius curve to the right through a central angle of 50°59'31" a distance of 279.90 feet to a point on the said westerly line of said Parcel 1B;  
 thence along said westerly line, S 18°19'10" W, 15.17 feet to the point of beginning.

**Easement 3:**

An easement, twenty-seven (27) feet in width, the centerline of which is more particularly described as follows:

Commencing at the Point "A" as previously described in Easement 2;

thence S 05°57'28" W, 0.04 feet;

thence along the arc of a 275.00 foot radius curve to the right through a central angle of 27°20'56" a distance of 131.26 feet;

thence S 33°18'24" W, 273.76 feet;

thence along the arc of a 972.85 foot radius curve to the left through a central angle of 07°17'48" a distance of 123.89 feet to the Point of Beginning;

thence S 26°00'36" W, 375.18 feet;

thence along the arc of a 300.00 foot radius curve to the right through a central angle of 53°56'48" a distance of 282.46 feet;

thence S 79°57'24" W, 171.52 feet;  
thence along the arc of a 200.00 foot radius curve to the left through a central angle of 64°34'43"  
a distance of 225.42 feet;  
thence S 15°22'41" W, 99.47 feet;  
thence along the arc of a 400.00 foot radius curve to the right through a central angle of  
15°56'14" a distance of 111.26 feet to the point of ending.  
The sidelines of said easement are to be shortened or extended as to terminate on the property  
line of the grantor.

Basis of bearings is Nevada State Plane Coordinate System, West Zone Grid, NAD83, per  
Survey Map 3653.

**GRANT OF EASEMENT**

THIS GRANT OF EASEMENT, made this 4<sup>th</sup> day of January, 2000, between SOUTHWEST POINTE ASSOCIATES, L.L.C., a Nevada limited liability company, Party of the first part, hereinafter referred to as "Grantor" and the COUNTY OF WASHOE, a political subdivision of the State of Nevada, Party of the second part, hereinafter referred to as "Grantee";

**WITNESSETH**

That the Grantor, for and in consideration of the sum of one dollar (\$1.00), lawful money of the United States of America, to him in hand paid by the Grantee, and other good and valuable considerations, receipt whereof is hereby acknowledged, does by these presents grant, bargain, sell and convey unto Grantee, its successors and assigns, a permanent easement and right-of-way for emergency ingress and egress, and waterline facilities upon, over, across, through the land herein described, together with the perpetual right to enter upon said land to construct, reconstruct, maintain and repair said facilities and the further right to remove trees, bushes, undergrowth and other obstructions interfering with the location, construction and maintenance of said facilities over, across, and through a parcel of land located in the County of Washoe, State of Nevada, as described on the attached EXHIBIT "A".

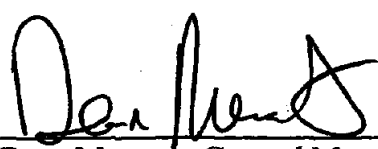

TO HAVE AND TO HOLD, said easement and right-of-way unto the Grantee and unto its successors and assigns forever.

This is a non-exclusive Grant of Easement and to the extent that other uses do not interfere with the use of said easement by Grantee as permitted herein, Grantor, his/her/their/its successors and assigns, shall be permitted to use the same for any purpose they may desire.

The covenants and agreements herein contained shall inure to the benefit of and shall be binding upon the executors, administrators, heirs, successors and assigns of the parties and shall be, and are, covenants running with the land binding upon said property of Grantor and for the benefit of Grantee.

IN WITNESS WHEREOF, the Grantor has caused these presents to be executed the day and year first above written.

Re: ArrowCreek Open Space Documents

Dear Karen:

Enclosed are the deed, restrictive covenant and easement for the second transfer of open space. There are no changes in language on these documents from those previously approved by the District Attorney and the Risk Manager. After execution, the order of recording for these documents is:

1. Restrictive Covenant;
2. Deed; and
3. Easement.

In any event, please supply me conformed copies immediately after recording.

Sincerely,

Robert M. Sader

**EASEMENT FOR DRAINAGE AND UTILITIES**

THIS GRANT OF EASEMENT, made and entered into this \_\_\_\_ day of \_\_\_\_\_, 1999, by and between the COUNTY OF WASHOE, a political subdivision of the State of Nevada, hereinafter referred to as "Grantor"; and SOUTHWEST POINTE ASSOCIATES, L.L.C., a Delaware limited liability company, ARROWCREEK HOMEOWNERS ASSOCIATION, a Nevada nonprofit corporation, and ARROWCREEK GOLF HOLDINGS, L.L.C., a Delaware corporation, hereinafter referred to collectively as "Grantees".

**WITNESSETH:**

For and in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, receipt is hereby acknowledged, Grantor hereby grants to Grantees a blanket easement for drainage of storm waters, utility facilities (gas, sewer, water, electric, cable TV and telephone) upon, over, across and through the land herein described, including the right of access upon said land for the purpose of construction and maintenance of improvements for said drainage and utility facilities.

The easement hereby granted is situated in the County of Washoe, State of Nevada, more particularly described in Exhibit "A" attached hereto and by this reference made a part hereof.

6 **RESTRICTIVE COVENANT**

7 THIS RESTRICTIVE COVENANT ("Covenant") is made as of this \_\_\_\_\_ day of  
8 \_\_\_\_\_, 1999, by SOUTHWEST POINT ASSOCIATES, L.L.C., a Delaware  
9 limited liability company ("SPA").

10 **1. GENERAL.**

11 1.1 SPA is the owner and developer of certain real property located in Washoe County,  
12 Nevada known as a portion of ArrowCreek (ArrowCreek is described in Washoe County Case No.  
13 DA9-1-93).

14 1.2 A portion of ArrowCreek owned by SPA is certain land more particularly described  
15 in Exhibit "1", attached hereto and incorporated herein, (the "Restricted Parcel").

16 1.3 SPA intends hereby to restrict any owner's or occupant's right to use all or any portion  
17 of the Restricted Parcel as specified herein.

18 1.4 The covenants and restrictions on the Restricted Parcel specified herein are for the  
19 benefit of SPA personally and for the owners of property in ArrowCreek, as represented by the  
20 ArrowCreek Homeowner's Association, a Nevada nonprofit corporation ("HOA"). The right to  
21 enforce this Restrictive Covenant shall be granted only to SPA or HOA, or a successor by an express  
22 assignment, recorded against Exhibit "1", of SPA's or HOA's rights hereunder.

23 1.5 SPA intends to convey all its right, title and interest in the Restricted Parcel to Washoe  
24 County, a political subdivision of the State of Nevada, ("County"). County agrees, by accepting this  
25 Covenant, to comply with all use restrictions specified herein, as well as other provisions hereof.

26 **2. USE RESTRICTIONS.**

27 2.1 Use of the Restricted Parcel shall be restricted, except as otherwise provided in this  
28 Section 2, to only those uses allowed in the Open Space land use regulatory zone of the Washoe  
County Development Code; provided that no above-ground structures other than those allowed in  
Subsection 2.2 and 2.3 shall be allowed.

2.2 Notwithstanding the foregoing, installation and maintenance of utility facilities and  
access roads thereto necessary for the development of ArrowCreek (e.g., sewer, water, gas,  
telephone, electric, storm drainage, cable TV) and the creation and maintenance of any firebreaks  
required by state or local agencies shall be allowed, as well as any ancillary or associated uses relating  
to ArrowCreek allowed by County.

2.3 Limited use of the Restricted Parcel for two public trails is allowed, Thomas Creek  
Trail and the Mackay/Fair Trail, as delineated on the Washoe County Regional Trail And Park Plan,  
provided the use of each trail is limited to the following activities:

(a) Construction, repair and maintenance of a trail for recreational uses, including,  
but not limited to, public hiking, bicycle riding, jogging, horseback riding and

other pedestrian and equestrian uses. Motorized vehicles of all kinds shall be prohibited and blocked from using the trail, except for County-authorized vehicles used for construction, maintenance or repair of the easement area.

(b) Use of the trail by the general public for recreational purposes, subject to any regulations of public use imposed by County, however, common park facilities shall not be allowed, including, but not limited to, community or neighborhood parks, children's playgrounds, ballfields, tennis courts, basketball courts, group picnic access, swimming pools, and other active recreational uses other than fishing and use of the walking-jogging-equestrian path or trail.

(c) Installation, maintenance and repair of landscaping, benches, turf or gardens, if any.

3. **RESTRICTIONS RUN WITH THE LAND.**

The use restrictions on the Restricted Parcel set forth in this Covenant shall be burdens on the Restricted Parcel and shall run with the land.

4. **SUCCESSORS AND ASSIGNS.**

This Covenant and the restrictions created hereby shall be binding upon any party owning any interest in all or any portion of the Restricted Parcel, its heirs, personal representatives, successors and assigns; provided, however, that if any such party transfers all or any portion of its interest in such Restricted Parcel, such party shall thereupon be released and discharged from any and all obligations as owner in connection with the interest transferred by it arising under this Covenant after the transfer.

5. **INJUNCTIVE OR ENFORCEMENT RELIEF.**

In the event of any violation or threatened violation by any person of any of the restrictions contained in this Covenant, those parties entitled to enforce this Covenant shall have the right to enjoin such violation or threatened violation or otherwise enforce the provisions hereof in a court of competent jurisdiction. The right of injunction shall be in addition to all other remedies set forth in this Covenant or provided by law.

6. **MODIFICATION AND TERMINATION.**

This Covenant may not be modified in any respect whatsoever or terminated, in whole or in part, except with the written consent of SPA or HOA, as specified in Subsection 1.4 above, which consent must be recorded in the office of the Recorder of Washoe County.

7. **WAIVER.**

The failure to insist upon strict performance of any of the restrictions or other terms and conditions contained herein shall not be deemed a waiver of any rights or remedies, and shall not be deemed a waiver of any subsequent breach or default in the performance of any of the restrictions, or other terms and conditions contained herein.

8. **ATTORNEY'S FEES.**

In the event a party entitled to enforce this Covenant initiates or defends any legal action or proceeding to enforce or interpret any of the terms of this Covenant, the prevailing party in any such action or proceeding shall be entitled to recover from the losing party in any such action or

1 proceeding its reasonable costs and attorney's fees (including its reasonable costs and attorney's fees  
2 on any appeal).

3 9. SEVERABILITY.

4 If any term or provision of this Covenant or the application of it to any person or circumstance  
5 shall to any extent be invalid or unenforceable, the remainder of this Covenant or the application of  
6 such term or provision to persons or circumstances, other than those as to which it is invalid or  
7 unenforceable, shall not be affected thereby, and each term and provision of this Covenant shall be  
8 valid and shall be enforced to the extent permitted by law.

9 10. CAPTIONS AND HEADINGS.

10 The captions and headings in this Covenant are for reference only and shall not be deemed  
11 to define or limit the scope or intent of any of the terms, covenants, conditions or agreements  
12 contained herein.

13 11. CONSTRUCTION.

14 In construing the provisions of this Covenant and whenever the context so requires, the use  
15 of a gender shall include all other genders, the use of the singular shall include the plural, and the use  
16 of the plural shall include the singular.

17 12. RECORDATION.

18 This Covenant shall be recorded against the Restricted Parcel in the office of the Washoe  
19 County Recorder.

20 EXECUTED as of the day and year first above written.

RECEIVED  
JUN 22 1999  
WASHOE COUNTY  
COMMUNITY DEVELOPMENT

**Subject: ArrowCreek Phase II, Unit 13**

Dear Don:

As a follow-up to our meeting last Friday morning, I have enclosed a copy of the 3/17/99 Site Plan for ArrowCreek Phase II and a copy of the proposed layout for Unit 13, which is part of Phase II. The layout for Unit 13 also shows lots that would be subdivided as part of our Phase III tentative map.

The proposed Unit 13 layout is slightly different from the layout shown on the 3/17/99 Site Plan. The difference between the two layouts is that more lots are now being shown on the cul-de-sac. It would be necessary to provide emergency access between Units 13 and 12 and such access is shown on the 3/17/99 Site Plan. Also, the number of lots proposed does not exceed the total number of lots shown on the original tentative map.

You stated that this minor modification would be an administrative change and that I should send Kris Klein and you a letter requesting approval for such a change. This letter is being sent with that purpose. Please discuss this matter with Kris and, if you are both in agreement with the modifications, please sign below.

Sincerely,

Brita Tryggvi, AICP  
Principal

WASHOE COUNTY
PUBLIC WORKS DEPARTMENT

Subject: ArrowCreek (Case No. DA9-1-93)

Dear Don and Kris:

This letter summarizes the modifications we would like to make to Condition #22. The revised street sections, which are attached, will be used in Units 6 and 8 in Phase I, Phase II, and all subsequent phases. The production builders in Phase I (i.e., Ryder Homes, Silver Star, and New Cities) are using different street sections, which the Washoe County Engineering Division determined to be in compliance with the tentative map conditions. These three builders will continue to use these street sections in their future phases located in Phase I.

22. The following roadway sections shall be applicable to the public and private on site streets shown on the tentative map. A traffic report shall be submitted with each tentative map and shall identify the ultimate average daily traffic on each street and shall make recommendations for geometric design (e.g., left turn storage capacity, site distance minimum required turning radius, etc.). The County Engineer shall be responsible for determining compliance with this condition.

a. Private Common Driveway - No change.

b. Rural Private -

Option 1: 27-foot ROW (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter; no parking either side. When a rural private street provides a connection between neighborhoods, a minimum 4-foot asphalt or decomposed granite path on one side of the street will be provided unless alternate provisions or locations for pedestrian paths can be provided and shown in the

Pedestrian Circulation Plan. When a connection between neighborhoods is not provided, no paths will be constructed. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)

**Option 2:** 24 foot ROW (maximum 200 ADT): minimum 22 foot pavement width; County Engineer-approved concrete header with roadside ditch both sides; no parking either side. When a rural private street provides a connection between neighborhoods, a minimum 4-foot asphalt or decomposed granite path on one side of the street will be provided unless alternate provisions or locations for pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. When a connection between neighborhoods is not provided, no paths will be constructed. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)

c. Local Private -

**Option 1:** 27-foot minimum ROW (200 - 500 ADT): minimum 22 foot pavement width; curb and gutter; no parking either side. A minimum 4-foot asphalt or decomposed granite path on one side of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)

**Option 2:** 24-foot minimum ROW (200 - 500 ADT): minimum 22 foot pavement width; County Engineer-approved concrete header with roadside ditch both sides; no parking either side. A minimum 4-foot asphalt or decomposed granite path on one side of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)

d. Collector Private -

**Option 1:** 29-foot minimum ROW (500 to 2000 ADT): minimum 24-foot pavement width; curb and gutter; no parking either side. A minimum 5-foot asphalt or decomposed granite path on one side of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to Street Sections.)

Option 2: 26 foot minimum ROW (500 to 2000 ADT): minimum 24-foot pavement width; County Engineer approved concrete header with roadside ditch both sides; no parking either side. A minimum 5-foot asphalt or decomposed granite path on-one side of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to Street Sections.)

- e. Collector Private - No change.
- f. Collector Private - No change.
- g. Minor Arterial, Private - No change.
- h. Minor Arterial, Public - No change.

Additionally, we would like to make one change to Exhibit E in the Development Standards Handbook. On page 2-15, under the heading Street and Median Guidelines, the sixth sentence reads as follows: "The developer is also responsible for installation and maintenance of all median landscaping and all landscaping along the edge of the minor arterial and collector streets." The proposed change would be modified to read: "The developer is responsible for installation and the Homeowners' Association is responsible for maintenance of all common area median landscaping and all common area landscaping along ArrowCreek Parkway." (The CC&Rs address maintenance and correspondence from Bob Sader is attached. Bob's letter addresses maintenance of all landscaping along ArrowCreek Parkway and maintenance of the ditches along rural, local, and collector streets.)

As you know, it was anticipated that the Development Agreement would periodically need to be amended and updated, and we provided examples of modifications that would be considered to be in substantial compliance with the overall character and design of the project. Such modifications can be approved by staff. Modifications to the street standards were among the changes that were considered to be in substantial compliance with the overall character of the project.

If you are in agreement with the preceding statements, please acknowledge by signing in the space provided. If you have any questions or need additional information, please contact me.

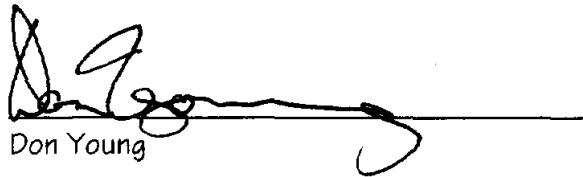

Sincerely,

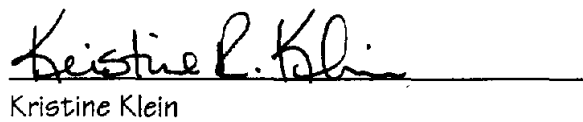

Brita Tryggvi, AICP  
Principal

Re: ArrowCreek Open Space Documents

Dear Karen:

Enclosed are the deed, restrictive covenant and easement for the first transfer of open space. These documents contain the revisions of John Rhodes. After execution, the order of recording for these documents is:

1. Restrictive Covenant;
2. Deed; and
3. Easement.

You may wish to return these documents to John for recording. In any event, please supply me conformed copies immediately after recording.

Sincerely,

Robert M. Sader

6 **RESTRICTIVE COVENANT**

7 THIS RESTRICTIVE COVENANT ("Covenant") is made as of this \_\_\_\_\_ day of  
8 \_\_\_\_\_, 1999, by **SOUTHWEST POINT ASSOCIATES, L.L.C.**, a Delaware  
9 limited liability company ("SPA").

10 **1. GENERAL.**

11 1.1 SPA is the owner and developer of certain real property located in Washoe County,  
12 Nevada known as a portion of ArrowCreek (ArrowCreek is described in Washoe County Case No.  
13 DA9-1-93).

14 1.2 A portion of ArrowCreek owned by SPA is certain land more particularly described  
15 in Exhibit "1", attached hereto and incorporated herein, (the "Restricted Parcel").

16 1.3 SPA intends hereby to restrict any owner's or occupant's right to use all or any portion  
17 of the Restricted Parcel as specified herein.

18 1.4 The covenants and restrictions on the Restricted Parcel specified herein are for the  
19 benefit of SPA personally and for the owners of property in ArrowCreek, as represented by the  
20 ArrowCreek Homeowner's Association, a Nevada nonprofit corporation ("HOA"). The right to  
21 enforce this Restrictive Covenant shall be granted only to SPA or HOA, or a successor by an express  
22 assignment, recorded against Exhibit "1", of SPA's or HOA's rights hereunder.

23 1.5 SPA intends to convey all its right, title and interest in the Restricted Parcel to Washoe  
24 County, a political subdivision of the State of Nevada, ("County"). County agrees, by accepting this  
25 Covenant, to comply with all use restrictions specified herein, as well as other provisions hereof.

26 **2. USE RESTRICTIONS.**

27 2.1 Use of the Restricted Parcel shall be restricted, except as otherwise provided in this  
28 Section 2, to only those uses allowed in the Open Space land use regulatory zone of the Washoe  
County Development Code; provided that no above-ground structures other than those allowed in  
Subsection 2.2 and 2.3 shall be allowed.

29 2.2 Notwithstanding the foregoing, installation and maintenance of utility facilities and  
30 access roads thereto necessary for the development of ArrowCreek (e.g., sewer, water, gas,  
31 telephone, electric, storm drainage, cable TV) and the creation and maintenance of any firebreaks  
32 required by state or local agencies shall be allowed, as well as any ancillary or associated uses relating  
33 to ArrowCreek allowed by County.

34 2.3 Limited use of the Restricted Parcel for two public trails is allowed, Thomas Creek  
35 Trail and the Mackay/Fair Trail, as delineated on the Washoe County Regional Trail And Park Plan,  
36 provided the use of each trail is limited to the following activities:

- 37 (a) Construction, repair and maintenance of a trail for recreational uses, including,  
38 but not limited to, public hiking, bicycle riding, jogging, horseback riding and

P:\dig\SW Pointe\Res Cov(5).mgw  
April 28, 1999

1 other pedestrian and equestrian uses. Motorized vehicles of all kinds shall be  
2 prohibited and blocked from using the trail, except for County-authorized  
vehicles used for construction, maintenance or repair of the easement area.

3 (b) Use of the trail by the general public for recreational purposes, subject to any  
4 regulations of public use imposed by County, however, common park facilities  
5 shall not be allowed, including, but not limited to, community or  
6 neighborhood parks, children's playgrounds, ballfields, tennis courts,  
basketball courts, group picnic access, swimming pools, and other active  
recreational uses other than fishing and use of the walking-jogging-equestrian  
path or trail.

7 (c) Installation, maintenance and repair of landscaping, benches, turf or gardens,  
8 if any.

9 **3. RESTRICTIONS RUN WITH THE LAND.**

10 The use restrictions on the Restricted Parcel set forth in this Covenant shall be burdens on the  
11 Restricted Parcel and shall run with the land.

12 **4. SUCCESSORS AND ASSIGNS.**

13 This Covenant and the restrictions created hereby shall be binding upon any party owning any  
14 interest in all or any portion of the Restricted Parcel, its heirs, personal representatives, successors  
15 and assigns; provided, however, that if any such party transfers all or any portion of its interest in  
16 such Restricted Parcel, such party shall thereupon be released and discharged from any and all  
17 obligations as owner in connection with the interest transferred by it arising under this Covenant after  
18 the transfer.

19 **5. INJUNCTIVE OR ENFORCEMENT RELIEF.**

20 In the event of any violation or threatened violation by any person of any of the restrictions  
21 contained in this Covenant, those parties entitled to enforce this Covenant shall have the right to  
22 enjoin such violation or threatened violation or otherwise enforce the provisions hereof in a court of  
23 competent jurisdiction. The right of injunction shall be in addition to all other remedies set forth in  
24 this Covenant or provided by law.

25 **6. MODIFICATION AND TERMINATION.**

26 This Covenant may not be modified in any respect whatsoever or terminated, in whole or in  
27 part, except with the written consent of SPA or HOA, as specified in Subsection 1.4 above, which  
28 consent must be recorded in the office of the Recorder of Washoe County.

**7. WAIVER.**

The failure to insist upon strict performance of any of the restrictions or other terms and  
conditions contained herein shall not be deemed a waiver of any rights or remedies, and shall not be  
deemed a waiver of any subsequent breach or default in the performance of any of the restrictions,  
or other terms and conditions contained herein.

**8. ATTORNEY'S FEES.**

In the event a party entitled to enforce this Covenant initiates or defends any legal action or  
proceeding to enforce or interpret any of the terms of this Covenant, the prevailing party in any such  
action or proceeding shall be entitled to recover from the losing party in any such action or

1 proceeding its reasonable costs and attorney's fees (including its reasonable costs and attorney's fees  
2 on any appeal).

3 9. SEVERABILITY.

4 If any term or provision of this Covenant or the application of it to any person or circumstance  
5 shall to any extent be invalid or unenforceable, the remainder of this Covenant or the application of  
6 such term or provision to persons or circumstances, other than those as to which it is invalid or  
7 unenforceable, shall not be affected thereby, and each term and provision of this Covenant shall be  
8 valid and shall be enforced to the extent permitted by law.

9 10. CAPTIONS AND HEADINGS.

10 The captions and headings in this Covenant are for reference only and shall not be deemed  
11 to define or limit the scope or intent of any of the terms, covenants, conditions or agreements  
12 contained herein.

13 11. CONSTRUCTION.

14 In construing the provisions of this Covenant and whenever the context so requires, the use  
15 of a gender shall include all other genders, the use of the singular shall include the plural, and the use  
16 of the plural shall include the singular.

17 12. RECORDATION.

18 This Covenant shall be recorded against the Restricted Parcel in the office of the Washoe  
19 County Recorder.

20 EXECUTED as of the day and year first above written.

EXHIBIT "A"  
DESCRIPTION

Parcel 1:

A parcel of land situate within Sections 23, 24 and 26, T18N, R19E, MDM, Washoe County, Nevada; more particularly described as follows:

Parcel A of Arrowcreek Subdivision, Unit 1, as shown on the plat thereof, recorded October 17, 1997, as Tract Map 3461, Document No. 2145697, Official Records of Washoe County, Nevada.

Containing 13.01 acres, more or less.

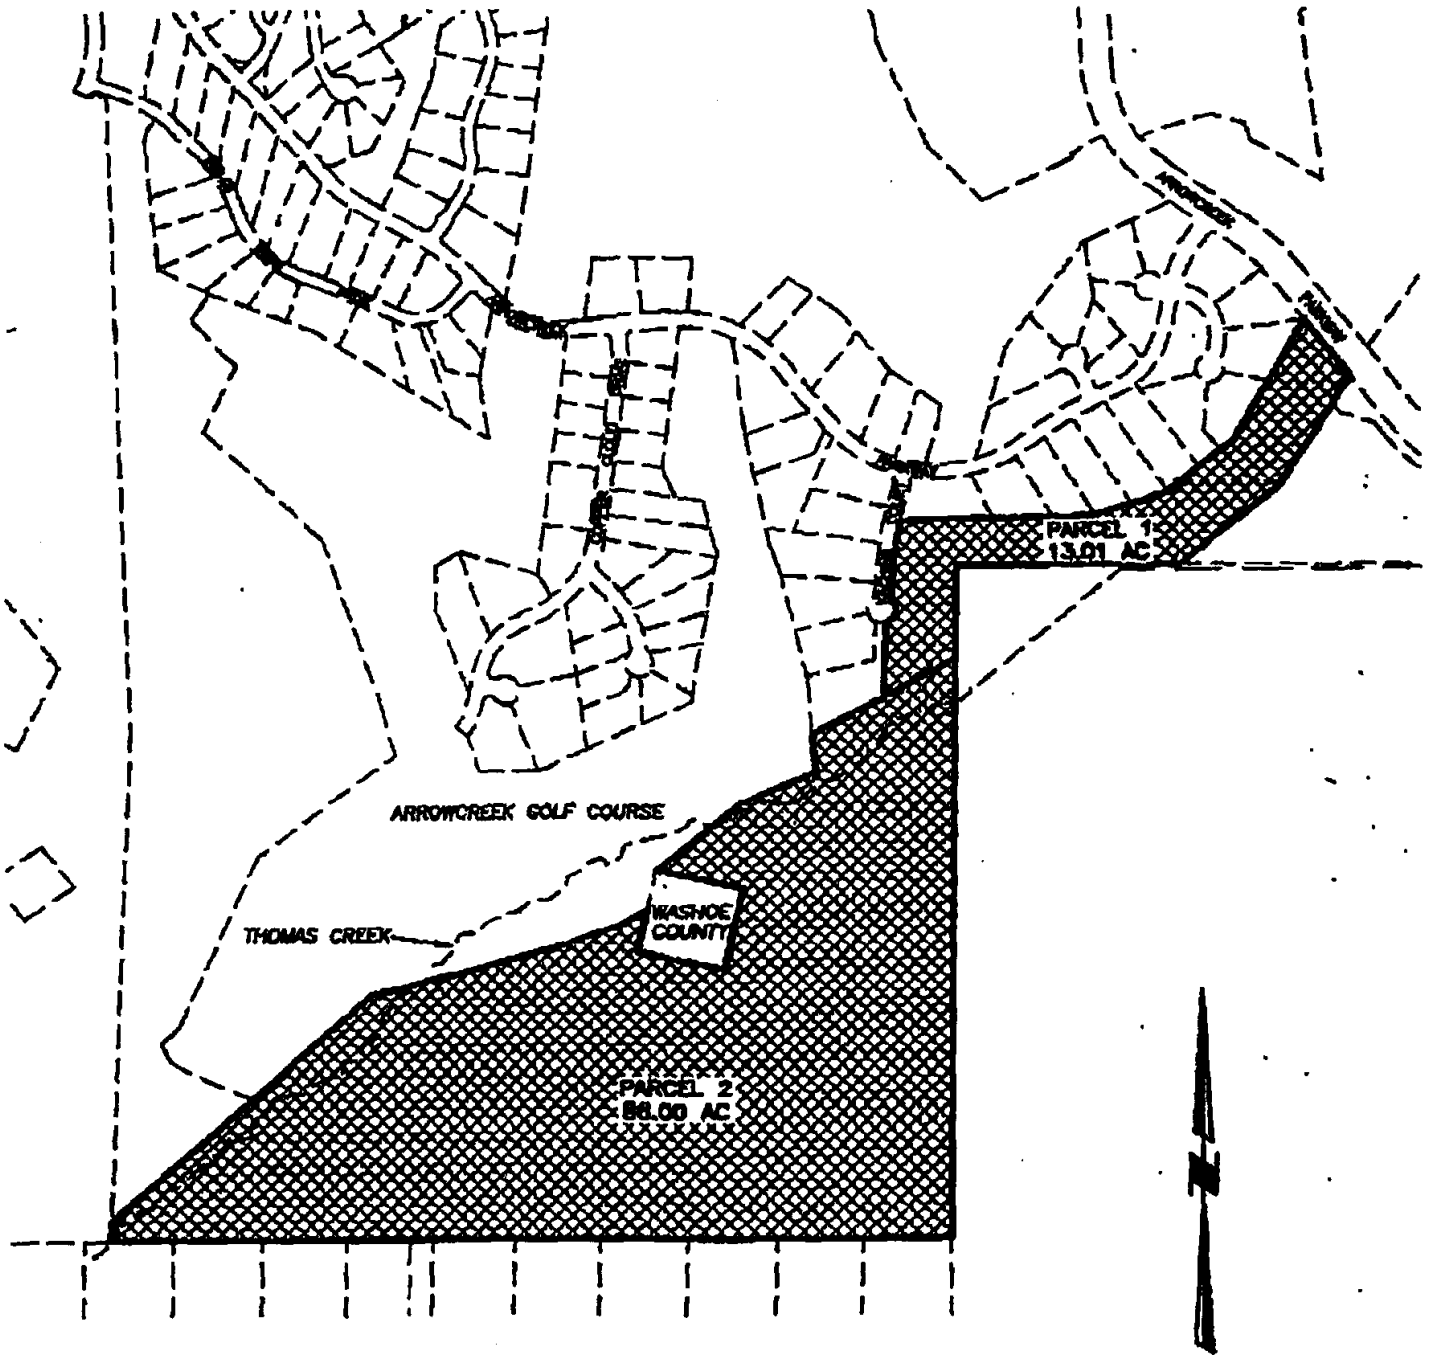

Parcel 2:

A parcel of land situate within the north one-half of Section 26, T18N, R19E, MDM, Washoe County, Nevada, being a portion of Parcel 4 of Parcel Map 3301, as shown on the plat thereof, recorded February 27, 1998, as Document No. 2183717, Official Records of Washoe County, Nevada; more particularly described as follows:

Commencing at the northeast corner of said Section 26;  
thence along the east line of said Section 26, S 00°41'04" W, 362.35 feet to the POINT OF BEGINNING;  
thence along the boundary line of said Parcel 4 the following twelve (12) courses and distances:  
S 61°56'16" W, 620.58 feet;  
S 04°56'53" E, 145.42 feet;  
S 66°19'53" W, 311.03 feet;  
S 49°29'09" W, 415.08 feet;  
S 77°46'57" E, 330.00 feet;  
S 12°13'03" W, 330.00 feet;  
N 77°46'57" W, 330.00 feet;  
N 12°13'03" E, 172.70 feet;  
S 56°29'11" W, 92.43 feet;  
S 68°59'35" W, 258.26 feet;  
S 75°39'35" W, 778.91 feet;  
S 48°28'07" W, 621.79 feet;  
thence continuing S 48°28'07" W, 695.68 feet to a point on the said boundary line of Parcel 4;  
thence along said boundary line the following three (3) courses and distances:  
S 02°15'30" W, 82.82 feet to a point on the east-west centerline of said Section 26;  
along said east-west centerline N 89°58'50" E, 3203.90 feet to the east one-quarter corner of said Section 26;  
along said east line of Section 26, N 00°41'04" E, 2276.96 feet to the point of beginning.

Containing 86.00 acres, more or less.

**EASEMENT FOR DRAINAGE AND UTILITIES**

THIS GRANT OF EASEMENT, made and entered into this \_\_\_\_ day of \_\_\_\_\_, 1999, by and between the **COUNTY OF WASHOE**, a political subdivision of the State of Nevada, hereinafter referred to as "Grantor"; and **SOUTHWEST POINTE ASSOCIATES, L.L.C.**, a Delaware limited liability company, **ARROWCREEK HOMEOWNERS ASSOCIATION**, a Nevada nonprofit corporation, and **ARROWCREEK GOLF HOLDINGS, L.L.C.**, a Delaware corporation, hereinafter referred to collectively as "Grantees".

**W I T N E S S E T H :**

For and in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, receipt is hereby acknowledged, Grantor hereby grants to Grantees a blanket easement for drainage of storm waters, utility facilities (gas, sewer, water, electric, cable TV and telephone) upon, over, across and through the land herein described, including the right of access upon said land for the purpose of construction and maintenance of improvements for said drainage and utility facilities.

The easement hereby granted is situated in the County of Washoe, State of Nevada, more particularly described in Exhibit "A" attached hereto and by this reference made a part hereof.

File:SW PointeEasement For Drainage.mgw  
April 28, 1999

This is a nonexclusive Grant of Easement and to the extent that other uses do not interfere with the use of said easement by Grantees as permitted herein, Grantor, its successors and assigns, shall be permitted to use the same for any purpose it may desire.

The covenants herein contained shall inure to the benefit of and shall be binding upon the executors, administrators, heirs, successors and assigns of the parties and shall be, and are, covenants running with the land binding upon said property of Grantor and for the benefit of Grantee.

TO HAVE AND TO HOLD, said easement unto the Grantees and unto their successors and assigns forever.

IN WITNESS WHEREOF, Grantor hereto has executed this Grant of Easement the day and year first above written.

**Re: ArrowCreek Open Space**

Dear Karen:

When we last met, approximately two weeks ago, you informed me that the document review to effectuate the phased open space transfers at ArrowCreek had progressed to the point in which you needed only confirmation from the district attorney's office that the documents were in order. Since that time I have not had any response from you on finishing document review.

We would like to move forward on this matter at your earliest convenience. Please advise me on when you think this process will be completed.

Sincerely,

ROBERT M. SADER

RECEIVED  
DEC 10 1998  
WASHOE COUNTY  
COMMUNITY DEVELOPMENT

**Subject:** ArrowCreek (Case No. DA9-1-93)

Dear Don and Kris:

This letter summarizes the modifications we would like to make to Condition #22. The revised street sections, which are attached, will be used in Units G and B in Phase I, Phase II, and all subsequent phases. The production builders in Phase I (i.e., Ryder Homes, Silver Star, and New Cities) are using different street sections, which the Washoe County Engineering Division determined to be in compliance with the tentative map conditions. These three builders will continue to use these street sections in their future phases located in Phase I.

22. The following roadway sections shall be applicable to the public and private on site streets shown on the tentative map. A traffic report shall be submitted with each tentative map and shall identify the ultimate average daily traffic on each street and shall make recommendations for geometric design (e.g., left turn storage capacity, site distance minimum required turning radius, etc.). The County Engineer shall be responsible for determining compliance with this condition.

- a. Private Common Driveway - No change.
- b. Rural Private -

Option 1: 24-foot ROW (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter; no parking either side. When a rural private street provides a connection between neighborhoods, a minimum 4-foot asphalt or decomposed granite path on one side of the street will be provided unless alternate provisions or locations for pedestrian paths can be provided and shown in the

Principal

Pedestrian Circulation Plan. When a connection between neighborhoods is not provided, no paths will be constructed. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)

Option 2: 27 foot ROW (maximum 200 ADT): minimum 22 foot pavement width; County Engineer-approved concrete header with roadside ditch both sides; no parking either side. When a rural private street provides a connection between neighborhoods, a minimum 4-foot asphalt or decomposed granite path on one side of the street will be provided unless alternate provisions or locations for pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. When a connection between neighborhoods is not provided, no paths will be constructed. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)

c. Local Private -

Option 1: 24-foot minimum ROW (200 - 500 ADT): minimum 22 foot pavement width; curb and gutter; no parking either side. A minimum 4-foot asphalt or decomposed granite path on one side of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)

Option 2: 27-foot minimum ROW (200 - 500 ADT): minimum 22 foot pavement width; County Engineer-approved concrete header with roadside ditch both sides; no parking either side. A minimum 4-foot asphalt or decomposed granite path on one side of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)

d. Collector Private -

Option 1: 26-foot minimum ROW (500 to 2000 ADT): minimum 24-foot pavement width; curb and gutter; no parking either side. A minimum 5-foot asphalt or decomposed granite path on one side of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to Street Sections.)

Option 2: 29 foot minimum ROW (500 to 2000 ADT): minimum 24-foot pavement width; County Engineer approved concrete header with roadside ditch both sides; no parking either side. A minimum 5-foot asphalt or decomposed granite path on-one side of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to Street Sections.)

- e. Collector Private - No change.
- f. Collector Private - No change.
- g. Minor Arterial, Private - No change.
- h. Minor Arterial, Public - No change.

Additionally, we would like to make one change to Exhibit E in the Development Standards Handbook. On page 2-15, under the heading Street and Median Guidelines, the sixth sentence reads as follows: "The developer is also responsible for installation and maintenance of all median landscaping and all landscaping along the edge of the minor arterial and collector streets." The proposed change would be modified to read: "The developer is responsible for installation and the Homeowners' Association is responsible for maintenance of all common area median landscaping and all common area landscaping along ArrowCreek Parkway." (The CC&Rs address maintenance and correspondence from Bob Sader is attached. Bob's letter addresses maintenance of all landscaping along ArrowCreek Parkway and maintenance of the ditches along rural, local, and collector streets.)

As you know, it was anticipated that the Development Agreement would periodically need to be amended and updated, and we provided examples of modifications that would be considered to be in substantial compliance with the overall character and design of the project. Such modifications can be approved by staff. Modifications to the street standards were among the changes that were considered to be in substantial compliance with the overall character of the project.

If you are in agreement with the preceding statements, please acknowledge by signing in the space provided. If you have any questions or need additional information, please contact me.

Sincerely,

Brita Tryggvi, AICP  
Principal

Re: ArrowCreek (Case No. DA9-1-93) Proposed Revision to Conditions

Dear Kris:

Brita Tryggvi of CFA, Inc. recently provided me your notes to Brita's letter of November 3, 1998 for a response relating to the questions you have raised concerning homeowners association maintenance of drainage facilities and landscaping.

Specifically, you requested verification of the responsibility of the ArrowCreek Homeowners Association for maintenance of some ditches which would no longer be in the right-of-way but instead be within lots, and landscaping along the edge of minor arterial and collector streets, as well as landscaping along ArrowCreek Parkway.

The ArrowCreek Declaration of Covenants, Conditions and Restrictions (CC&Rs) recorded as Document No. 2145699 authorized the association to maintain drainage ditches on lots, as well as landscaping areas along subdivision streets and ArrowCreek Parkway. Subsection I.2.g. defines common areas, among other things, as easements for drainage ways and facilities, and landscaping. Subsection II.1.a. authorizes the association to own easements for common area within the subdivision. Subsection II.1.d. authorizes the association to own or maintain off-site common area landscaping along Whites Creek Lane (the former name for what is now ArrowCreek Parkway).

The common practice is for the developer to create landscaping or drainage easements on final maps or by separately recorded easements for areas within the subdivision. Landscaping along the edge of right-of-ways will not require separate easements, since all streets within the subdivision are private and will be owned by the homeowners association after improvements are constructed. This will include streetscapes along those right-of-ways. Similarly, landscaping and medians will be part of the right-of-ways owned and maintained by the association. Since ArrowCreek Parkway (fka Whites Creek Lane) will be owned by the county outside the boundaries of the project, the usual county form of landscape maintenance agreement between the county and the association will need to be executed in order to authorize the association to maintain landscaping along this public right-of-way.

Kristine Klien  
December 9, 1998  
Page 2

Enclosed please find copies of the pages of the CC&Rs on which the subsections cited above are located. If you have any questions, please do not hesitate to contact me. I trust that this explanation of the CC&Rs resolves the questions raised on authorizing and requiring the ArrowCreek Homeowners Association to maintain drainage facilities on lots and landscaping areas along streets.

Sincerely,

ROBERT M. SADER, ESQ.

**ARROWCREEK**

**DECLARATION OF COVENANTS, CONDITIONS  
AND RESTRICTIONS**

BK 5016PC 993

RT M :

f.

I.2.g.

"Committee" means the ArrowCreek Design Review Committee.

"Common Area" or "common elements" means all of the real property designated as such in this Declaration or pursuant to final maps recorded within the Subdivision; and all real property interests (e.g., fee title or easements) acquired by the Association, whether from Declarant or otherwise, together in each instance with all improvements which may at any time be located or constructed thereon and owned by the Association, including, but not limited to the following types of improvements in the Common Area: swim and tennis facility, fencing, recreational and community facilities, recreational vehicle parking area, lakes, parks, paths, sidewalks, trails, open space, fences, gates, gatehouses, signs, entry ways, drainage ways and drainage facilities, private streets and curbs, private security, lighting, snow removal and storage areas, landscaping, fire and fuelbreaks, golf cart crossings, residential parking areas and surface water retention areas.

As also specified in Article XII, Section 10, an area of the Subdivision of approximately 1,500 acres (or as otherwise approved by Washoe County) is required to be dedicated to an entity approved by the County as public open space. Upon said dedication, which will probably be conveyed incrementally as residential development occurs, areas so dedicated shall not be (or shall cease to be) Common Area and this Declaration shall be terminated as to such areas. Said dedication may be subject to conservation easements or covenants against uses which are not compatible with open space imposed by Declarant.

- h. "Declarant", when used herein, means collectively the Southwest Pointe and the Redfield Trust, unless an individual Declarant is specified. All rights and obligations of Declarant hereunder or pursuant to law are hereby assigned and assumed (except the right to withdraw real estate) by Southwest Pointe, including all voting power in the Association, all financial obligations and all requirements of consent and approval.
- i. "Declaration" means this Declaration and any future amendments hereto.
- j. "Equivalent Lots" shall define the allocated interests in the Association (voting power, assessment obligations and other rights and responsibilities) of the Nonresidential Areas Owners, as specified in subsection (ee) of this Section and Article VII, Section 2.

Equivalent Lots are created on the date the Assessment Threshold for each Nonresidential Area is reached (as specified in subsection (ee) of this Section), and prior to that date Nonresidential Areas Owners have no membership in the Association, nor any allocated interests.

BK50 10609 105XB

- c. For Lots delineated on a final map, if two or more adjacent Lots are purchased by a person or developed by Declarant with the intent of constructing only one single family dwelling on the Lots, then upon notice of said intent to Association, said Lots shall be considered as one Lot for the purpose of allocated interests in voting and assessments under subsection (dd) of Section 2 of this Article.

**Section 4. Lot Subdivision.** A Lot not delineated on a final map may be subdivided into two or more Lots by Declarant at the time it is delineated on a final map, so long as each Lot in the Subdivision contains the minimum square footage required by tentative map and the total Lots in the Subdivision do not exceed 1090 (or additional Lots as allowed herein), without following the procedure prescribed in NRS 116.2113 and without any approval by the Association.

**Section 5. Modification.** The provisions of this Article I may not be modified, amended, terminated or abridged without the consent of Declarant.

## ARTICLE II ARROWCREEK HOMEOWNERS ASSOCIATION

**Section 1. Purpose.** The purpose of the Association shall be to:

- a. Own and maintain all easements and deeded real property for Common Area within the Subdivision; including without limitation the funding, operation and maintenance of the following common elements: recreational and community facilities; lakes; parks; paths; sidewalks; trails; open space; fences; landscaping; gates; gatehouses; signs; entry ways; drainage ways and drainage facilities; private streets and curbs; private security, recreational vehicle storage, snow removal and storage areas, landscaping, fire and fuelbreaks, golf cart crossings, residential parking areas, lighting, and surface water detention areas.
- b. Provide for removal of ice and snow from roads and parking areas owned by the Association at any time when such a condition may restrain access within the Subdivision. The Association shall either contract for snow and ice removal or acquire equipment and hire personnel to effect the provisions of this subsection. In the event that snow removal operations require exporting of snow or ice from roads or parking areas, said material may be exported outside the perimeter of the Subdivision to a suitable location, said material may be deposited within the perimeter of the Subdivision on an appropriate easement, open area or Common Area in such a manner as to not unreasonably restrict access or create a unreasonable hazard to any road, parking area or common walkway.
- c. Maintain controlled access at the entrance gate. Security personnel may be employed as deemed necessary by the Board.

BK 50 - PG 0907

II. 1. d.

Enforce and administer any provisions of this Declaration pertaining to Association's rights, obligations, powers and duties as required by Washoe County; including, at a minimum but without limitation, the funding of the maintenance, replacement and perpetuation of the following Subdivision amenities, if and when constructed:

- (1) Private roads within the Subdivision.
- (2) Swim and Tennis Club.
- (3) Staffing of maintenance and security forces, if any.
- (4) Common Area landscaping and lighting.
- (5) Entrance gates.
- (6) Snow removal and storage areas.
- (7) Common Area landscaping including along private streets, or landscaping along Whites Creek Lane.
- (8) Fire and fuelbreaks.
- (9) Detention basins and the accumulated sediment.
- (10) Equestrian/pedestrian trails.
- (11) Bicycle and pedestrian paths.
- (12) Golf cart crossings.
- (13) Off-site residential parking areas.

The Association shall have no other purpose than those specified herein, and shall expressly be prohibited from representing the Owners and residents of Lots within the Subdivision on issues of land use, planning, municipal annexation, master plan amendments, growth, area development or similar matters.

The Association shall purchase any and all equipment, materials and supplies necessary to undertake its duties imposed by this Declaration, its Articles and By-Laws. The Association may purchase any equipment, materials and supplies from the Declarant provided the purchase price shall be the fair market value thereof.

The Association may, but shall not be obligated, to maintain or support certain activities within the Subdivision designed to make the Subdivision safer than it otherwise might be. Neither the Association nor the Declarant shall in any way be considered insurers or guarantors of security within the Subdivision, nor shall any of them be held liable for any loss or damage by reason of failure to provide adequate security or of ineffectiveness of security measures undertaken. No representation or warranty is made that any fire protection system, burglar alarm system, security personnel or other security system cannot be compromised or circumvented, nor that any such systems or security measures undertaken will in all cases prevent loss or provide the detection or protection for which the system is designed or intended. Each Owner acknowledges, understands and covenants to inform its tenants that the Association and the Declarant, are not insurers or liable to persons living in or visiting the Subdivision for conduct resulting from acts of third parties.

**Section 2. Formation and Management Under Article 3 of NRS Chapter 116.**

The Association shall be a nonprofit Nevada corporation formed under Chapter 82 of the Nevada Revised Statutes. The Association is not authorized to have and shall not issue any capital

Re: ArrowCreek Open Space Dedication

Dear Karen and Don:

Some time ago Brita Tryggvi and I met with you to discuss the procedures for incremental dedication of  $\pm 1,500$  acres of open space to Washoe County as development progresses at ArrowCreek. We agreed that a deed and a restrictive covenant regarding land uses would best effectuate the development agreement required for phased dedications and future use restrictions.

We believe the first two parcels of open space adjacent to existing final mapped areas should now be dedicated. Enclosed please find drafts of a deed and restrictive covenant for this purpose, as well as a site map showing you the location of these parcels. Parcel 1 (13.01 acres) has been created by a final map. Parcel 2 will be created by a record of survey, which has been submitted to the County Engineer for approval.

Please review these documents and confirm they are in order. I will then supply originals to one of you (you choose) for agendizing acceptance by the BBC.

Sincerely,

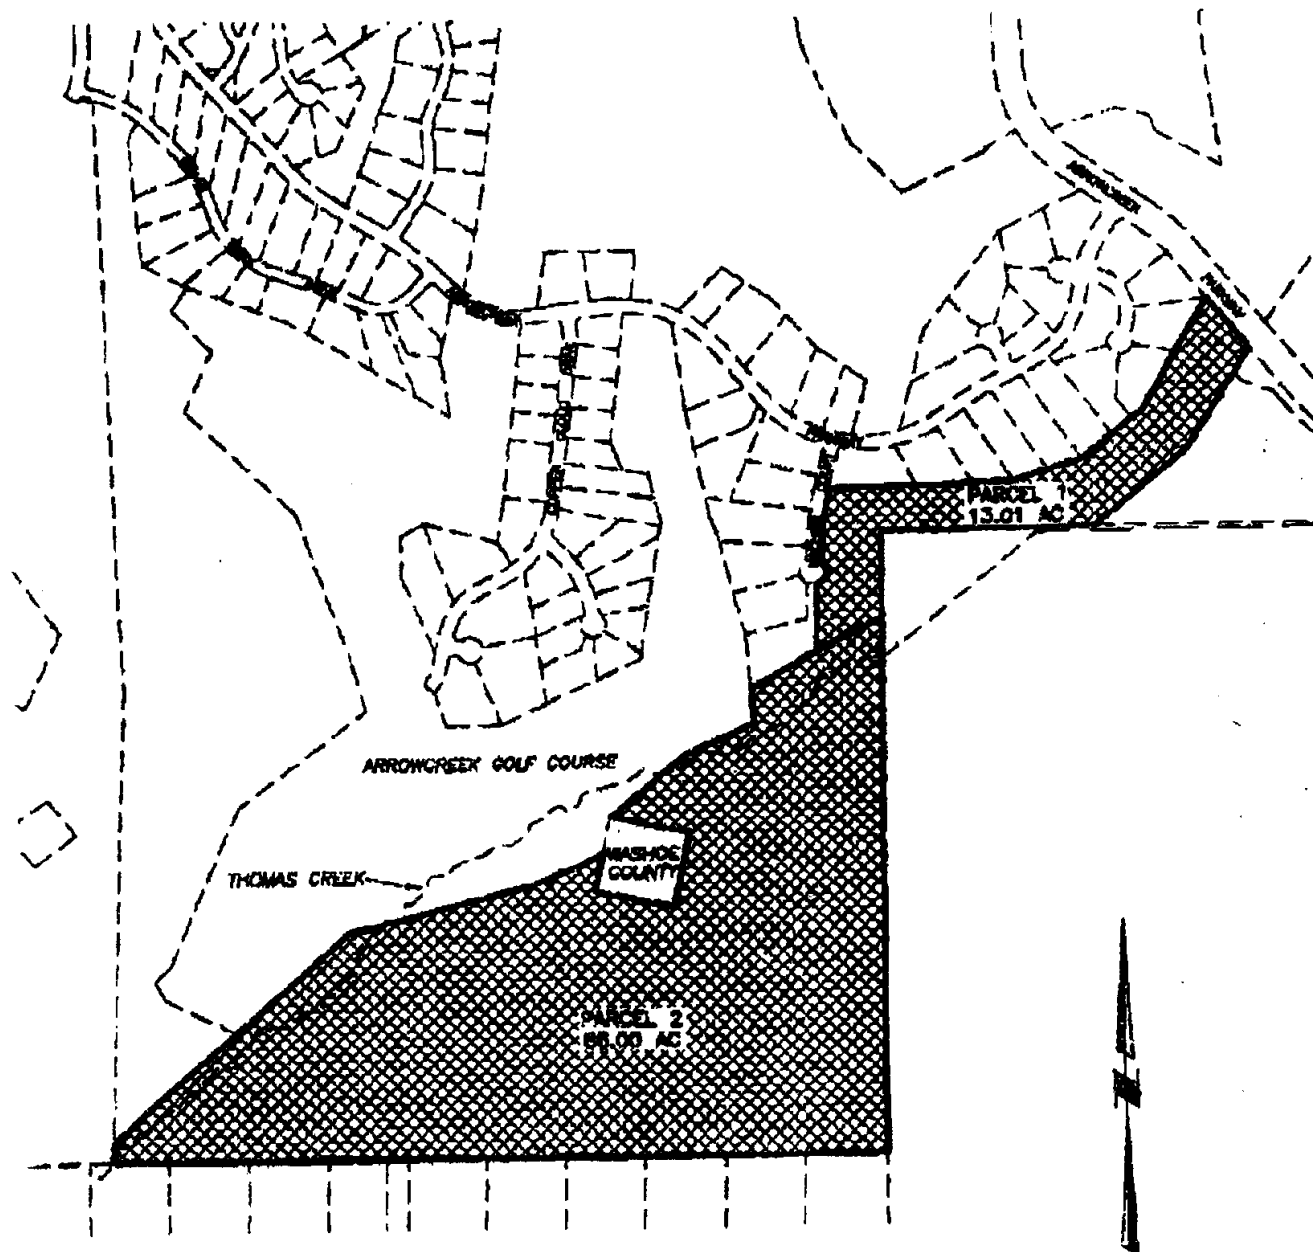

ROBERT M. SADER

## EXHIBIT "A"

## DESCRIPTION

Parcel 1:

A parcel of land situate within Sections 23, 24 and 26, T18N, R19E, MDM, Washoe County, Nevada; more particularly described as follows:

Parcel A of Arrowcreek Subdivision, Unit 1, as shown on the plat thereof, recorded October 17, 1997, as Tract Map 3461, Document No. 2145697, Official Records of Washoe County, Nevada.

Containing 13.01 acres, more or less.

Parcel 2:

A parcel of land situate within the north one-half of Section 26, T18N, R19E, MDM, Washoe County, Nevada, being a portion of Parcel 4 of Parcel Map 3301, as shown on the plat thereof, recorded February 27, 1998, as Document No. 2183717, Official Records of Washoe County, Nevada; more particularly described as follows:

Commencing at the northeast corner of said Section 26;  
thence along the east line of said Section 26, S 00°41'04" W, 362.35 feet to the POINT OF BEGINNING;  
thence along the boundary line of said Parcel 4 the following twelve (12) courses and distances:  
S 61°56'16" W, 620.58 feet;  
S 04°56'53" E, 145.42 feet;  
S 66°19'53" W, 311.03 feet;  
S 49°29'09" W, 415.08 feet;  
S 77°46'57" E, 330.00 feet;  
S 12°13'03" W, 330.00 feet;  
N 77°46'57" W, 330.00 feet;  
N 12°13'03" E, 172.70 feet;  
S 56°29'11" W, 92.43 feet;  
S 68°59'35" W, 258.26 feet;  
S 75°39'35" W, 778.91 feet;  
S 48°28'07" W, 621.79 feet;  
thence continuing S 48°28'07" W, 695.68 feet to a point on the said boundary line of Parcel 4;  
thence along said boundary line the following three (3) courses and distances:  
S 02°15'30" W, 82.82 feet to a point on the east-west centerline of said Section 26;  
along said east-west centerline N 89°58'50" E, 3203.90 feet to the east one-quarter corner of said Section 26;  
along said east line of Section 26, N 00°41'04" E, 2276.96 feet to the point of beginning.

Containing 86.00 acres, more or less.

DRAFT

1 WHEN RECORDED, RETURN TO:

6 **RESTRICTIVE COVENANT**

7 THIS RESTRICTIVE COVENANT ("Covenant") is made as of this \_\_\_\_\_ day of  
8 \_\_\_\_\_, 1998, by **SOUTHWEST POINT ASSOCIATES, L.L.C.**, a Delaware  
9 limited liability company ("SPA")

10 **1. GENERAL**

11 1.1 SPA is the owner and developer of certain real property located in Washoe County,  
12 Nevada known as a portion of ArrowCreek (ArrowCreek is described in Washoe County Case No  
13 DA9-1-93).

14 1.2 A portion of ArrowCreek owned by SPA is certain land more particularly described  
15 in Exhibit "1", attached hereto and incorporated herein, (the "Restricted Parcel").

16 1.3 SPA intends hereby to restrict any owner's or occupant's right to use all or any portion  
17 of the Restricted Parcel as specified herein.

18 1.4 The covenants and restrictions on the Restricted Parcel specified herein are for the  
19 benefit of SPA personally and for the owners of property in ArrowCreek, as represented by the  
20 ArrowCreek Homeowner's Association, a Nevada nonprofit corporation ("HOA"). The right to  
21 enforce this Restrictive Covenant shall be granted only to SPA or HOA, or a successor by an express  
22 assignment, recorded against Exhibit "1", of SPA's or HOA's rights hereunder.

23 1.5 SPA intends to convey all its right, title and interest in the Restricted Parcel to Washoe  
24 County, a political subdivision of the State of Nevada, ("County"). County agrees, by accepting this  
25 Covenant, to comply with all use restrictions specified herein, as well as other provisions hereof.

26 **2. USE RESTRICTIONS**

27 2.1 Use of the Restricted Parcel shall be restricted, except as otherwise provided in this  
28 Section 2, to only those uses allowed in the Open Space land use regulatory zone of the Washoe  
County Development Code (Section 110.106.70), but excluding therefrom any active recreation  
facilities (parks, playgrounds, sports fields and courts) except as allowed in Subsection 2.2 below.  
Notwithstanding the foregoing, installation and maintenance of utility facilities and access roads  
thereto (e.g., sewer, water, gas, telephone, electric, storm drainage, cable TV) and the creation and  
maintenance of any firebreaks required by state or local agencies shall be allowed, as well as any  
ancillary or associated uses to ArrowCreek allowed by County.

2.2 Limited use of the Restricted Parcel for either of two public trails is allowed, Thomas  
Creek Trail or the McKay Flume Trail, as delineated on the Washoe County Regional Trail And Park  
Plan, provided the use of each trail is limited to the following activities

- (a) Construction, repair and maintenance of a trail for recreational uses, including, but not limited to, public hiking, bicycle riding, jogging, horseback riding and other pedestrian and equestrian uses. Motorized vehicles of all kinds shall be

1  
2

28

prohibited and blocked from using the trail, except for County-authorized vehicles used for construction, maintenance or repair of the easement area.

(b) Use of the trail by the general public for recreational purposes, subject to any regulations of public use imposed by County, however, common park facilities shall not be allowed, including, but not limited to, community or neighborhood parks, children's playgrounds, ballfields, tennis courts, basketball courts, group picnic access, swimming pools, and other active recreational uses other than fishing and use of the walking-jogging-equestrian path or trail.

(c) Installation, maintenance and repair of landscaping, turf or gardens, if any.

**3. RESTRICTIONS RUN WITH THE LAND.**

The use restrictions on the Restricted Parcel set forth in this Covenant shall be burdens on the Restricted Parcel and shall run with the land.

**4. SUCCESSORS AND ASSIGNS.**

This Covenant and the restrictions created hereby shall be binding upon any party owning any interest in all or any portion of the Restricted Parcel, its heirs, personal representatives, successors and assigns; provided, however, that if any such party transfers all or any portion of its interest in such Restricted Parcel, such party shall thereupon be released and discharged from any and all obligations as owner in connection with the interest transferred by it arising under this Covenant after the transfer.

**5. DURATION AND TERMINATION.**

Except as otherwise provided herein, the term of this Covenant shall be for ninety-nine (99) years from the date hereof, after which time this Covenant shall have no further force and effect.

**6. INJUNCTIVE OR ENFORCEMENT RELIEF.**

In the event of any violation or threatened violation by any person of any of the restrictions contained in this Covenant, those parties entitled to enforce this Covenant shall have the right to enjoin such violation or threatened violation or otherwise enforce the provisions hereof in a court of competent jurisdiction. The right of injunction shall be in addition to all other remedies set forth in this Covenant or provided by law.

**7. MODIFICATION AND TERMINATION.**

This Covenant may not be modified in any respect whatsoever or terminated, in whole or in part, except with the written consent of SPA or HOA, as specified in Subsection 1.4 above, which consent must be recorded in the office of the Recorder of Washoe County.

**8. WAIVER.**

The failure to insist upon strict performance of any of the restrictions or other terms and conditions contained herein shall not be deemed a waiver of any rights or remedies, and shall not be deemed a waiver of any subsequent breach or default in the performance of any of the restrictions, or other terms and conditions contained herein.

1 9. **ATTORNEY'S FEES**

2 In the event a party entitled to enforce this Covenant initiates or defends any legal action or  
3 proceeding to enforce or interpret any of the terms of this Covenant, the prevailing party in any such  
4 action or proceeding shall be entitled to recover from the losing party in any such action or  
5 proceeding its reasonable costs and attorney's fees (including its reasonable costs and attorney's fees  
6 on any appeal).

5 10. **SEVERABILITY**

6 If any term or provision of this Covenant or the application of it to any person or circumstance  
7 shall to any extent be invalid or unenforceable, the remainder of this Covenant or the application of  
8 such term or provision to persons or circumstances, other than those as to which it is invalid or  
9 unenforceable, shall not be affected thereby, and each term and provision of this Covenant shall be  
10 valid and shall be enforced to the extent permitted by law.

9 11. **CAPTIONS AND HEADINGS**

10 The captions and headings in this Covenant are for reference only and shall not be deemed  
11 to define or limit the scope or intent of any of the terms, covenants, conditions or agreements  
12 contained herein.

12 12. **CONSTRUCTION**

13 In construing the provisions of this Covenant and whenever the context so requires, the use  
14 of a gender shall include all other genders, the use of the singular shall include the plural, and the use  
15 of the plural shall include the singular

15 13. **RECORDATION**

16 This Covenant shall be recorded against the Restricted Parcel in the office of the Washoe  
17 County Recorder.

18 EXECUTED as of the day and year first above written.

EXHIBIT "A"  
DESCRIPTION

Parcel 1:

A parcel of land situate within Sections 23, 24 and 26, T18N, R19E, MDM, Washoe County, Nevada; more particularly described as follows:

Parcel A of Arrowcreek Subdivision, Unit 1, as shown on the plat thereof, recorded October 17, 1997, as Tract Map 3461, Document No. 2145697, Official Records of Washoe County, Nevada.

Containing 13.01 acres, more or less.

Parcel 2:

A parcel of land situate within the north one-half of Section 26, T18N, R19E, MDM, Washoe County, Nevada, being a portion of Parcel 4 of Parcel Map 3301, as shown on the plat thereof, recorded February 27, 1998, as Document No. 2183717, Official Records of Washoe County, Nevada; more particularly described as follows:

Commencing at the northeast corner of said Section 26;  
thence along the east line of said Section 26, S 00°41'04" W, 362.35 feet to the POINT OF BEGINNING;  
thence along the boundary line of said Parcel 4 the following twelve (12) courses and distances:  
S 61°56'16" W, 620.58 feet;  
S 04°56'53" E, 145.42 feet;  
S 66°19'53" W, 311.03 feet;  
S 49°29'09" W, 415.08 feet;  
S 77°46'57" E, 330.00 feet;  
S 12°13'03" W, 330.00 feet;  
N 77°46'57" W, 330.00 feet;  
N 12°13'03" E, 172.70 feet;  
S 56°29'11" W, 92.43 feet;  
S 68°59'35" W, 258.26 feet;  
S 75°39'35" W, 778.91 feet;  
S 48°28'07" W, 621.79 feet;  
thence continuing S 48°28'07" W, 695.68 feet to a point on the said boundary line of Parcel 4;  
thence along said boundary line the following three (3) courses and distances:  
S 02°15'30" W, 82.82 feet to a point on the east-west centerline of said Section 26;  
along said east-west centerline N 89°58'50" E, 3203.90 feet to the east one-quarter corner of said Section 26;  
along said east line of Section 26, N 00°41'04" E, 2276.96 feet to the point of beginning.

Containing 86.00 acres, more or less.

Project No. 88-003.20  
February 13, 1996

RECEIVED  
FEB 15 1996  
DEVELOPMENT REVIEW

Mr. Don Young, Planner  
Department of Development Review  
P. O. Box 11130  
Reno, NV 89520

**Subject: Southwest Pointe**

Dear Don:

At our meeting on February 1, we discussed several clarifications and modifications to the Conditions of Approval for Southwest Pointe which we would like to present to the Planning Commission and the Board of County Commissioners. Those changes are summarized below. Deletions are ~~struck thru~~ and additions are in *italic*. One of the more significant modifications has to do with Condition #26, which pertains to street standards for public and private roads. We are requesting that the primary loop road, which will have either an 80-foot or a 60-foot right-of-way, be private rather than public and that we have the option of installing a gate at the point where Whites Creek Lane becomes a private road

**Conditions for Development Agreement Case No. DA9-1-93**

- 2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format shall be made a part of the final development agreement. ~~For the Phase-I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase-I~~

Samuel Chacón, P.E.  
President  
Bryan Sprague, P.E.  
Vice President  
Brita Tryggvi, A.I.C.P.  
Principal  
Greg Doerr, A.I.C.P.  
Principal

~~tentative map and special use permit applications shall be submitted to Department of Development Review staff.~~

**Reason for Modification:** The final development agreement will be recorded this spring; therefore, there is no reason to prepare a draft statement of compliance because the Phase I applications will not be submitted before the final development agreement is approved.

4. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's office and the development review staff *prior to final map approval*. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. . .

**Reason for Modification:** To clarify when the CC&Rs will be prepared.

- ~~12. The project shall be developed in three phases. Phase I includes a tentative map for 436 lots, an 18-hole golf course, the village center, and driving range. Phase II will include an additional nine holes, the equestrian center and a tentative map for approximately 220 dwelling units. Phase III includes the remaining 434 lots and the last nine holes of golf. Modifications to the proposed phasing plan may be made if mutually agreeable to the developer and Washoe County. These modifications may include the commercial portion of the project and the second 18-hole golf course, which may be constructed during Phase II or Phase III.~~

**Reason for Modification:** This condition is unnecessary because the previous condition states that the contents of the final development agreement must conform to the provisions of Article 814. Section 110.814.75 states that the final development agreement must include a development schedule that indicates the phases in which the land subject to the development agreement will be built and the approximate dates for the completion of each phase.

14. The developer shall provide the Department of Development Review staff with a ~~monthly~~ *quarterly* report indicating ~~the number of building permits activity issued~~, once residential construction has started.

**Reason for Modification:** Monthly is too frequent, and quarterly should be often enough. The scope of the report was broadened to include all building activity (e.g., golf course, infrastructure) rather than simply an inventory of building permits.

20. Prior to final approval of the development agreement, the developer for Southwest Pointe shall petition the Washoe County Board of County Commissioners to create a Special Assessment District for the purpose of financing the construction of Whites Creek Lane from the project site to Wedge Parkway and other roads as defined in the SAD agreement. In the event that a special assessment district is not created, the developer shall construct Whites Creek Lane, as outlined in Condition No. 16 and 18, from the project site to Wedge Parkway, to the satisfaction of the County Engineer.

~~Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following not to the satisfaction of the Development Review staff.~~

#### NOTE

~~An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge be less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.~~

**Reason for Modification:** The county has approved the Regional Road Impact Fee, which goes into effect this month. As a result, the second half of this condition is no longer necessary.

26. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street.
- d. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36-foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted on both sides. A minimum ~~five (5)~~ *four (4)* foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
  - ~~e. Public - 60 foot ROW collector street (2000 ADT to 9600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt path one side; residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.~~
  - f. ~~Public-Private~~ - 80 foot ROW ~~minor arterial collector~~ street (*up to 9600 ADT to 10,830 ADT*): A minimum 11 foot center median from curb face to curb face, ~~29.5~~ 20 foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; a minimum four (4) foot meandering asphalt path both sides; no residential driveway access allowed.
  - g. Public - 100 foot ROW ~~major-minor~~ arterial street (~~more than~~ *up to 10,800 ADT*): *A minimum 20 foot center median from curb face to curb face, 29.5 foot roadway section curb face to curb face on either side of the*

*median; curb and gutter on both sides; no parking either side; a six (6) foot concrete sidewalk both sides. A gate may be installed at the point where Whites Creek Lane becomes a private road.*

**Reason for Modification:** To be consistent with Washoe County Street Design Standards, to create a hierarchy of paths, and to change some of the public streets to private streets.

33. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs that are longer than ~~500~~ 1,500 feet to the satisfaction of the County Engineer and the applicable fire protection agency. These roads shall have a 30-foot access easement with a minimum 20-foot width of ~~6 inches of Type 2 Class B aggregate base. 2.5 inches of asphalt concrete pavement on an engineered gravel base.~~ The roads shall be controlled by emergency access gates and shall be posted with signs stating "For emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer.

**Reason for Modification:** The county has adopted new standards for emergency access roads since this project was approved. The proposed change is consistent with the new standards.

34. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. ~~The emergency access road shall be constructed within a 30-foot access easement to a minimum 20 foot width with 4 inches of Type 2 Class B aggregate base.~~

**Reason for Modification:** The last sentence repeats Condition #33.

40. Off-site parking areas shall be provided within ~~300~~ 500 feet of homes that have lots ranging in size between 12,000 square feet and 0.5 acre . One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the tentative map(s), to the satisfaction of Washoe County Department of Development Review and the Developer.

**Reason for Modification:** To avoid having a multitude of guest parking areas with 1 or 2 spaces, the spacing requirement was increased to 500 feet so that the guest parking areas will consist of 4 or 5 spaces. Guest parking areas will be added to the neighborhoods with 0.5 acre lots because on-street parking will be prohibited on the private streets and the front yard setback can be reduced with side-entry and detached garages.

43. Regulatory signs must be installed at the juncture of all public streets with a private street *and at intersections along the primary loop road* to the satisfaction of the County Engineer. Said sign shall state: "Private street not maintained by county." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.

**Reason for Modification:** Since there is only one location where a public street intersects with a private street (i.e., at the main project entrance), there would only be one sign. The county staff wants signs at additional locations and, therefore, the suggested wording to add "at intersections along the primary loop road."

51. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:
  - a. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, ~~the Washoe County Parks and Recreation Department for a neighborhood park~~, or revert to open space.
  - b. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within 5 years of the approval of the final development agreement. If construction is not started by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the

Washoe County School District for a middle school, ~~the Washoe County Parks and Recreation Department for a neighborhood park,~~ or revert to open space.

- c. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, ~~the Washoe County Parks and Recreation Department for a neighborhood park,~~ or revert to open space.
- d. If the detention basin is constructed, Washoe County shall pay fair market value for the property.

**Reason for Modification:** We have been working with Karen Mullens, Washoe County Parks and Recreation Department, to identify a neighborhood park that is not adjacent to the school. The preferred location is adjacent to Thomas Creek on the south side of Whites Creek Lane.

~~79. The project shall be designed to accommodate a gravity flow sanitary sewer system within the boundaries of the subdivision. Such design shall be to the satisfaction of the Utility Division.~~

**Reason for Modification:** According to Terri Svetich, Washoe County Utility Division, this is not a Utility Division condition and can be deleted.

~~90. Should the proposed "off stream" location for the flood detention facility proposed in the 1990 Kennedy/Jenks report not be dedicated for this purpose, a minimum ten acre site for an elementary and a minimum 25 acre site for a middle school shall be offered for dedication. If the "off-stream" flood control facility is dedicated to Washoe County, a 10-acre site for the elementary school shall be offered for dedication. If the area for the "off-stream" facility is dedicated, but the county has not complied with Condition No. 51, the use for the area shall revert back to a school site and/or a park site (if requested by Washoe County) as proposed by the developer. If a school or park site is not requested by Washoe County, this area shall remain as an open space buffer.~~

**Reason for Modification:** The special use permit for the elementary school has already been approved. The elementary school will be located on a 17-acre parcel on the north side of Whites Creek Lane. This elementary school site is not impacted by the flood control facility. A neighborhood park site has also been proposed on the south side of Whites Creek Lane.

92. A minimum one-acre site shall be offered for dedication *prior to approval of a final map*, if requested by the applicable fire protection agency, for a fire station. The developer shall enter into talks with the applicable fire protection agency for any other requirements, such as, a fire station site, manpower and equipment needs, or for coordination with other developments that have similar requirements.

**Reason for Modification:** To clarify when the fire station site must be dedicated.

95. ~~Unless the off-stream site is dedicated to the county,~~ A minimum 10-acre public park site shall be offered for dedication to the county. A sketch plan ~~has been submitted, which if conceptually approved by the county,~~ should be included in the final development agreement. The final park design shall be mutually agreeable to the county and the developer. The developer will construct the recreation facilities in the park and then be reimbursed for the cost of the construction from the Residential Construction Tax. The responsibility of park maintenance shall be negotiated by the developer and Washoe County prior to the approval of the final development agreement.

**Reason for Modification:** The park site has nothing to do with the off-stream detention facility, therefore, this reference is inaccurate. The sketch plan that is referred to in this condition has been changed and the park site has been moved, therefore, this reference is also inaccurate.

97. Prior to approval of the final development agreement, the developer shall submit ~~schematic landscaping and architectural design guidelines~~ a *Development Standards Handbook* for the entire project to the Design Review Committee for its review and approval. These guidelines shall

address, but not be limited to, type and color of building material, general architectural design, fencing, landscaping material (if plant material: type, size at time of planting, maturation size at full growth, period of time between planting and full growth), landscaping location, landscaping irrigation system, and financial assurances that landscaping will be planted and maintained.

**Reason for Modification:** To make the wording consistent with Article 814, Development Agreements.

~~99. Homes located on 12,000 square foot lots shall have a minimum 160 square foot storage space added in their garages, if only one garage space is provided. All homes will have a minimum two car garage.~~

**Reason for Modification:** No homes will be constructed with one garage space.

**Tentative Map Conditions for Development Agreement Case No. DA9-1-93**

When the preliminary development agreement was submitted in 1993, a tentative map was included with the application. This tentative map, however, was never presented to either the Planning Commission or the Board of County Commissioners because of the changes that were made to the project during the approval process. These changes made the tentative map inaccurate and therefore, it could not be acted upon.

Even though the tentative map was not brought to the Planning Commission or the Board, conditions of approval for the tentative were included with the development agreement. This has resulted in a confusing situation, which we would now like to clarify. Therefore, we are suggesting that the tentative map conditions that were approved with the preliminary development agreement be used as the framework for preparing the conditions of approval for the tentative maps that will be submitted in the future and, wherever appropriate, those original conditions would appear as future tentative map conditions.

**Final Map Conditions for Development Agreement Case No. DA9-1-93**

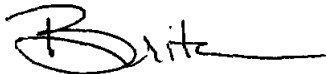

After reviewing the final map conditions, it is our opinion that all of these conditions, with the exception of one, are already addressed in either the conditions of approval for the development agreement or the tentative map. Therefore, we are suggesting that these conditions, with the exception of Condition #46, be deleted. Condition #46, which address a District Health Department requirement pertaining to recordation of a final map prior to issuance of a grading permit, would be added to the conditions of approval for the development agreement.

**Special Use Permit Application and Construction Conditions for Development Agreement Case No. DA9-1-93**

We suggest that these conditions be handled in a manner similar to the tentative map conditions -- i.e., as a framework for preparing the conditions of approval for the special use permits that will be submitted in the future and, wherever appropriate, those original conditions would appear as future special use permit conditions. .

Thank you for your consideration of this request. Please call me if I can provide you with additional information or answer any questions.

Sincerely,

Brita Tryggvi, AICP  
Principal

WASHOE COUNTY  
DEVELOPMENT REVIEW

August 2, 1995

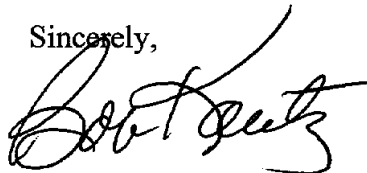

Mr. Don Young  
Washoe County Planning  
Development Review  
P.O. Box 11130  
Reno, NV. 89520

Dear Don:

Enclosed, please find the original copy of the report regarding the cultural resources on the additional 22 acres of the Southwest Pointe property that was necessitated by the expansion of the golf course across the creek at this location. If you will recall, I spoke to you about this engineering modification of the development's boundary by phone. Also, please be informed that the title of this submission contains the phrase "Addendum No. 2" because I have submitted another addendum to the SHPO concerning the results of the obsidian hydration and sourcing program at these sites and I entitled that brief letter report, "Addendum No. 1".

If you have any questions, please give me a call. When this report is formally accepted by SHPO, I will forward a copy on to the Washoe Tribe.

Sincerely,

Robert R. Kautz, Ph.D.  
President

WASHOE COUNTY  
DEVELOPMENT REVIEW

Mr. Don Young  
Project Planner  
Department of Development Review  
1001 E. Ninth Street  
PO Box 11130  
Reno, NV 89520-0027

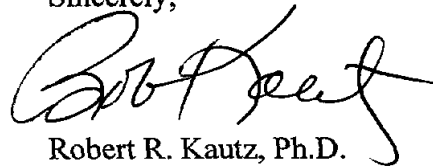

Dear Don:

Enclosed, please find a letter I sent to Ms. Rebecca Palmer at the SHPO discussing the complicated assignment of trinomials to the sites we described in our report entitled, *A Cultural Resources Assessment of the [REDACTED] Division, Washoe County, Nevada*, that you had forwarded on to her as per your letter dated May 31. I believe the letter is self-explanatory, but if you should have questions please call.

I also want to let you know that Mr. Jeff Dingman, the developer, has extended the project another twenty acres or so to the south of the creek. I found this out only about two weeks ago and have already had the new areas surveyed. We will be submitting that small increment to you as an addendum to the original report.

Thanks for your help.

Sincerely,

Robert R. Kautz, Ph.D.  
President

Ms. Rebecca Palmer  
Nevada State Historic Preservation Office  
Capitol Complex  
100 Stewart Street  
Carson City, NV 89710

Dear Rebecca:

I am writing to clarify the issue regarding the appropriate nomenclature for the prehistoric archaeological sites on the banks of Thomas Creek as addressed in my report entitled, *A Cultural Resources Assessment of the Southwest Pointe Subdivision, Washoe County, Nevada*, that was submitted in March and that you reviewed in June.

As you know, this is an area of tightly packed archaeological resources that were mapped fairly unevenly in the past. The analysis that follows is the result of reconducting the literature review with the help of Maggie Brown at the records facility and then going out and revisiting each site (both ours and the other listed sites) to review each site's boundaries. We (Bob Kautz, Teri Christensen, and Stephanie Slaughter) used a GPS unit to confirm site locations and paid particular attention to noting background scatters that might serve to connect various loci along the creek terraces. This work resulted in the following conclusions:

The site we gave the temporary designation KEC-N, that extends along the west bank of Thomas Creek is definitely the "Lower Thomas Creek Site" as described by G.W. Smith in her conversations with Martin Baumhoff during the 1960s. Mel Aikens (1972:23) summarized the site and reexamined some of Smith's artifacts following her death. She willed some forty of the surface artifacts to the University of Nevada Reno where they are still evidently curated. The initial undated and unattributed site form was probably produced from information supplied by Baumhoff and Aikens based on their conversations with Smith. New trinomials were evidently assigned all the Gladys Smith sites at the time that Aikens prepared to publish the results of her work (Aikens 1972) and so this site's new designation became 26Wa1703, or most commonly, 26Wa99/1703.

In the interim, a number of archaeological surveys have been conducted along both banks of Thomas Creek resulting in the recordation of other nearby sites, some of which probably relate to the original Lower Thomas Creek Site. As a result of our ground truthing, I believe we have a closer handle of how these designations should be distributed.

## **1. The Lower Thomas Creek Site**

The boundaries mapped by my crews on the west side of the creek and designated KEC-014-N, contains the core of the site on the west side of the creek (see map, accompanying this letter). It is

separated from sites KEC-014-R and KEC-014-M, by a broad secondary drainage flowing west to east, ending in Thomas Creek. The secondary drainage and Thomas Creek have cut into the terrace leaving the terrace and the sites some 30-40 feet higher at this point. This is the reason I have recommended that these sites be designated as separate. The sites we have mapped along the terrace to the north of KEC-104-M, are definitely separated from these more southerly sites by acreage that appears to be devoid of archaeological remains. This will change the northern edge as hatched on the base map at Ms. Brown's facility.

We also revisited a number of petroglyph sites along the creek that have been given separate site designations. These include 26Wa3127, a petroglyph with a grinding slick on one face, the petroglyph portion of site 26Wa2012 that was recorded by Meneley and Tuttle in 1984, and 26Wa 3126, which (though outside our present project area) should all be included in the Lower Thomas Creek Site.

The next question regards whether this site should be extended to the east bank of the creek. I note that G. Smith (in Aikens and in the original site recordation) considered the site to occur on both banks. In addition, Walsh and Burke (1987, 1988), during their local surveys, extended their east bank site, 26Wa2012, onto the west bank by including the earlier petroglyph recordation as part of their site. It therefore seems both logically and historically correct to include materials from both sides of the creek. It is therefore recommended that 26Wa2012 be included in the Lower Thomas Creek Site along with 26Wa3124 (another petroglyph). Members of my firm are continuing to survey on the east side of the creek for the Washoe County School District and I am sure that these activities will result in an addition to the total area for this site and hopefully, a clearer definition of its bounds. As the earliest designation is usually reserved for sites that are combined, I recommend providing this entire site with the designation 26Wa99 (inclusive of 26Wa99, -1073, -2012, -3124, -3126, -3127). This includes the following agency numbers:

Trinomial	Agency Number	Site Summary
26Wa99		Extensive creek terrace site, ground and flaked stone, west side of creek, with stone effigy and petroglyphs, well defined
26Wa1073		Same site as above
26Wa2012	CrNV-31-3372	Terrace site on east side of creek, with petroglyph, not yet well defined
26Wa3124	CrNV-31-3373	Petroglyph
26Wa3126	CrNV-31-3375	Petroglyph
26Wa3127	CrNV-31-3376	Petroglyph

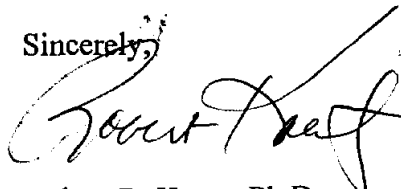

## II. Other Changes

During the course of this review, it was noted that site KEC-014-L occurs very close to where a site designated by Elston as 26Wa2016, is found on the base map in Carson City. However, this site was one of the early site designations that lacks an accompanying site record. As we carefully surveyed around the site and found no other nearby sites, it is recommended that this designation be adopted for the site that we reported (i.e., Site KEC-014-L = 26Wa2016).

Finally, our GPS and ground truthing resulted in the relocation of Site KEC-014-O. It was misplotted on the site location map submitted previously (though it was correct in the original field notes). We are including a new Figure 6.3, Site Location Map to include the new site designations and have corrected the one misplot and have also changed the IMACS record plot for KEC-014-O.

If you have any questions, please give me a call.

Sincerely,

Robert R. Kautz, Ph.D.  
President

WASHOE COUNTY  
DEVELOPMENT REVIEW

Dear Don:

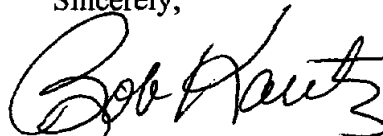

Enclosed please find a copy of the report regarding archaeological resources located on land being developed by Dingman Investments, Genoa Lakes Venture, of Genoa, Nevada, for their Southwest Pointe Subdivision located in southwest Reno. This report includes information produced by means of both federal archaeological Class III survey standards (though this is not a federal undertaking) as well as limited testing operations at six sites that required more information prior to my personnel proving a formal recommendation of their eligibility to the National Register.

The work we conducted was mandated by Kris Schenk, Executive Director of the Truckee Meadows Regional Planning Commission, specifically to satisfy Policy 17h of the Regional Plan and Resolution 93-2 (RPC) as a *Project of Regional Significance* (Agenda Item IV-1, Regional Planning Commission Meeting of March 23, 1994, entitled SOUTHWEST POINTE: PROJECT OF REGIONAL SIGNIFICANCE).

A copy of this report has also been sent to Ms. Jody Steele of the Washoe Tribe of Nevada and California for her review. I have had several conversations with Jody regarding this project and Jody is particularly aware of it because of the stone effigy from this property that was deeded to the Washoe Tribe and currently resides at the Nevada State Museum on temporary loan from the Tribe. Jody has been invited to visit the sites in question and may do so soon.

I have just spoken with Ms. Rebecca Palmer at the SHPO, and she is alerted that you will be forwarding this report on to her. Thank you for your help in this matter.

Sincerely,

Robert R. Kautz, Ph.D.  
President

Department of Development Review  
P. O. Box 11130  
Reno, NV 89520-0027

**Subject: Southwest Pointe (Case No. DA9-1-93)**

Dear Jeff:

Condition #19 from the amended conditions of approval reads as follows:

19. The final development agreement shall not be approved until the right-of-way of all necessary off-site accesses from the project to Thomas Creek Road are obtained. Provided however, that preliminary golf course and roadway grading may commence before such approval has been obtained so long as such construction is done in accordance with Condition #21. A recorded right-of-way document shall be provided to the satisfaction of the County Engineer and the District Attorney's Office.

I have attached a copy of the recorded document that allows ingress and egress of vehicles from Zolezzi Lane to the Redfield Trust property and provides for underground utilities. With receipt of this document, we have complied with this condition in a manner sufficient to permit issuance of a grading permit for the golf course. (We realize that a similar document must be recorded for Whites Creek Lane prior to approval of the final development agreement or issuance of the first building permit.)

Please contact me immediately if you are not in agreement with the preceding statements. If I do not hear from you, I will assume you agree.

Sincerely,

Brita Tryggvi, AICP  
Associate

February 20, 1995

Mr. Jeff Dingman  
Dingman Investments  
1597 Esmeralda Lane  
Minden, Nevada 89423

Re: Southwest Pointe/Whites Creek Lane

Dear Mr. Dingman,

We, the undersigned homeowners who reside on the westerly and south side of Fieldcreek Lane, offer the following comments concerning the construction of Whites Creek Lane for your consideration:

We remain opposed to the construction of Whites Creek Lane. We believe more logical access to Southwest Pointe would be achieved through either a direct access to the Mount Rose Highway, an access north to McCarren, an easterly access to Zolezzi Lane, or any combination of the foregoing. We are aware the County is trying to acquire the USFS land necessary to construct Whites Creek Lane via the land exchange process and we are also aware of the appeal process to this procedure.

If, however, Whites Creek Lane (hereinafter "the road") is constructed, contrary to our wishes, we would like to remind Dingman Investments of the County's mandate to work with we Fieldcreek Lane homeowners to mitigate the impact of the road as much as possible. To that end, we proffer the following:

1. The road be restricted to two lanes only.
2. Construction traffic be routed elsewhere.
3. The road be recessed as much as possible.
4. The road be located on the southernmost side of the easement and a determined investigation be undertaken to ascertain the availability of extending the easement 30' along the southern boundary.
5. A cul-de-sac be constructed on the western end of Fieldcreek Lane, and a small neighborhood park be constructed on that site. We believe that without the cul-de-sac, Fieldcreek Lane will become an island in traffic as Southwest Pointe homeowners attempt to shorten their commute into town. Additionally, we have been advised that two intersections situated so closely on Thomas Creek Road would be a traffic hazard.

6. That we be shielded from the road by means of a six-foot sound wall and a berm with vegetation, all located on the easement. We require the wall not only for the noise factor, but for our children's safety and our homes' security. We request you meet with each homeowner to determine the most appropriate vegetation behind each homesite. We homeowners will assume maintenance responsibility for the vegetation so long as that portion of the easement is deeded back to each homeowner. Each homeowner be given a stipend to assist in the cost of irrigation for this vegetation and for any additional vegetation required on our own lots to further obstruct the view of the road. Please refer to the sketch below.

7. To partially offset the loss in property values which our attorney advises us we will incur, membership in Southwest Pointe's recreational facilities.

We would be pleased to meet with you or your representatives to further discuss the foregoing. We might feel better about the road if we knew what we could expect. We request that as soon as your plans for the road have been drawn they be submitted to us for review.

Thank you for your attention to this matter.

Sincerely,

Fieldcreek Lane Homeowners

**Subject: Southwest Pointe (Case No. DA9-1-93)**

Dear Jeff:

In compliance with Condition #59, I have attached a letter from the Corps of Engineers verifying the wetland delineation that was performed on Southwest Pointe. The Corps has determined that the delineation prepared by Soil Resource Investigations is accurate with the exception of additional waters of the United States being present. These additions are marked on the enclosed maps.

For your files, I am sending you the November 14, 1994 letter signed by Robert Junell and the maps (2 sheets, 1" = 400') that define the wetlands and waters located on the property. The verification is valid for five years from the date of the Corps letter.

With submittal of this information to your office, I believe the requirements of Condition #59 have been met. Please contact me immediately if you believe you need additional information pertaining to this condition.

Sincerely,

Brita Tryggvi, AICP  
Associate

Reno, NV 89520

**Subject: Southwest Pointe (Case No. DA9-1-93)**

Dear Jeff:

As we discussed yesterday, I would like to request that this case be postponed until the September 20 Planning Commission meeting. Because of the election next week, the Washoe County Planning Commission is meeting on the same evening as the Reno Planning Commission. Unfortunately, we have projects scheduled before both groups. Since the County Planning Commission has scheduled a second meeting in September, I would like to request that we be rescheduled for that meeting.

I apologize for any inconvenience this change may have caused. Please call me if you have any questions.

Sincerely,

Brita Tryggvi, AICP  
Associate

Project No. 88-003.17

July 14, 1994

Mr. Jeff Murphree, AICP  
Department of Development Review  
P.O. Box 11130  
Reno, NV 89520-0027

**Subject: Southwest Pointe (Case No. DA9-1-93)**

Dear Jeff:

This letter serves as our formal request to have the following modifications to the conditions of approval scheduled for the September Planning Commission meeting. The purpose of these amendments is to permit grading of the first 18-hole golf course this fall or winter. The changes we are proposing are outlined below. Additions are underlined and deletions are ~~struck thru~~.

19. The final development agreement shall not be approved until the right-of-way of all necessary off-site accesses from the project to Thomas Creek Road are obtained. Provided however, that preliminary golf course and roadway grading may commence before such approval has been obtained so long as such construction is done in accordance with Condition #21. A recorded right-of-way document shall be provided to the satisfaction of the County Engineer and the District Attorney's office.
  
45. Prior to ~~approval of the final development agreement~~ issuance of a grading permit or approval of a final map, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective

street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

59. Prior to issuance of a grading permit for the golf course approval of the ~~final development agreement~~, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.
60. Prior to issuance of a grading permit for the golf course or approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossings of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
61. Prior to issuance of a grading permit for the golf course or approval of the ~~final development agreement~~, a golf course management plan shall be prepared that documents how the migration of fertilizers, pesticides, herbicides, and fungicides to surface and ground waters will be prevented. A surface and ground water sampling program shall be implemented to demonstrate that migration is not occurring and commits to modifying practices in the event that any of the above materials are detected.

Since our meeting on July 6, Bryan Sprague has talked with Kirk Nichols about Condition #47, which pertains to a storm drain master plan. Now that everyone has a better understanding of the development agreement process, Bryan believes it is unrealistic to prepare a storm drain master plan for the entire project prior to acceptance of the final development agreement. In the attached letter from Bryan to Kirk he has suggested some alternative wording for this condition. We do not yet have a response from Kirk regarding these changes.

We intend to reactivate the four special use permit applications that were submitted in September 1993. However, since you have requested a preliminary grading plan for the golf course in conjunction with that special use permit, we will be unable to provide that plan prior to the July 15 deadline. I have spoken with the golf course architect, and he thinks he can complete that work prior to the August 15 deadline. This means we could take the special use permits to the October Planning Commission meeting. I will keep you informed of our progress.

Please schedule the amendments to the conditions for the September 6 Planning Commission meeting. If you need any further information, do not hesitate contacting me.

Sincerely,

Brita Tryggvi, AICP  
Associate

Project No. 88-003.17

Mr Kirk Nichols  
Washoe County Engineering  
PO Box 11130  
Reno NV 89520

**Re: Southwest Pointe Conditions 47 and 48**

Dear Kirk:

This letter is a follow-up to our phone conversation of July 7th regarding Condition Numbers 47 and 48 of the Southwest Pointe preliminary development agreement approval.

Condition Number 47 requires that a "general concept level storm drain master plan" be completed and approved prior to the final development agreement. The question at hand is how much detail needs to be included in this general concept level report. You have indicated that without a fair amount of detail you will not be able to adequately evaluate the project. My concern is that at this stage in the project not enough detailed engineering is done to provide all the answers you would like.

It is important, I think, to understand the various approval stages that this project will have to go through and the kinds of information needed for each. This project is being pursued via a development agreement. We currently have a conditional approval on a preliminary development agreement. The next step is to obtain approval on the final development agreement. After that we will still need approvals for tentative maps and final maps. It seems to me that the kind of information you are asking for with the final development agreement is actually more applicable to the tentative map level of detail. I do not feel that a tentative map level hydrology study is appropriate for the final development agreement. I do, however, think that detailed information is necessary prior to approval of a construction activity such as a grading permit or final map.

In an attempt to more appropriately relate the required amount of detail to the various approval stages I would propose that Condition Numbers 47 and 48 be re-written as follows:

47. A general concept level storm drain master plan shall be submitted and approved prior to acceptance of the final development agreement to the satisfaction of the County Engineer. The general concept level storm drain master plan shall address in general terms proposed methods for handling the existing and increased flows for the 10 and 100 year storms including detention and other proposed mitigation measures. This master plan shall include a drawing which shows the existing drainage basins within the development and indicate how they may be impacted. After approval of the final development agreement, and prior

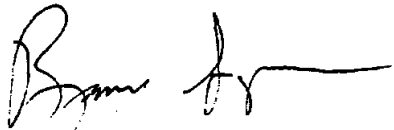

to approval of a tentative map for each phase, a preliminary hydrology report shall be submitted and approved to the satisfaction of the County Engineer. This preliminary hydrology report shall be prepared in accordance with County requirements for tentative maps and be applicable to the specific tentative map being approved.

48. Prior to recordation of any final map, or issuance of any grading permit, a final detailed hydrology/hydraulic report for that construction phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and any preliminary hydrology report previously prepared and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.

As for your concern in regards to approving something for construction which may not be compatible with the overall project, I also have the same concern. I certainly do not want our client to construct an improvement which may be inadequate in the future and be required to spend a lot of money on reconstruction. And I am certainly not disputing the necessity for providing detailed hydrology/hydraulic calculations for any final construction related approval. However, a final development agreement is not an approval to start construction and does not warrant the level of detail you would like to see. I believe the revisions I suggest to Condition Numbers 47 and 48 will require us to provide an adequate level of detail necessary for each stage of the project.

I am hopeful that this has clarified my concerns and also addressed yours. If you have any questions please give me a call.

Sincerely,

Bryan Sprague, PE  
Vice President

**Subject: Southwest Pointe (Case No. DA9-1-93)**

Gentlemen:

The purpose of this letter is to list the conditions of approval that must be complied with prior to obtaining a grading permit for the first 18-hole golf course. Based on my notes, these are the conditions that were agreed to at our meeting yesterday afternoon.

**Development Agreement Conditions of Approval**

- #2 Draft statement of compliance shall be provided to staff prior to public hearings on the special use permits.
- #5 Archaeological/historical survey shall be reviewed by the Department of Conservation and Natural Resources.
- #19 A recorded right-of-way document shall be provided for the access along Zolezzi Lane.

- #21 A construction traffic haul route plan for completion of the first 18-hole golf course and for the extension of utilities.
- #45 A dust control plan for the first 18-hole golf course.
- #46 A letter stating that detention/retention facilities for the golf course will be maintained by the developer.
- #47 A concept-level storm drain master plan shall be submitted for Phase I.
- #48 A detailed hydrology/hydraulic report for the golf course.
- #49 A maintenance plan for all drainage facilities on the golf course.
- #53 A geotech report that considers the effects of earthquake forces and faulting and the siting and design of detention/retention facilities.
- #54 & 60 Design crossing of Thomas Creek and obtain a permit from the Corps of Engineers.
- #58 Obtain a stormwater discharge permit from NDEP.
- #59 A final wetlands determination must be made and approved by the Corps of Engineers.
- #61 Prepare a golf course management plan.
- #64 Prepare a phasing schedule for the dedication of water rights.

#### Final Map Conditions of Approval

- #46 Prepare a parcel map(s) to comply with regulations governing review of plans for subdivisions, condominiums, and planned unit developments

As we discussed yesterday, the applicant understands that all conditions of approval must be complied with during the various stages of the project, even though not all of the conditions are pertinent to grading of the first golf course. Kirk had some concerns regarding street and roadway design; however, after some discussion, it was generally agreed that those conditions are not applicable at this stage. These conditions will come into play as the project progresses.

If I have omitted anything from our discussion yesterday, please contact me immediately. If I do not hear from you by August 15, I will assume that all of the preceding statements are correct.

Sincerely,

A handwritten signature in cursive script that reads "Brita".

**Subject: Southwest Pointe - Development Agreement Case No. DA9-1-93**

Dear Jeff:

The purpose of this letter is to request an 18-month extension of time for the above-referenced preliminary development agreement. According to our records, the approval will expire on September 23, 1994. This extension is necessary to provide the Redfield Land Company with sufficient time to work with the U.S.F.S. to acquire the 120-acre parcel immediately to the east of Southwest Pointe. Whites Creek Lane, which is the main access to the property, will go through this property, and this cannot be done until the property is acquired. The Redfield Land Company is working diligently with the U.S.F.S. and the American Land Conservancy to acquire the property; however, we expect this process to take several more months.

I have enclosed a check for \$125.00 to cover the fee. Please call me if I can provide you with additional information or answer any questions.

Sincerely,

Brita Tryggvi, AICP  
Associate

\_\_\_\_ Risk Manager

**DATE:** December 6, 2002

**TO:** Board of County Commissioners

**FROM:** Mike Boster, Park Planner

**Through:** Karen Mullen, Director

**SUBJECT:** Recommendation to accept the dedication of Arrowcreek Park, which was constructed by the developers of the ArrowCreek subdivision and offered for dedication by the Nell J. Redfield Trust, and authorize Chairman to execute Grant, Bargain and Sale Deed.

**COMMISSION MEETING DATE:** December 17, 2002

**RECOMMENDATION:**

It is recommended that the Board of County Commissioners accept the dedication of Arrowcreek Park, which was constructed by the developers of the ArrowCreek subdivision and offered for dedication by the Nell J. Redfield Trust, and authorize Chairman to execute Grant, Bargain and Sale Deed. The property totals 11.21-acres and is addressed at 2950 Arrowcreek Parkway.

**BACKGROUND:**

Southwest Pointe Associates, L.L.C, developers of the ArrowCreek subdivision, constructed Arrowcreek Park under a County Commission-approved construction and dedication agreement, which required the dedication of the property to Washoe County upon completion of the park improvements. Washoe County staff and the general contractor for the park performed a final walk-through inspection of the site on November 26, 2002. The facility was found to be constructed per plans and ready for dedication to Washoe County.

**PREVIOUS BOARD ACTION:**

June 11, 1996 – Adoption of I-C Park District Master Plan  
October 24, 2000 – Approval of Arrowcreek Park Master Plan  
August 14, 2001 – Approval of Arrowcreek Park Construction and Dedication Agreement

Δ- 12/17/02  
7H

**FISCAL IMPACT:**

The total cost of the Arrowcreek Park was \$807,288.72 of which the County paid \$38,918.11 directly to vendors for benches, impact and water connection fees, signs and markers and construction testing. We have reimbursed Southwest Point Assoc. a total of \$572,035.61 of park construction tax funds to date. The balance of the cost to develop the park, \$157,416.89, will be reimbursed as additional building permits are issued and invoices are received.

Respectfully submitted,

  
Karen Mullen, Director

**Subject:** ARROWCREEK - RELOCATION OF PRESUMED PUBLIC ROAD

Don,

Rich Baines stopped in to discuss a few ArrowCreek items with me. He is wondering how to proceed with the relocation of the presumed public relocation of the Timberline Drive extension, now that they have withdrawn the Development Agreement Amendment. Originally, I believe you and I thought ArrowCreek could relocate it to staff's approval because the roads were not classified as "presumed public" by the BCC until after the ArrowCreek Development Agreement was approved. Then we had the big staff meeting at which it was decided that Dave Roundtree would take the idea of relocation to the BCC. That fell through, and then the relocation was included with the Development Agreement Amendment. How does ArrowCreek proceed, now that the Development Agreement has been withdrawn? If it's an easy answer, I'll pass it on to Rich Baines. If not, he is willing to come in and discuss it with us. Thanks for the input.

SUBJECT: Water Quality Monitoring , ArrowCreek Golf Course

Dear Mr. Davis,

Thank you for opportunity to view the monitoring program on the ArrowCreek Golf Course. I would like to respond to your request of the Water Resources Department to acknowledge your efficient management practices.

On April 24, 2002, you and I met with Josh Fortmann, Kleinfelder and Associates, for the purpose of inspecting the monitoring program on the ArrowCreek Golf Course. The program was initiated as part of the Final Development Agreement (Southwest Pointe Partners), dated August 9, 1996, condition 27, to control the migration of fertilizers, pesticides, herbicides and fungicides from the golf course to Thomas Creek or groundwaters. From our inspection it was apparent to me that the operation of the drains from the greens do not allow for the migration of these contaminants to Thomas Creek or to the groundwaters of Nevada. Further, from the water quality sampling program conducted by Kleinfelder and Associates, these drains have always been dry and therefore not sampled. It is also apparent from the sampling program that contaminants for the golf course in general are not affecting Thomas Creek. This is an indication to me that proper irrigation application rates are occurring such that the course in not generating excess runoff.

Based upon these observations and the sampling results conducted since 1996, I would recommend that the program be reconditioned. I see no reason to continue this line of sampling. I do think that it is important for the golf course to participate in the Interlocal Stormwater Management Program whereby sampling for a few indicator constituents could be incorporated into their monitoring program (Terri Svetich, City of Reno or Lynn Orphan, KennedyJenks).

If you have any questions, please do not hesitate to contact me at (775) 954-4655.

Sincerely,

Michael Widmer

RE: ArrowCreek Unit 25 Common Driveways

REMARKS:  URGENT  FOR YOUR REVIEW  ASAP  PLEASE COMMENT

Tim,

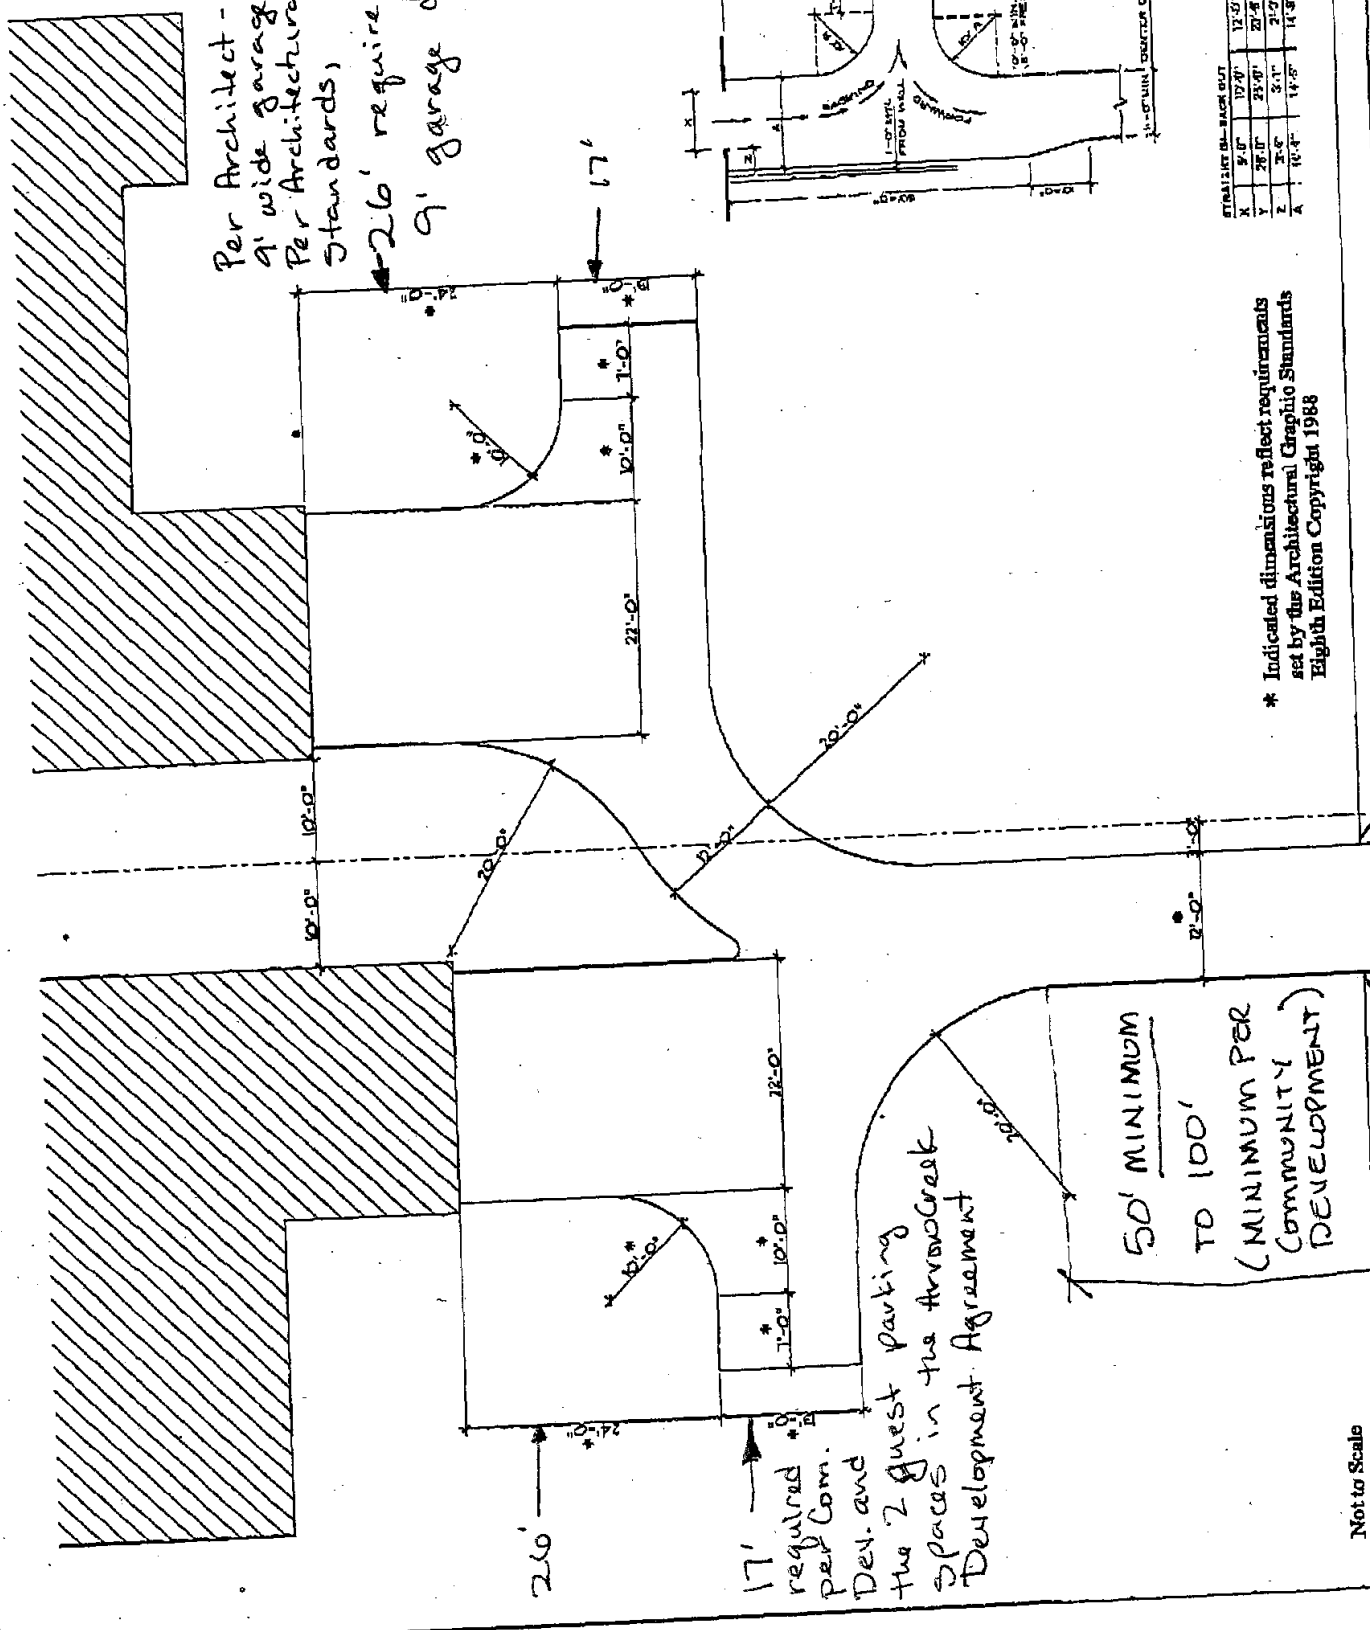

Dave Price, County Engineer has approved your common driveway request with the following conditions and the revisions noted on the attached sketch. Conditions of approval are:

1. Provide approval of driveway configuration from Fire Dept.
2. Add trash pad for each house, adjacent to the street.
3. Water and sewer laterals shall be installed per the Utility Services Division's requirements.

Also, to formalize the request and Dave Price's approval, we need the request submitted in writing by Southwest Pointe. (The Dev. Agmt.

requires that the owner submit the request.) Please use a format similar to the previously approved common driveway request. Please call if you have questions.

**To:** Young, Don  
**Subject:** RE: SW Pointe Development Agreement

Don - I can answer, I think, the last question and will get back after reviewing everything as to the other questions. Because the agreement was so large, what was recorded was a document stating the fact that the property to which the recording obtains is covered by a development agreement, which agreement is located in the Department of Community Development. What concerns me is that you probably shouldn't have the original - it should be with the County Clerk. But, even the latter, I need to check into.

-----Original Message-----

**From:** Young, Don  
**Sent:** Thursday, February 07, 2002 8:39 AM  
**To:** Shipman, Madelyn  
**Cc:** Klein, Kris  
**Subject:** SW Pointe Development Agreement

Kris Klein and I have been working with a developer in ArrowCreek that is thinking of asking the property owner to request a change to the driveway standards in the Development Standards Handbook (DSH) which is Section E of the big binder adopted by reference in the Development Agreement (DA). Page 8 of the Final DA, the one actually adopted by ordinance and signed by the owners and the county, states that the County Engineer (CE) may approve requests to these types of standards.

The main question is: What is the process if the CE refuses to approve these type of variances? Section 110.814.95 states that the BCC may approve an amendment by ordinance, with subsequent certification and recordation, with notice being published in a newspaper. Is this the process to follow if the CE won't approve the variance? And that section implies that we don't have to go thru the PC first?

To further contort the question is Section 110.814.50 which said we could adopt procedures for "minor modifications." Well, we did so in Section 8 (page 8-1) of the DSH. There the Director of Development Review has the authority to determine "whether or not a proposed modification is in substantial compliance with the overall project character." He may then approve it. What are the developer's options if he doesn't approve the request.

One further twist that's more of an aside and not related to the above questions. I have in my possession the original Final DA that was signed by all the property owners, the BCC chair, the clerk, and you. I'm wondering what document was recorded without delay (Section 110.814.85) and what I should do with this one.

Note to Kris: If there's anything I missed or needs further clarification, please chime in. Don

RE: Washoe County School District / Redfield Land Company,  
Southwest Pointe Development, Truckee Meadows at Thomas Creek,  
Washoe County.

Dear Mr. Young:

The Nevada State Historic Preservation Office (SHPO) reviewed the cultural resources inventory for the proposed project. The SHPO concurs with the consultant's findings that the following sites are not significant:

KEC-034-2 and KEC-034-4.

The SHPO also concurs with the consultant's findings that the following sites are significant loci of 26Wa99:

KEC-034-1 and KEC-034-3.

As stated in our letter of June 10, 1995 (Southwest Pointe Subdivision) site 26Wa99 has the potential to yield data that would be important to our understanding of the region's prehistory and history. More specifically, further excavation and data recovery could potentially contribute information to research issues concerning lithic procurement, chronology, technology, historic economic development, and the historic social organization of Truckee Meadows.

If you have any questions concerning this correspondence, please feel free to call me at (702) 687-5138.

Sincerely,

Rebecca Lynn Palmer

RE: Addendum No. 2 to A Cultural Resource Assessment of Southwest  
Pointe Development, Truckee Meadows at Thomas Creek, Washoe  
County.

Dear Mr. Young:

The Nevada State Historic Preservation Office (SHPO) reviewed the  
addendum to the cultural resources inventory for the proposed  
project. The SHPO concurs with the consultant's finding that the  
following site is not significant:

KEC-023a-2.

The SHPO also concurs with the consultant's finding that the  
following site is a significant locus of 26Wa99:

KEC-023a-1.

As stated in our letter of June 10, 1995 (Southwest Pointe  
Subdivision) site 26Wa99 has the potential to yield data that would  
be important to our understanding of the region's prehistory and  
history. More specifically, further excavation and data recovery  
could potentially contribute information to research issues  
concerning lithic procurement, chronology, technology, historic  
economic development, and the historic social organization of  
Truckee Meadows.

The SHPO also concurs with the consultant's findings that the  
following site is significant:

KEC-23a-3.

Petroglyphs have long been recognized as significant sites that are  
important representatives of the aesthetic, cultural, and ritual

D. Sumner Young

RE: Archaeological/Historical Survey for Southwest Pointe

Dear Mr. James:

In accordance with your earlier request that Washoe County begin forwarding requested surveys to your office, please find enclosed the cover letter and Addendum #2 to the prior survey report from Kautz Environmental Consultants, Inc. Your office had requested the referenced survey upon receiving the following case descriptions from our agency:

Applicant/Property Owner: Dingman Investments/Redfield Land Company

Development Agreement Case No. DA9-1-93 for Southwest Pointe: To develop a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center and a commercial village center. The total acreage of the project is  $\pm 3,171.6$  acres. The project entrance is proposed west of the intersection of Zolezzi Lane and Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN:49-010-04, 49-010-10 and 41-030-12)

Washoe County has required the enclosed report be submitted prior to the applicant commencing the project. Please let us know within three weeks from the date of this letter whether the enclosed survey has been found to be acceptable or not. After that time, Washoe County will assume no response to be an acceptance of the survey and with the understanding that permits may be issued. If you have any question, please contact the undersigned at the letterhead address or by telephone at 328-3620. Please excuse the untimeliness of this agency in forwarding the new information.

P.O. Box 11130  
Reno NV 89520-0027

RE: Southwest Pointe, South Truckee Meadows at Thomas Creek,  
Washoe County.

Dear Mr. Young:

The Nevada State Historic Preservation Office (SHPO) acknowledges receipt of your submission dated July 26, 1995. Earlier in the month, this office expressed concern about a number of previously-recorded archaeological sites identified within the project area that were not addressed in the initial cultural resources inventory report. Your submission has adequately addressed this concern.

As of this date, the following sites have been identified within the boundaries of the project area:

26Wa2016 (KEC-014-L);      26Wa2014 (KEC-014-O);  
KEC-014-B;      KEC-014-C;      KEC-014-D;      KEC-014-E;  
KEC-014-F;      KEC-014-G;      KEC-014-H;      KEC-014-I;  
KEC-014-J;      KEC-014-K;      KEC-014-M;      KEC-014-P;  
KEC-014-Q;      KEC-014-R;

26Wa99 (KEC-014-N) includes the following sites:  
26Wa1073;      26Wa3124;      26Wa3126;      26Wa3127;  
and the portions of 26Wa2012 described on page 2 of Dr.  
Kautz's letter dated July 26, 1995.

As of this date, the following previously-recorded sites could not be relocated within the boundaries of the project area:

26Wa2013; 26Wa2015; and 26Wa2017.

Mr. D. Sumner Young  
August 9, 1995  
Page 2 of 2

After reviewing the additional information Washoe County submitted concerning this project, our original review of the sites identified within the project area remains unchanged.

The SHPO concurs with the consultant's findings that the following sites are not significant:

26Wa2014;	KEC-14-B;	KEC-14-C;	KEC-14-D;
KEC-14-E;	KEC-14-F;	KEC-14-H;	KEC-14-I;
KEC-14-M;	KEC-14-P;	KEC-14-Q.	

The SHPO concurs with the consultant's findings that the following sites are regionally significant:

26Wa99;	26Wa2016;	KEC-14-J;	KEC-14-K.
---------	-----------	-----------	-----------

As stated by the consultant, these sites have the potential to yield data that would be important to our understanding of the region's prehistory and history. More specifically, further excavation and data recovery could potentially contribute information to research issues concerning lithic procurement, chronology, technology, historic economic development, and the historic social organization of Truckee Meadows.

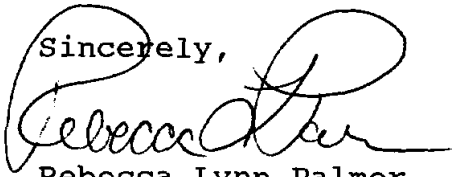

The SHPO still does not concur with the consultant's findings that the following sites are not significant:

KEC-14-G and KEC-14-R.

Petroglyphs such as these have long been recognized as significant sites that are important representatives of the aesthetic, cultural, and ritual values of the Native American groups that created them. As a result, the SHPO considers these sites to be regionally significant.

If you have any questions concerning this correspondence, please call me at (702) 687-5138.

Sincerely,

Rebecca Lynn Palmer  
Archaeologist

RE: Southwest Pointe, South Truckee Meadows at Thomas Creek,  
Washoe County.

Dear Mr. Young:

The Nevada State Historic Preservation Office (SHPO) reviewed the cultural resources report for the proposed project. The SHPO concurs with the consultant's findings that the following sites are not significant:

KEC-14-B;            KEC-14-C;            KEC-14-D;            KEC-14-E;  
KEC-14-F;            KEC-14-H;            KEC-14-I;            KEC-14-M;  
KEC-14-O;            KEC-14-P;            KEC-14-Q.

The SHPO also concurs with the consultant's findings that the following sites are regionally significant:

26Wa99/26Wa1073;    KEC-14-J;            KEC-14-K;            KEC-14-L.

As stated by the consultant, these sites have the potential to yield data that would be important to our understanding of the region's prehistory and history. More specifically, further excavation and data recovery could potentially contribute information to research issues concerning lithic procurement, chronology, technology, historic economic development, and the historic social organization of Truckee Meadows.

The SHPO does not concur with the consultant's findings that the following sites are not significant:

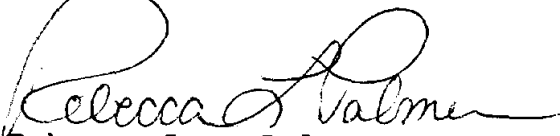

KEC-14-G and KEC-14-R.

Mr. D. Sumner Young  
June 2, 1995  
Page 2 of 2

Petroglyphs such as these have long been recognized as significant sites that are important representatives of the aesthetic, cultural, and ritual values of the Native American groups that created them. As a result, the SHPO considers these sites to be regionally significant. The SHPO also recommends that Ms. Jody Steele, cultural coordinator for the Washoe Tribe of Nevada and California, be contacted concerning these specific sites. It is possible that these features might be significant to the traditional culture of the Washoe Tribe.

If you have any questions concerning this correspondence, please call me at (702) 687-5138.

Sincerely,

Rebecca Lynn Palmer  
Archaeologist

RE: Archaeological/Historical Survey for Southwest Pointe

Dear Mr. James:

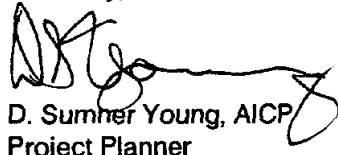

In accordance with your earlier request that Washoe County begin forwarding requested surveys to your office, please find enclosed the cover letter, survey report, and encoding forms from Kautz Environmental Consultants, Inc. Your office had requested the referenced survey upon receiving the following case descriptions from our agency:

Applicant/Property Owner: Dingman Investments/Redfield Land Company

Development Agreement Case No. DA9-1-93 for Southwest Pointe: To develop a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center and a commercial village center. The total acreage of the project is  $\pm$ 3,171.6 acres. The project entrance is proposed west of the intersection of Zolezzi Lane and Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN:49-010-04, 49-010-10 and 41-030-12)

Washoe County has required the enclosed report be submitted prior to the applicant commencing the project. Please let us know within three weeks from the date of this letter whether the enclosed survey has been found to be acceptable or not. After that time, Washoe County will assume no response to be an acceptance of the survey and with the understanding that permits may be issued. If you have any question, please contact the undersigned at the letterhead address or by telephone at 328-3620.

Sincerely,

D. Sumner Young, AICP  
Project Planner

Bruce Kenny  
Soil Resource Investigations  
1390 Tioga Way  
Reno, Nevada 89503

Dear Mr. Kenny:

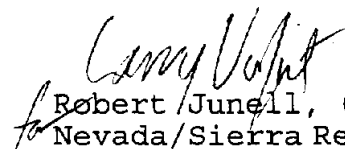

This is in response to your request for verification of a wetland delineation on the Southwest Pointe property in southern Reno. The site is located within several Sections of Township 18 North, Range 19 East, Washoe County, Nevada.

Based upon the information provided and a site inspection by Ms. Jeanette Gallihugh, we have determined that the delineation provided to us by you is accurate with the exception of additional waters of the U.S. being present. One is a braided tributary to Dry Creek in the middle of the site and the second is an ephemeral drainage in the southwest portion of the property. These additions are marked on the enclosed maps (labeled WD 199400905, dated 10-25-94) defining the wetlands and waters located on the property.

Our jurisdiction in this area is under Section 404 of the Clean Water Act. A Department of the Army permit is required prior to discharging dredged or fill material into, or excavation of, a water of the United States, including wetlands. Accordingly, a permit will be required prior to filling any of the waters present on your property described above. The type of permit required will depend on the type and amount of waters which would be lost or adversely modified by fill activities.

This verification is valid for five years from the date of this letter. If you have any questions, please contact Ms. Gallihugh at our Reno Field Office, C. Clifton Young Federal Building, 300 Booth Street, Room 2120, Reno, Nevada 89509, or telephone (702)784-5304.

Sincerely,

  
Robert Junell, Chief  
Nevada/Sierra Regulatory Office

EASEMENT

This Easement is made this 10th day of July, 1994 by and between TMS Associates, a limited partnership ("TMS") and Betty Alyce Jones, Helen Jeanne Jones, Iris G. Brewerton, Kenneth G. Walker and Gerald C. Smith, surviving trustees of the Nell J. Redfield Trust (collectively referred to herein as the "Trust").

R E C I T A L S:

This Easement is made with reference to the following facts:

1. On or about July 1, 1980 Nell J. Redfield and TMS Associates entered into an agreement wherein TMS would provide to Redfield the location of an easement over a portion of the properties owned by TMS more particularly described in Exhibit "A" attached hereto (the "TMS Property") for use in conjunction with certain real property then owned by Ms. Redfield.

2. The Trust, successor-in-interest of Nell J. Redfield, owns that certain real property described in Exhibit "B" (the "Trust Property") and wishes to obtain an easement for the purposes described hereinafter.

NOW THEREFORE, it is hereby agreed between the parties as follows:

A. Easement Over The Easement Property.

1. Grant of Easement: TMS hereby grants to the Trust, for the benefit of the Trust Property and the mortgagees, holders of security interest, tenants, lessees, sublessees, employees and agents of the Trust an easement for the ingress and egress of vehicles to the Trust Property over that portion of the TMS Property described on Exhibit "C" attached hereto (hereinafter the "Easement Property").

2. Purpose of Easement: The easement granted hereby shall be for the purpose of allowing the ingress and egress of vehicles from Zolezzi Lane to the Trust Property and providing for underground utilities.

BK 4114 PG 0118

B. Non-Exclusive Easement. This Easement is non-exclusive and may be used by TMS, its mortgagees, holders of security interest, tenants, lessees, sub-lessees, grantees, employees, agents, licensees, visitors and invitees for any purpose, including general unrestricted access to the TMS Property. TMS may, at TMS's sole discretion, pave the road constructed on the Easement Property (the "Road"), widen it and move it to another location on the TMS Property so long as access is still provided to the Trust Property to the satisfaction of Washoe County and the Nevada Division of Forestry. TMS may, at TMS's sole discretion, relocate the roadway and utilities, if so placed within the Easement Property, with the consent of the Trust which consent will not be unreasonably withheld. The Trust agrees to provide TMS with no less than sixty days notice prior to the placement of any utilities within the Easement Property. The Trust agrees to withhold any and all objections to TMS tying into utilities placed within the Easement Property. TMS agrees to fund its proportionate share of the utility construction cost if TMS ties into the utilities placed within the Easement Property.

C. Road Design: Bridges. The Road shall be constructed at the expense of the Trust and/or the County of Washoe and under no circumstances at the expense of TMS. The Road design, method of construction, any bridges constructed thereon, culverts and all other matters in connection with the design and construction of the Road on the Easement Property must comply with all ordinances and requirements of all governmental agencies for such a road and must be approved by TMS, which approval shall not be unreasonably withheld.

D. Maintenance. The Trust shall maintain the Road at all times, all culverts and bridges constructed thereon or associated therewith and all slopes and shall grade the Road, keep it free of debris and vegetation and keep it passable at all times as shall be reasonably required and approved by TMS and in conformance with all regulations of Washoe County.

E. Easement Runs With The Land. The easement granted hereby shall run with the land, benefit the Trust Property, burden the TMS Property and shall bind and inure to the benefit of the respective heirs, executors, administrators, successors and assigns of both TMS and the Trust in ownership of their respective properties described herein. Neither the benefits nor the burdens of the easement granted hereby shall run with any other land or to the benefit of any other entity or person whatsoever. No other person or entity is intended to nor shall any such person or entity be the beneficiary of any provision of this document.

F. Indemnity. The Trust shall indemnify and hold TMS harmless from any liability, claims, causes of action, damages or costs, including attorneys fees, which TMS may incur in connection with or relative to the easement granted hereby and to the

construction, use and maintenance of the Road, arising from any act or failure to act, except the intentional act, failure to act or negligence of TMS. The Trust shall protect, indemnify and hold harmless TMS, its partners, officers, agents, employees, attorneys, successors and assigns from and against any loss, damage, claim, expense or liability (including attorneys fees) directly or indirectly arising out of or attributable to the use, presence, generation, production, release, discharge or disposal of a hazardous substance (as defined in any statute, ordinance or governmental regulation) on or about the Easement Property caused in any way by the Trust or its successors and assigns or anyone using the Easement Property granted hereby, or any replacement thereof, for access to the Trust Property.

G. Prior Agreements. This Easement supersedes any and all prior understandings and agreements between TMS and the Trust of any kind whatsoever, including but not limited to the agreement of July 1, 1980 described in recital 1 above, and shall be deemed to be in complete satisfaction of and in complete compliance with all such agreements and understandings.

H. Attorneys Fees. Either party may enforce this instrument by appropriate action and the prevailing party shall be entitled to recover costs, including reasonable attorneys fees.

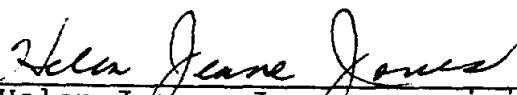

I. Law. This Easement shall be governed by Nevada law.

RE: Wedge Meadows Subdivision (TM6-6-93)  
Wedge Parkway Alignment Study

Dear Mr. Kipp:

This is in response to your request dated March 29, 1994, that Odyssey Engineering be accepted by Washoe County to prepare the alignment study and design of Wedge Parkway between Zolezzi Lane and the southern boundary of the proposed Wedge Meadows Subdivision.

Tentative map conditions for the Wedge Meadows and Southwest Pointe subdivisions, and Washoe County Public Works memorandum dated October 26, 1993, required the following prerequisites to design of the Whites Creek Lane/Wedge Parkway minor arterial from west of Thomas Creek Lane to South Virginia Street (including the Zolezzi Lane/Wedge Parkway/South Virginia Street intersection):

1. An alignment study be performed prior to approval of any final map for Wedge Meadows Subdivision.
2. Completion of a Zolezzi Lane/Wedge Parkway intersection location and design study.
3. Completion of an "area wide" transportation study to determine the cumulative effects of existing, proposed and probable future development.
4. That design and location of transportation facilities is based on an approved Whites Creek drainage basin management plan. The Zolezzi Lane/Wedge Parkway/South Virginia Street intersection is to include that right-of-way and those associated drainage easements needed to accommodate facilities required for drainage of adjacent affected properties for the 100 year flood, consistent with interim Whites Creek basin management policies.

RE: Wedge Meadows Subdivision (TM6-6-93)  
Wedge Parkway Alignment Study

July 1, 1994

Page Two

Your request could not be approved until certain of the above requirements were completed and/or otherwise satisfied. The following have now been done and found to be acceptable: RTC has completed an area-wide transportation study forecasting future traffic volumes at the critical Zolezzi Lane/Wedge Parkway/South Virginia Street intersection (reference: RTC letter concerning Southwest Pointe Subdivision traffic impacts dated November 11, 1993); a conceptual alignment of Whites Creek Lane acceptable to Washoe County (reference: letter dated June 7, 1994, concerning Pine Tree Subdivision); and the Second Draft of the preliminary Whites Creek Basin Management study (prepared by Cella Barr Associates and dated April 4, 1994) which was recently presented to Southwest Truckee Meadows CAB, as well as to affected developers, engineering consultants, and government entities .

In consideration of the foregoing, Odyssey Engineers may proceed to prepare the Wedge Parkway alignment study and Zolezzi Lane/Wedge Parkway/South Virginia Street intersection design subject to the following conditions:

1. A site specific drainage study must be performed which addresses the conveyance across South Virginia Street and surrounding affected properties. The applicable recommendations in the Cella Barr report of April 4, 1994, are to be followed.
2. The Zolezzi Lane/Wedge Parkway/South Virginia Street intersection design must be in accordance with RTC letters concerning TM6-6-93 dated July 16, 1993, and TM9-14-93 dated November 11, 1993, and applicable tentative map conditions.
3. Coordination with other affected property owners for their review of your design proposals is required.

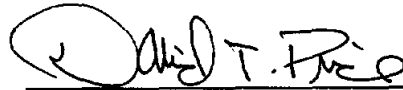

RE: Wedge Meadows Subdivision (TM6-6-93)  
Wedge Parkway Alignment Study

July 1, 1994

Page Three

We appreciate your work on these critical transportation planning and design matters. Please call me if you have any questions.

Sincerely,

A handwritten signature in dark ink, appearing to read "David T. Price". The signature is written in a cursive style with a large initial "D".

TO: Michael A. Harper, Director  
Department of Development Review

FROM: David T. Price, County Engineer

SUBJECT: Pine Tree Ranch Subdivision (TM10-16-93)  
Proposed Unit 1 Final Map, Adjacent to Whites Creek Lane

This letter responds to the applicant's position, as set forth in detail by the attached CFA, Inc., letter dated May 31, 1994, that the recently submitted Unit 1 final map is in compliance with Tentative Map Condition No. 19.

Upon further detailed review of the submittals and Condition No. 19, we find that the applicant is in reasonable conformance with the condition. The prior right-of-way dedication for Whites Creek Lane, as it exists today, both will provide satisfactory access to Unit 1, and constitutes their equitable share of necessary right-of-way. We do not foresee an alignment of Whites Creek Lane which would require additional right-of-way from this parcel. In the (unlikely) event that the existing alignment of Whites Creek Lane becomes the final configuration, a minimum 50 foot radius (which appears will not affect the proposed detention facility), will be needed at the intersection with Wedge Parkway, for right lane turning movements. Dedication of the associated right-of-way is required.

The applicant has agreed to post a bond for the Whites Creek Lane improvements as required by Condition No. 19 and a registered engineer's detailed estimate of the construction costs will be used to determine the bond amount.

We will continue to process the submittals in accordance with normal procedures and forward the final map to you when the applicable tentative map conditions are satisfied.

A handwritten signature in cursive script that reads "David T. Price".

DAVID T. PRICE, P.E.

**SUBJECT: TM10-16-93 Pine Tree Ranch Subdivision—White's Creek Lane**

Dear Mike:

Staff has met with Department of Development Review and Engineering Division staff and with representatives of the subject development to review their suggested alternative alignments for White's Creek Lane. The developer is requesting "approval" of either of the alternatives because this would remove the future arterial from the subject property.

In some important ways the suggested alternatives are considered superior to the existing White's Creek Lane. Two concerns raised by staff could not be resolved at this meeting. These concerns are discussed in detail below.

Staff has the following recommendations regarding the suggested alignment alternatives and conditions of approval relative to White's Creek Lane and the Pine Tree Ranch subdivision:

## RECOMMENDATIONS:

1. In order to assure completion of planned transportation facilities needed to accommodate approved development in the Southwest Planning Area, existing right-of-way for White's Creek Lane should be preserved until an alternative alignment is formally adopted by the Washoe County Board of County Commissioners.
2. To provide a basis for adoption of an alignment for the future facility, an alignment study, required by existing conditions of approval for the Pine Tree Ranch Subdivision, should be completed to the satisfaction of the County Engineer.

Mr. Mike Harper, Director  
May 24, 1994  
Page 2

**DISCUSSION:**

Staff is concerned that the developer's request may jeopardize the ability to provide transportation facilities identified in the Southwest Area Plan. The above alternatives address concerns of area residents regarding traffic volumes on other existing facilities and facilitate implementation of regional and Southwest Planning Area transportation plans. For these reasons, RTC staff has indicated that the suggested alternatives are superior, from a traffic perspective, to the existing White's Creek alignment.

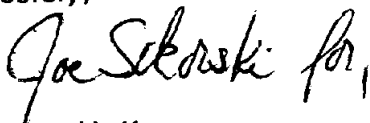

Two important questions remain regarding the ability to build the planned arterial along the proposed new alignments:

1. What physical, environmental, or archeological constraints exist along the proposed alignments which could affect design, construction, and cost of the future facility?
2. Can the county be assured that right-of-way will be secured so that the facility may be constructed when needed (i.e., when Southwest Pointe develops)?

Existing conditions of approval address the above concerns by requiring a study to assess the physical feasibility of alternative alignments, including the existing White's Creek Lane. Right-of-way for alternatives to the existing White's Creek Lane is not yet secured, and use of eminent domain may be required if one of these alternatives is selected. For this reason, staff feels it appropriate that the issue of adoption of a new alignment be determined by the Board of County Commissioners, based on information obtained in the above required study.

Thank you for the opportunity to comment on the above transportation-related development issues. Please feel free to call me or Joe Sikorski of my staff if you have any questions or comments.

Sincerely,

Gregbry H. Krause  
Planning Manager

**NOTICE OF PUBLIC HEARING**

**AMENDMENT - DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**  
**SOUTHWEST POINTE/DINGMAN INVESTMENTS**

**NOTICE IS HEREBY GIVEN** that the Board of County Commissioners, Washoe County, Nevada, will hold a public hearing on Tuesday, November 8, 1994, at 6:00 p.m. in the Commission Chambers of the Washoe County Administration Complex, 1001 Ninth Street, Reno, Nevada, to consider the amendment of a preliminary development agreement that facilitates the development of a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center, and a commercial village center. The amendment would allow the applicant to begin preliminary grading of the golf course and installation of infrastructure along Zolezzi Lane prior to the approval of the final development agreement. The total acreage of the project is ±3,171.6 acres. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR), and General Rural (GR), and is situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada.

Anyone desiring to attend said hearing to protest or to affirm may do so by appearing at the above-named time and place. The staff person to contact prior to the hearing for more information is Jeff Murphree at 328-3613.

RE: PUBLIC HEARING: AMENDMENT OF THE CONDITION OF APPROVAL SPECIFYING THE CONSTRUCTION HAUL ROUTE FOR DEVELOPMENT AGREEMENT CASE NO. DA9-1-93 AND MODIFICATION OF THE MINIMUM LOT SIZE PERMITTED BY THE DEVELOPMENT STANDARDS HANDBOOK FOR ARROWCREEK (SOUTHWEST POINTE) (SOUTHWEST POINTE ASSOCIATES/REDFIELD LAND COMPANY)

You are hereby notified that an application for an amendment to a Development Agreement has been filed with the Washoe County Planning Commission.

This application requests permission to amend Condition 12 of Development Agreement Case No. DA9-1-93 to allow a proposed construction haul route to be constructed to Mount Rose Highway (SR 431) to replace the currently required ArrowCreek Parkway (fka Whites Creek Lane). To modify Table 1-2 in the required Development Standards Handbook to change the minimum permitted lot size to be reduced from 12,000 square feet to 4,500 square feet. This would permit a housing mix (e.g., courtyard or patio homes, zero lot line homes, and attached or detached townhouses) that is not currently allowed but would not change the approved number of units or the percentage of lots in each category. The previously-approved Development Agreement facilitates the development of the residential community which includes 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center, and a commercial village center. The total acreage of the project is  $\pm 3,171.6$  acres and it is located north of Mount Rose Highway and west of Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) in the Southwest Truckee Meadows Area Plan and is situated within portions of Sections 3, 10, 13, 14, 15, 22, 23, 24, 26 and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN: 152-010-10; 152-020-04 thru 65; and 152-051-02 thru 152-053-05, 152-061-01 thru 152-063-17)

A public hearing will be held in the Commission Chambers, 1001 East Ninth Street, Reno, Nevada, on February 2, 1999 at 7:00 p.m., or as soon thereafter as may be practicable. As an owner of property in the vicinity, you are invited to present testimony relative to this application.

**WASHOE COUNTY PLANNING COMMISSION  
STAFF REPORT**

**To:** Members of the Washoe County Planning Commission  
**Re:** Amendment to Development Agreement Case No. DA9-1-93 for Southwest Pointe  
**Date:** April 30, 1996 **Prepared By:** DSY

**GENERAL INFORMATION SUMMARY**

**Applicant/Property Owner:** Southwest Pointe Partners/Redfield Land Company

**Requested Action:** To amend the development agreement that facilitates the development of a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center, and a commercial village center. The amendment allows the applicant to modify portions of the agreement pertaining to streets, access, drainage, parks and other portions. The total acreage of the project is ±3,171.6 acres and it is located north of Mount Rose Highway (SR 431) and west of Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) in the Southwest Truckee Meadows Area Plan and is situated within portions of Sections 3, 10, 13, 14, 15, 22, 23, 24, 26 and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN: 49-010-04, 49-010-10 and 49-030-12)

**ISSUES**

**CONCEPTUAL PLAN:** The conceptual plan presented in 1994 has been modified sufficiently to warrant review and approval by the Planning Commission. The layout and relationship of the golf courses with the homes has been altered to reflect a redesign related to the known archaeological/cultural resources and the water features and delineated wetlands. More of the homesites are now in close proximity to the open spaces associated with the golf courses. The emphasis of the entire project has been changed from a project containing separate gated neighborhoods to a gated community with the gate at the project entrance. Additionally, a change in the product mix to provide more market flexibility and to reduce the number of larger lots has been requested.

CONDITIONS OF APPROVAL: The previously-approved conditions, which were often duplicative or not applicable, are being clarified, rearranged, consolidated, and in some instances amended or deleted. The development agreement conditions are those required to present and obtain approval for the final Development Agreement. The tentative map and special use permit condition lists provide the "boilerplate" conditions to be applied to subsequent requests. Project specific conditions may still be applied to all future tentative maps and special use permits.

**RECOMMENDATION/FINDINGS**

Based upon the staff analysis, comments received, and the site inspection, staff recommends approval of the request with the attached conditions and offers the following motion for your consideration:

The Washoe County Planning Commission conditionally approves the Amendment to Development Agreement Case No. DA9-1-93 for Southwest Pointe, having made the findings:

1. That requested amendments do not alter the following findings originally made to support this project.
2. That this request conforms to the goals and policies of the adopted Southwest Truckee Meadows Area Plan;
3. That the requested subdivision is consistent with the density provisions and lot size regulations of the Washoe County Development Code;
4. The requested development agreement is consistent with the provisions of Section 814 of the Washoe County Development Code;
5. The physical design of the project and the manner in which the design does make adequate provision for public services;
6. The site is particularly suitable for the density and type of residential development proposed;
7. The amount, purpose and location of common open space provided in the proposed project is adequate as related to the proposed density and type of residential development;
8. The proposed maintenance and conservation of common open space is adequate to serve the proposed project;
9. The terms and conditions of this development agreement are sufficient to protect the interests of the public, residents, and the owners of the land subject to the development agreement in the integrity of the plan;
10. The conditions of approval ensure consideration of the items cited in NRS 278.349; and
11. That the Commissioners gave reasoned consideration to the information contained within the staff report and information received during the meeting.

**ANALYSIS**

The developer of the Southwest Pointe project in the Southwest Truckee Meadows planning area has requested amendments to the approved preliminary Development Agreement. The modifications cover three broad categories. The first is an actual change in the layout of the project in which the golf courses, proposed subdivisions, and streets have been altered slightly and the ratio of the product mix has been changed. The second is a change to the orientation of the entire project from having some public components to being a gated community in its entirety. The third change is a reorganization, clarification, and, where necessitated by the other changes, amendment of the conditions. The attached April 30 CFA letter from Brita Tryggvi explains the requested amendments and provides the rationale for them.

The changes to the layout of the project have resulted from a number of factors. As the project approached a more detailed design and the results of items such as the cultural resources survey, the wetlands, delineation, and precise location of faultlines were incorporated, adjustments were necessary. As a result of reorienting the golf courses into a more linear design, more homes have been allowed to benefit from the perceived open space and both the residents and the developer receive benefits. A marketing study suggested a change in the product mix to decrease the ratio of large lots. The lot size ratios in the attached letter have been accepted by the Southwest Truckee Meadows Citizens Advisory Board. Staff supports the increase in the number of smaller lots, without a change to the overall number of lots, 1090. is portion of the request. This change reduces the area of the property that must be disturbed and decreases the amount of impervious surface.

The project originally planned for a loop road that would have been public and would have provided access to the golf courses and to the individual gated subdivisions. The requested modification would allow a gate to be constructed at the entrance to Southwest Pointe. The issues related to the public access to the golf courses and the public trails and bikeways has been resolved.

The last change is the one that has been the most difficult but it is also the one that will allow subsequent actions, both administrative and discretionary, to be much less demanding. For the most part, the changes proposed in the attached letter have been accepted by the county staff, for the reasons cited. The condition numbers in the following discussion refer to the original condition lists and to those in the letter, not those attached to this report.

Condition 14 which requires a quarterly report to be submitted to the Department of Development Review has been moved to the Development Agreement since staff wants to receive a single consolidated report and not a potentially large number of dissimilar reports with little information and the attendant enforcement difficulties when they are not received.

Condition 22 has also been added to the Development Agreement requirements in an altered form that requires the process be specified, but not the actual conditions, covenants, and restrictions (CC&Rs). That process shall ensure that the maintenance and replacement of the streets, parking areas, lighting, landscaping, recreational facilities, utilities, and other private infrastructure shall be performed by the homeowners associations and shall be perpetually funded.

Condition 92 has been left with the Development Agreement requirements but the time for dedication of a site has been accepted. The condition as written could possibly have been

interpreted to place the requirement upon a single subdivision within the project.

Staff has also added a condition to the Development Agreement that requires specification of any time frames within the Nevada Revised Statutes or the Washoe County Code that have been extended. These must be a part of the Development Agreement to be recognized.

The comments and changes of the reviewing agencies have been incorporated into the attached conditions. Project specific conditions may still be applied to all future tentative maps and special use permits. The special use permit conditions are directly applicable to the proposed and previously-approved golf courses and will be applied in part to future requests that require a special use permit. The tentative map and special use permit condition lists provide the potential "boilerplate" conditions.

Staff is recommending approval of this request to amend the preliminary Development Agreement requirements, to the changes to the plan and orientation of the project, and to the reorganization of the conditions of approval. The recommendation of the Planning Commission will be forwarded to the Board of County Commissioners for final action. The final Development Agreement will not be presented to the Planning Commission. Upon review and approval by the District Attorney and the Department of Development Review, it will be forwarded directly to the County Commission.

**CITIZENS ADVISORY BOARD COMMENTS:** Staff has not received written correspondence from the Southwest Truckee Meadows Citizens Advisory Board but has spoken with a representative. They will have members in attendance at the meeting to express their views.

**APPLICABLE REGULATIONS**

Nevada Revised Statutes Chapter 278; Washoe County Code Chapter 110.

**CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93  
for  
SOUTHWEST POINTE**

(As recommended by Department of Development Review and  
attached to Staff Report dated April 30, 1996)

**\*\*\* IMPORTANT -- PLEASE READ \*\*\***

**UNLESS OTHERWISE STATED, PRIOR TO APPROVAL OF THE FINAL DEVELOPMENT AGREEMENT, ALL CONDITIONS MUST BE MET. A COPY OF ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL BE FILED WITH THE DEPARTMENT OF PUBLIC WORKS AND/OR DEPARTMENT OF DEVELOPMENT REVIEW.**

**COMPLIANCE WITH THE APPLICABLE STATUTES, ORDINANCES, RULES, REGULATIONS, AND POLICIES AND WITH THE CONDITIONS OF APPROVAL OF THIS TENTATIVE MAP IS THE RESPONSIBILITY OF THE DEVELOPER, ITS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY, AND THEIR SUCCESSORS IN INTEREST.**

GENERAL CONDITIONS

1. Unless specifically stated in the final Development Agreement, all uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final Development Agreement, the allowed uses, densities, and standards of the land subject to the Development Agreement shall be those in effect at the time the final agreement is approved.
2. The final Development Agreement shall specify any time frames that have been extended beyond those specified by Washoe County Code or Nevada Revised Statutes. The Department of Development Review shall be responsible for determining compliance with this condition.
3. A "statement of compliance" format or formats for both residential and non-residential projects shall be made a part of the final Development Agreement. The Department of Development Review shall be responsible for determining compliance with this condition.
4. The developer and all successors shall direct any potential purchaser of the site, or portions thereof (other than individual single-family lots), to meet with the Department of Development Review to review the Development Agreement and the conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the Department of Development Review of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.

5. Prior to submittal to the Washoe County Board of County Commissioners, the final Development Agreement shall be reviewed and approved by the Office of the District Attorney of Washoe County.
6. The final Development Agreement will be submitted to the Washoe County Board of County Commissioners within three months of submission of a completed agreement with all accompanying exhibits, provided the Department of Development Review does not delay the submission in order to approve provisions of the agreement to its satisfaction. Extension of any of these time frames may be requested if mutually agreeable to Washoe County and the developer.
7. The developer shall provide the Department of Development Review staff with a quarterly report indicating the number of building permits issued and other building activity, once residential construction has started.
8. The developer shall define a process to ensure that the maintenance and replacement of the streets, parking areas, lighting, landscaping, recreational facilities, utilities, and other private infrastructure shall be performed by the homeowners associations and shall be perpetually funded. The County Engineer and the Department of Development Review shall be responsible for determining compliance with this condition.

#### STREETS AND TRAFFIC

9. A Level of Service C, or the current Washoe County standard, shall be used as a basis for evaluating transportation needs and traffic impact mitigation requirements.
10. The final Development Agreement shall not be approved until the right-of-way (ROW) of all necessary off-site accesses from the project to Thomas Creek Road are obtained. Preliminary golf course and roadway grading may commence before such approval has been obtained so long as such construction is done in accordance with Condition 21 for tentative maps. An approved and recorded ROW document shall be provided to the County Engineer and the District Attorney's Office.
11. Prior to final approval of the Development Agreement, the developer for Southwest Pointe shall petition the Washoe County Board of County Commissioners to create a Special Assessment District for the purpose of financing the construction of Whites Creek Lane from the project site to Wedge Parkway and other roads as defined in the SAD agreement. In the event that a special assessment district is not created, the developer shall construct Whites Creek Lane, as outlined in Conditions 17 and 19 for tentative maps, from the project site to Wedge Parkway. The County Engineer shall be responsible for determining compliance with this condition.
12. A Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. However, as part of Phase I development, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

13. The developer shall provide a schematic pedestrian circulation plan. The Department of Development Review shall be responsible for determining compliance with this condition. The "statement of compliance" shall require that a detailed pedestrian circulation plan will be submitted as part of each tentative map and approved by the Department of Development Review.
14. Unless specifically stated in the conditions of approval or in the final Development Agreement, all public and private street design and construction is to be done in accordance with the Washoe County standards that are in effect at the time the final Development Agreement is recorded. The County Engineer shall be responsible for determining compliance with this condition.
15. Unless otherwise stated in these conditions of approval or in the final Development Agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided. The County Engineer shall be responsible for determining compliance with this condition.
16. All private roadways shall be depicted on the final maps and identified on the tentative map as either private access easements over individual adjacent lots or, if identified as separate parcels, as either common areas with equal fractional ownership by all of the lots within the development or common areas owned by the homeowners association. The County Engineer shall be responsible for determining compliance with this condition.

GRADING AND DRAINAGE

17. A general concept-level storm drain master plan shall be submitted to the County Engineer for approval prior to acceptance of the final Development Agreement. The general concept-level storm drain master plan shall address in general terms proposed methods for handling the existing and increased flows for the 10- and 100-year storms including detention and other proposed mitigation measures for both on-site and off-site areas. This master plan shall include a drawing which shows the existing drainage basins within the development and indicate how they may be impacted. After approval of the general concept-level storm drain master plan and the final Development Agreement, and prior to approval of a tentative map for any phase or approval of any special use permit, a preliminary hydrology report shall be submitted to the County Engineer for approval. The County Engineer shall be responsible for determining compliance with this condition.
18. Detention/retention facilities are to be maintained by a homeowners association and perpetually funded unless Washoe County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County. The County Engineer shall be responsible for determining compliance with this condition.
19. A maintenance plan of all drainage facilities to be owned by the homeowners association shall be provided prior to approval of the conditions, covenants, and restrictions (CC&Rs). All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe County water treatment plant and associated Steamboat Ditch conveyance system. The County Engineer shall be responsible for determining compliance with this condition.

20. The off-stream detention/debris basin recommended in the 1990 Kennedy, Jenks, Chilton report shall be reserved based on the following timetable:
  - a. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final Development Agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the developer or his successors, for dedication to the Washoe County School District for a middle school or revert to open space.
  - b. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within 5 years of the approval of the final Development Agreement. If construction is not started by that date, the property for the detention site shall be offered by the developer or his successors, for dedication to the Washoe County School District for a middle school or revert to open space.
  - c. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school or revert to open space.
  - d. If the detention basin is constructed, Washoe County shall pay fair market value for the property.
21. The increase in development-caused runoff from the 100-year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained on-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company. The County Engineer shall be responsible for determining compliance with this condition.
22. A geotechnical report shall be prepared, which considers the effects of earthquake forces and faulting in the area. The siting and design of detention/retention facilities shall be addressed based on the findings and recommendations provided in the geotechnical report. The County Engineer shall be responsible for determining compliance with this condition.
23. The development shall comply with the requirements of the Hillside Ordinance of the Development Code, as applicable. The Department of Development Review shall be responsible for determining compliance with this condition.

#### WATER AND WASTEWATER

24. A schematic water system plan for the referenced proposal must be submitted to the Utility Division and the District Health Department. Prior to a final map approval, the plan must show that the water system will conform to the State of Nevada Water Supply Regulations, NAC Chapter 445, and the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, NAC 278.400 through 278.410.
25. Prior to the approval of the final Development Agreement, a complete water analysis from at least one monitoring well must be submitted to the District Health Department. The analysis must demonstrate the water conforms to the existing and proposed drinking water standards.

26. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure. The Utility Division shall be responsible for determining compliance with this condition.

FIRE PROTECTION

27. If requested by the applicable fire protection agency, a minimum one-acre site for a fire station shall be offered for dedication prior to recordation of the first final map. The developer shall enter into talks with the applicable fire protection agency for any other requirements, such as, a fire station site, manpower and equipment needs, or for coordination with other developments that have similar requirements and the results of those discussions, as they relate to the entire project, shall be incorporated into the Development Agreement.

PARKS/RECREATION/OPEN SPACE

28. An open space management plan and map shall be prepared that specifies the ownership of open spaces, type of uses allowed and who is responsible for maintenance. This plan shall address the provisions of Section 110.408.45 of the Development Code. Common areas shall be maintained by the homeowners association and provisions be made for perpetual funding for maintenance.

Prior to approval of the final Development Agreement, a government entity (e.g. United States Forest Service, Washoe County Parks Department, etc.) or a non-profit organization (e.g. Washoe Parks Foundation) shall be identified that will accept the dedication of the open space buffers identified on the Concept Plan, which consists of approximately 1,500 acres. The Parks and Recreation Department and the Department of Development Review shall be responsible for determining compliance with this condition.

29. The final Development Agreement shall include a provision for the public open space that prohibits the sale of any open space without the consent of Washoe County. The Department of Development Review shall be responsible for determining compliance with this condition.
30. A minimum 10-acre public park site shall be offered for dedication to the county. A sketch plan will be included in the final Development Agreement. The final park design shall be mutually agreeable to the county and the developer. The developer will construct the recreation facilities in the park and then be reimbursed for the cost of the construction from the Residential Construction Tax. The responsibility of park maintenance shall be negotiated by the developer and Washoe County prior to the approval of the final Development Agreement. The Parks and Recreation Department and Department of Development Review shall be responsible for determining compliance with this condition.

31. The developer will work with the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer. The Parks and Recreation Department and Department of Development Review shall be responsible for determining compliance with this condition.

LANDSCAPING/ARCHITECTURAL DESIGN

32. Prior to approval of the final Development Agreement, the developer shall submit a Development Standards Handbook for the entire project to the Design Review Committee for its review and approval. These guidelines shall address, but not be limited to, type and color of building material, general architectural design, fencing, landscaping material (if plant material: type, size at time of planting, maturation size at full growth, period of time between planting and full growth), landscaping location, landscaping irrigation system, and financial assurances that landscaping will be planted and maintained.

The Design Review Committee shall also review the design of Whites Creek Lane, specifically to address Condition 19.c. for tentative maps. The Department of Development Review shall be responsible for determining compliance with this condition.

<p><b>CONDITIONS</b> for <b>TENTATIVE SUBDIVISION MAP CASE NO. _____</b> for _____ <b>SUBDIVISION</b></p>
---

(As recommended by Department of Development Review and  
attached to Staff Report dated \_\_\_\_\_ )

**\*\*\* IMPORTANT -- PLEASE READ \*\*\***

UNLESS OTHERWISE STATED, PRIOR TO FINALIZATION OF ANY PORTION OF THE TENTATIVE SUBDIVISION MAP, ALL CONDITIONS MUST BE MET OR FINANCIAL ASSURANCES TO ENSURE COMPLETION OF THE CONDITIONS MUST BE PROVIDED. THE AGENCY RESPONSIBLE FOR DETERMINING COMPLIANCE WITH A SPECIFIC CONDITION SHALL DETERMINE WHETHER THE CONDITION MUST BE FULLY COMPLETED OR WHETHER THE DEVELOPER SHALL BE OFFERED THE OPTION OF PROVIDING FINANCIAL ASSURANCES.

A COPY OF ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL BE FILED WITH THE DEPARTMENT OF PUBLIC WORKS AND/OR DEPARTMENT OF DEVELOPMENT REVIEW.

THE DEVELOPER SHALL MEET WITH THE ENGINEERING DIVISION AND THE DEPARTMENT OF DEVELOPMENT REVIEW AT LEAST SIXTY (60) DAYS BEFORE THE ANTICIPATED DATE OF APPROVAL BY THE PLANNING COMMISSION TO REVIEW SCHEDULING, REQUIREMENTS, FINAL CONSTRUCTION DRAWINGS, AND DOCUMENTATION NECESSARY TO ADEQUATELY COMPLY WITH THE CONDITIONS OF APPROVAL AND THE APPLICABLE STATUTES, ORDINANCES, RULES, REGULATIONS, AND POLICIES. NO FINAL MAP WILL BE SCHEDULED FOR A PLANNING COMMISSION MEETING DATE THAT IS LESS THAN SIXTY (60) DAYS FROM THE DATE OF THIS MANDATORY MEETING.

A REQUEST FOR AN EXTENSION OF TIME FOR THE RECORDING OF A FINAL MAP MUST BE SUBMITTED TO THE DEPARTMENT OF DEVELOPMENT REVIEW AT LEAST SIXTY (60) DAYS PRIOR TO THE EXPIRATION DATE OF THE TENTATIVE SUBDIVISION MAP. SAID EXPIRATION IS TWO YEARS FROM THE DATE OF APPROVAL OF THE TENTATIVE MAP OR A SUBSEQUENT FINAL MAP BY THE BOARD OF COUNTY COMMISSIONERS OR, WHEN APPLICABLE, BY THE PLANNING COMMISSION.

COMPLIANCE WITH THE DEVELOPMENT AGREEMENT, APPLICABLE STATUTES, ORDINANCES, RULES, REGULATIONS, AND POLICIES AND WITH THE CONDITIONS OF APPROVAL OF THIS TENTATIVE MAP IS THE RESPONSIBILITY OF THE DEVELOPER, ITS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY, AND THEIR SUCCESSORS IN INTEREST.

GENERAL CONDITIONS

1. The subdivider shall present to the planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

Prior to the expiration of a tentative map, the planning commission or, upon appeal, the governing body may grant a two (2) year extension for the presentation of the entire final map or next successive final map. The effective date of the extension shall be two (2) years from the date upon which the map would have expired.

If the subdivider fails to record a final map for any portion of the tentative map or obtain an extension within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

2. Unless specifically stated in the final Development Agreement, final maps and final construction drawings shall comply with all applicable statutes, ordinances, rules, regulations, and policies in effect at the time of approval of the final map or any subsequent extension date. The Department of Development Review shall be responsible for determining compliance with this condition.
3. Final maps shall be in substantial compliance with all plans and documents submitted with and made part of this tentative map request, as may be amended by action of the final approving authority. Substantial compliance shall be determined by the applicable agency and the Department of Development Review.
4. As part of every tentative map and final application, the developer shall include a completed "statement of compliance" that demonstrates how the development will be or is consistent with the recorded final Development Agreement. The "statement of compliance" for the final map shall incorporate a description of how the conditions of approval have been met. The Department of Development Review shall be responsible for determining compliance with this condition.
5. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's Office, County Engineer, and the Department of Development Review prior to final map approval or prior to issuance of a certificate of occupancy for a non-residential use. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. If the CC&Rs are not recorded on the entire property, subsequent phases will be annexed to the previously recorded CC&Rs. Said CC&Rs shall specifically address the ability of the county to enforce certain provisions against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement, of the following items, at a minimum:
  - a. Private roads within the subdivision.
  - b. Equestrian center.
  - c. Staffing of maintenance and security forces.
  - d. Common area landscaping.
  - e. Entrance gates.
  - f. Snow removal and storage areas.
  - g. Common area landscaping including along streets or landscaping along Whites Creek Lane.

- h. Fire and fuelbreaks.
- i. Detention basins and the accumulated sediment.
- j. Equestrian/pedestrian trails.
- k. Bicycle and pedestrian paths.
- m. Golf cart crossings.
- n. Off-site residential parking areas.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
  - b. All homes must have a garage with space for a minimum of two cars.
  - c. Specifications on the limitation of turf area for single-family homes.
  - d. Retention of public access to the golf course, bike paths, (i.e., 8-foot meandering paths along minor arterials and some collectors; refer to street sections), public trails, and non-residential uses.
  - e. Notice of requirement to pay future sewer user fees.
  - f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
  - g. Potential for conservation easements or dedication of open space.
  - h. Prohibition of motorized vehicles in open space.
  - i. Areas with potential for equestrian traffic.
  - j. Access to open space for pedestrian and bicycle traffic.
  - k. Notice of pedestrian easements to abutting properties.
  - l. Minimum defensible space requirements.
  - m. Snow storage areas.
6. Prior to ground-disturbing activity or prior to finalization of any portion of the tentative map, the developer shall submit an archaeological/historical survey to the Department of Development Review. The Department of Development Review shall submit the survey to the State Historic Preservation Office of the Department of Museums, Library and Arts for review. Following that review, the State Historic Preservation Office shall submit a letter to the Department of Development Review that indicates the survey was acceptable.
7. A note shall be placed on all grading plans and construction drawings stating:
- NOTE
- Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the State Historic Preservation Office of the Department of Museums, Library and Arts, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.
8. The developer shall be required to participate in any applicable General Improvement District or Special Assessment District formed by Washoe County. The applicable division of the Department of Public Works shall be responsible for determining compliance with this condition.

9. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada.
10. A complete set of construction improvement drawings, including an on-site grading plan, shall be submitted to the Engineering Division for approval prior to finalization of any portion of the subdivision. Grading shall comply with best management practices and shall include detailed plans for grading and drainage on each lot, erosion control, slope stabilization, mosquito abatement. Placement or disposal of any excavated material shall be indicated on the grading plan.
11. All soil boring logs must be included as part of the construction drawings. The County Engineer shall be responsible for determining compliance with this condition.
12. All new utilities shall be placed underground. The County Engineer shall be responsible for determining compliance with this condition.
13. The developer is to provide written approval from the US Postal Service for the plans for the installation of mail delivery facilities. The system, other than individual mail boxes, must be shown on the project construction plans and installed as part of the on-site improvements. The County Engineer shall be responsible for determining compliance with this condition.
14. The final map shall designate faults, by distance and bearings, that have been active during the Holocene epoch of geological time and shall contain the following note.

NOTE

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time. The faults have been located by Civil Engineer Registered in Nevada and experienced in Geotechnical Engineering and field surveyed by a Nevada Registered Land Surveyor.

The Department of Development Review shall be responsible for determining compliance with this condition.

15. The Washoe County Planning Commission certificate on the final map shall be approved by the County Engineer and the Department of Development Review.

STREETS AND TRAFFIC

16. The developer shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required. The County Engineer shall be responsible for determining compliance with this condition.

17. Prior to the issuance of the first building permit, two lanes of Whites Creek Lane shall be constructed, to two-lane minor arterial standards as a minimum, from Thomas Creek Road to the project site. The County Engineer shall be responsible for determining compliance with this condition.
18. Prior to the issuance of the first building permit, a second access shall be constructed to the project site to emergency standards to the satisfaction of the applicable fire protection agency.
19. The County Engineer shall be responsible for determining compliance with this condition. Prior to the issuance of the 35th building permit, the following roadway improvements shall be constructed:
  - a. The remaining two lanes of Whites Creek Lane from Thomas Creek Road to the project site if warranted by projected traffic demands.
  - b. Two (2) lanes of Whites Creek Lane from Thomas Creek Road to Wedge Parkway with 100 feet of right-of-way. These two lanes will be constructed so that an additional two lanes may be added in the future if warranted by projected traffic volumes.
  - c. Whites Creek Lane will be designed in a manner that minimizes any impacts on the adjacent homes to the north in Fieldcreek Ranch (e.g., fencing, berms, lowering the travel lanes).
20. The minimum pavement structural section shall be 5 inches of asphalt over 8 inches of aggregate base for minor arterials, 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector streets, and 3 inches of asphalt over 6 inches of granular base for roadways for local streets. The County Engineer shall be responsible for determining compliance with this condition.
21. Prior to approval of any final map or prior to the issuance of the first building permit for the first final map, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submits a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:
  - a. site distance requirements;
  - b. left turn storage capacity and design;
  - c. intersection location and alignment;
  - d. proximity to existing intersections and recommended separate distances;
  - e. existing center median and landscaping concerns;
  - f. determination of adequacy of existing Thomas Creek Road roadway geometric section; and
  - g. determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

22. Prior to or upon approval of the CC&Rs, the developer shall have a street maintenance program approved by the County Engineer and the Department of Development Review. Maintenance of private streets shall be performed by the homeowners association and shall be perpetually funded.
23. The following roadway sections shall be applicable to the public and private on-site streets shown on the tentative map. A traffic report shall be submitted with each tentative map and shall identify the ultimate average daily traffic on each street and shall make recommendations for geometric design (e.g., left turn storage capacity, site distance, minimum required turning radius, etc.). The County Engineer shall be responsible for determining compliance with this condition.
  - a. Private Common Driveways - Serving 4 or less lots, pavement width 20 feet; serving 5 or more lots, pavement width 22 feet; no parking either side. Curb returns shall have a minimum face of curb radius of 20 feet on local streets and 25 feet on collector streets. Private common driveway locations will be shown on all tentative maps. Private common driveways will line up with proposed street intersections where possible and will comply with street intersection offset requirements. Single lot driveway access will not be allowed onto streets on which the average daily traffic exceeds 2000 trips. (Refer to street sections.)
  - b. Rural Private - 60 foot minimum ROW (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer-approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum 4-foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)
  - c. Local Private - 60 foot minimum ROW (200 - 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer-approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum 4-foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)
  - d. Collector Private - 60 foot minimum ROW (500 ADT to 2000 ADT): minimum 24-foot pavement width; curb and gutter or County Engineer-approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. a minimum 4-foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to Street Sections.)

- e. Collector Private - 60 foot minimum ROW (2000 ADT to 8000 ADT): minimum 24-foot pavement width with an additional 12-foot left turn lane at intersections where warranted; curb and gutter or County Engineer-approved concrete header with roadside ditch both sides (developer's discretion); no parking on either side. A minimum 8-foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. No residential driveway access will be allowed. Access for private common driveways will be allowed. (Refer to street sections.)
  - f. Collector Private - 120 foot minimum ROW collector street (up to 9600 ADT): A minimum 27-foot center median from curb face to curb face, 19-foot pavement width on either side of the median; curb and gutter on both sides or County Engineer-approved concrete header with roadside ditch both sides (developer's discretion); no parking either side except during special events; a minimum 8-foot meandering asphalt path both sides; no residential driveway access allowed. (Refer to street sections.)
  - g. Minor Arterial, Private - 120 foot minimum ROW (more than 10,800 ADT): A minimum 27-foot center median from curb face to curb face, 24-foot pavement width on either side of the median; County Engineer-approved concrete header with roadside ditch; no parking either side; a minimum 8-foot meandering asphalt path both sides. A gate may be installed at the point where Whites Creek Lane becomes a private road. (Refer to street sections.)
  - h. Minor Arterial, Public - 120-foot minimum ROW (more than 10,800 ADT): A minimum 27-foot center median from curb face to curb face, 29.5-foot roadway section on either side of the median; curb and gutter on both sides; a minimum 6-foot concrete sidewalk on both sides; no residential driveway access is allowed. (Refer to street sections.) A gate may be installed at the point where Whites Creek Lane becomes a private road. A public turn-around is required on the public side of the gate.
24. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards. The County Engineer shall be responsible for determining compliance with this condition.
25. Construction near fault lines shall be as follows:
- a. Buildings for human occupancy shall be set back from the centerline of fault traces. Setback distances shall be determined by a geotechnical investigation prepared by a Nevada Registered Civil Engineer experienced in geotechnical engineering. The minimum setback shall be 50 feet on each side of the fault line.
  - b. Roadway construction in fault zones and along fault traces shall be reviewed by a Nevada Registered Civil Engineer experienced in geotechnical engineering. Any recommended special construction requirements (e.g., flexible joint connections for utilities) shall be complied with.
- The County Engineer shall be responsible for determining compliance with this condition.
26. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement. The County Engineer shall be responsible for determining compliance with this condition.

27. Landscaped medians shall be designed in accordance with AASHTO site distance and safety guidelines. The County Engineer and the Department of Development Review shall be responsible for determining compliance with this part of the condition. Maintenance of median landscaping shall be by the homeowners association as provided for in a separate maintenance agreement to be approved by the County Engineer and the District Attorney's Office prior to approval of the CC&Rs.
28. Temporary county standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street. The County Engineer shall be responsible for determining compliance with this condition.
29. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs that are longer than 1,500 feet. These roads shall have a 30-foot access easement with a minimum 20-foot width and 2.5 inches of asphalt concrete pavement on an engineered gravel base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only". The County Engineer and the applicable fire protection agency shall be responsible for determining compliance with this condition.
30. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately-maintained streets. The County Engineer shall be responsible for determining compliance with this condition.
31. Meandering asphalt paths will be acceptable provided that:
  - a. Pedestrian easements are included for portions of the paths located outside the county right-of-way.
  - b. Landscaping between the back of the curb and the path shall be designed in accordance with AASHTO site distance and safety guidelines. The County Engineer shall be responsible for determining compliance with the provisions of this condition.
  - c. Maintenance of the asphalt paths and landscaping shall be the responsibility of the developer and, when created, by the homeowners association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior to approval of the final Development Agreement.
32. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded. The County Engineer shall be responsible for determining compliance with this condition.
33. Street lights shall be installed at major intersections. The County Engineer shall be responsible for determining compliance with this condition.
34. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater. Where possible, crossings should be below the grade of public streets. The County Engineer shall be responsible for determining compliance with this condition.

- 35. Off-site parking areas shall be provided within 500 feet of homes that have lots ranging in size between 12,000 square feet and one-half acre. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the tentative map(s). The Department of Development Review shall be responsible for determining compliance with this condition.
- 36. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved by the County Engineer and constructed as approved.
- 37. Regulatory signs must be installed at the juncture of all public streets with a private street and at intersections along the primary loop road. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards. The County Engineer shall be responsible for determining compliance with this condition.
- 38. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

DRAINAGE AND GRADING

- 39. After approval of the general concept-level storm drain master plan and the final Development Agreement, and prior to approval of a tentative map for any phase, a preliminary hydrology report shall be submitted to the County Engineer for approval. This preliminary hydrology report shall be prepared in accordance with county requirements for tentative maps, in conformance with the general concept-level storm drain master plan, and be applicable to the specific tentative map or special use permit being approved.

The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10- and 100-year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities. The County Engineer shall be responsible for determining compliance with this condition.

- 40. Prior to the submittal of any final map or issuance of any grading permit, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted to the County Engineer for approval. The report shall be in substantial compliance with the general concept-level storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed, constructed, and approved by the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.

41. A maintenance plan of all drainage facilities, to be owned by the homeowners association, shall be provided prior to approval of the CC&Rs. All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe County water treatment plant, and associated Steamboat Ditch conveyance system. All runoff from improved areas which runs into the Steamboat Ditch shall be pre-treated for silt and petrochemicals and shall be routed through a "wet" detention facility or approved alternative. The Utility Division and the Department of Development Review shall be responsible for determining compliance with this condition.
42. The 100-year floodplain boundaries and flood elevations shall appear on each final map. If the floodplain boundary has been changed by a Federal Emergency Management Agency (FEMA) Conditional Letter of Map Amendment or Conditional Letter of Map Revision, the date of that letter and a note to that effect shall appear on the final map. Grading or building permits shall not be issued for areas currently shown as "A" zones on the FEMA floodplain maps until a Letter of Map Amendment or Revision is submitted or until conformance with Washoe County flood construction standards is determined by the County Engineer. The County Engineer shall be responsible for determining compliance with this condition.
43. Prior to approval of the final map, the developer shall obtain a Stormwater Discharge Permit from the Nevada Division of Environmental Protection. If required, point discharge permit for each proposed detention pond will be obtained from the Nevada Division of Environmental Protection and copy shall be submitted to the County Engineer.
44. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan. The County Engineer shall be responsible for determining compliance with this condition.
45. Prior to issuance of a grading permit for the golf course and/or final map, a final wetlands determination must be made and approved by the US Army Corps of Engineers and the approval letter provided to the Department of Development Review.
46. Prior to issuance of a grading permit for the golf course or approval of a final map, the developer shall obtain from the Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
47. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway. Erosion protection shall be provided based upon the recommendation of the geotechnical report. The County Engineer shall be responsible for determining compliance with this condition.
48. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts. The District Health Department and the County Engineer shall be responsible for determining compliance with this condition.

49. The stormwater discharges from this development that flow to Dry Creek shall be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. The developer shall provide drainage structures under Steamboat Ditch that would pass the 10-year frequency storm or demonstrate that there will not be any water quality degradation in Steamboat Ditch. The County Engineer shall be responsible for determining compliance with this condition.

The developer shall contact the Division of Water Resources, State of Nevada, to determine whether the proposed flood detention facilities will require permits. If required, copies shall be submitted to the County Engineer.

50. Prior to the approval of a grading permit or approval of a final map, a detailed dust control plan shall be prepared and submitted to Air Quality Management of the District Health Department and to the Department of Development Review. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.
51. Prior to approval of the first final map, an erosion control and soil stabilization plan and a grading plan shall be approved by the Washoe-Storey Conservation District. A copy of the approval shall be submitted to the District Health Department, Department of Development Review, and County Engineer.
52. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided from any structures. The Department of Development Review shall be responsible for determining compliance with this condition.
53. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100-year flows and lined. The County Engineer shall be responsible for determining compliance with this condition.

#### WATER AND WASTEWATER

54. The developer shall construct or provide the financial assurances for the construction of the water and sewer system facilities. The financial assurances must be in a form and amount that is satisfactory to the Utility Division.
55. Fees for plan checking and inspection shall be paid in accordance with Washoe County ordinance. The Utility Division shall be responsible for determining compliance with this condition.
56. Easements for all water and sewer utilities shall be offered for dedication to Washoe County. The Utility Division shall be responsible for determining compliance with this condition.

57. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance. The Utility Division shall be responsible for determining compliance with this condition.
58. The sanitary sewer collection system and water system facilities, with the exception of the golf course and common area irrigation systems, must be offered for dedication to Washoe County. The Utility Division shall be responsible for determining compliance with this condition.
59. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance. The Utility Division shall be responsible for determining compliance with this condition.
60. The Nevada Division of Environmental Protection must submit a letter to the District Health Department certifying their approval of the final map.
61. The developer shall deposit with the Utility Division the sum of \$50.00 per lot prior to recordation of all or part of the final map. This fee shall represent the prorated share of the completed water and wastewater facilities plan for the South Truckee Meadows for this development.
62. In accordance with the Washoe County Utility Division policies for the Southwest Truckee Meadows, water rights shall be dedicated to Washoe County. Prior to acceptance, the water rights must be in good standing with the State of Nevada Division of Water Resources and must reflect a point of diversion, place and manner of use acceptable to the Utility Division.
64. All minor infrastructure for potable water distribution shall be designed, constructed, inspected, and approved by the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infrastructure design can be accomplished prior to the approval of the final map.
65. Responsibility for design of wells, pump structure, controls, telemetry, and appurtenances, storage tanks, and transmission lines to the edge of the subdivision, all necessary to provide water service to the project, will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
66. Prior to final map approval, a letter of approval from the Division of Water Resources for the water rights serving this proposal must be submitted. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource. The Utility Division shall be responsible for determining compliance with this condition.

67. Before approval of the final map will be considered, a letter from the water purveyor committing adequate water service to this proposal must be submitted to the District Health Department. This letter shall indicate that the facility will not be brought beyond its permitted capacity by this service.
68. Prior to the approval of a final map by the District Health Department, the production wells that will serve any phase of this development must be constructed, pump tested and sampled to ensure the proposed water system has sufficient quality and quantity.
69. Water quality results from a state-certified laboratory for new water sources shall be submitted to the Utility Division. The water quality sampling and testing shall be in compliance with the current State of Nevada Regulations for Public Water Systems, NAC 445.
70. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits. The Utility Division shall be responsible for determining compliance with this condition.
71. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval.
72. Any wells on the property not in use for production or monitoring purposes, shall be properly abandoned in accordance with State Regulations governing Water Wells and Related Drilling. The Utility Division shall be responsible for determining compliance with this condition.
73. The developer shall provide access to the existing monitoring wells. In the event access is no longer available, the developer shall construct new wells. The Utility Division shall be responsible for determining compliance with this condition.
74. The tentative maps shall show the maintenance roads for the existing and proposed water tanks. The location of these roads shall be mutually agreeable to the Department of Public Works and the developer.
75. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters. The Department of Development Review shall be responsible for determining compliance with this condition.
76. Pursuant to Section 278.340 of the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, no grading permit shall be issued prior to District Health Department approval of the referenced final map. This condition does not apply to the construction of production wells required in Condition 68.

The developer may seek relief from the District Board of Health for this requirement or may choose to create a separate parcel for the first 18-hole golf course.

77. The Department of Development Review shall be responsible for determining compliance with this condition. The final map shall contain the following note:

**NOTE**

No Certificate of Occupancy shall be issued until the water facilities have been completed and accepted by Washoe County.

78. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
79. All minor infrastructure for sewer collection shall be designed, constructed, inspected, and approved by the District Health Department and the Utility Division.
80. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development. The Utility Division shall be responsible for determining compliance with this condition.
81. All sewer hookup fees for the area within the final map will be paid to Washoe County. The Utility Division shall be responsible for determining compliance with this condition.
82. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines. The Utility Division shall be responsible for determining compliance with this condition.
83. Proper easements shall be shown for off-site sewage and drainage systems. The Utility Division and the County Engineer shall be responsible for determining compliance with this condition.
84. Prior to final map approval, a letter, which can be a will-serve letter, from the Utility Division committing sewer service, must be submitted to the District Health Department. This letter shall indicate that the treatment facility will not be brought beyond its permitted capacity by this service.

FIRE PROTECTION

85. The plans submitted with a building permit application shall show evidence of compliance with the recommendations of the applicable fire protection agency. Those concerns are fire flows, fire hydrant number and location, access, sequential phasing of firebreaks during development, permanent firebreaks, minimum defensible space, use of fire resistant construction and/or roof material, sprinklering of structures, and spark arrestors in chimneys. Access and fire flows shall be addressed to the satisfaction of the fire protection agency prior to the approval of a final map.
86. The developer shall minimize grading to the maximum extent possible in the area around the critical mule deer habitat in order to preserve the existing browse shrubs. The Department of Development Review, in conjunction with the applicable fire protection agency, shall be responsible for determining compliance with this condition.

OTHER

87. A minimum 25-foot landscape buffer shall be installed between the homes and the collector and secondary loop streets. The homeowners association shall be required to perpetually maintain these areas. The Department of Development Review shall be responsible for determining compliance with this condition.
88. Prior to acceptance of the first final map, the telephone easement Doc. No. 415899, which runs through the middle of many lots, shall be realigned with appropriate abandonment and relocation easements, or the proposed lots realigned. The County Engineer shall be responsible for determining compliance with this condition.

**CONDITIONS  
FOR  
SPECIAL USE PERMIT CASE NO. \_\_\_\_\_**

(As recommended by Department of Development Review and  
attached to Staff Report dated \_\_\_\_\_ )

**UNLESS OTHERWISE SPECIFIED, ALL CONDITIONS MUST BE MET OR FINANCIAL ASSURANCES MUST BE PROVIDED TO SATISFY THE CONDITIONS PRIOR TO SUBMITTAL FOR A BUILDING PERMIT. THE AGENCY RESPONSIBLE FOR DETERMINING COMPLIANCE WITH A SPECIFIC CONDITION SHALL DETERMINE WHETHER THE CONDITION MUST BE FULLY COMPLETED OR WHETHER THE DEVELOPER SHALL BE OFFERED THE OPTION OF PROVIDING FINANCIAL ASSURANCES. ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL HAVE A COPY FILED WITH THE COUNTY ENGINEER AND THE DEPARTMENT OF DEVELOPMENT REVIEW.**

**COMPLIANCE WITH THE CONDITIONS OF THIS SPECIAL USE PERMIT IS THE RESPONSIBILITY OF THE DEVELOPER, HIS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY AND THEIR SUCCESSORS IN INTEREST. FAILURE TO COMPLY WITH ANY CONDITIONS IMPOSED IN THE ISSUANCE OF THE SPECIAL USE PERMIT MAY RESULT IN THE INSTITUTION OF REVOCATION PROCEDURES.**

**WASHOE COUNTY RESERVES THE RIGHT TO REVIEW AND REVISE THE CONDITIONS OF THIS APPROVAL SHOULD THEY DETERMINE THAT A SUBSEQUENT LICENSE OR PERMIT ISSUED BY WASHOE COUNTY VIOLATES THE INTENT OF THIS APPROVAL.**

GENERAL CONDITIONS

1. As part of every special use permit application, the developer shall include a completed "statement of compliance" that demonstrates how the development will be or is consistent with the recorded final Development Agreement. The Department of Development Review shall be responsible for determining compliance with this condition.
2. Prior to ground-disturbing activity, the developer shall submit an archaeological/historical survey to the Department of Development Review. The Department of Development Review shall submit the survey to the State Historic Preservation Office of the Department of Museums, Library and Arts for review. Following that review, the State Historic Preservation Office shall submit a letter to the Department of Development Review that indicates the survey was acceptable.

3. A note shall be placed on all grading plans and construction drawings stating:

**NOTE**

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the State Historic Preservation Office of the Department of Museums, Library and Arts, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.

4. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada.
5. The developer shall be required to participate in any applicable General Improvement District or Special Assessment District formed by Washoe County. The applicable division of the Department of Public Works shall be responsible for determining compliance with this condition.
6. All new utilities shall be placed underground. The County Engineer shall be responsible for determining compliance with this condition.
7. An animal waste management plan shall be prepared prior to the issuance of any building permit for a facility that might require such a plan. The plan must document how the migration of bacteria, nutrients, and other animal waste by-products to surface and ground waters will be prevented. The Department of Development Review shall be responsible for determining compliance with this condition.

**STREETS AND TRAFFIC**

8. All street construction shall comply, at a minimum, with the requirements for a subdivision within this project. The County Engineer shall be responsible for determining compliance with this condition.
9. The developer shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required. The County Engineer shall be responsible for determining compliance with this condition.
10. The minimum pavement structural section shall be 5 inches of asphalt over 8 inches of aggregate base for minor arterials, 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector streets, and 3 inches of asphalt over 6 inches of granular base for roadways for local streets. The County Engineer shall be responsible for determining compliance with this condition.

11. Prior to the issuance of the first building permit, two lanes of Whites Creek Lane shall be constructed, to two-lane minor arterial standards as a minimum, from Thomas Creek Road to the project site. The County Engineer shall be responsible for determining compliance with this condition.
12. Prior to the issuance of the first building permit, a second access shall be constructed to the project site to emergency standards. The applicable fire protection agency shall be responsible for determining compliance with this condition.
13. Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submits a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:
  - a. site distance requirements;
  - b. left turn storage capacity and design;
  - c. intersection location and alignment;
  - d. proximity to existing intersections and recommended separate distances;
  - e. existing center median and landscaping concerns;
  - f. determination of adequacy of existing Thomas Creek Road roadway geometric section; and
  - g. determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

14. Construction near fault lines shall be as follows:
  - a. Buildings for human occupancy shall be set back from the centerline of fault traces. Setback distances shall be determined by a geotechnical investigation prepared by a Nevada Registered Civil Engineer experienced in geotechnical engineering. The minimum setback shall be 50 feet on each side of the fault line.
  - b. Roadway construction in fault zones and along fault traces shall be reviewed by a Nevada Registered Civil Engineer experienced in geotechnical engineering. Any recommended special construction requirements (e.g., flexible joint connections for utilities) shall be complied with.

The County Engineer shall be responsible for determining compliance with this condition.

15. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded. The County Engineer shall be responsible for determining compliance with this condition.
16. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater. Where possible, crossings should be below the grade of public streets. The County Engineer shall be responsible for determining compliance with this condition.

#### GRADING AND DRAINAGE

17. After approval of the general concept-level storm drain master plan and the final Development Agreement, and prior to approval of any special use permit, a preliminary hydrology report shall be submitted to the County Engineer for approval. This preliminary hydrology report shall be prepared in accordance with county requirements for tentative maps, in conformance with the general concept-level storm drain master plan, and be applicable to the specific tentative map or special use permit being approved.

The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10- and 100-year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities. The County Engineer shall be responsible for determining compliance with this condition.

18. Prior to the submittal of any final map or issuance of any grading permit, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted to the County Engineer for approval. The report shall be in substantial compliance with the general concept-level storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed, constructed, and by the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.

Prior to the issuance of a grading permit, the developer shall provide a letter granting a blanket drainage and construction easement to the Southwest Pointe Subdivision that allows the subdivision to drain onto the golf course and to construct detention facilities necessary to accommodate the subdivision-generated stormwaters in mutually agreed-upon locations. The easement shall be submitted with the plans for the final golf course improvements. The County Engineer shall be responsible for determining compliance with this condition.

19. Prior to the approval of a grading permit, a detailed dust control plan shall be prepared and submitted to Air Quality Management of the District Health Department and to the Department of Development Review. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

20. For all projects larger than 5 acres, the developer shall obtain a Stormwater Discharge Permit from the Nevada Division of Environmental Protection and submit a copy to the County Engineer prior to ground-disturbing activity.
21. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan. The County Engineer shall be responsible for determining compliance with this condition.
22. The stormwater discharges from this development that flow to Dry Creek shall be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. The developer shall provide drainage structures under Steamboat Ditch that would pass the 10-year frequency storm or demonstrate that there will not be any water quality degradation in Steamboat Ditch. The County Engineer shall be responsible for determining compliance with this condition.
23. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway. Erosion protection shall be provided based upon the recommendation of the geotechnical report. The County Engineer shall be responsible for determining compliance with this condition.
24. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts. The District Health Department and the County Engineer shall be responsible for determining compliance with this condition.
25. Prior to issuance of a grading permit for the golf course and/or final map, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.
26. Prior to issuance of a grading permit for the golf course or approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
27. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.
28. Prior to the issuance of a grading permit for the golf course, a golf course management plan shall be prepared that documents how the migration of fertilizers, pesticides, herbicides, and fungicides to surface and ground waters will be prevented. A surface and ground water sampling program shall be implemented to demonstrate that migration is not occurring and commits to modifying practices in the event that any of the above materials are detected. The Department of Development Review shall be responsible for determining compliance with this condition.

WATER AND WASTEWATER

29. The sanitary sewer collection system and water system facilities, with the exception of the golf course and common area irrigation systems, must be offered for dedication to Washoe County. The Utility Division shall be responsible for determining compliance with this condition.
30. The developer shall construct or provide the financial assurances for the construction of the water and sewer system facilities. The financial assurances must be in a form and amount that is satisfactory to the Utility Division.
31. Fees for plan checking and inspection shall be paid in accordance with Washoe County ordinance. The Utility Division shall be responsible for determining compliance with this condition.
32. Easements for all water and sewer utilities shall be offered for dedication to Washoe County. The Utility Division shall be responsible for determining compliance with this condition.
33. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance. The Utility Division shall be responsible for determining compliance with this condition.
34. If required and in accordance with the Washoe County Utility Division policies for the Southwest Truckee Meadows, water rights shall be dedicated to Washoe County. Prior to acceptance, the water rights must be in good standing with the State of Nevada Division of Water Resources and must reflect a point of diversion, place and manner of use acceptable to the Utility Division.
35. Responsibility for design of wells, pump structure, controls, telemetry, and appurtenances, storage tanks, and transmission lines to the edge of the subdivision, all necessary to provide water service to the project, will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
36. Water quality results from a State of Nevada-certified laboratory for new water sources shall be submitted to the Utility Division. The water quality sampling and testing shall be in compliance with the current State of Nevada Regulations for Public Water Systems, NAC 445.
37. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits. The Utility Division shall be responsible for determining compliance with this condition.

38. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval.
39. Any wells on the property not in use for production or monitoring purposes, shall be properly abandoned in accordance with State Regulations governing Water Wells and Related Drilling. The Utility Division shall be responsible for determining compliance with this condition.
40. The developer shall provide access to the existing monitoring wells. In the event access is no longer available, the developer shall construct new wells. The Utility Division shall be responsible for determining compliance with this condition.
41. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
42. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development. The Utility Division shall be responsible for determining compliance with this condition.

#### FIRE PROTECTION

43. The plans submitted with a building permit application shall show evidence of compliance with the recommendations of the applicable fire protection agency. Those concerns are fire flows, fire hydrant number and location, access, sequential phasing of firebreaks during development, permanent firebreaks, minimum defensible space, use of fire resistant construction and/or roof material, sprinklering of structures, and spark arrestors in chimneys. Access and fire flows shall be addressed prior to the introduction of any combustible materials to the site. The fire protection agency shall be responsible for determining compliance with this condition.
44. The developer shall minimize grading to the maximum extent possible in the area around the critical mule deer habitat in order to preserve the existing browse shrubs. The Department of Development Review, in conjunction with the applicable fire protection agency, shall be responsible for determining compliance with this condition.

LANDSCAPING

45. Detailed landscaping and irrigation plans for the village commercial center, club house, golf course, golf driving range, equestrian center, or other non-residential uses requiring special use permit review shall be submitted prior to the issuance of a building permit for the particular use.
46. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200(e) of the Uniform Building Code Section 7011 amended. The Department of Development Review shall be responsible for determining compliance with this condition.

**CONDITIONS**  
for  
**DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**  
for  
**SOUTHWEST POINTE**

(As amended by the Washoe County Planning Commission on  
May 7, 1996)

\*\*\* IMPORTANT – PLEASE READ \*\*\*

UNLESS OTHERWISE STATED, PRIOR TO APPROVAL OF THE FINAL DEVELOPMENT AGREEMENT, ALL CONDITIONS MUST BE MET. A COPY OF ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL BE FILED WITH THE DEPARTMENT OF PUBLIC WORKS AND/OR DEPARTMENT OF DEVELOPMENT REVIEW.

COMPLIANCE WITH THE APPLICABLE STATUTES, ORDINANCES, RULES, REGULATIONS, AND POLICIES AND WITH THE CONDITIONS OF APPROVAL OF THIS TENTATIVE MAP IS THE RESPONSIBILITY OF THE DEVELOPER, ITS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY, AND THEIR SUCCESSORS IN INTEREST.

GENERAL CONDITIONS

1. Unless specifically stated in the final Development Agreement, all uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final Development Agreement, the allowed uses, densities, and standards of the land subject to the Development Agreement shall be those in effect at the time the final agreement is approved. No  
Action
2. The final Development Agreement shall specify any time frames that have been extended beyond those specified by Washoe County Code or Nevada Revised Statutes. The Department of Development Review shall be responsible for determining compliance with this condition. Incorporated  
into  
Dev. Agreement
3. A "statement of compliance" format or formats for both residential and non-residential projects shall be made a part of the final Development Agreement. The Department of Development Review shall be responsible for determining compliance with this condition.
4. The developer and all successors shall direct any potential purchaser of the site, or portions thereof (other than individual single-family lots), to meet with the Department of Development Review to review the Development Agreement and the conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the Department of Development Review of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale. No  
Action

- 5. Prior to submittal to the Washoe County Board of County Commissioners, the final Development Agreement shall be reviewed and approved by the Office of the District Attorney of Washoe County.
- 6. The final Development Agreement will be submitted to the Washoe County Board of County Commissioners within three months of submission of a completed agreement with all accompanying exhibits, provided the Department of Development Review does not delay the submission in order to approve provisions of the agreement to its satisfaction. Extension of any of these time frames may be requested if mutually agreeable to Washoe County and the developer.
- 7. The developer shall provide the Department of Development Review staff with a quarterly report indicating the number of building permits issued and other building activity, once residential construction has started.
- 8. The developer shall define a process to ensure that the maintenance and replacement of the streets, parking areas, lighting, landscaping, recreational facilities, utilities, and other private infrastructure shall be performed by the homeowners associations and shall be perpetually funded. The County Engineer and the Department of Development Review shall be responsible for determining compliance with this condition.

letter from  
Bob Sader

★  
Reason

STREETS AND TRAFFIC

- 9. A Level of Service C, or the current Washoe County standard, shall be used as a basis for evaluating transportation needs and traffic impact mitigation requirements.
- 10. The final Development Agreement shall not be approved until the right-of-way (ROW) of all necessary off-site accesses from the project to Thomas Creek Road are obtained. Preliminary golf course and roadway grading may commence before such approval has been obtained so long as such construction is done in accordance with Condition 21 for tentative maps. An approved and recorded ROW document shall be provided to the County Engineer and the District Attorney's Office.
- 11. Prior to final approval of the Development Agreement, the developer for Southwest Pointe shall petition the Washoe County Board of County Commissioners to create a Special Assessment District for the purpose of financing the construction of Whites Creek Lane from the project site to Wedge Parkway and other roads as defined in the SAD agreement. In the event that a special assessment district is not created, the developer shall construct Whites Creek Lane, as outlined in Conditions 17 and 19 for tentative maps, from the project site to Wedge Parkway. The County Engineer shall be responsible for determining compliance with this condition.
- 12. A Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. However, as part of Phase I development, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

County Engineer

Prior to approval of any final map or prior to the issuance of the first building permit for the first final map, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submits a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a. site distance requirements;
- b. left turn storage capacity and design;
- c. intersection location and alignment;
- d. proximity to existing intersections and recommended separate distances;
- e. existing center median and landscaping concerns;
- f. determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g. determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

13.

The developer shall provide a schematic pedestrian circulation plan. The Department of Development Review shall be responsible for determining compliance with this condition. The "statement of compliance" shall require that a detailed pedestrian circulation plan will be submitted as part of each tentative map and approved by the Department of Development Review.

Site Plan*

14.

Unless specifically stated in these conditions of approval or in the final Development Agreement, all public and private street design and construction is to be done in accordance with the Washoe County standards that are in effect at the time the final Development Agreement is recorded. The County Engineer shall be responsible for determining compliance with this condition.

*No Action*

15.

Unless otherwise stated in these conditions of approval or in the final Development Agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided. The County Engineer shall be responsible for determining compliance with this condition.

*No Action*

*Dev. Review*

16. All private roadways shall be depicted on the final maps and identified on the tentative map as either private access easements over individual adjacent lots or, if identified as separate parcels, as either common areas with equal fractional ownership by all of the lots within the development or common areas owned by the homeowners association. The County Engineer shall be responsible for determining compliance with this condition.

No  
Action

#### GRADING AND DRAINAGE

17. A general concept-level storm drain master plan shall be submitted to the County Engineer for approval prior to acceptance of the final Development Agreement. The general concept-level storm drain master plan shall address in general terms proposed methods for handling the existing and increased flows for the 10- and 100-year storms including detention and other proposed mitigation measures for both on-site and off-site areas. This master plan shall include a drawing which shows the existing drainage basins within the development and indicate how they may be impacted. After approval of the general concept-level storm drain master plan and the final Development Agreement, and prior to approval of a tentative map for any phase or approval of any special use permit, a preliminary hydrology report shall be submitted to the County Engineer for approval. The County Engineer shall be responsible for determining compliance with this condition.

City Engineer

5/14/96  
submitted  
to Dave  
Price

18. Detention/retention facilities are to be maintained by a homeowners association and perpetually funded unless Washoe County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County. The County Engineer shall be responsible for determining compliance with this condition.

No  
Action

19. A maintenance plan of all drainage facilities to be owned by the homeowners association shall be provided prior to approval of the conditions, covenants, and restrictions (CC&Rs). All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe County water treatment plant and associated Steamboat Ditch conveyance system. The County Engineer shall be responsible for determining compliance with this condition.

No  
Action

20. The off-stream detention/debris basin recommended in the 1990 Kennedy, Jenks, Chilton report shall be reserved based on the following timetable:

No  
Action

- a. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final Development Agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the developer or his successors, for dedication to the Washoe County School District for a middle school or revert to open space.
- b. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within 5 years of the approval of the final Development Agreement. If construction is not started by that date, the property for the detention site shall be offered by the developer or his successors, for dedication to the Washoe County School District for a middle school or revert to open space.
- c. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school or revert to open space.

d. If the detention basin is constructed, Washoe County shall pay fair market value for the property.

21. The increase in development-caused runoff from the 100-year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained on-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company. The County Engineer shall be responsible for determining compliance with this condition.

No Action

22. A geotechnical report shall be prepared, which considers the effects of earthquake forces and faulting in the area. The siting and design of detention/retention facilities shall be addressed based on the findings and recommendations provided in the geotechnical report. The County Engineer shall be responsible for determining compliance with this condition.

City Engineer

5/16/96  
Submitted to Dave Price

23. The development shall comply with the requirements of the Hillside Ordinance of the Development Code, as applicable. The Department of Development Review shall be responsible for determining compliance with this condition.

none required

No Action

WATER AND WASTEWATER

24. A schematic water system plan for the referenced proposal must be submitted to the Utility Division and the District Health Department. Prior to a final map approval, the plan must show that the water system will conform to the State of Nevada Water Supply Regulations, NAC Chapter 445, and the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, NAC 278.400 through 278.410.

Health Utilities

5/13/96  
Submitted to Doug Coulter and Terri Svetich

no comments yet

25. Prior to the approval of the final Development Agreement, a complete water analysis from at least one monitoring well must be submitted to the District Health Department. The analysis must demonstrate the water conforms to the existing and proposed drinking water standards.

Correspondence received from Terri Svetich

26. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure. The Utility Division shall be responsible for determining compliance with this condition.

No Action

need to tie down how developer participate

FIRE PROTECTION

27. If requested by the applicable fire protection agency, a minimum one-acre site for a fire station shall be offered for dedication prior to recordation of the first final map. The developer shall enter into talks with the applicable fire protection agency for any other requirements, such as, a fire station site, manpower and equipment needs, or for coordination with other developments that have similar requirements and the results of those discussions, as they relate to the entire project, shall be incorporated into the Development Agreement.

PARKS/RECREATION/OPEN SPACE

28. An open space management plan and map shall be prepared that specifies the ownership of open spaces, type of uses allowed and who is responsible for maintenance. This plan shall address the provisions of Section 110.408.45 of the Development Code. Common areas shall be maintained by the homeowners association and provisions be made for perpetual funding for maintenance.

Prior to approval of the final Development Agreement, a government entity (e.g. United States Forest Service, Washoe County Parks Department, etc.) or a non-profit organization (e.g. Washoe Parks Foundation) shall be identified that will accept the dedication of the open space buffers identified on the Concept Plan, which consists of approximately 1,500 acres. The Parks and Recreation Department and the Department of Development Review shall be responsible for determining compliance with this condition.

29. The final Development Agreement shall include a provision for the public open space that prohibits the sale of any open space without the consent of Washoe County. The Department of Development Review shall be responsible for determining compliance with this condition.

30. A minimum 10-acre public park site shall be offered for dedication to the county. A sketch plan will be included in the final Development Agreement. The final park design shall be mutually agreeable to the county and the developer. The developer will construct the recreation facilities in the park and then be reimbursed for the cost of the construction from the Residential Construction Tax. The responsibility of park maintenance shall be negotiated by the developer and Washoe County prior to the approval of the final Development Agreement. The Parks and Recreation Department and Department of Development Review shall be responsible for determining compliance with this condition.

31. The developer will work with the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer. The Parks and Recreation Department and Department of Development Review shall be responsible for determining compliance with this condition.

LANDSCAPING/ARCHITECTURAL DESIGN

32. Prior to approval of the final Development Agreement, the developer shall submit a Development Standards Handbook for the entire project to the Design Review Committee for its review and approval. These guidelines shall address, but not be limited to, type and color of building material, general architectural design, fencing, landscaping material (if plant material: type, size at time of planting, maturation size at full growth, period of time between planting and full growth), landscaping location, landscaping irrigation system, and financial assurances that landscaping will be planted and maintained.

The Design Review Committee shall also review the design of Whites Creek Lane, specifically to address Condition 19.c. for tentative maps. The Department of Development Review shall be responsible for determining compliance with this condition.

**FINAL DEVELOPMENT AGREEMENT**

This Agreement is entered into this \_\_\_ day of \_\_\_\_\_, 1996 by and between the **COUNTY OF WASHOE**, a political subdivision of the State of Nevada ("COUNTY"); and **BETTY ALYCE JONES, HELEN JEANE JONES, IRIS G. BREWERTON, KENNETH G. WALKER, AND GERALD C. SMITH**, Trustees of The Nell J. Redfield Trust and **SOUTHWEST POINTE PARTNERS**, a Nevada general partnership, (collectively referred to as "OWNERS"). For valuable consideration, receipt of which is hereby acknowledged, the parties agree as follows:

**1. GENERAL.**

1.1 **Legal Authority.** Nevada Revised Statute ("NRS") 278.0201 to 278.0207 and Washoe County Development Code (the "Code") §§ 110.814.00 to 110.814.95 authorize the COUNTY and the OWNERS to enter into agreements for the development of real property. This Agreement is a final development agreement, as defined in Code § 110.814.75, and as provided in NRS Chapter 278.

1.2 **The Project.** The OWNERS hold a legal or equitable interest in certain real property located in COUNTY, a legal description of which is attached as Exhibit "A". Development of the real property, subject to the terms of this Agreement, has been authorized by COUNTY under Case No. DA9-1-93 and ancillary cases, and is described as a residential community which includes 1,090 residential lots with common open space, a water delivery system (potable and nonpotable), sewer system, two golf courses with related recreational facilities, and a commercial village center, the total acreage being ±3,171.6 acres, designated under COUNTY land use

1 designations as Low Density Suburban, Low Density Rural, Medium Density Rural,  
2 High Density Rural, and General Rural (the "Project").

3 **1.3 Past Approvals.** The OWNERS have obtained the following  
4 approvals from the COUNTY pertaining to the Project:  
5

- 6 a) On June 11, 1996 OWNERS obtained approval from the  
7 ~~Washoe County Planning Commission~~ Board of County  
8 Commissioners for conditions to DA9-1-93. Said  
9 conditions and amendments thereto ~~approved concurrently~~  
10 ~~with this Agreement by the Board of County Commissions,~~  
11 and are attached hereto as Exhibit "B".
- 12 b) On September 5, 1995 OWNERS obtained approval from  
13 the Planning Commission for a Special Use Permit (Case  
14 No. SPW9-10-93) to develop a water system having  
15 storage of 1.4 million gallons and necessary delivery  
16 system. The order issuing such approval is attached as  
17 Exhibit "C"
- 18 c) On May 2, 1995 OWNERS obtained approval from the  
19 Planning Commission for a Special Use Permit (Case No.  
20 SPW9-13-93) to grade the first golf course and improve  
21 the construction access. The order issuing such approval  
22 is attached as Exhibit "D".
- 23 d) On November 8, 1994 OWNERS obtained approval from  
24 the Board of County Commissioners to amend the  
25 preliminary development agreement.
- 26 e) On September 27, 1994 OWNERS obtained approval from  
27 the Board of County Commissioners for an 18-month  
28 extension to submit a draft final agreement, which  
OWNERS have submitted in compliance with said  
extension.
- f) On February 8, 1994 OWNERS obtained approval from  
the Board of County Commissioners pursuant to Code §  
110.814.70 of a preliminary development agreement (Case  
No. DA9-1-93).

1.4 **Ordinance.** This Agreement shall be approved by ordinance. The  
Project is to be developed as a single entity and includes uses and development

1 standards consistent with the Washoe County Comprehensive Plan and the Southwest  
2 Truckee Meadows Area Plan.

3           **1.5 Benefit To OWNERS.** The OWNERS acknowledge and agree  
4 that, prior to entering into this Agreement appropriate legal advice and counsel was  
5 sought, that the OWNERS made a voluntary informed business decision to enter into  
6 this Agreement in good faith. The OWNERS further acknowledge and agree that  
7 substantial benefits will accrue to the OWNERS as a result of the OWNERS and the  
8 COUNTY entering into this Agreement, including entitlements to develop the Project  
9 in accordance with this Agreement and the Conditions of Approval, an extension or  
10 opportunity to seek an extension of the time in which to file a final subdivision map  
11 under this Agreement, certainty in the particular on-site and offsite improvements and  
12 requirements which the OWNERS will be responsible for constructing or completing,  
13 and certainty in the imposition of land use fees or obligations which may be imposed  
14 by the COUNTY.  
15

16           **1.6 Benefit to COUNTY.** The COUNTY acknowledges and agrees  
17 that substantial benefits will accrue to the COUNTY as a result of OWNERS and the  
18 COUNTY entering into this Agreement, including the rational, planned land uses and  
19 development of the Real Property.  
20

21           **2. SELECTED DEFINITIONS.**

22           2.1 "Agreement" means this development agreement.

23           2.2 "Conditions of Approval" mean all conditions of the Project  
24 approvals as set forth in the orders from Washoe County attached to this Agreement  
25

as Exhibits B, C, and D, which conditions are incorporated herein as provisions of this Agreement.

2.3 "COUNTY" means Washoe County, a political subdivision of the State of Nevada, and its officers, elected officials, agents, employees, divisions, departments, committees, boards and commissions.

2.4 CC&Rs means the declaration of covenants, conditions and restrictions which will be drafted by OWNERS, approved by the COUNTY and recorded against the Real Property, as further provided in the Conditions of Approval.

2.5 "Development Standards Handbook" means the development standards for the Project as set forth in Exhibit "E".

2.6 "Golf Course Property" includes all real property for the golf and related recreational facilities component of the Project.

2.7 "OWNERS" mean those property owners identified above and their successors and assigns.

2.8 "Project" means the Southwest Pointe development as approved by the COUNTY in Case No. DA9-1-93 and this Agreement.

2.9 "Public Facilities" are facilities that will be dedicated to the COUNTY. Public Facilities shall include, but are not limited to: ~~storm drains and drop inlets~~ on-site or offsite sewage collection facilities; water rights dedicated for service; water systems facilities; together with all lines, mains, holding and disposing areas, tanks, public easements and rights-of-way; and all off-site improvements that include public roadways, equipment, street lights and traffic signals. Owner constructed Public Facilities for water will include all non-golf related improvements consisting of the

required water storage tanks, well improvements, water mains, water services, water meters, gate valves, fire hydrants, flush valves, air release valves and related appurtenances. The Public Facilities for sewer will include sewer manholes, sewer mains, sewer laterals and collection lines within the Common Area Property as well as off-site effluent irrigation lines, tanks and pump stations, and the on-site effluent main line and reservoirs. In addition, Public Facilities also includes improvement of Whites Creek Lane as specified in the Conditions of Approval.

2.10 "Public Utilities" include, but are not limited to, water, sewer, natural gas, electricity, telephone, and cable television, together with all equipment and easements dedicated for these utilities.

2.11 "Real Property" means all the real property described in Exhibit "A". The real property includes the Golf Course Property, the Subdivision Property, and any remaining real property within the Project.

2.12 "Site Plan" means the plans in compliance with Code § 110.814.45 and attached hereto as Exhibit "F", and includes the Development Standards Handbook, Exhibit "E".

2.13 "Subdivision Improvements" are any on-site or off-site improvements or facilities required of residential subdivisions pursuant to this Agreement. Subdivision Improvements include, but are not limited to, all drainage improvements, common area improvements, curbs, streets, gutters, medians, parkways, pedestrian and bike paths, sidewalks, street lights, any directional traffic devices, and the Public Facilities required in connection with residential development.

1                   2.14 "Subdivision Property" includes all real property for the residential  
2 housing component of the Project.

3                   **3.     REQUIRED CONTENTS OF AGREEMENT.** Pursuant to Code §  
4 110.814.75, the following matters are included in this Agreement.

5                   **3.1     Preliminary Agreement.** Reference is made to the preliminary  
6 development agreement as approved in Case No. DA9-1-93 and amended or  
7 superseded by this Agreement.

8                   **3.2     Legal Agreement.** The substance of covenants, grants or  
9 easements, or other restrictions proposed to be imposed upon the use of the land,  
10 buildings and structures, including proposed easements or grants for Public Utilities  
11 shall be as provided in the CC&Rs and as specified in the Conditions of Approval.

12                   **3.3     Site Plan.** A Site Plan in conformance to Code § 110.814.45 is  
13 attached to this Agreement as Exhibit "F"; and includes the Development Standards  
14 Handbook, Exhibit "E".

15                   **3.4     Installation and Maintenance.** A program for the installation and  
16 maintenance of parking areas, lighting, landscaping, private drainage facilities  
17 (including detention ponds, ditches, storm drains and drop inlets), private streets,  
18 utilities, recreational facilities and other infrastructure is specified in the Conditions of  
19 Approval and will be further provided for, in part, in the CC&Rs.

20                   **3.5     Open Space Resources.** A program for the protection of open  
21 space resources, approved by COUNTY, is attached as Exhibit "G". No open space  
22 shall be sold to a bona fide third party without prior written consent of County. As

1 provided in Exhibit "G", after the 10-acre park is constructed, the County shall be  
2 responsible for park maintenance and upkeep.

3           **3.6 Development Schedule And Phasing.** Guidelines for a  
4 development schedule and phasing of the Project are more particularly described in  
5 the Development Standards Handbook ( See Article I), Exhibit "E".  
6

7           **3.7 Development Standards Handbook.** A Development Standards  
8 Handbook in compliance with Code § 110.814.35(a) is attached hereto as Exhibit "E".

9           **3.8 Incorporation Of Other Exhibits.** The following exhibits are also  
10 attached hereto:

- 11                           a) Right-Of-Way Documents for Off-Site Access from  
12 Thomas Creek Road, Exhibit "H";
- 13                           b) Construction Traffic Haul Route Plan, Exhibit "I";
- 14                           c) Concept-Level Storm Drain Plan, Exhibit "J";
- 15                           d) Geotechnical Report On Earthquake Faulting, Exhibit "K";  
16 and
- 17                           e) Schematic Water System Plan, Exhibit "L".

18           **4. EFFECT OF AGREEMENT.**

19           **4.1 Entitlements.** The approval of this Agreement by County  
20 constitutes a vested right of OWNERS to develop the Real Property as set forth in this  
21 Agreement and pursuant to the land use designations provided herein. Pursuant to  
22 Code § 110.814.15(b), this Agreement does not prevent COUNTY in a subsequent  
23 action applicable to the Real Property from adopting new ordinances, resolutions or  
24 regulations that conflict with those ordinances, resolutions and regulations in effect at  
25 the time this Agreement is made, provided any new ordinances, resolutions or  
26  
27  
28

1 regulations do not impose upon OWNERS restrictions, requirements or standards  
2 which are more burdensome, more expensive or more onerous to satisfy than those  
3 in effect at the time this Agreement is made; and provided further that any said new  
4 ordinances, resolutions or regulations do not conflict with provisions of this Agreement  
5 in a manner that adversely affects OWNERS. The parties agree such a conflict or  
6 inconsistency would prevent development of the Project as set forth in this Agreement.  
7 Nothing contained in this subsection 4.1 shall be construed to impair enforcement or  
8 compliance with the provisions of Code § 110.814.15(c) or (d).  
9

10 **4.2 Subsequent Approvals And Conditions.** Tentative maps and  
11 final maps for Subdivision Property, building permits, variances, parcel maps,  
12 boundary line adjustments, special use permits for nonresidential property, and other  
13 approvals by COUNTY within the Project ("Subsequent Approvals") shall be required  
14 pursuant to Code requirements in existence at the time this Agreement is made,  
15 except as stated otherwise herein. All Subsequent Approvals in conformance with  
16 NRS Chapter 278 and the Code (as amended hereby), and in substantial  
17 conformance with the provisions of this Agreement shall be approved by the COUNTY  
18 as a consent item without public hearing. The Conditions of Approval specified in  
19 Exhibit "B", "C", and "D" may not be amended by Subsequent Approvals without the  
20 consent of OWNERS. Any conditions imposed by COUNTY in Subsequent Approvals  
21 which pertain to the same subject matter as any Conditions of Approval may not  
22 impose restrictions, requirements or standards which are more burdensome, more  
23 expensive or more onerous for OWNERS to satisfy than any Conditions of Approval,  
24 without the consent of OWNERS; provided that reasonable conditions imposed by  
25  
26  
27  
28

1 COUNTY in Subsequent Approvals which pertain to matters not addressed by any  
2 Conditions of Approval, or provide more detail and do not conflict with matters  
3 addressed by any Conditions of Approval, shall be allowed.  
4

5 Conditions and provisions hereof regarding construction of off-site or on-site  
6 improvements (e.g. streets and utilities), including development standards and design  
7 guidelines, may be varied upon request of the OWNERS and approval of the County  
8 Engineer.

9 **4.3 Subsequent Fees.** COUNTY currently imposes four (4) fees for  
10 the privilege of developing real property: a water connection fee; a sewer connection  
11 fee; a park residential construction tax; and the Regional Road Impact Fee ("RRIF")  
12 ("collectively County Fees"). The County Fees shall be imposed on applicable  
13 development within the Project in the same manner said fees are imposed for other  
14 similarly situated development in the COUNTY, subject to the following conditions.  
15

16 4.3.1 Provided OWNERS construct a potable water system as  
17 part of the Public Facilities to serve the potable water demands of the Project as those  
18 demands arise, COUNTY shall charge no water connection fee for development within  
19 the Project.  
20

21 4.3.2 Provided OWNERS receive a credit for all off-site sewer  
22 facilities infrastructure constructed by OWNERS, OWNERS shall pay the sewer  
23 connection fee at the time and in the amount specified by COUNTY ordinance.

24 4.3.3 Subject to any credits allowed by a RRIF Capital Front-  
25 Ending Agreement, OWNERS shall pay the RRIF at the time and in the amount  
26 specified by County ordinance.  
27  
28

1                   4.3.4 Subject to the provisions of an agreement between  
2 COUNTY and OWNERS for the construction of neighborhood park improvements  
3 within the Project, OWNERS shall pay the park residential construction tax at the time  
4 and in the amount specified under NRS 278.497 to NRS 278.4987.

5  
6                   **4.4    No New COUNTY Fees.** Except for the County Fees or as  
7 specified in subsections 4.5 and 4.6 below, no new fees or taxes enacted or approved  
8 by COUNTY after the date this Agreement is made for construction or development  
9 within the Project or for capital improvements for Public Facilities shall apply to the  
10 Project, provided that the provisions of this subsection are not intended to prohibit the  
11 imposition and collection of County fees and charges imposed at the time of execution  
12 hereof (e.g., for permits or inspections).

13  
14                   **4.5    Special Assessment Districts.** ~~At the option of OWNERS,~~ The  
15 parties agree that certain Public Facilities shall may be financed, constructed and paid  
16 for, in whole or in part, by one or more developer special assessment districts. For  
17 the purposes of the County's Special Assessment Guidelines dated February, 1992  
18 ("Guidelines"), the parties agree that the following improvements generally are agreed  
19 to provide a public benefit, satisfy Section A of the Guidelines and may be included  
20 at the discretion of the parties in a special assessment district: are includable at the  
21 discretion of OWNERS in such special assessment districts:

- 22  
23                   (a) the construction and land costs of Whites Creek Lane;  
24                   (b) the County-owned nonpotable water system for golf  
25                   course and landscape irrigation;  
26                   (c) the purchase price of creek water rights (with  
27                   supplemental groundwater rights) for the County-owned  
28                   nonpotable water system;

28

~~\_\_\_\_\_ (d) the off-site Public Utilities;~~

(d) the County-owned potable water system; and

(e) County-owned landscaping improvements and trails/paths along public streets.

**4.6 Nonpotable Water Agreement.** Any fees, costs and expenses of OWNERS pursuant to an agreement between the parties for the provision of nonpotable water for golf course and common area landscape irrigation shall not be construed as a new fee under subsection 4.4. above.

**4.7 Credits Or Reimbursements Of County Fees.** No successor or assign of OWNERS shall be entitled to a credit or reimbursement of a County Fee or fee imposed pursuant to subsection 4.6 above, unless that successor OWNER obtains an express assignment of the right to the credit or reimbursement from the OWNER who paid for or earned the credit or reimbursement of a County Fee.

**4.8 Parcel Maps.** OWNERS shall be entitled to submit or obtain approval of parcel maps within Project in order to facilitate development, even if said parcel maps create legal parcels within an area of the Project subject to a tentative map, provided that such parcel maps are not used as a subterfuge to create residential lots subject to an approved tentative map. OWNERS shall not be required to dedicate water rights for new parcels created by parcel maps within the Project, if such new parcels are not intended to require potable water service by COUNTY under the provisions of this Agreement.

~~\_\_\_\_\_ **4.9 Security For Improvements.** In order to construct improvements pursuant to this Agreement for which COUNTY customarily requires security to be posted prior to commencement, OWNERS shall not be required to provide security~~

1 to COUNTY for the construction of private streets or Public Utilities which upon  
2 completion are not to be owned by COUNTY. Any security required by COUNTY shall  
3 be in the amount of:

4 \_\_\_\_\_ (a) ~~One hundred percent (100%) of the approved engineer's~~  
5 ~~cost estimate for the improvements to be constructed; plus~~

6 \_\_\_\_\_ (b) ~~Twenty percent (20%) of that sum as a contingency~~  
7 ~~amount.~~

8 **4.9 Fire Protection.** Owners agree to transfer and dedicate free of  
9 charge to County (or to another government entity of County's choice) prior to the  
10 recordation of the first final map a one-acre fire station site located on Whites Creek  
11 Lane west of the proposed elementary school and east of the Project entrance. The  
12 exact location and parcel configuration shall be mutually agreed by the parties. The  
13 deed for the fire station site shall restrict use to a fire station and ancillary purposes.  
14 Owners and representatives of the Truckee Meadows Fire Protection District have  
15 entered into discussions regarding the free dedication of the fire station site and other  
16 possible needs for fire protection, and no other commitments were made except  
17 Owner's agreement herein to dedicate the fire station site.

18  
19 **5. TERM OF AGREEMENT.**

20  
21 The term of this Agreement shall be fifteen (15) years from the date  
22 hereof; provided that all applicable terms of this Agreement shall remain binding and  
23 enforceable regarding permits, construction or development on any portion of the Real  
24 Property subject to a tentative map, a recorded final map or a special use permit in  
25 existence at the time of expiration of this Agreement.

1                   6.     **OBLIGATIONS OF OWNERS/ASSIGNMENT.**

2                   The parties acknowledge that OWNERS will sell or otherwise convey title  
3 to portions of the Real Property as development occurs. Successors to OWNERS  
4 shall acquire rights and assume obligations only to the extent required under this  
5 Agreement to develop or use the portion of the Real Property so acquired. Upon  
6 conveyance of each portion of Real Property, OWNERS' liability for obligations under  
7 this Agreement shall terminate, provided the successor OWNERS assumes said  
8 obligations. The provisions of this Agreement constitute covenants running with the  
9 Real Property. Notwithstanding the provisions of this Section 6, a successor OWNER  
10 of a single lot created by final map within the Project shall not have any obligation  
11 under this Agreement other than for development and use of the lot so owned  
12 consistent with this Agreement.  
13

14                   7.     **MISCELLANEOUS.**

15                   7.1     **Governing Law; Venue.** This Agreement is being executed and  
16 delivered in Washoe County, Nevada, and is intended to be  
17 performed in the State of Nevada, and the laws of Nevada shall  
18 govern the validity, construction, enforcement and interpretation  
19 of this Agreement. Venue for any legal action arising out of this  
20 Agreement shall be in Washoe County, Nevada.

21                   7.2     **Entirety and Amendments.** This Agreement embodies the entire  
22 Agreement between the parties and supersedes all prior  
23 agreements and understandings, if any, relating to the Project,  
24 and may be amended or supplemented only by an instrument in  
25 writing executed by the party against whom enforcement is  
26 sought, and as provided in Code § 110814.95(b). No oral  
27 statements or representations made before or after the execution  
28 of this Agreement regarding the subject matter of this Agreement  
are binding on a party, nor may any such oral statements or  
representations be relied on by a party.

7.3     **Invalid Provisions.** If any provision of this Agreement is held to  
be illegal, invalid or unenforceable under present or future laws,

such provision shall be fully severable. The Agreement shall be construed and enforced as if such illegal, invalid or unenforceable provision had never comprised a part of the Agreement. The remaining provisions of the Agreement shall remain in full force and effect and shall not be affected by the illegal, invalid or unenforceable provision or by its severance from this Agreement.

**7.4 Parties Bound and Assignment.** Subject to the provisions of Section 6, this Agreement shall be binding upon and inure to the benefit of the parties, and their respective heirs, personal representatives, successors and assigns. In the event COUNTY, for any reason, ceases to have jurisdiction as the applicable local governmental entity regarding the subject matter of all or any part of the Agreement, COUNTY shall require the new entity to assume the applicable obligations hereof.

**7.5 Further Acts.** In addition to the acts recited in this Agreement to be performed, the parties agree to perform, or cause to be performed, any and all further acts as may be reasonably necessary to consummate the obligations contemplated hereby.

**7.6 Headings.** Headings used in this Agreement are used for reference purposes only and do not constitute substantive matter to be considered in construing the terms of this Agreement.

**7.7 Attorneys' Fees.** In the event that any action is necessary to enforce the rights of any party hereto, the prevailing party in any such action shall be entitled to reasonable costs and attorneys' fees.

**7.8 Notice.** All notices given pursuant to this Agreement shall be in writing and shall be given by personal delivery, by facsimile transmission, by United States mail or by United States express mail or other established express delivery service (such as Federal Express), postage or delivery charge prepaid, addressed to the appropriate party at the address set forth below:

Project No. 88-003.20  
 March 29, 1996  
 Revised April 30, 1996

Mr. Don Young, Planner  
 Department of Development Review  
 P. O. Box 11130  
 Reno, NV 89520

**Subject: Southwest Pointe**

Dear Don:

This letter incorporates all previous correspondence pertaining to clarifications and modifications to the Conditions of Approval for Southwest Pointe. Those changes are summarized below. Deletions are ~~struck thru~~ and additions are in *italic*. One of the more significant modifications has to do with Condition #26, which pertains to street standards for public and private roads. We are requesting that the primary loop road, which will have either an 80-foot or a 60-foot right-of-way, be private rather than public and that we have the option of installing a gate at the point where Whites Creek Lane becomes a private road.

One change that does not deal with a condition, but rather with the concept plan, is the number of 12,000 square foot, 1/2 acre, and 1 acre lots. We are proposing to modify the percentage of lots in each category as outlined below.

<u>Lot Size</u>	<u>As Approved</u>	<u>Proposed</u>
12,000 sq. ft.	40%	40%
1/2 acre & larger	15%	35%
1 acre & larger	45%	25%

Samuel Chacón, P.E.  
 President

Bryan Sprague, P.E.  
 Vice President

Brita Tryggvi, A.I.C.P.  
 Principal

Greg Doerr, A.I.C.P.  
 Principal

The biggest change occurs in the number of 1/2-acre lots which has been increased and the number of 1-acre lots which has been decreased. The rationale for this change is based on a marketing study performed by Whitney Research Group in February 1996. This study identified a greater demand for 1/2 acre lots. Their

reasoning is based on demographic aging trends which suggest that as consumers grow older (i.e., aging baby boomers), they do not want the upkeep of a large custom homesite. The older consumer desires freedom to travel and not be tied down to a large custom home and lot requiring extensive maintenance upkeep. Further, we are requesting a range, rather than a specific percentage, to permit some flexibility in site planning and to minimize the need for future revisions.

**Conditions for Development Agreement Case No. DA9-1-93**

1. *Unless specifically stated in the final development agreement, all uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved.*

**Reason for Modification:** Different standards may be proposed in the final development agreement; therefore, the wording of this condition needs to reflect this possibility.

2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. ~~The A "statement of compliance" format shall be made a part of the final development agreement. For the Phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff.~~

**Reason for Modification:** The second sentence should become a separate condition because it refers to the development agreement. The first sentence should also be a separate condition because it deals with the tentative maps and special use permits. The proposed deletions simply reflect the fact that

there is no reason to prepare a draft statement of compliance because the Phase I applications will not be submitted before the final development agreement is approved.

- ~~3. The recorded final development agreement shall be effective for a period not more than 15 years. An extension of this approval may be granted if mutually agreed to by the developer and Washoe County.~~

**Reason for Modification:** Article 814, Section 110.814.75 requires a development schedule as part of the final development agreement. Therefore, this condition is unnecessary because it simply repeats the requirements of the Washoe County Development Code.

4. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's Office, *County Engineer*, and the Department of Development Review *prior to final map approval or prior to issuance of a certificate of occupancy for a non-residential use*. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. *If the CC&Rs are not recorded on the entire property, subsequent phases will be annexed to the previously recorded CC&Rs.* Said CC&Rs shall specifically address the ~~potential for liens~~ *county's ability to enforce certain provisions* against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement, of the following items, at a minimum.

g. *Common area landscaping including along streets or landscaping along Whites Creek Lane*

h. *Fire and fuelbreaks on open space*

~~l. Private streets and utilities~~

~~e. Public park center~~

. . . At a minimum, the CC&Rs shall also specifically address the following items:

j. ~~Requirement of Access to open space remaining open to~~ *for pedestrian and bicycle traffic.*

l. *Retention of public access to the golf course, bike paths, (i.e., 8-foot meandering paths along minor arterials and some collectors; refer to street sections), public trails, and non-residential uses.*

**Reason for Modifications:** The first change more accurately reflects the county's interest in enforcement. The second changes clarifies that this condition does not pertain to landscaping on private property along streets but is strictly limited to landscaping in common areas. Fire and fuelbreaks may be located on property other than open space, therefore, the reference to open space should be deleted. Private streets are listed in an earlier item. (i.e., Item A). The developer will not be maintaining the public park and, therefore, this reference should be deleted. Lastly, some open space, such as wetlands, may not be open to pedestrian and bicycle traffic, therefore, this wording should be clarified.

11. ~~Within six months of the approval of the preliminary development agreement, a draft final development agreement that conforms with the provisions of Section 814 of the Washoe County Development Code shall be completed and submitted to the Washoe County Department of Development Review. Washoe County Department of Development Review will provide comments on the draft final agreement. The final development agreement will then be submitted to the Washoe County Board of County Commissioners within three months of submission of a completed agreement with all accompanying exhibits, provided the Department of Development Review does not delay the submission in order to approve provisions of the agreement to its satisfaction. Extension of any of these time frames may be requested if mutually agreeable to Washoe County and the developer.~~

**Reason for Modification:** A draft of the final development agreement has already been submitted, therefore, the proposed deletions simply reflect the current status. The proposed addition provides for delay in the submission.

12. ~~The project shall be developed in three phases. Phase I includes a tentative map for 436 lots, an 18-hole golf course, the village center, and driving range. Phase II will include an additional nine holes, the equestrian center and a tentative map for approximately 220 dwelling units. Phase III includes the remaining 434 lots and the last nine holes of golf. Modifications to the proposed phasing plan may be made if mutually agreeable to the developer and Washoe County. These modifications may include the commercial portion of the project and the second 18-hole golf course, which may be constructed during Phase II or Phase III.~~

**Reason for Modification:** Section 110.814.75 states that the final development agreement must include a development schedule that indicates the phases in which the land subject to the development agreement will be built and the approximate dates for the completion of each phase.

13. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired.

If the subdivider fails to record a final map for any portion of the tentative map *or obtain an extension* within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

**Reason for Modification:** For clarification, the order of the second and third paragraphs was reversed and the phrase regarding an extension was added.

14. The developer shall provide the Department of Development Review staff with a ~~monthly~~ *quarterly* report indicating the number of building permits issued *and other building activity*, once residential construction has started.

**Reason for Modification:** Monthly is too frequent, and quarterly should be often enough. The scope of the report was broadened to include all building activity (e.g., golf course, infrastructure) rather than simply an inventory of building permits.

20. Prior to final approval of the development agreement, the developer for Southwest Pointe shall petition the Washoe County Board of County Commissioners to create a Special Assessment District for the purpose of financing the construction of Whites Creek Lane from the project site to

Wedge Parkway and other roads as defined in the SAD agreement. In the event that a special assessment district is not created, the developer shall construct Whites Creek Lane, as outlined in Condition No. 16 and 18, from the project site to Wedge Parkway, to the satisfaction of the County Engineer.

~~Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following not to the satisfaction of the Development Review staff.~~

#### NOTE

~~An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge be less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee.~~

**Reason for Modification:** The county has approved the Regional Road Impact Fee, which goes into effect this month. As a result, the second half of this condition is no longer necessary.

21. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

**Reason for Modification:** This condition should be divided into two conditions because the first paragraph deals with the development agreement and the remainder refers to the tentative maps and special use permits.

22. Prior to *or upon* approval of the ~~final development agreement~~ CC&Rs, the developer shall provide a street maintenance program to the satisfaction of the County Engineer and the Department of Development Review. Street maintenance of private streets shall be performed by the homeowner's association and shall be perpetually funded.

**Reason for Modification:** The Homeowners' Association will be responsible for street maintenance, therefore, this topic is more accurately addressed in the CC&Rs.

23. Prior to approval of the final development agreement, *the developer shall provide* a schematic pedestrian circulation plan. As part of each tentative map, a detailed pedestrian circulation plan will be submitted and approved by the Department of Development Review.

**Reason for Modification:** The condition was incomplete.

25. Unless specifically stated *in these Conditions of Approval or in the final development agreement*, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer.

**Reason for Modification:** The conditions of approval are separate from the final development agreement and may include some items that are not in the development agreement.

26. The following roadway sections shall be applicable to the public and private on-site streets shown on the tentative map. A traffic report shall be submitted ~~prior to approval of the first final~~ *with each tentative map* which identifies the ultimate average daily traffic on each street *and make recommendations for geometric design (e.g., left turn storage capacity, site distance, minimum required turning radius)*

- a. *Private Common Driveways - Serving 4 or less lots, pavement width 20 feet; serving 5 or more lots, pavement width 22 feet; no parking either side. Curb returns shall have a minimum face of curb radius of 20 feet on local streets and 25 feet on collector streets. Private common driveway locations will be shown on all tentative maps. Private common driveways will line up with proposed street intersections where possible and will comply with street intersection offset requirements. Single lot driveway access will not be allowed onto streets on which the average daily traffic exceeds 2000. (Refer to street sections.)*
  
- a. *b. Rural Private - ~~41 60~~ foot minimum ROW ~~cul-de-sac rural street~~ (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum 4 foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. (Refer to street sections.)*
  
- b. *c. Local Private - ~~50-60~~ foot minimum ROW ~~local street~~ (200 - 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum 4 foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. (Refer to street sections.)*
  
- e. *d. Collector Private - ~~50 60~~ foot minimum ROW ~~collector street~~ (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. a minimum 4 foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. (Refer to Street Sections.)*

- d. ~~e. Collector Private - 60 foot minimum ROW collector street (2000 ADT to 8000 ADT):~~ minimum 36 24-foot pavement width with an additional 12-foot left turn lane at intersections where warranted; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking ~~permitted on both on either~~ side. A minimum ~~five (5) eight (8) foot~~ path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed. *Access for private common driveways will be allowed. (Refer to street sections.)*
- ~~e. Public 60 foot ROW collector street (2000 ADT to 9600 ADT):~~ minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt path one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
- f. ~~Public-Collector Private - 80 120 foot minimum ROW minor-arterial collector street (up to 9600 ADT to 10,830 ADT):~~ A minimum 41 27 foot center median from curb face to curb face, 29.5 19 foot roadway section curb face to curb face pavement width on either side of the median; curb and gutter on both sides or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side *except during special events*; a minimum ~~four (4) eight (8) foot~~ meandering asphalt path both sides; no residential driveway access allowed. *(Refer to street sections.)*
- g. *Minor Arterial, Private - 120 foot minimum ROW (more than 10,800 ADT): A minimum 27 foot center median from curb face to curb face, 24 foot pavement width on either side of the median; County Engineer approved concrete header with roadside ditch; no parking either side; a minimum 8 foot meandering asphalt path both sides. A gate may be installed at the point where Whites Creek Lane becomes a private road. (Refer to street sections.)*

- h. Minor Arterial, Public - 120 foot minimum ROW (more than 10,800 ADT): A minimum 27 foot center median from curb face to curb face, 29.5 foot roadway section on either side of the median; curb and gutter on both sides; a minimum 6 foot concrete sidewalk on both sides; no residential driveway access is allowed. (Refer to street sections.) A gate may be installed at the point where Whites Creek Lane becomes a private road. A public turn-around is required on the public side of the gate.*

**Reason for Modification:** To be consistent with Washoe County Street Design Standards, to create a hierarchy of paths, and to change some of the public streets to private streets.

- 27. Landscaped medians shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer, Washoe County Department of Development Review and the developer. Maintenance of median landscaping shall be by the Homeowners' Association as provided for in a separate maintenance agreement to be approved by the County Engineer and the District Attorney's Office prior to approval of the ~~final development agreement~~ CC&Rs.

**Reason for Modification:** The Homeowners' Association will be responsible for the maintenance of median landscaping, therefore, this topic is more accurately addressed in the CC&Rs.

- 28. Meandering asphalt paths will be acceptable provided . . .
  - c. Maintenance of the asphalt paths and landscaping shall be the responsibility of the developer and, when created, by the Homeowners' Association as provided for in a separate maintenance agreement and be approved by the County Engineer and the District Attorney's office prior to approval of the ~~final development agreement~~ CC&Rs.

**Reason for Modification:** The Homeowners' Association will be responsible for the maintaining the asphalt paths and the landscaping between the road and the path, therefore, this topic is more accurately addressed in the CC&Rs.

29. ~~Proposed roadways (public or private) are not to be centered along fault lines. Fault lines shall be located behind the curb line, on the up thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback excluding construction for buildings for human occupancy may be reduced, to the satisfaction of the County Engineer.~~

*Construction near fault lines shall be as follows:*

- a. *Buildings for human occupancy shall be set back from the centerline of fault traces. Setback distances shall be determined by a geotechnical investigation prepared by a Nevada Registered Civil Engineer experienced in geotechnical engineering. The minimum setback shall be 50 feet on each side of the fault line.*
- b. *Roadway construction in fault zones and along fault traces shall be reviewed by a Nevada Registered Civil Engineer experienced in geotechnical engineering. Any recommended special construction requirements (e.g., flexible joint connections for utilities) shall be complied with.*

**Reason for Modification** There was confusion over how the original condition should be interpreted. The proposed wording was developed in conjunction with the staff of the Engineering Division, Kleinfelder, and Harding Lawson.

33. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs that are longer than ~~500~~ 1,500 feet to the satisfaction of the County Engineer and the applicable fire protection agency. These roads shall have a 30-foot access easement with a minimum 20-foot width of ~~6 inches of Type 2 Class B aggregate base.~~ *2.5 inches of asphalt concrete pavement on an engineered gravel base.* The roads shall be controlled by emergency access gates and shall be posted with signs stating "For emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer.

**Reason for Modification:** The county has adopted new standards for emergency access roads since this project was approved. The proposed change is consistent with the new standards.

34. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. ~~The emergency access road shall be constructed within a 30-foot access easement to a minimum 20-foot width with 4 inches of Type 2 Class B aggregate base.~~

**Reason for Modification:** The last sentence repeats Condition #33.

36. Unless otherwise stated *in these conditions of approval or in the final development agreement*, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided to the satisfaction of the County Engineer.

**Reason for Modification:** The conditions of approval are separate from the final development agreement and may include some items that are not in the development agreement.

37. The minimum pavement structural section shall be *5 inches of asphalt over 8 inches of aggregate base for minor arterials*, 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector streets, and 3 inches of asphalt over 6 inches of granular base for roadways for local streets to the satisfaction of the County Engineer.

**Reason for Modification:** No structural section for minor arterials had been identified.

40. Off-site parking areas shall be provided within ~~300~~ 500 feet of homes that have *lots ranging in size between 12,000 square feet and 0.5 acre*. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the tentative map(s), to the satisfaction of Washoe County Department of Development Review and the Developer.

**Reason for Modification:** To avoid having a multitude of guest parking areas with 1 or 2 spaces, the spacing requirement was increased to 500 feet so that the guest parking areas will consist of 4 or 5 spaces. Guest parking areas will be added to the neighborhoods with 0.5 acre lots because on-street parking will be prohibited on the private streets and the front yard setback can be reduced with side-entry and detached garages.

41. All private roadways shall be depicted on the final maps and identified ~~in the final development agreement~~ *on the tentative map* as either private access easements over individual adjacent lots or, if identified as separate parcels, as *either* common areas with equal fractional ownership by all of the lots within the development *or common areas owned by the Homeowners' Association* to the satisfaction of the County Engineer.

**Reason for Modification:** NRS Chapter 116 (Uniform Common Interest Ownership Act) requires a corporation to be formed for the Homeowners' Association. The corporation owns the common areas.

43. Regulatory signs must be installed at the juncture of all public streets with a private street *and at intersections along the primary loop road* to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards.

**Reason for Modification:** Since there is only one location where a public street intersects with a private street (i.e., at the main project entrance), there would only be one sign. The county staff wants signs at additional locations and, therefore, the suggested wording to add "at intersections along the primary loop road."

48. Prior to the submittal of any final map or issuance of any grading permit, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.

Prior to the issuance of a grading permit, the applicant shall provide a letter granting a blanket drainage and construction easement to the Southwest Pointe Subdivision that allows the subdivision to drain onto the golf course and to construct detention facilities necessary to accommodate the subdivision-generated stormwaters in mutually agreed upon locations to the satisfaction of the County Engineer. The easement shall be submitted with the plans for the final golf course improvements.

**Reason for Modification:** The first paragraph pertains to tentative maps and special use permits; whereas, the second paragraph only refers to the special use permit for the golf course. Therefore, only the first paragraph should appear with the tentative map conditions and both paragraphs should appear with the special use permit conditions.

49. A maintenance plan of all drainage facilities to be owned by the homeowners' association shall be provided prior to approval of the ~~final development agreement~~ CC&Rs. All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe County water treatment plant and associated Steamboat Ditch conveyance system . . .

**Reason for Modification:** The Homeowners' Association will be responsible for the maintaining the asphalt paths and the landscaping between the road and the path, therefore, this topic is more accurately addressed in the CC&Rs.

51. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:

- a. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, ~~the Washoe County Parks and Recreation Department for a neighborhood park,~~ or revert to open space.
- b. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within 5 years of the approval of the final development agreement. If construction is not started by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, ~~the Washoe County Parks and Recreation Department for a neighborhood park,~~ or revert to open space.
- c. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, ~~the Washoe County Parks and Recreation Department for a neighborhood park,~~ or revert to open space.
- d. If the detention basin is constructed, Washoe County shall pay fair market value for the property.

**Reason for Modification:** We have been working with Karen Mullens, Washoe County Parks and Recreation Department, to identify a neighborhood park that is not adjacent to the school. The preferred location is adjacent to Thomas Creek on the south side of Whites Creek Lane.

56. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided ~~between property lines of single-family residences and riparian vegetation from any structures.~~

**Reason for Modification:** It would be difficult and impractical to implement the original wording because it would result in long, thin parcels along riparian areas that would become a "no man's land". The suggested wording is consistent with the intent of this condition and avoids the creation of unusable parcels.

- ~~64. Prior to the approval of the final development agreement, the applicant shall provide staff with a phasing schedule for the dedication of water rights. Permitted or certificated groundwater rights in the amount of 1.12 acre feet must be dedicated to Washoe County for each lot of a final map. Water rights, in accordance with the Washoe County Utility Division policies for the Southwest Truckee Meadows, shall be dedicated to Washoe County. Prior to acceptance, the water rights must be in good standing with the State of Nevada Division of Water Resources and must reflect a point of diversion, place and manner of use acceptable to the Utility Division.~~

**Reason for Modification:** Current county policy requires that sufficient water rights will be dedicated prior to recordation of each final map. A phasing schedule is typically not necessary. The required number of water rights for each lot may change in the future because the county is evaluating SPPCo water rights dedication requirement which is based on lot size. If the requirement changes, we do not want to be constrained by this condition.

- ~~65. Prior to the approval of the final map, the developer shall demonstrate how compliance with NRS 278.349, that requires the availability of water meet applicable health standards and is sufficient in quantity to serve the foreseeable needs of the subdivision, shall be met to the satisfaction of the District Health Department and Washoe County Department of Development Review.~~

**Reason for Modification:** Condition #67 addresses this topic, therefore, this condition is repetitive.

- ~~69. The developer shall provide adequate assurance that the sewage, water, and drainage systems will be satisfactorily maintained and operated.~~

**Reason for Modification:** The developer is not responsible for maintaining the sewage and water systems. These facilities are maintained Washoe County. Maintenance of the drainage system has already been addressed in Condition #49.

74. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval. ~~The water source shall meet both primary and secondary standards of the Safe Drinking Water Act.~~

**Reason for Modification:** The last sentence repeats federal, state, and local law. A subsequent condition (i.e., #77) requires the developer to use treated wastewater which will not meet drinking water standards. Therefore, the two conditions contradict one another.

- ~~79. The project shall be designed to accommodate a gravity flow sanitary sewer system within the boundaries of the subdivision. Such design shall be to the satisfaction of the Utility Division.~~

**Reason for Modification:** According to Terri Svetich, Washoe County Utility Division, this is not a Utility Division condition and can be deleted.

83. The sanitary sewer collection system and water system facilities, *with the exception of the golf course and common area irrigation systems*, must be offered for dedication to Washoe County.

**Reason for Modification:** Washoe County does not want to be responsible for golf course and common area irrigation systems, therefore, these systems should remain private.

- ~~90. Should the proposed "off stream" location for the flood detention facility proposed in the 1990 Kennedy/Jenks report not be dedicated for this purpose, a minimum ten acre site for an elementary and a minimum 25 acre site for a middle school shall be offered for dedication. If the "off stream"~~

~~flood control facility is dedicated to Washoe County, a 10-acre site for the elementary school shall be offered for dedication. If the area for the "off-stream" facility is dedicated, but the county has not complied with Condition No. 51, the use for the area shall revert back to a school site and/or a park site (if requested by Washoe County) as proposed by the developer. If a school or park site is not requested by Washoe County, this area shall remain as an open space buffer.~~

**Reason for Modification:** The special use permit for the elementary school has already been approved. The elementary school will be located on a 17-acre parcel on the north side of Whites Creek Lane. This elementary school site is not impacted by the flood control facility. A neighborhood park site has also been proposed on the south side of Whites Creek Lane.

92. A minimum one-acre site shall be offered for dedication *prior to approval of a final map*, if requested by the applicable fire protection agency, for a fire station. The developer shall enter into talks with the applicable fire protection agency for any other requirements, such as, a fire station site, manpower and equipment needs, or for coordination with other developments that have similar requirements.

**Reason for Modification:** To clarify when the fire station site must be dedicated.

95. ~~Unless the off-stream site is dedicated to the county,~~ A minimum 10-acre public park site shall be offered for dedication to the county. A sketch plan ~~has been submitted, which if conceptually approved by the county, should~~ *will* be included in the final development agreement. The final park design shall be mutually agreeable to the county and the developer. The developer will construct the recreation facilities in the park and then be reimbursed for the cost of the construction from the Residential Construction Tax. The responsibility of park maintenance shall be negotiated by the developer and Washoe County prior to the approval of the final development agreement.

**Reason for Modification:** The park site has nothing to do with the off-stream detention facility, therefore, this reference is inaccurate. The sketch

plan that is referred to in this condition has been changed and the park site has been moved, therefore, this reference is also inaccurate.

97. Prior to approval of the final development agreement, the developer shall submit ~~schematic landscaping and architectural design guidelines~~ *a Development Standards Handbook* for the entire project to the Design Review Committee for its review and approval. These guidelines shall address, but not be limited to, type and color of building material, general architectural design, fencing, landscaping material (if plant material: type, size at time of planting, maturation size at full growth, period of time between planting and full growth), landscaping location, landscaping irrigation system, and financial assurances that landscaping will be planted and maintained.

**Reason for Modification:** To make the wording consistent with Article 814, Development Agreements.

- ~~99. Homes located on 12,000 square foot lots shall have a minimum 160 square foot storage space added in their garages, if only one garage space is provided. All homes will have a minimum two car garage.~~

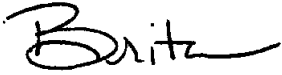

**Reason for Modification:** No homes will be constructed with one garage space.

**Tentative Map Conditions for Development Agreement Case No. DA9-1-93**  
**Final Map Conditions for Development Agreement Case No. DA9-1-93**  
**Special Use Permit Application and Construction Conditions for Development Agreement Case No. DA9-1-93**

Currently, there are numerous repetitive conditions under each of these headings, and there are also conditions that pertain to the tentative map that appear under the development agreement and vice versa. I have reorganized the conditions under three headings -- development agreement conditions, tentative map conditions, and special use permit conditions. I think this format will be easier for everyone to work with.

Thank you for your consideration of this request. Please call me if I can provide you with additional information or answer any questions.

Sincerely,

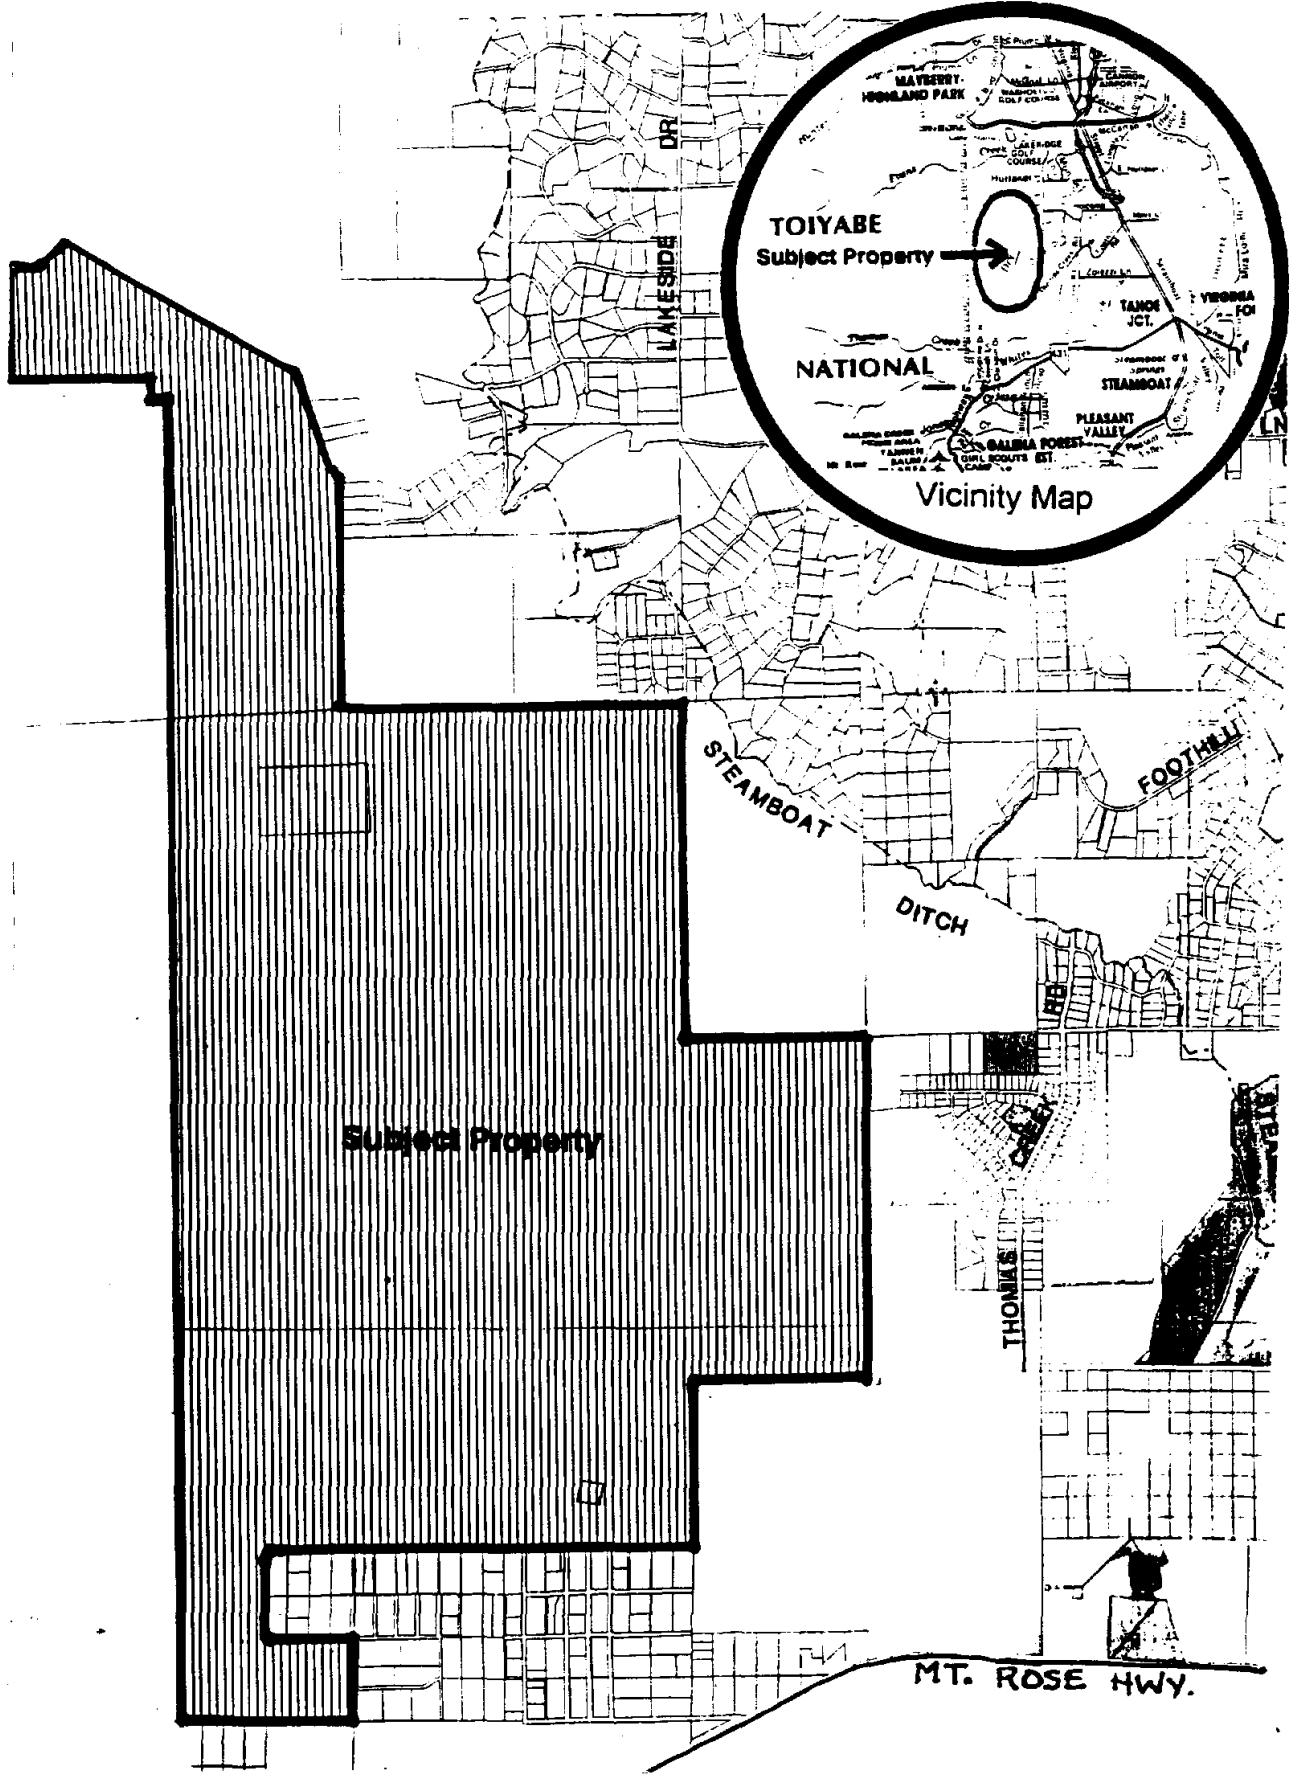

A handwritten signature in black ink, appearing to read "Brita". The signature is fluid and cursive, with a long horizontal stroke at the end.

**PUBLIC AND PRIVATE TRAIL SYSTEM**

GENERAL CONDITIONS  
for  
DEVELOPMENT AGREEMENT CASE NO. DA9-1-93

GENERAL CONDITIONS

- ✓ 1. All uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final development agreement, the allowed uses, densities, and standards of the land subject to the development agreement shall be those in effect at the time the final agreement is approved. *(Revision Proposed.)*
  
- ✓ 2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff. *(Revision Proposed. If revisions are approved this condition would be divided into two conditions -- one under development agreements and the other under tentative maps and special use permits)*
  
- ✓ 3. The recorded final development agreement shall be effective for a period not-more-than 15 years. An extension of this approval may be granted if mutually agreed to by the developer and Washoe County. *(Deletion Proposed)*
  
- ✓ 9. The developer and all successors shall direct any potential purchaser of the site, or portions thereof, to meet with the development review staff to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the development review staff of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.
  
- ✓ 10. Prior to submittal to the Washoe County Board of County Commissioners, the final development agreement shall be reviewed and approved by the Washoe County District Attorney's Office.

The development agreement shall specify the time frames that have been extended beyond those specified by WCC or NRS.

- ✓ 11. Within six months of the approval of the preliminary development agreement, a draft final development agreement that conforms with the provisions of section 814 of the Washoe County Development Code shall be completed and submitted to the Washoe County Department of Development Review. Washoe County Department of Development Review will provide comments on the draft final agreement. The final development agreement will then be submitted to the Washoe County Board of County Commissioners within three months. Extensions of any of these time frames may be requested if mutually agreeable to Washoe County and the developer. (*Revision Proposed*)

PHASING

- ✓ 12. The project shall be developed in three phases. Phase I includes a tentative map for 436 lots, an 18-hole golf course, the village center and driving range. Phase II will include an additional nine holes, the equestrian center and a tentative map for approximately 220 dwelling units. Phase III includes the remaining 434 lots and the last nine holes of golf. Modification to the proposed phasing plan may be made if mutually agreeable the developer and Washoe County. These modifications may include the commercial portion of the project and the second 18-hole golf course, which may be constructed during phase II or phase III. (*Deletion Proposed*)

TRAFFIC

- ✓ 15. A LOS C, or the current Washoe County standard, shall be used as a basis for evaluating transportation needs and traffic impact mitigation requirements.
- ✓ 19. The final development agreement shall not be approved until the right-of-way of all necessary off-site accesses from the project to Thomas Creek Road are obtained. Provided however, that preliminary golf course and roadway grading may commence before such approval has been obtained so long as such construction is done in accordance with Condition #21. A recorded right-of-way document shall be provided to the satisfaction of the County Engineer and the District Attorney's Office.
- ✓ 20. Prior to the final approval of the development agreement, the developer for Southwest Pointe shall petition the Washoe County Board of County Commissioners to create a Special Assessment District (SAD) for the purpose of financing the construction of Whites Creek Lane from the project site to Wedge Parkway and other roads as defined in the SAD agreement. In the event that a special assessment district is not created, the developer shall construct Whites Creek Lane, as outlined in Condition No.'s 16 and 18, from the project site to Wedge Parkway, to the satisfaction of the County Engineer.

Unless substituted by Washoe County Board of County Commissioner action, each final map shall contain the following note to the satisfaction of the development review staff:

**NOTE**

An off-site road construction fee is applicable to all parcels created by this map. Any applicant for a permit to construct or otherwise use this land shall either (1) enter into an agreement with Washoe County, requiring financial assurances and approval by the District Attorney's Office, to pay the future off-site road impact fee upon its adoption or (2) pay any interim fee imposed by Washoe County, be released from the responsibility of the future impact fee, and be eligible for a refund should the future impact fee charge less than the interim fee. All options to pay existing interim fees expire upon the subsequent adoption of a replacement interim fee or an impact fee. *(Revision Proposed)*

- ✓ 21. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements. *(Revisions Proposed. If revisions are approved this condition would be divided into two conditions -- one under development agreements and the other under tentative maps and special use permits)*

- ✓ 22. Prior to approval of the final development agreement, the developer shall provide a street maintenance program to the satisfaction of the County Engineer and the Department of Development Review. Street maintenance of private streets shall be performed by the homeowner's association and shall be perpetually funded. *(Revision Proposed that would move this to tentative map) Altered cond'n to DA*
- ✓ 23. Prior to the approval of the final development agreement, a schematic pedestrian circulation plan. As part of each tentative map, a detailed pedestrian circulation plan will be submitted and approved by the Department of Development Review. *(Revision Proposed) Slightly revised.*
- ✓ 25. Unless specifically stated in the final development agreement, all (public and private) street design and construction is to be done in accordance with the Washoe County Standards that are approved at the time the final development agreement is recorded, to the satisfaction of the County Engineer. *(Revision Proposed)*
- ✓ 27. Landscaped medians shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer, Washoe County Department of Development Review ~~and the developer~~. Maintenance of median landscaping shall be by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement. *(Revision Proposed that would move this to tentative map)*
- ✓ 28. Meandering asphalt paths will be acceptable provided:
- A. Pedestrian easements are included for portions of the paths located outside the County r.o.w.
  - B. Landscaping between the back of the curb and the path shall be designed in accordance with AASHTO site distance and safety guidelines to the satisfaction of the County Engineer.
  - C. Maintenance of the asphalt paths and landscaping shall be the responsibility of the developer and, when created, by the Homeowners Association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior approval of the final development agreement. *(Revision Proposed that would move this to tentative map)*

- ✓ 36. Unless otherwise stated in the final development agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided to the satisfaction of the County Engineer. (*Revision Proposed*)
- ✓ 41. All private roadways shall be depicted on the final maps and identified in the final development agreement as either private access easements over individual adjacent lots or, if identified as separate parcels, as common areas with equal fractional ownership by all of the lots within the development to the satisfaction of the County Engineer. (*Revision Proposed that would move this to tentative map*)

DRAINAGE

- ✓ 46. Detention/retention facilities are to be maintained by a homeowner's association and perpetually funded unless the County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County.
- ✓ 47. A general concept level storm drain master plan shall be submitted and approved prior to acceptance of the final development agreement to the satisfaction of the County Engineer. The general concept-level storm drain master plan shall address in general terms proposed methods for handling the existing and increased flows for the 10- and 100-year storms including detention and other proposed mitigation measures for both on- and off-site areas. This master plan shall include a drawing which shows the existing drainage basins within the development and indicate how they may be impacted. After approval of the final development agreement, and prior to approval of the tentative map for each phase or approval of any special use permit, a preliminary hydrology report shall be submitted and approved to the satisfaction of the County Engineer. This preliminary hydrology report shall be prepared in accordance with County requirements for tentative maps, in conformance with the general concept level storm drain master plan, and be applicable to the specific tentative map or special use permit being approved.

The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10 and 100 year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities.

Split  
for  
TM & SUP

- ✓ 49. A maintenance plan of all drainage facilities, to be owned by the homeowner's association, shall be provided prior to approval of the ~~final development agreement~~. ~~final~~ <sup>final</sup> <sup>CCRS</sup> All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe county water treatment plant, and associated Steamboat Ditch conveyance system. All runoff from improved areas which runs into the Steamboat Ditch shall be pre-treated for silt and petrochemicals and shall be routed through a "wet" detention facility or approved alternative, to the satisfaction of the Utility Division and the Department of Development Review. (Revision Proposed that would move this to tentative map)
  
- ✓ 51. The off-stream detention/debris basin recommended in the 1990 Kennedy/Jenks/Chilton report shall be reserved based on the following timetable:
  - A. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final development agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - B. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within five (5) years of the approval of the final development agreement. If construction is not started within by that date, the property for the detention site shall be offered by the applicant or his successors, for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - C. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school, the Washoe County parks and Recreation Department for a neighborhood park, or revert to open space.
  - D. If the detention basin is constructed, Washoe County shall pay fair market value for the property. *(Revision Proposed)*
  
- ✓ 52. The increase in development-caused runoff from the 100 year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained on-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company, to the satisfaction of the County Engineer.
  
- ✓ 53. Prior to the approval of the final development agreement, a geotechnical report shall be prepared, which considers the effects of earthquake forces and faulting in the area, to the satisfaction of the County Engineer.

The siting and design of detention/retention facilities shall be addressed based on the findings and recommendations provided in the geotechnical report.

WATER

✓  
Moved to  
TM & SUP

- ✓ 64. Prior to the approval of the final development agreement, the applicant shall provide staff with a phasing schedule for the dedication of water rights. Permitted or certificated groundwater rights in the amount of 1.12 acre feet must be dedicated to Washoe County for each lot of a final map. Prior to acceptance, the water rights must be in good standing with the State of Nevada Division of Water Resources and must reflect a point of diversion, place and manner of use acceptable to the Utility Division. *(Revision Proposed)*
- ✓ 66. Prior to the approval of the final development agreement, a complete water analysis from at least one monitoring well must be submitted to the District Health Office. The analysis must demonstrate the water conforms to the existing and proposed drinking water standards.
- ✓ 67. Prior to the approval of the final development agreement, a schematic water system plan for the referenced proposal must be submitted to the Utility Division and the District Health Department. Prior to final map approval, the plan must show that the water system will conform to the State of Nevada Water Supply Regulations, NAC Chapter 445, and the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, NAC 278.400 through 278.410.
- ✓ 69. The developer shall ~~provide~~ adequate assurance that the sewage, water and drainage systems will be satisfactorily maintained and operated. *(Deletion Proposed)*
- ✓ 77. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure.

GRADING

- ✓ 89. The development shall comply with the requirements of the Hillside Development Ordinance, as applicable.

SCHOOLS

- ✓ 90. Should the proposed "off-stream" location for the flood detention facility proposed in the 1990 Kennedy/Jenks report ~~not~~ be dedicated for this purpose, a minimum ten acre site for an elementary school and a minimum 25 acre site for a middle school shall be offered for dedication.  
  
If the "off-stream" flood control facility is dedicated to Washoe County, a 10 acre site for the elementary school shall be offered for dedication.

If the area for the "off-stream" facility is dedicated, but the County has not complied with Condition No. 51, the use for the area shall revert back to a school site and/or a park site (if requested by Washoe County) as proposed by the developer. If a school or park site is not requested by Washoe County, this area shall remain as an open space buffer. (*Deletion Proposed*)

FIRE PROTECTION

✓ 92. A minimum one-acre site shall be offered for dedication, if requested by the applicable fire protection agency, for a fire station. The developer shall enter into talks with the applicable fire protection agency for any other requirements, such as, a fire station site, manpower and equipment needs, or for coordination with other developments that have similar requirements. (*Revision Proposed that would move this to tentative map*) NO

PARKS/RECREATION/OPEN SPACE

✓ 93. Prior to the approval of the final development agreement, an open space management plan and map shall be prepared that specifies the ownership of open spaces, type of uses allowed and who is responsible for maintenance. This plan shall address the provisions of Section 110.408.45 of the Development Code. Common areas shall be maintained by the homeowner's association and provisions be made for perpetual funding for maintenance.

Prior to approval of the final development agreement, a government entity (e.g. United States Forest Service, Washoe County Parks Department, etc.) or a non-profit organization (e.g. Washoe Parks Foundation) shall be identified that will accept the dedication of the open space buffers identified on the Concept Plan, which consists of approximately 1,500 acres.

✓ 94. The final development agreement shall include a provision for the public open space that prohibits the sale of any open space without the consent of Washoe County.

✓ 95. Unless the off-stream site is dedicated to the County, a minimum 10-acre public park site shall be offered for dedication to the County. A sketch plan has been submitted, which if conceptually approved by the County, should be included in the final development agreement. The final park design shall be mutually agreeable to the County and the developer. The developer will construct the recreational facilities in the park and then be reimbursed for the cost of the construction from the Residential Construction Tax. The responsibility of park maintenance shall be negotiated by the developer and Washoe County prior to the approval of the final development agreement. (*Revision Proposed*)

✓ 96. The developer will work together with staff from the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer.

LANDSCAPING/ARCHITECTURAL DESIGN

- ✓ 97. Prior to the approval of the final development agreement, the developer shall submit schematic landscaping and architectural design guidelines of the entire project to the Design Review Committee (DRC) for its review and approval. These guidelines shall address, but not be limited to, type and color of building material, general architectural design, fencing, landscaping material (if plant material: type, size at time of planting, maturation size at full growth, period of time between planting and full growth), landscaping location, landscaping irrigation system, and financial assurances that landscaping will be planted and maintained. *(Revision Proposed)*

The Design Review Committee shall also review the design of Whites Creek Lane, specifically to address Condition No. 18C.

- ✓ 99. ~~Homes located on 12,000 square foot lots shall have a minimum 160 square foot storage space added in their garages, if only one garage space is provided. *(Revision Proposed)*~~

*Deleted*

**GENERAL CONDITIONS  
for  
TENTATIVE MAPS**

**GENERAL CONDITIONS**

✓ 2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff. *(Revisions Proposed. If revisions are approved this condition would be divided into two conditions -- one under development agreements and the other under tentative maps and special use permits)*

✓ 4. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's office and the development review staff. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. Said CC&Rs shall specifically address the potential for liens against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement, of the following items, at a minimum: *(Revisions Proposed)*

- a. Private roads within the subdivision.
- b. Equestrian center.
- c. Staffing of maintenance and security forces.
- d. Common area landscaping.
- e. Entrance gates.
- f. Snow removal and storage areas.
- g. Landscaping along streets.
- h. Fire and fuelbreaks on open space.
- i. Detention basins and the accumulated sediment.
- j. Equestrian/pedestrian trails.
- k. Bicycle and pedestrian paths.
- l. Private streets and utilities.
- m. Golf cart crossings.
- n. Off-site residential parking areas.
- o. Public park center.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
- b. Specifications on the limitation of turf area for single family homes.

**Washoe County Board of County Commissioners**  
**Re: Tentative Maps (Southwest Pointe)--Page 2**

- c. Notice of requirement to pay future sewer user fees
- d. Minimum defensible space requirements.
- e. Snow storage areas.
- f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
- g. Potential for conservation easements or dedication of open space.
- h. Prohibition of motorized vehicles in open space.
- i. Areas with potential for equestrian traffic.
- j. Requirement of open space remaining open to pedestrian and bicycle traffic.
- k. Notice of pedestrian easements to abutting properties.

- ✓ 5. Prior to ground disturbing activity, the developer shall provide an archaeological/historical survey for review by the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology.
- ✓ 6. The developer shall participate in any applicable General Improvement District or Special Assessment District formed by Washoe County to the satisfaction of the applicable division of Public Works.
- ✓ 7. All new utilities shall be placed underground to the satisfaction of the County Engineer.
- ✓ 8. Prior to final map approval, the developer is to provide written approval of the plans for the installation of mail delivery facilities from the US Postal Service. The system must be shown on the project construction plans and installed as part of the on-site improvements to the satisfaction of the County Engineer and the US Postal Service.

PHASING

- ✓ 13. The subdivider shall present to the governing body or planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

If the subdivider fails to record a final map for any portion of the tentative map within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

The governing body or planning commission may grant an extension of not more than two (2) years for the presentation of any final map after the two (2) year period for presenting the entire final map or next successive final map has expired. *(Revisions Proposed)*

- ✓ 14. The developer shall provide Department of Development Review staff with a monthly report indicating the number of building permits issued, once residential construction has started. *(Revisions Proposed)*

*Moved to DA*

TRAFFIC

- ✓ 16. Prior to the issuance of the first building permit, two lanes of Whites Creek Lane shall be constructed, to two-lane minor arterial standards as a minimum, from Thomas Creek Road to the project site, to the satisfaction of the County Engineer.
- ✓ 17. Prior to the issuance of the first building permit, a second access shall be constructed to the project site to emergency standards to the satisfaction of the applicable fire protection agency.
- ✓ 18. Prior to the issuance of the 35th building permit, the following roadway improvements shall be constructed to the satisfaction of the County Engineer:
- A. The remaining two lanes of Whites Creek Lane from Thomas Creek Road to the project site if warranted by projected traffic demands.
  - B. Two (2) lanes of Whites Creek Lane from Thomas Creek Road to Wedge Parkway with 100 feet of right-of-way. These two lanes will be constructed so that an additional two lanes may be added in the future if warranted by projected traffic volumes.
  - C. Whites Creek Lane will be designed in a manner that minimizes any impacts on the adjacent homes to the north in Fieldcreek Ranch (e.g., fencing, berms, lowering the travel lanes).
- ✓ 21. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site. *moved to DA*
- ✓ Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:
- a) site distance requirements;
  - b) left turn storage capacity and design;
  - c) intersection location and alignment;
  - d) proximity to existing intersections and recommended separate distances;
  - e) existing center median and landscaping concerns;
  - f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and

- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements. *(Revisions Proposed. If revisions are approved this condition would be divided into two conditions -- one under development agreements and the other under tentative maps and special use permits)*

- ✓ 24. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards, to the satisfaction of the County Engineer.

- ✓ 26. The following roadway sections shall be applicable to the private on-site streets shown on the tentative map. A traffic report shall be submitted prior to approval of the first final map which identifies the ultimate average daily traffic on each street. *(Revisions Proposed)*

- A. Private - 41 foot ROW cul-de-sac street (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- B. Private - 50 foot ROW local street (maximum 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.
- C. Private -50 foot ROW collector street (500 ADT to 2000 ADT): minimum 24 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum four (4) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer.

**Washoe County Board of County Commissioners**  
**Re: Tentative Maps (Southwest Pointe)--Page 5**

- D. Private - 60 foot ROW collector street (2000 ADT to 8000 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides (developer's discretion); no parking permitted both sides. A minimum five (5) foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan to the satisfaction of the County Engineer. No residential driveway access will be allowed.
- E. Public - 60 foot ROW collector street (2000 ADT to 9,600 ADT): minimum 36 foot pavement width; curb and gutter or County Engineer approved concrete header with roadside ditch both sides; parking prohibited both sides; minimum four (4) foot meandering asphalt one side, residential driveway access not allowed. Where proposed, center medians shall be limited to a minimum of 11 feet from curb face to curb face.
- F. Public - 80 foot ROW minor arterial street (9,600 ADT to 10,830 ADT): A minimum 11 foot center median from curb face to curb face, 29<sup>1</sup>/<sub>2</sub> foot roadway section curb face to curb face on either side of the median; curb and gutter on both sides; no parking either side; four (4) foot meandering asphalt path, both sides; no residential driveway access allowed.
- G. Public - 100 ROW major arterial street (more than 10,830 ADT).

- ✓ 29. Proposed roadways (public or private) are not to be centered along fault lines. Faultlines shall be located behind the curblines, on the up-thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback excluding construction for buildings for human occupancy may be reduced, to the satisfaction of the County Engineer. *(Revisions Proposed)*
- ✓ 30. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded.
- ✓ 31. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement, to the satisfaction of the County Engineer.
- ✓ 32. Temporary County Standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street, to the satisfaction of the County Engineer.
- ✓ 33. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs that are longer than 500 feet to the satisfaction of the County Engineer and the applicable fire protection agency. These roads shall have a 30-foot access easement with a minimum 20-foot width of 6 inches of Type 2 Class B aggregate base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only" to the satisfaction of the applicable fire protection agency and the County Engineer. *(Revisions Proposed)*

**Washoe County Board of County Commissioners**  
**Re: Tentative Maps (Southwest Pointe)--Page 6**

- ✓ 34. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately maintained streets, to the satisfaction of the County Engineer. The emergency access road shall be constructed within a 30 foot access easement to a minimum 20 foot width with 4 inches of Type 2 Class B aggregate base. *(Revisions Proposed)*
- ✓ 35. Street lights shall be installed at major intersections to the satisfaction of the County Engineer.
- ✓ 37. The minimum pavement structural section shall be 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector-classified streets and shall be 3 inches of asphalt over 6 inches of granular base for roadways for local streets to the satisfaction of the County Engineer. *(Revisions Proposed)*
- ✓ 38. The applicant shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required.
- ✓ 39. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater, to the satisfaction of the County Engineer. Where possible, crossings should be below the grade of public streets.
- ✓ 40. Off-site parking areas shall be provided within 300 feet of homes that have 12,000 square foot lot sizes. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the revised tentative maps for phase I and subsequent tentative map applications for phases II and III, to the satisfaction of Washoe County Department of Development Review and the developer. *(Revisions Proposed)*
- ✓ 42. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved and constructed to the satisfaction of the County Engineer.
- ✓ 43. Regulatory signs must be installed at the juncture of all public streets with a private street to the satisfaction of the County Engineer. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards. *(Revisions Proposed)*
- ✓ 44. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

AIR QUALITY MANAGEMENT

- ✓ 45. Prior to the approval of a grading permit or approval of a final map, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

DRAINAGE

- ✓ 48. Prior to the submittal of any final map or issuance of any grading permit, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.

~~Prior to the issuance of a grading permit, the applicant shall provide a letter granting a blanket drainage and construction easement to the Southwest Pointe Subdivision that allows the subdivision to drain onto the golf course and to construct detention facilities necessary to accommodate the subdivision-generated stormwaters in mutually agreed upon locations to the satisfaction of the County Engineer. The easement shall be submitted with the plans for the final golf course improvements. *(Revisions Proposed that, if approved, would move the second paragraph under special use permits only)*~~

✓ 49

- ✓ 50. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.

- ✓ 54. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.

- ✓ 56. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided between property lines of single family residences and riparian vegetation. *(Revisions Proposed)*

✓ 57. The stormwater discharges from this development that flow to Dry Creek shall be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. The applicant shall provide drainage structures under Steamboat Ditch that would pass the 10-year frequency storm or demonstrate that there will not be any water quality degradation in Steamboat Ditch.

✓ 58. Prior to approval of the final map, the developer shall obtain a Stormwater Discharge Permit from the Nevada Division of Environmental Protection. If required, point discharge permit for each proposed detention pond will be obtained from the Nevada Division of Environmental Protection and copy submitted to the Engineering Division.

The applicant shall contact the Division of Water Resources, State of Nevada, to determine whether the proposed flood detention facilities will require a permit.

✓ 59. Prior to issuance of a grading permit for the golf course and/or final map, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.

✓ 60. Prior to issuance of a grading permit for the golf course or approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.

✓ 63. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100 year flows and lined, to the satisfaction of the County Engineer.

#### WATER

✓ 65. Prior to the approval of the final map, the developer shall demonstrate how compliance with ~~NRS 278.349~~, that requires the availability of water meet applicable health standards and ~~is sufficient in quantity to serve the foreseeable needs of the subdivision, shall be met to the satisfaction of the District Health Department and Washoe County Department of Development Review.~~ *(Deletion Proposed)*

✓ 68. Prior to final map approval, a letter of approval for the water rights serving this proposal must be submitted from the Division of Water Resources. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource to the satisfaction of the Utility Division.

✓ 70. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters.

✓ 71. Water quality results from a State certified laboratory for new water sources shall be submitted to the Utility Division. The water quality sampling and testing shall be in compliance with the current State of Nevada Regulations for Public Water Systems, NAC 445.

- ✓ 72. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits.
- ✓ 73. Any wells on the property not in use for production or monitoring purposes, shall be properly abandoned in accordance with State Regulations governing Water Wells and Related Drilling.
- ✓ 74. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval. The water source shall meet both primary and secondary standards of the Safe Drinking Water Act. *(Revisions Proposed)*
- ✓ 75. The tentative maps shall show the maintenance roads for the existing and proposed water tanks. The location of these roads shall be mutually agreeable to Washoe County and the developer.
- ✓ 76. The developer shall provide access to the existing monitoring wells to the satisfaction of the Utility Division. In the event access is no longer available, the developer shall construct new wells to the satisfaction of the Utility Division.

**WASTEWATER**

- ✓ 78. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
- ✓ 79. The project shall be designed to accommodate a gravity flow sanitary sewer system within the boundaries of the subdivision. Such design shall be to the satisfaction of the Utility Division. *(Revisions Proposed)*
- ✓ 80. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines, to the satisfaction of the Utility Division.
- ✓ 81. All minor infrastructure for potable water distribution shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infrastructure design can be accomplished prior to the approval of the final map.

- ✓ 82. Responsibility for design of wells, pump structure, controls, telemetry, and appurtenances, storage tanks, and transmission lines to the edge of the subdivision, all necessary to provide water service to the project, will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
- ✓ 83. The sanitary sewer collection system and water system facilities must be offered for dedication to Washoe County.
- ✓ 84. The developer shall construct or provide the financial assurances for the construction of the water and sewer system facilities. The financial assurances must be in a form and amount that is satisfactory to the Utility Division.
- ✓ 85. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance to the satisfaction of the Utility Division.
- ✓ 86. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development.
- ✓ 87. Fees for plan checking and inspection shall be paid in accordance with Washoe County ordinance.
- ✓ 88. Easements for all water and sewer utilities shall be offered for dedication to the satisfaction of the Utility Division.

**FIRE PROTECTION**

- ✓ 91. The plans submitted with a building permit application shall show evidence of compliance with the recommendations of the applicable fire protection agency. Those concerns are fire flows, fire hydrant number and location, access, sequential phasing of firebreaks during development, permanent firebreaks, minimum defensible space, use of fire resistant construction and/or roof material, sprinklering of structures, and spark arrestors in chimneys. Access and fire flows shall be addressed to the satisfaction of the fire protection agency prior to the introduction of any combustible materials to the site.
- ✓ 98. The developer shall minimize grading to the maximum extent possible in the area around the critical mule deer habitat in order to preserve the existing browse shrubs.

LANDSCAPING

- ✓ 100. A minimum 25 foot landscape buffer shall be installed between the homes and the collector and secondary loop streets. The homeowners association shall be required to perpetually maintain these areas.

OTHER

- ✓ 101. Prior to acceptance of the first final map, the telephone easement Doc. No. 415899, which runs through the middle of many lots, shall be realigned with appropriate abandonment and relocation easements, or the proposed lots realigned, to the satisfaction of the County Engineer.

GENERAL CONDITIONS

- ✓ 1. Unless specifically stated in the final development agreement, final maps and final construction drawings shall comply with all applicable statutes, ordinances, rules, regulations, and policies in effect at the time of approval of the final map or any subsequent extension date.
- ✓ 2. Final maps shall be in substantial compliance with all plans and documents submitted with and made part of this tentative map request, as may be amended by action of the final approving authority. All documentation necessary to satisfy the conditions noted below shall accompany the final map when submitted to the Engineering Division and the development review staff.
- ✓ 6. A note shall be placed on all construction drawings stating:

NOTE

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.

- ✓ 7. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada, when field conditions mandate construction other than that shown in the original drawing.
- ✓ 8. The final map shall designate faults, by distance and bearings, that have been active during the Holocene epoch of geological time and shall contain the following note to the satisfaction of the development review staff:

**NOTE**

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time. The faults have been located by Civil Engineer Registered in Nevada and experienced in Geotechnical Engineering and field surveyed by a Nevada Registered Land Surveyor.

- ✓ 9. A complete set of construction improvement drawings, including an on-site grading plan, shall be submitted to the Engineering Division for approval prior to finalization of any portion of the subdivision. Grading shall comply with best management practices and shall include detailed plans for grading and drainage on each lot, erosion control, slope stabilization, mosquito abatement. Placement or disposal of any excavated material shall be indicated on the grading plan.
- ✓ 10. All soil boring logs must be included as part of the construction drawings to the satisfaction of the County Engineer.
- ✓ 13. The Washoe County Planning Commission certificate on the final map shall be to the satisfaction of the County Engineer and the Department of Development Review.

**DRAINAGE**

- ✓ 39. The 100-year floodplain boundaries and flood elevations shall appear on each final map to the satisfaction of the County Engineer. If the floodplain boundary has been changed by a Federal Emergency Management Agency (FEMA) Conditional Letter of Map Amendment or Conditional Letter of Map Revision, the date of that letter and a note to that effect shall appear on the final map to the satisfaction of the County Engineer. Grading or building permits shall not be issued for areas currently shown as "A" zones on the FEMA floodplain maps until a Letter of Map Amendment or Revision is submitted or until conformance with Washoe County flood construction standards is determined by the County Engineer.
- ✓ 40. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts to the satisfaction of the District Health Department and the County Engineer.
- ✓ 41. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.

**WATER**

- ✓ 42. Prior to the approval of a final map by the District Health Department, the production wells that will serve any phase of this development must be constructed, pump tested and sampled to ensure the proposed water system has sufficient quality and quantity.

**Washoe County Board of County Commissioners**  
**Re: Tentative Maps (Southwest Pointe)--Page 13**

- ✓ 43. Before approval of the final map will be considered, a letter from the water purveyor committing adequate water service to this proposal must be submitted to the District Health Department.
- ✓ 46. Pursuant to Section 278.340 of the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, no grading permit shall be issued prior to District Health Department approval of the referenced final map. This condition does not apply to the construction of production wells required in condition Number 48.

The applicant may seek relief from the District Board of Health for this requirement or may choose to create a separate parcel for the first 18-hole golf course.

- ✓ 49. A letter, which can be a will-serve letter, from the appropriate provider committing water service must be submitted to the District Health Department and Utility Division. This letter shall indicate that the facility will not be brought beyond its permitted capacity by this service.
- ✓ 50. The final map shall contain the following note to the satisfaction of the development review staff:

**NOTE**

No Certificate of Occupancy shall be issued until the water facilities have been completed and accepted by resolution of the Board of County Commissioners.

**WASTEWATER**

- ✓ 53. Proper easements shall be shown for off-site sewage and drainage systems to the satisfaction of the Utility Division and the County Engineer.
- ✓ 54. The Nevada Division of Environmental Protection must submit a letter to the District Health Department certifying their approval of the final map.
- ✓ 55. All minor infrastructure for sewer collection shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division.
- ✓ 58. All sewer hookup fees for the area within the final map will be paid to the satisfaction of the Utility Division.
- ✓ 59. The developer shall deposit with the Utility Division the sum of \$50.00 per lot prior to recordation of all or part of the final map. This fee shall represent the development's prorated share of the completed water and wastewater facilities plan for the south Truckee Meadows .
- ✓ 60. Prior to final map approval, a letter, which can be a will-serve letter, from the Utility Division committing sewer service, must be submitted to the District Health Department. This letter shall indicate that the treatment facility will not be brought beyond its permitted capacity by this service.

- ✓ 61. All minor infrastructure for potable water distribution shall be designed, constructed, and inspected to the satisfaction of the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infrastructure design can be accomplished prior to the approval of the final map.

GRADING

- ✓ 63. Prior to approval of the first final map, an erosion control/soil stabilization plan and grading plan shall be approved by the Washoe-Storey Conservation District. A copy of the approval shall be submitted to the District Health Department, Department of Development Review and Washoe County Engineer.

**GENERAL CONDITIONS  
for  
SPECIAL USE PERMITS**

GENERAL CONDITIONS

- ✓ 2. As part of every tentative map and special use permit application, the developer shall include a "statement of compliance" that demonstrates how the development application is consistent with the recorded final development agreement. The "statement of compliance" format(s) shall be made a part of the final development agreement. For the phase I applications, including the tentative map, special use permit and administrative waiver, a "draft statement of compliance" shall be provided to staff prior to the public hearing. When the final development agreement is approved, a revised statement of compliance for the Phase I tentative map and special use permit applications shall be submitted to Department of Development Review staff. *(Revisions Proposed. If revisions are approved this condition would be divided into two conditions -- one under development agreements and the other under tentative maps and special use permits)*
  
- ✓ 5. Prior to ground disturbing activity, the developer shall provide an archaeological/historical survey for review by the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology.
  
- ✓ 6. The developer shall participate in any applicable General Improvement District or Special Assessment District formed by Washoe County to the satisfaction of the applicable division of Public Works.
  
- ✓ 7. All new utilities shall be placed underground to the satisfaction of the County Engineer.

TRAFFIC

- ✓ 16. Prior to the issuance of the first building permit, two lanes of Whites Creek Lane shall be constructed, to two-lane minor arterial standards as a minimum, from Thomas Creek Road to the project site, to the satisfaction of the County Engineer.
  
- ✓ 17. Prior to the issuance of the first building permit, a second access shall be constructed to the project site to emergency standards to the satisfaction of the applicable fire protection agency.
  
- ✓ 21. Prior to approval of the final development agreement, a proposed Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. As part of Phase I development, however, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

✓ Prior to the issuance of the first building permit, all construction traffic will be diverted to Whites Creek Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submit a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a) site distance requirements;
- b) left turn storage capacity and design;
- c) intersection location and alignment;
- d) proximity to existing intersections and recommended separate distances;
- e) existing center median and landscaping concerns;
- f) determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g) determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements. *(Revisions Proposed. If revisions are approved this condition would be divided into two conditions -- one under development agreements and the other under tentative maps and special use permits)*

✓ 29. Proposed roadways (public or private) are not to be centered along fault lines. Faultlines shall be located behind the curbline, on the up-thrown side, to the satisfaction of the County Engineer. Roads may cross fault lines. If fault lines are more accurately located in the field, the setback excluding construction for buildings for human occupancy may be reduced, to the satisfaction of the County Engineer. *(Revisions Proposed)*

✓ 30. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded.

✓ 37. The minimum pavement structural section shall be 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector-classified streets and shall be 3 inches of asphalt over 6 inches of granular base for roadways for local streets to the satisfaction of the County Engineer. *(Revisions Proposed)*

- ✓ 38. The applicant shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required.
- ✓ 39. No at-grade crossing golf cart crossings shall be allowed across any street with 500 ADT or greater, to the satisfaction of the County Engineer. Where possible, crossings should be below the grade of public streets.

AIR QUALITY MANAGEMENT

- ✓ 45. Prior to the approval of a grading permit or approval of a final map, a detailed dust control plan shall be prepared and submitted to Air Quality Management and to Washoe County Department of Development Review staff. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.

DRAINAGE

- ✓ 48. Prior to the submittal of any final map or issuance of any grading permit, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted and approved by the County Engineer. The report shall be in substantial compliance with the general storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed and constructed to the satisfaction of the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.

Prior to the issuance of a grading permit, the applicant shall provide a letter granting a blanket drainage and construction easement to the Southwest Pointe Subdivision that allows the subdivision to drain onto the golf course and to construct detention facilities necessary to accommodate the subdivision-generated stormwaters in mutually agreed upon locations to the satisfaction of the County Engineer. The easement shall be submitted with the plans for the final golf course improvements. *(Revisions Proposed that would place the second part of this condition under special use permits only.)*

✓ Added 5 ac Stormwater Discharge Permit req't.

- ✓ 50. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site to the satisfaction of the County Engineer. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan.
- ✓ 54. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway, to the satisfaction of the County Engineer. Erosion protection shall be provided based upon the recommendation of the geotechnical report.
- ✓ 55. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200 (e) of the Uniform Building code Section 7011 amended.
- ✓ 57. The stormwater discharges from this development that flow to Dry Creek shall be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. The applicant shall provide drainage structures under Steamboat Ditch that would pass the 10-year frequency storm or demonstrate that there will not be any water quality degradation in Steamboat Ditch.
- ✓ 59. Prior to issuance of a grading permit for the golf course and/or final map, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.
- ✓ 60. Prior to issuance of a grading permit for the golf course or approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
- ✓ 61. Prior to the issuance of a grading permit for the golf course, a golf course management plan shall be prepared that documents how the migration of fertilizers, pesticides, herbicides, and fungicides to surface and ground waters will be prevented. A surface and ground water sampling program shall be implemented to demonstrate that migration is not occurring and commits to modifying practices in the event that any of the above materials are detected.

add 62

WATER

- ✓ 71. Water quality results from a State certified laboratory for new water sources shall be submitted to the Utility Division. The water quality sampling and testing shall be in compliance with the current State of Nevada Regulations for Public Water Systems, NAC 445.
- ✓ 72. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits.

- ✓ 73. Any wells on the property not in use for production or monitoring purposes, shall be properly abandoned in accordance with State Regulations governing Water Wells and Related Drilling.
- ✓ 74. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval. The water source shall meet both primary and secondary standards of the Safe Drinking Water Act. *(Revisions Proposed)*
- ✓ 76. The developer shall provide access to the existing monitoring wells to the satisfaction of the Utility Division. In the event access is no longer available, the developer shall construct new wells to the satisfaction of the Utility Division.

WASTEWATER

- ✓ 78. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
- ✓ 79. The project shall be designed to accommodate a gravity flow sanitary sewer system within the boundaries of the subdivision. Such design shall be to the satisfaction of the Utility Division. *(Revisions Proposed)*
- ✓ 82. Responsibility for design of wells, pump structure, controls, telemetry, and appurtenances, storage tanks, and transmission lines to the edge of the subdivision, all necessary to provide water service to the project, will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
- ✓ 83. The sanitary sewer collection system and water system facilities must be offered for dedication to Washoe County. *(Revisions Proposed)*
- ✓ 84. The developer shall construct or provide the financial assurances for the construction of the water and sewer system facilities. The financial assurances must be in a form and amount that is satisfactory to the Utility Division.

- ✓ 85. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance to the satisfaction of the Utility Division.
- ✓ 86. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development.
- ✓ 87. Fees for plan checking and inspection shall be paid in accordance with Washoe County ordinance.
- ✓ 88. Easements for all water and sewer utilities shall be offered for dedication to the satisfaction of the Utility Division.

**FIRE PROTECTION**

- ✓ 91. The plans submitted with a building permit application shall show evidence of compliance with the recommendations of the applicable fire protection agency. Those concerns are fire flows, fire hydrant number and location, access, sequential phasing of firebreaks during development, permanent firebreaks, minimum defensible space, use of fire resistant construction and/or roof material, sprinklering of structures, and spark arrestors in chimneys. Access and fire flows shall be addressed to the satisfaction of the fire protection agency prior to the introduction of any combustible materials to the site.

**LANDSCAPING/ARCHITECTURAL DESIGN**

- ✓ 98. The developer shall minimize grading to the maximum extent possible in the area around the critical mule deer habitat in order to preserve the existing browse shrubs.

**GENERAL CONDITIONS**

- ✓ 3. A note shall be placed on all construction drawings stating:

**NOTE**

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the Department of Conservation and Natural Resources, Division of Historic Preservation and Archeology, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.

- ✓ 4. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada, when field conditions mandate construction other than that shown in the original drawing.

**DRAINAGE**

- ✓ 10. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts to the satisfaction of the District Health Department and the County Engineer.
- ✓ 11. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.

**LANDSCAPING**

- ✓ 13. Detailed landscaping and irrigation plans for the village commercial center, club house, golf course, golf driving range and equestrian center shall be submitted prior to the issuance of a building permit for the particular use.

# Excerpt from Article 814

- (2) The phases, if any, in which the land subject to the development agreement will be built and the approximate dates for the completion of each phase.
- (g) Development Standards Handbook. A development standards handbook that provides development standards for the following:
- (1) Architectural style; Chapter IV
  - (2) Energy supply and conservation; Chapters III & IV
  - (3) Land grading, erosion and flood control; Chapter III

RE: Southwest Pointe Development Agreement DA9-1-93  
Site Plan and Development Standards Handbook

Dear Brita:

We have reviewed the engineering related items of the Site Plan and the Development Standards Handbook submitted May 21, 1996, and May 22, 1996, respectively. The following list outlines required revisions and suggested changes to address the Engineering Division concerns.

**SITE PLAN (DEVELOPMENT CODE 110.814.45)**

- OK 1. Both sheets of the Site Plan must be stamped and signed by the design engineer.
2. Perimeter grading conditions look excessive. Assuming a 3:1 slope, most slopes range from twenty to forty feet high, with a maximum height of about 83 feet. Slopes this large do not appear to be in compliance with the Development Standards Handbook. What will be done to mitigate the benched look these slopes will create? *Will add stds to DSH*
- OK 3. *Revised text on p. 214* Neighborhoods J, M, N, W and AA show proposed street grades of 10% on the Site Plan, while Page 2-14 of the Development Standards Handbook states street grades will be limited to 9%. The maximum street grades allowed are 9% on streets with a northern exposure and 10% on streets with a southern exposure. All street grades steeper than 6% require the approval of the County Engineer and will be reviewed at the Tentative Map stage.
- OK 4. Public and private streets are not clearly identified on the Site Plan. The Site Plan shall be revised accordingly. *Note on plans*

RE: Southwest Pointe Development Agreement DA9-1-93  
Site Plan and Development Standards Handbook  
May 31, 1996  
Page Two

*Will note on site plan* 5. It appears that the Site Plan shows some, but not all, of the proposed common driveways as a shaded or dashed line. The common driveways shown on the Site Plan shall be labeled. It may be helpful to note that not all proposed common driveways are shown on the Site Plan, but that they will be shown at the Tentative Map stage.

OK 6. Portions of the internal loop roads appear as a shaded <sup>BLACK</sup> green line on Sheet 1 of the Site Plan. Identify the significance of the green shading.

**DEVELOPMENT STANDARDS HANDBOOK**

*Will add Cond 26 to page 2-15* 1. Page 2-1 refers to entry landscaping consisting of dense conifers along the road. All landscaping within medians and adjacent to roadways will be required to meet AASHTO site distances and safety guidelines. Therefore, dense conifers may not be allowed at all locations. A suggested addition to Chapter V. Landscape Guidelines, is a section on street landscaping that includes the AASHTO site distances and safety guidelines requirement.

OK 2. The returns on the Common Driveway, Figure 2-13, shall be revised to show a minimum face of curb radius of 20 feet for local streets and 25 feet for collector streets, per Tentative Map Condition of approval 22a.

OK 3. A gravel shoulder is not allowed in lieu of a path for the collector and local streets described on page 2-23. The reference to the gravel shoulder shall be deleted.

OK 4. The description of rural streets on page 2-24 references Figure 2-12. In order to clarify this section it is suggested that "Rural Street" is added to Section A/1 of Figure 2-12. It would also be helpful to mention the four foot path in the text on page 2-24.

*Will address* 5. The grading guidelines in the Grading, Drainage, and Erosion Control section of Chapter III, do not consider mass grading. Provide mass grading guidelines that address cut and fill slopes, maximum heights and remediation measures to eliminate a benched look.

RE: Southwest Pointe Development Agreement DA9-1-93  
Site Plan and Development Standards Handbook  
May 31, 1996  
Page Three

6. *Will amend* The driveway criteria presented on page 3-4 shall be revised such that it complies with Washoe County standards. A maximum 12 foot wide driveway is not wide enough to provide access to a 2 or 3 car garage. Minimum paved driveway widths are 12 feet for a 1 car garage, 16 feet for a 2 car garage, and 24 feet for a 3 car garage (Standard Detail W-16.4).
7. *OK* The maximum allowed driveway slope is 14% per the Uniform Building Code. Driveways steeper than 14% are not allowed. Revise page 3-4 accordingly.
8. *OK* Circular driveways on one acre lots may be allowed with the approval of the County Engineer.
9. *OK* It is recommended that the statement regarding unpaved parking areas on page 3-4 be expanded to indicate specifically when and where unpaved parking areas would be allowed. For example, unpaved parking areas on the golf course would be used only during special events.
10. *Will resolve* All new infrastructure shall be constructed with new materials. Recycled railroad flatbed cars (page 7-1) are not acceptable for bridge structures.
11. *Strike "Dedicated to the County"* The Financial Assurances section on page 8-2 shall be expanded such that financial assurances will be provided for the construction of all capital improvements, public or private, necessary to provide service to the lots.

Please call if you have any questions, or if you would like to discuss these recommendations.

Sincerely,

DAVID T. PRICE, P.E.  
County Engineer

RE: Historic Preservation Treatment Plan for Southwest Pointe (Phase 1)

Dear Rebecca:

Enclosed is the subject treatment plan from Kautz Environmental Consultants, Inc. If you could excerpt the applicable portions for forwarding to the applicable Indian tribe or agency, it would be appreciated. In accordance with the Truckee Meadows Regional Plan, the proposed mitigation measures must be approved for the project to avoid review as a Project of Regional Significance.

The treatment plan is relevant to the following case description:

**Applicant/Property Owner:** Southwest Pointe Partners/Redfield Land Company

**Request:** Approve a development agreement that facilitates the development of a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center, and a commercial village center. The amendment allows the applicant to modify portions of the agreement pertaining to streets, access, drainage, parks and other portions. The total acreage of the project is  $\pm 3,171.6$  acres and it is located north of Mount Rose Highway (SR 431) and west of Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) in the Southwest Truckee Meadows Area Plan and is situated within portions of Sections 3, 10, 13, 14, 15, 22, 23, 24, 26 and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN: 49-010-04, 49-010-10 and 49-030-12)

Please let us know whether the mitigation measures proposed by this plan appear to be reasonable. If you have any question, please contact Don Young at the letterhead address or by telephone at 328-3620.

Sincerely,

D. Sumner Young, AICP  
Project Planner

**WASHOE COUNTY  
DEVELOPMENT REVIEW**

Dear Don:

Enclosed, please find the Treatment Plan for cultural resources for the Southwest Pointe Subdivision development on the Mt. Rose fan in southwest Reno. I have sent you a single copy because I know you ask that I send you a copy that you can forward to Ms. Palmer at SHPO for reasons of security.

If you require any further information, please give me a call at any time.

Sincerely,

Robert R. Kautz, Ph.D.  
President

 RE: Southwest Pointe

SPECIAL INSTRUCTIONS: Attached are my latest comments on the development agreement. What type of improvements are proposed under Section 4.5(e) "County-owned landscaping improvements"? Is this something the Parks Department has agreed to maintain? The Roads Division will not maintain landscaping improvements in the County right-of-way.

Also, I've reviewed Bob's 5/10/96 letter Re: Compliance with Condition B of the Development Agreement. The letter is acceptable to the Engineering Division.

### MEMORANDUM

**TO:** Washoe County Board of County Commissioners

**FROM:** Washoe County Planning Commission

**RE:** Amendment to Development Agreement Case No. DA9-1-93 for Southwest Pointe

**DATE:** May 21, 1996

Initialed By: 

### **GENERAL INFORMATION SUMMARY**

**APPLICANT:** Southwest Pointe Partners/Redfield Land Company

**REQUESTED ACTION:** To amend the development agreement that facilitates the development of a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center, and a commercial village center. The amendment allows the applicant to modify portions of the agreement pertaining to streets, access, drainage, parks and other portions. The total acreage of the project is  $\pm 3,171.6$  acres and it is located north of Mount Rose Highway (SR 431) and west of Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) in the Southwest Truckee Meadows Area Plan and is situated within portions of Sections 3, 10, 13, 14, 15, 22, 23, 24, 26 and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN: 49-010-04, 49-010-10 and 49-030-12)

### **PLANNING COMMISSION ACTION**

At its regular meeting of May 7, 1996, the Washoe County Planning Commission conditionally approved Amendment to Development Agreement Case No. DA9-1-93 (Southwest Pointe):

<b>Ayes:</b>	Johnson, Metcalf, Meagher, Oakes, Preku, Rock, Strobel
<b>Nays:</b>	None
<b>Abstained:</b>	None
<b>Absent:</b>	None

**PLANNING COMMISSION MINUTES**

Don Young reviewed the staff report, dated April 30, 1996, noting the proposed amendment was a request for modifications in three broad categories. Included was changing the layout of the project and golf course; changing the product mix by decreasing the ratio of large lots; and condensing the original conditions which numbered near 300 to less than 200. Some additional changes suggested for the attached conditions were: deleting Condition 13 from the SUP; removing Condition 21 from the Tentative Map and combining it with Condition 12 in the Development Agreement. He also specified a slight language change to Condition 14 in General Conditions and moved a phrase from Condition 23f to Condition 23g. Staff recommended approval of the modifications.

Brita Tryggvi, CFA Engineering, representing the applicant, addressed the planning commission, noting the presence of Mike Mohler, Project Manager for Southwest Pointe and Mitch Baines, head of construction. She advised that during a meeting with Randy Jackson, President of Thomas Creek Homeowners Association, he discussed the residents' concern for the construction haul route. Ms. Tryggvi requested that the condition that addressed the haul route specify that construction is prohibited from using Thomas Creek Road between Zolezzi Lane and Whites Creek Lane. She indicated this had always been the intent of the developer and he was most willing to have it addressed in written form. In response to an earlier question from Commissioner Strobel regarding public access to a gated community, Ms. Tryggvi illustrated on the plan the 8-foot wide paths formed at the perimeter of the project. The paths were multi use, including pedestrian and bicycle traffic. It had been planned to make the trails accessible as part of the public trail system. Ms. Tryggvi illustrated the location of the turn-around area in the vicinity of the guarded gatehouse planned to accommodate persons who missed the entrance to the trails.

Chair Johnson opened the public hearing.

Lyn Mundt, Chair, Southwest Truckee Meadows CAB, advised the applicant had appeared before the CAB at the March and April meetings. The majority of CAB members had approved the amendment application but two concerns remained. The first was public access which was covered under Condition 5d in the Tentative Map. Mr. Young advised this would be addressed by the CC&Rs. The CAB's other concern was the developer's plan to reduce several of the lot sizes from 1 acre to 1/2 acre. Ultimately, the percentage of lots size changes was reduced to 20% fewer 1-acre lots and 20% more 1/2 acre lots, which was considered a reasonable compromise.

There being no other person who wished to address the Commission, the public hearing was closed.

Commissioner Preku moved to conditionally approve DA9-1-93 as recommended by staff with the following changes:

Delete Condition 13 from the Special Use Permit;

Delete Condition 21 from the Tentative Map and add it to Condition 12 in the Development Agreement;

Change the first sentence in Condition 14 of the Tentative Map under Streets and Traffic by replacing "the' conditions" to "these' conditions";

In Condition 23-g of the Tentative Map, add the phrase "; no residential driveway access allowed", following "a minimum 8-foot meandering asphalt path both sides"; and

In Condition 12 in the Development Agreement, add "Construction traffic is prohibited from using Thomas Creek Road between Whites Creek Lane and Zolezzi Lane."

The motion was seconded by Commissioner Metcalf, and passed with a unanimous vote of seven (7) in favor, none (0) opposed, and none (0) absent. The motion was based on the following findings:

1. That requested amendments do not alter the following findings originally made to support this project;
2. That this request conforms to the goals and policies of the adopted Southwest Truckee Meadows Area Plan;
3. That the requested subdivision is consistent with the density provisions and lot size regulations of the Washoe County Development Code;
4. That the requested development agreement is consistent with the provisions of Section 814 of the Washoe County Development Code;
5. The physical design of the project and the manner of design does make adequate provision for public services;
6. The site is particularly suitable for the density and type of residential development proposed;
7. The amount, purpose and location of common open space provided in the proposed project is adequate as related to the proposed density and type of residential development;
8. The proposed maintenance and conservation of common open space is adequate to serve the proposed project;
9. The terms and conditions of this development agreement are sufficient to protect the interests of the public, residents, and the owners of the land subject to the development agreement in the integrity of the plan;
10. The conditions of approval ensure consideration of the items cited in NRS 278.349; and
11. That the Commissioners gave reasoned consideration to the information contained within the staff report and information received during the meeting.

**COUNTY COMMISSION OPTIONS**

The Washoe County Board of County Commissioners has the following options and resultant consequences available on Amendment to Development Agreement Case No. DA9-1-93 for Southwest Pointe:

- 1. Approve the request as recommended by the Planning Commission. This would allow the developer to proceed. The next formal step would be submittal of a final Development Agreement for approval by the BCC.
- 2. Approve the request with amendments to address specified concerns. The consequences would be the same as above.
- 3. Defer the request until the developer could provide the information necessary to formulate an action. The consequences would be dependent upon the resultant action.
- 4. Deny the request. The developer would be required to continue with the project as originally approved.

**APPLICABLE REGULATIONS**

Nevada Revised Statutes Chapter 278; Washoe County Code Chapter 110.

for  
**SOUTHWEST POINTE**

(As amended by the Washoe County Planning Commission on  
May 7, 1996)

**\*\*\* IMPORTANT -- PLEASE READ \*\*\***

**UNLESS OTHERWISE STATED, PRIOR TO APPROVAL OF THE FINAL DEVELOPMENT AGREEMENT, ALL CONDITIONS MUST BE MET. A COPY OF ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL BE FILED WITH THE DEPARTMENT OF PUBLIC WORKS AND/OR DEPARTMENT OF DEVELOPMENT REVIEW.**

**COMPLIANCE WITH THE APPLICABLE STATUTES, ORDINANCES, RULES, REGULATIONS, AND POLICIES AND WITH THE CONDITIONS OF APPROVAL OF THIS TENTATIVE MAP IS THE RESPONSIBILITY OF THE DEVELOPER, ITS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY, AND THEIR SUCCESSORS IN INTEREST.**

GENERAL CONDITIONS

1. Unless specifically stated in the final Development Agreement, all uses, densities and standards shall be consistent with the Washoe County Development Code and with the goals and policies in the Comprehensive Plan and the Southwest Truckee Meadows Area Plan. Unless specifically stated in the final Development Agreement, the allowed uses, densities, and standards of the land subject to the Development Agreement shall be those in effect at the time the final agreement is approved.
2. The final Development Agreement shall specify any time frames that have been extended beyond those specified by Washoe County Code or Nevada Revised Statutes. The Department of Development Review shall be responsible for determining compliance with this condition.
3. A "statement of compliance" format or formats for both residential and non-residential projects shall be made a part of the final Development Agreement. The Department of Development Review shall be responsible for determining compliance with this condition.
4. The developer and all successors shall direct any potential purchaser of the site, or portions thereof (other than individual single-family lots), to meet with the Department of Development Review to review the Development Agreement and the conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the Department of Development Review of the name, address, telephone number, and contact person of the new purchaser within 30 days of the final sale.

5. Prior to submittal to the Washoe County Board of County Commissioners, the final Development Agreement shall be reviewed and approved by the Office of the District Attorney of Washoe County.
6. The final Development Agreement will be submitted to the Washoe County Board of County Commissioners within three months of submission of a completed agreement with all accompanying exhibits, provided the Department of Development Review does not delay the submission in order to approve provisions of the agreement to its satisfaction. Extension of any of these time frames may be requested if mutually agreeable to Washoe County and the developer.
7. The developer shall provide the Department of Development Review staff with a quarterly report indicating the number of building permits issued and other building activity, once residential construction has started.
8. The developer shall define a process to ensure that the maintenance and replacement of the streets, parking areas, lighting, landscaping, recreational facilities, utilities, and other private infrastructure shall be performed by the homeowners associations and shall be perpetually funded. The County Engineer and the Department of Development Review shall be responsible for determining compliance with this condition.

#### STREETS AND TRAFFIC

9. A Level of Service C, or the current Washoe County standard, shall be used as a basis for evaluating transportation needs and traffic impact mitigation requirements.
10. The final Development Agreement shall not be approved until the right-of-way (ROW) of all necessary off-site accesses from the project to Thomas Creek Road are obtained. Preliminary golf course and roadway grading may commence before such approval has been obtained so long as such construction is done in accordance with Condition 21 for tentative maps. An approved and recorded ROW document shall be provided to the County Engineer and the District Attorney's Office.
11. Prior to final approval of the Development Agreement, the developer for Southwest Pointe shall petition the Washoe County Board of County Commissioners to create a Special Assessment District for the purpose of financing the construction of Whites Creek Lane from the project site to Wedge Parkway and other roads as defined in the SAD agreement. In the event that a special assessment district is not created, the developer shall construct Whites Creek Lane, as outlined in Conditions 17 and 19 for tentative maps, from the project site to Wedge Parkway. The County Engineer shall be responsible for determining compliance with this condition.
12. A Construction Traffic Haul Route Plan shall be submitted to the County Engineer for review and approval. The primary construction haul route shall be Whites Creek Lane. However, as part of Phase I development, Zolezzi Lane may be used, for construction mobilization only, for completion of the first 18-hole golf course and for the extension of utilities into the project site.

Prior to approval of any final map or prior to the issuance of the first building permit for the first final map, all construction traffic will be diverted to Whites Creek Lane. No construction traffic will be allowed on Thomas Creek Road between Whites Creek Lane and Zolezzi Lane. Access to Whites Creek Lane will be from the Mt. Rose Highway to Thomas Creek Road. When the 35th building permit is issued, all construction traffic will be required to use Whites Creek Lane from Wedge Parkway. Construction traffic will use Whites Creek Lane from Wedge Parkway if this segment is completed prior to the issuance of the 35th building permit. Thomas Creek Road from Mt. Rose Highway to the proposed Whites Creek Lane may be considered for a haul route provided the developer submits a traffic analysis and intersection design prepared by a licensed Nevada Civil Engineer which addresses and provides, as a minimum, recommendations regarding:

- a. site distance requirements;
- b. left turn storage capacity and design;
- c. intersection location and alignment;
- d. proximity to existing intersections and recommended separate distances;
- e. existing center median and landscaping concerns;
- f. determination of adequacy of existing Thomas Creek Road roadway geometric section; and
- g. determination of adequacy of existing structural section and load bearing capability.

The submitted report shall be evaluated and accepted by the County Engineer prior to any approval of the use of Thomas Creek Road as a haul route. Once Whites Creek Lane is connected to Wedge Parkway, this road shall become the primary construction haul route.

Any existing or proposed roads that will be used as construction haul routes and are not designated truck routes must be evaluated by a geotechnical study to determine the existing structural section and its load supporting capability. If the pavement section is inadequate to support the proposed construction loadings, the roadway must be redesigned or reconstructed as needed to provide a 20-year design life in accordance with the AASHTO Interim Guide for Flexible Pavements.

13. The developer shall provide a schematic pedestrian circulation plan. The Department of Development Review shall be responsible for determining compliance with this condition. The "statement of compliance" shall require that a detailed pedestrian circulation plan will be submitted as part of each tentative map and approved by the Department of Development Review.
14. Unless specifically stated in these conditions of approval or in the final Development Agreement, all public and private street design and construction is to be done in accordance with the Washoe County standards that are in effect at the time the final Development Agreement is recorded. The County Engineer shall be responsible for determining compliance with this condition.
15. Unless otherwise stated in these conditions of approval or in the final Development Agreement, all roadway improvements necessary (including but not limited to, curb, gutter, sidewalk, signing and striping, driveway access, and street lighting) to serve the project shall be designed and constructed to county standards and specifications and/or financial assurances in an appropriate form and amount shall be provided. The County Engineer shall be responsible for determining compliance with this condition.

16. All private roadways shall be depicted on the final maps and identified on the tentative map as either private access easements over individual adjacent lots or, if identified as separate parcels, as either common areas with equal fractional ownership by all of the lots within the development or common areas owned by the homeowners association. The County Engineer shall be responsible for determining compliance with this condition.

#### GRADING AND DRAINAGE

17. A general concept-level storm drain master plan shall be submitted to the County Engineer for approval prior to acceptance of the final Development Agreement. The general concept-level storm drain master plan shall address in general terms proposed methods for handling the existing and increased flows for the 10- and 100-year storms including detention and other proposed mitigation measures for both on-site and off-site areas. This master plan shall include a drawing which shows the existing drainage basins within the development and indicate how they may be impacted. After approval of the general concept-level storm drain master plan and the final Development Agreement, and prior to approval of a tentative map for any phase or approval of any special use permit, a preliminary hydrology report shall be submitted to the County Engineer for approval. The County Engineer shall be responsible for determining compliance with this condition.
18. Detention/retention facilities are to be maintained by a homeowners association and perpetually funded unless Washoe County agrees to accept maintenance and financial responsibilities. Regional facilities would be maintained by Washoe County. The County Engineer shall be responsible for determining compliance with this condition.
19. A maintenance plan of all drainage facilities to be owned by the homeowners association shall be provided prior to approval of the conditions, covenants, and restrictions (CC&Rs). All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe County water treatment plant and associated Steamboat Ditch conveyance system. The County Engineer shall be responsible for determining compliance with this condition.
20. The off-stream detention/debris basin recommended in the 1990 Kennedy, Jenks, Chilton report shall be reserved based on the following timetable:
  - a. Washoe County will have three years to obtain the necessary permits for construction of the off-stream detention basin. This three years shall commence upon the approval of the final Development Agreement. If Washoe County fails to obtain the necessary permits, the property for the detention site shall be offered by the developer or his successors, for dedication to the Washoe County School District for a middle school or revert to open space.
  - b. If Washoe County does obtain the necessary permits within three years, construction of the project shall commence within 5 years of the approval of the final Development Agreement. If construction is not started by that date, the property for the detention site shall be offered by the developer or his successors, for dedication to the Washoe County School District for a middle school or revert to open space.
  - c. If an alternative solution or site becomes available for flood control, this property will immediately become available for dedication to the Washoe County School District for a middle school or revert to open space.

- d. If the detention basin is constructed, Washoe County shall pay fair market value for the property.
21. The increase in development-caused runoff from the 100-year storm, including drainages which run directly into the Steamboat Ditch, shall be detained/retained on-site because of the limited capacity of the flood control facilities in the area of South Virginia Street and the Steamboat Ditch Company. The County Engineer shall be responsible for determining compliance with this condition.
22. A geotechnical report shall be prepared, which considers the effects of earthquake forces and faulting in the area. The siting and design of detention/retention facilities shall be addressed based on the findings and recommendations provided in the geotechnical report. The County Engineer shall be responsible for determining compliance with this condition.
23. The development shall comply with the requirements of the Hillside Ordinance of the Development Code, as applicable. The Department of Development Review shall be responsible for determining compliance with this condition.

#### WATER AND WASTEWATER

24. A schematic water system plan for the referenced proposal must be submitted to the Utility Division and the District Health Department. Prior to a final map approval, the plan must show that the water system will conform to the State of Nevada Water Supply Regulations, NAC Chapter 445, and the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, NAC 278.400 through 278.410.
25. Prior to the approval of the final Development Agreement, a complete water analysis from at least one monitoring well must be submitted to the District Health Department. The analysis must demonstrate the water conforms to the existing and proposed drinking water standards.
26. The developer shall utilize treated wastewater from the South Truckee Meadows Wastewater Treatment Plant. As part of the initial construction, the developer shall provide the necessary on-site easements needed to construct the infrastructure. When this resource becomes available to irrigate the golf course, the developer shall construct the necessary on-site infrastructure. The Utility Division shall be responsible for determining compliance with this condition.

#### FIRE PROTECTION

27. If requested by the applicable fire protection agency, a minimum one-acre site for a fire station shall be offered for dedication prior to recordation of the first final map. The developer shall enter into talks with the applicable fire protection agency for any other requirements, such as, a fire station site, manpower and equipment needs, or for coordination with other developments that have similar requirements and the results of those discussions, as they relate to the entire project, shall be incorporated into the Development Agreement.

PARKS/RECREATION/OPEN SPACE

28. An open space management plan and map shall be prepared that specifies the ownership of open spaces, type of uses allowed and who is responsible for maintenance. This plan shall address the provisions of Section 110.408.45 of the Development Code. Common areas shall be maintained by the homeowners association and provisions be made for perpetual funding for maintenance.

Prior to approval of the final Development Agreement, a government entity (e.g. United States Forest Service, Washoe County Parks Department, etc.) or a non-profit organization (e.g. Washoe Parks Foundation) shall be identified that will accept the dedication of the open space buffers identified on the Concept Plan, which consists of approximately 1,500 acres. The Parks and Recreation Department and the Department of Development Review shall be responsible for determining compliance with this condition.

29. The final Development Agreement shall include a provision for the public open space that prohibits the sale of any open space without the consent of Washoe County. The Department of Development Review shall be responsible for determining compliance with this condition.
30. A minimum 10-acre public park site shall be offered for dedication to the county. A sketch plan will be included in the final Development Agreement. The final park design shall be mutually agreeable to the county and the developer. The developer will construct the recreation facilities in the park and then be reimbursed for the cost of the construction from the Residential Construction Tax. The responsibility of park maintenance shall be negotiated by the developer and Washoe County prior to the approval of the final Development Agreement. The Parks and Recreation Department and Department of Development Review shall be responsible for determining compliance with this condition.
31. The developer will work with the Department of Parks and Recreation to locate the proposed regional public trails to the satisfaction of Washoe County and the developer. The Parks and Recreation Department and Department of Development Review shall be responsible for determining compliance with this condition.

LANDSCAPING/ARCHITECTURAL DESIGN

32. Prior to approval of the final Development Agreement, the developer shall submit a Development Standards Handbook for the entire project to the Design Review Committee for its review and approval. These guidelines shall address, but not be limited to, type and color of building material, general architectural design, fencing, landscaping material (if plant material: type, size at time of planting, maturation size at full growth, period of time between planting and full growth), landscaping location, landscaping irrigation system, and financial assurances that landscaping will be planted and maintained.

The Design Review Committee shall also review the design of Whites Creek Lane, specifically to address Condition 19.c. for tentative maps. The Department of Development Review shall be responsible for determining compliance with this condition.

**CONDITIONS**  
for  
**TENTATIVE SUBDIVISION MAP CASE NO. \_\_\_\_\_**  
for  
\_\_\_\_\_ **SUBDIVISION**

(As recommended by Department of Development Review and  
attached to Staff Report dated \_\_\_\_\_ )

**\*\*\* IMPORTANT -- PLEASE READ \*\*\***

UNLESS OTHERWISE STATED, PRIOR TO FINALIZATION OF ANY PORTION OF THE TENTATIVE SUBDIVISION MAP, ALL CONDITIONS MUST BE MET OR FINANCIAL ASSURANCES TO ENSURE COMPLETION OF THE CONDITIONS MUST BE PROVIDED. THE AGENCY RESPONSIBLE FOR DETERMINING COMPLIANCE WITH A SPECIFIC CONDITION SHALL DETERMINE WHETHER THE CONDITION MUST BE FULLY COMPLETED OR WHETHER THE DEVELOPER SHALL BE OFFERED THE OPTION OF PROVIDING FINANCIAL ASSURANCES.

A COPY OF ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL BE FILED WITH THE DEPARTMENT OF PUBLIC WORKS AND/OR DEPARTMENT OF DEVELOPMENT REVIEW.

THE DEVELOPER SHALL MEET WITH THE ENGINEERING DIVISION AND THE DEPARTMENT OF DEVELOPMENT REVIEW AT LEAST SIXTY (60) DAYS BEFORE THE ANTICIPATED DATE OF APPROVAL BY THE PLANNING COMMISSION TO REVIEW SCHEDULING, REQUIREMENTS, FINAL CONSTRUCTION DRAWINGS, AND DOCUMENTATION NECESSARY TO ADEQUATELY COMPLY WITH THE CONDITIONS OF APPROVAL AND THE APPLICABLE STATUTES, ORDINANCES, RULES, REGULATIONS, AND POLICIES. NO FINAL MAP WILL BE SCHEDULED FOR A PLANNING COMMISSION MEETING DATE THAT IS LESS THAN SIXTY (60) DAYS FROM THE DATE OF THIS MANDATORY MEETING.

A REQUEST FOR AN EXTENSION OF TIME FOR THE RECORDING OF A FINAL MAP MUST BE SUBMITTED TO THE DEPARTMENT OF DEVELOPMENT REVIEW AT LEAST SIXTY (60) DAYS PRIOR TO THE EXPIRATION DATE OF THE TENTATIVE SUBDIVISION MAP. SAID EXPIRATION IS TWO YEARS FROM THE DATE OF APPROVAL OF THE TENTATIVE MAP OR A SUBSEQUENT FINAL MAP BY THE BOARD OF COUNTY COMMISSIONERS OR, WHEN APPLICABLE, BY THE PLANNING COMMISSION.

COMPLIANCE WITH THE DEVELOPMENT AGREEMENT, APPLICABLE STATUTES, ORDINANCES, RULES, REGULATIONS, AND POLICIES AND WITH THE CONDITIONS OF APPROVAL OF THIS TENTATIVE MAP IS THE RESPONSIBILITY OF THE DEVELOPER, ITS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY, AND THEIR SUCCESSORS IN INTEREST.

GENERAL CONDITIONS

1. The subdivider shall present to the planning commission a final map, prepared in accordance with the tentative map, for the entire area for which a tentative map has been approved, or one of a series of final maps, each covering a portion of the approved tentative map, within two (2) years after the date of approval of the tentative map.

Prior to the expiration of a tentative map, the planning commission or, upon appeal, the governing body may grant a two (2) year extension for the presentation of the entire final map or next successive final map. The effective date of the extension shall be two (2) years from the date upon which the map would have expired.

If the subdivider fails to record a final map for any portion of the tentative map or obtain an extension within two years after the date of approval of the tentative map, all proceedings concerning the subdivision are terminated.

2. Unless specifically stated in the final Development Agreement, final maps and final construction drawings shall comply with all applicable statutes, ordinances, rules, regulations, and policies in effect at the time of approval of the final map or any subsequent extension date. The Department of Development Review shall be responsible for determining compliance with this condition.
3. Final maps shall be in substantial compliance with all plans and documents submitted with and made part of this tentative map request, as may be amended by action of the final approving authority. Substantial compliance shall be determined by the applicable agency and the Department of Development Review.
4. As part of every tentative map and final map application, the developer shall include a completed "statement of compliance" that demonstrates how the development will be or is consistent with the recorded final Development Agreement. The "statement of compliance" for the final map shall incorporate a description of how the conditions of approval have been met. The Department of Development Review shall be responsible for determining compliance with this condition.
5. Conditions, covenants, and restrictions (CC&Rs) shall be reviewed and approved by the District Attorney's Office, County Engineer, and the Department of Development Review prior to final map approval or prior to issuance of a certificate of occupancy for a non-residential use. Washoe County shall be made a party to the applicable provisions of the CC&Rs to the satisfaction of the District Attorney's office. If the CC&Rs are not recorded on the entire property, subsequent phases will be annexed to the previously recorded CC&Rs. Said CC&Rs shall specifically address the ability of the county to enforce certain provisions against the property and the individual property owner's responsibilities for the perpetual funding, maintenance and replacement, of the following items, at a minimum:
  - a. Private roads within the subdivision.
  - b. Equestrian center.
  - c. Staffing of maintenance and security forces.
  - d. Common area landscaping.
  - e. Entrance gates.
  - f. Snow removal and storage areas.

- g. Common area landscaping including along streets or landscaping along Whites Creek Lane.
- h. Fire and fuelbreaks.
- i. Detention basins and the accumulated sediment.
- j. Equestrian/pedestrian trails.
- k. Bicycle and pedestrian paths.
- m. Golf cart crossings.
- n. Off-site residential parking areas.

At a minimum, the CC&Rs shall also specifically address the following items:

- a. Requirement to abide by Architectural/Community Design Guidelines.
  - b. All homes must have a garage with space for a minimum of two cars.
  - c. Specifications on the limitation of turf area for single-family homes.
  - d. Retention of public access to the golf course, bike paths, (i.e., 8-foot meandering paths along minor arterials and some collectors; refer to street sections), public trails, and non-residential uses.
  - e. Notice of requirement to pay future sewer user fees.
  - f. Requirement to adhere to National Electric Safety Code setbacks for existing overhead power lines.
  - g. Potential for conservation easements or dedication of open space.
  - h. Prohibition of motorized vehicles in open space.
  - i. Areas with potential for equestrian traffic.
  - j. Access to open space for pedestrian and bicycle traffic.
  - k. Notice of pedestrian easements to abutting properties.
  - l. Minimum defensible space requirements.
  - m. Snow storage areas.
6. Prior to ground-disturbing activity or prior to finalization of any portion of the tentative map, the developer shall submit an archaeological/historical survey to the Department of Development Review. The Department of Development Review shall submit the survey to the State Historic Preservation Office of the Department of Museums, Library and Arts for review. Following that review, the State Historic Preservation Office shall submit a letter to the Department of Development Review that indicates the survey was acceptable.
7. A note shall be placed on all grading plans and construction drawings stating:
- NOTE
- Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the State Historic Preservation Office of the Department of Museums, Library and Arts, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.
8. The developer shall be required to participate in any applicable General Improvement District or Special Assessment District formed by Washoe County. The applicable division of the Department of Public Works shall be responsible for determining compliance with this condition.

9. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada.
10. A complete set of construction improvement drawings, including an on-site grading plan, shall be submitted to the Engineering Division for approval prior to finalization of any portion of the subdivision. Grading shall comply with best management practices and shall include detailed plans for grading and drainage on each lot, erosion control, slope stabilization, mosquito abatement. Placement or disposal of any excavated material shall be indicated on the grading plan.
11. All soil boring logs must be included as part of the construction drawings. The County Engineer shall be responsible for determining compliance with this condition.
12. All new utilities shall be placed underground. The County Engineer shall be responsible for determining compliance with this condition.
13. The developer is to provide written approval from the US Postal Service for the plans for the installation of mail delivery facilities. The system, other than individual mail boxes, must be shown on the project construction plans and installed as part of the on-site improvements. The County Engineer shall be responsible for determining compliance with this condition.
14. The final map shall designate faults, by distance and bearings, that have been active during the Holocene epoch of geological time and shall contain the following note.

**NOTE**

No habitable structures shall be located on a fault that has been active during the Holocene epoch of geological time. The faults have been located by Civil Engineer Registered in Nevada and experienced in Geotechnical Engineering and field surveyed by a Nevada Registered Land Surveyor.

The Department of Development Review shall be responsible for determining compliance with this condition.

15. The Washoe County Planning Commission certificate on the final map shall be approved by the County Engineer and the Department of Development Review.

**STREETS AND TRAFFIC**

16. The developer shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required. The County Engineer shall be responsible for determining compliance with this condition.

17. Prior to the issuance of the first building permit, two lanes of Whites Creek Lane shall be constructed, to two-lane minor arterial standards as a minimum, from Thomas Creek Road to the project site. The County Engineer shall be responsible for determining compliance with this condition.
18. Prior to the issuance of the first building permit, a second access shall be constructed to the project site to emergency standards to the satisfaction of the applicable fire protection agency.
19. The County Engineer shall be responsible for determining compliance with this condition. Prior to the issuance of the 35th building permit, the following roadway improvements shall be constructed:
  - a. The remaining two lanes of Whites Creek Lane from Thomas Creek Road to the project site if warranted by projected traffic demands.
  - b. Two (2) lanes of Whites Creek Lane from Thomas Creek Road to Wedge Parkway with 100 feet of right-of-way. These two lanes will be constructed so that an additional two lanes may be added in the future if warranted by projected traffic volumes.
  - c. Whites Creek Lane will be designed in a manner that minimizes any impacts on the adjacent homes to the north in Fieldcreek Ranch (e.g., fencing, berms, lowering the travel lanes).
20. The minimum pavement structural section shall be 5 inches of asphalt over 8 inches of aggregate base for minor arterials, 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector streets, and 3 inches of asphalt over 6 inches of granular base for roadways for local streets. The County Engineer shall be responsible for determining compliance with this condition.
21. Prior to or upon approval of the CC&Rs, the developer shall have a street maintenance program approved by the County Engineer and the Department of Development Review. Maintenance of private streets shall be performed by the homeowners association and shall be *perpetually funded*.
22. The following roadway sections shall be applicable to the public and private on-site streets shown on the tentative map. A traffic report shall be submitted with each tentative map and shall identify the ultimate average daily traffic on each street and shall make recommendations for geometric design (e.g., left turn storage capacity, site distance, minimum required turning radius, etc.). The County Engineer shall be responsible for determining compliance with this condition.
  - a. Private Common Driveways - Serving 4 or less lots, pavement width 20 feet; serving 5 or more lots, pavement width 22 feet; no parking either side. Curb returns shall have a minimum face of curb radius of 20 feet on local streets and 25 feet on collector streets. Private common driveway locations will be shown on all tentative maps. Private common driveways will line up with proposed street intersections where possible and will comply with street intersection offset requirements. Single lot driveway access will not be allowed onto streets on which the average daily traffic exceeds 2000 trips. (Refer to street sections.)

- b. Rural Private - 60 foot minimum ROW (maximum 200 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer-approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum 4-foot path or gravel shoulder on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)
- c. Local Private - 60 foot minimum ROW (200 - 500 ADT): minimum 22 foot pavement width; curb and gutter or County Engineer-approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. A minimum 4-foot path on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to street sections.)
- d. Collector Private - 60 foot minimum ROW (500 ADT to 2000 ADT): minimum 24-foot pavement width; curb and gutter or County Engineer-approved concrete header with roadside ditch both sides (developer's discretion); no parking either side. a minimum 4-foot path on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. (Refer to Street Sections.)
- e. Collector Private - 60 foot minimum ROW (2000 ADT to 8000 ADT): minimum 24-foot pavement width with an additional 12-foot left turn lane at intersections where warranted; curb and gutter or County Engineer-approved concrete header with roadside ditch both sides (developer's discretion); no parking on either side. A minimum 8-foot path on both sides of the street will be provided unless alternate provisions or locations of pedestrian paths can be provided and shown in the Pedestrian Circulation Plan. The County Engineer shall be responsible for determining compliance with the provisions of this condition. No residential driveway access will be allowed. Access for private common driveways will be allowed. (Refer to street sections.)
- f. Collector Private - 120 foot minimum ROW collector street (up to 9600 ADT): A minimum 27-foot center median from curb face to curb face, 19-foot pavement width on either side of the median; curb and gutter on both sides or County Engineer-approved concrete header with roadside ditch both sides (developer's discretion); no parking either side except during special events; a minimum 8-foot meandering asphalt path both sides; no residential driveway access allowed. (Refer to street sections.)
- g. Minor Arterial, Private - 120 foot minimum ROW (more than 10,800 ADT): A minimum 27-foot center median from curb face to curb face, 24-foot pavement width on either side of the median; County Engineer-approved concrete header with roadside ditch; no parking either side; a minimum 8-foot meandering asphalt path both sides; no residential driveway access allowed. A gate may be installed at the point where Whites Creek Lane becomes a private road. (Refer to street sections.)
- h. Minor Arterial, Public - 120-foot minimum ROW (more than 10,800 ADT): A minimum 27-foot center median from curb face to curb face, 29.5-foot roadway section on either side of the median; curb and gutter on both sides; a minimum 6-foot concrete sidewalk on both sides; no residential driveway access is allowed. (Refer to street sections.) A gate may be installed at the point where Whites Creek Lane becomes a private road. A public turn-around is required on the public side of the gate.

23. All roadway grades shall be limited to the maximum allowable grades for each street classification as provided in the Washoe County Standards. The County Engineer shall be responsible for determining compliance with this condition.
24. Construction near fault lines shall be as follows:
  - a. Buildings for human occupancy shall be set back from the centerline of fault traces. Setback distances shall be determined by a geotechnical investigation prepared by a Nevada Registered Civil Engineer experienced in geotechnical engineering. The minimum setback shall be 50 feet on each side of the fault line.
  - b. Roadway construction in fault zones and along fault traces shall be reviewed by a Nevada Registered Civil Engineer experienced in geotechnical engineering. Any recommended special construction requirements (e.g., flexible joint connections for utilities) shall be complied with.

The County Engineer shall be responsible for determining compliance with this condition.

25. All cul-de-sacs shall be a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to edge of pavement. The County Engineer shall be responsible for determining compliance with this condition.
26. Landscaped medians shall be designed in accordance with AASHTO site distance and safety guidelines. The County Engineer and the Department of Development Review shall be responsible for determining compliance with this part of the condition. Maintenance of median landscaping shall be by the homeowners association as provided for in a separate maintenance agreement to be approved by the County Engineer and the District Attorney's Office prior to approval of the CC&Rs.
27. Temporary county standard turnarounds shall be constructed on all phased roadways which extend more than one lot depth beyond a maintained public or private street. The County Engineer shall be responsible for determining compliance with this condition.
28. All-weather emergency access roads shall be constructed at the end of all cul-de-sacs that are longer than 1,500 feet. These roads shall have a 30-foot access easement with a minimum 20-foot width and 2.5 inches of asphalt concrete pavement on an engineered gravel base. The roads shall be controlled by emergency access gates and shall be posted with signs stating "For Emergency Vehicles Only". The County Engineer and the applicable fire protection agency shall be responsible for determining compliance with this condition.
29. Prior to final map approval, the developer shall provide all weather emergency access easements and road improvements at the locations shown on the tentative map, terminating at public or privately-maintained streets. The County Engineer shall be responsible for determining compliance with this condition.
30. Meandering asphalt paths will be acceptable provided that:
  - a. Pedestrian easements are included for portions of the paths located outside the county right-of-way.
  - b. Landscaping between the back of the curb and the path shall be designed in accordance with AASHTO site distance and safety guidelines. The County Engineer shall be responsible for determining compliance with the provisions of this condition.

- c. Maintenance of the asphalt paths and landscaping shall be the responsibility of the developer and, when created, by the homeowners association as provided for in a separate maintenance agreement and to be approved by the County Engineer and the District Attorney's office prior to approval of the final Development Agreement.
31. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded. The County Engineer shall be responsible for determining compliance with this condition.
32. Street lights shall be installed at major intersections. The County Engineer shall be responsible for determining compliance with this condition.
33. No at-grade golf cart crossings shall be allowed across any street with 500 ADT or greater. Where possible, crossings should be below the grade of public streets. The County Engineer shall be responsible for determining compliance with this condition.
34. Off-site parking areas shall be provided within 500 feet of homes that have lots ranging in size between 12,000 square feet and one-half acre. One space shall be provided for every three homes. Parking areas shall be evenly distributed to avoid large paved areas and shall be shown on the tentative map(s). The Department of Development Review shall be responsible for determining compliance with this condition.
35. Project streets that are designed with security gates at points intersecting with public streets shall have adequate on-site stacking space. The specific type and size of the stacking areas must be approved by the County Engineer and constructed as approved.
36. Regulatory signs must be installed at the juncture of all public streets with a private street and at intersections along the primary loop road. Said sign shall state: "PRIVATE STREET NOT MAINTAINED BY COUNTY." All regulatory signs shall meet the Manual of Uniform Traffic Control Device standards. The County Engineer shall be responsible for determining compliance with this condition.
37. Street names shall be reviewed and approved by the Regional Street Naming Coordinator. The tentative map shall indicate street names for identification purposes.

#### DRAINAGE AND GRADING

38. After approval of the general concept-level storm drain master plan and the final Development Agreement, and prior to approval of a tentative map for any phase, a preliminary hydrology report shall be submitted to the County Engineer for approval. This preliminary hydrology report shall be prepared in accordance with county requirements for tentative maps, in conformance with the general concept-level storm drain master plan, and be applicable to the specific tentative map or special use permit being approved.

The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10- and 100-year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities. The County Engineer shall be responsible for determining compliance with this condition.

39. Prior to the submittal of any final map or issuance of any grading permit, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted to the County Engineer for approval. The report shall be in substantial compliance with the general concept-level storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed, constructed, and approved by the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.
40. A maintenance plan of all drainage facilities, to be owned by the homeowners association, shall be provided prior to approval of the CC&Rs. All treatment of stormwater, including snow storage runoff and storm water facilities design, is to consider the future planned Washoe County water treatment plant, and associated Steamboat Ditch conveyance system. All runoff from improved areas which runs into the Steamboat Ditch shall be pre-treated for silt and petrochemicals and shall be routed through a "wet" detention facility or approved alternative. The Utility Division and the Department of Development Review shall be responsible for determining compliance with this condition.
41. The 100-year floodplain boundaries and flood elevations shall appear on each final map. If the floodplain boundary has been changed by a Federal Emergency Management Agency (FEMA) Conditional Letter of Map Amendment or Conditional Letter of Map Revision, the date of that letter and a note to that effect shall appear on the final map. Grading or building permits shall not be issued for areas currently shown as "A" zones on the FEMA floodplain maps until a Letter of Map Amendment or Revision is submitted or until conformance with Washoe County flood construction standards is determined by the County Engineer. The County Engineer shall be responsible for determining compliance with this condition.
42. Prior to approval of the final map, the developer shall obtain a Stormwater Discharge Permit from the Nevada Division of Environmental Protection. If required, point discharge permit for each proposed detention pond will be obtained from the Nevada Division of Environmental Protection and copy shall be submitted to the County Engineer.
43. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan. The County Engineer shall be responsible for determining compliance with this condition.

44. Prior to issuance of a grading permit for the golf course and/or final map, a final wetlands determination must be made and approved by the US Army Corps of Engineers and the approval letter provided to the Department of Development Review.
45. Prior to issuance of a grading permit for the golf course or approval of a final map, the developer shall obtain from the Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
46. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway. Erosion protection shall be provided based upon the recommendation of the geotechnical report. The County Engineer shall be responsible for determining compliance with this condition.
47. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts. The District Health Department and the County Engineer shall be responsible for determining compliance with this condition.
48. The stormwater discharges from this development that flow to Dry Creek shall be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. The developer shall provide drainage structures under Steamboat Ditch that would pass the 10-year frequency storm or demonstrate that there will not be any water quality degradation in Steamboat Ditch. The County Engineer shall be responsible for determining compliance with this condition.  
  
The developer shall contact the Division of Water Resources, State of Nevada, to determine whether the proposed flood detention facilities will require permits. If required, copies shall be submitted to the County Engineer.
49. Prior to the approval of a grading permit or approval of a final map, a detailed dust control plan shall be prepared and submitted to Air Quality Management of the District Health Department and to the Department of Development Review. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.
50. Prior to approval of the first final map, an erosion control and soil stabilization plan and a grading plan shall be approved by the Washoe-Storey Conservation District. A copy of the approval shall be submitted to the District Health Department, Department of Development Review, and County Engineer.
51. A buffer shall be provided next to riparian vegetation. The size of the buffer shall be mutually agreeable to Washoe County and the developer. A minimum 50-foot buffer shall be provided from any structures. The Department of Development Review shall be responsible for determining compliance with this condition.

52. Individual lot drainage shall not be allowed to drain onto neighboring properties without proper reciprocal drainage easements and the individual lot drainage swales shall be designed to handle the 100-year flows and lined. The County Engineer shall be responsible for determining compliance with this condition.

**WATER AND WASTEWATER**

53. The developer shall construct or provide the financial assurances for the construction of the water and sewer system facilities. The financial assurances must be in a form and amount that is satisfactory to the Utility Division.
54. Fees for plan checking and inspection shall be paid in accordance with Washoe County ordinance. The Utility Division shall be responsible for determining compliance with this condition.
55. Easements for all water and sewer utilities shall be offered for dedication to Washoe County. The Utility Division shall be responsible for determining compliance with this condition.
56. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance. The Utility Division shall be responsible for determining compliance with this condition.
57. The sanitary sewer collection system and water system facilities, with the exception of the golf course and common area irrigation systems, must be offered for dedication to Washoe County. The Utility Division shall be responsible for determining compliance with this condition.
59. The Nevada Division of Environmental Protection must submit a letter to the District Health Department certifying their approval of the final map.
60. The developer shall deposit with the Utility Division the sum of \$50.00 per lot prior to recordation of all or part of the final map. This fee shall represent the prorated share of the completed water and wastewater facilities plan for the South Truckee Meadows for this development.
61. In accordance with the Washoe County Utility Division policies for the Southwest Truckee Meadows, water rights shall be dedicated to Washoe County. Prior to acceptance, the water rights must be in good standing with the State of Nevada Division of Water Resources and must reflect a point of diversion, place and manner of use acceptable to the Utility Division.
62. All minor infrastructure for potable water distribution shall be designed, constructed, inspected, and approved by the District Health Department and the Utility Division. The developer shall coordinate with the Utility Division to ensure the major infrastructure design can be accomplished prior to the approval of the final map.

63. Responsibility for design of wells, pump structure, controls, telemetry, and appurtenances, storage tanks, and transmission lines to the edge of the subdivision, all necessary to provide water service to the project, will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
64. Prior to final map approval, a letter of approval from the Division of Water Resources for the water rights serving this proposal must be submitted. A water "will-serve" letter for a final map will not be issued until the production wells have been determined to have adequate water resource. The Utility Division shall be responsible for determining compliance with this condition.
65. Before approval of the final map will be considered, a letter from the water purveyor committing adequate water service to this proposal must be submitted to the District Health Department. This letter shall indicate that the facility will not be brought beyond its permitted capacity by this service.
66. Prior to the approval of a final map by the District Health Department, the production wells that will serve any phase of this development must be constructed, pump tested and sampled to ensure the proposed water system has sufficient quality and quantity.
67. Water quality results from a state-certified laboratory for new water sources shall be submitted to the Utility Division. The water quality sampling and testing shall be in compliance with the current State of Nevada Regulations for Public Water Systems, NAC 445.
68. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits. The Utility Division shall be responsible for determining compliance with this condition.
69. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval.
70. Any wells on the property not in use for production or monitoring purposes, shall be properly abandoned in accordance with State Regulations governing Water Wells and Related Drilling. The Utility Division shall be responsible for determining compliance with this condition.
71. The developer shall provide access to the existing monitoring wells. In the event access is no longer available, the developer shall construct new wells. The Utility Division shall be responsible for determining compliance with this condition.

72. The tentative maps shall show the maintenance roads for the existing and proposed water tanks. The location of these roads shall be mutually agreeable to the Department of Public Works and the developer.
73. The final map owner's certificate shall contain language indicating that the developer and his assignees agree to the use of residential water meters. The Department of Development Review shall be responsible for determining compliance with this condition.
74. Pursuant to Section 278.340 of the State of Nevada Regulations Governing Review of Plans for Subdivisions, Condominiums, and Planned Unit Developments, no grading permit shall be issued prior to District Health Department approval of the referenced final map. This condition does not apply to the construction of production wells required in Condition 68.

The developer may seek relief from the District Board of Health for this requirement or may choose to create a separate parcel for the first 18-hole golf course.

75. The Department of Development Review shall be responsible for determining compliance with this condition. The final map shall contain the following note:

**NOTE**

No Certificate of Occupancy shall be issued until the water facilities have been completed and accepted by Washoe County.

76. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
77. All minor infrastructure for sewer collection shall be designed, constructed, inspected, and approved by the District Health Department and the Utility Division.
78. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development. The Utility Division shall be responsible for determining compliance with this condition.
79. All sewer hookup fees for the area within the final map will be paid to Washoe County. The Utility Division shall be responsible for determining compliance with this condition.
80. The final subdivision map shall show a dedicated, all-weather easement, with access, over the developments sanitary sewer lines. The Utility Division shall be responsible for determining compliance with this condition.

81. Proper easements shall be shown for off-site sewage and drainage systems. The Utility Division and the County Engineer shall be responsible for determining compliance with this condition.
82. Prior to final map approval, a letter, which can be a will-serve letter, from the Utility Division committing sewer service, must be submitted to the District Health Department. This letter shall indicate that the treatment facility will not be brought beyond its permitted capacity by this service.

#### FIRE PROTECTION

83. The plans submitted with a building permit application shall show evidence of compliance with the recommendations of the applicable fire protection agency. Those concerns are fire flows, fire hydrant number and location, access, sequential phasing of firebreaks during development, permanent firebreaks, minimum defensible space, use of fire resistant construction and/or roof material, sprinklering of structures, and spark arrestors in chimneys. Access and fire flows shall be addressed to the satisfaction of the fire protection agency prior to the approval of a final map.
84. The developer shall minimize grading to the maximum extent possible in the area around the critical mule deer habitat in order to preserve the existing browse shrubs. The Department of Development Review, in conjunction with the applicable fire protection agency, shall be responsible for determining compliance with this condition.

#### OTHER

85. A minimum 25-foot landscape buffer shall be installed between the homes and the collector and the arterial streets. The homeowners association shall be required to perpetually maintain these areas. The Department of Development Review shall be responsible for determining compliance with this condition.
86. Prior to acceptance of the first final map, the telephone easement Doc. No. 415899, which runs through the middle of many lots, shall be realigned with appropriate abandonment and relocation easements, or the proposed lots realigned. The County Engineer shall be responsible for determining compliance with this condition.

**CONDITIONS  
FOR  
SPECIAL USE PERMIT CASE NO. \_\_\_\_\_**

(As recommended by Department of Development Review and  
attached to Staff Report dated \_\_\_\_\_ )

**UNLESS OTHERWISE SPECIFIED, ALL CONDITIONS MUST BE MET OR FINANCIAL ASSURANCES MUST BE PROVIDED TO SATISFY THE CONDITIONS PRIOR TO SUBMITTAL FOR A BUILDING PERMIT. THE AGENCY RESPONSIBLE FOR DETERMINING COMPLIANCE WITH A SPECIFIC CONDITION SHALL DETERMINE WHETHER THE CONDITION MUST BE FULLY COMPLETED OR WHETHER THE DEVELOPER SHALL BE OFFERED THE OPTION OF PROVIDING FINANCIAL ASSURANCES. ALL AGREEMENTS, EASEMENTS, OR OTHER DOCUMENTATION REQUIRED BY THESE CONDITIONS SHALL HAVE A COPY FILED WITH THE COUNTY ENGINEER AND THE DEPARTMENT OF DEVELOPMENT REVIEW.**

**COMPLIANCE WITH THE CONDITIONS OF THIS SPECIAL USE PERMIT IS THE RESPONSIBILITY OF THE DEVELOPER, HIS SUCCESSOR IN INTEREST, AND ALL OWNERS, ASSIGNEES, AND OCCUPANTS OF THE PROPERTY AND THEIR SUCCESSORS IN INTEREST. FAILURE TO COMPLY WITH ANY CONDITIONS IMPOSED IN THE ISSUANCE OF THE SPECIAL USE PERMIT MAY RESULT IN THE INSTITUTION OF REVOCATION PROCEDURES.**

**WASHOE COUNTY RESERVES THE RIGHT TO REVIEW AND REVISE THE CONDITIONS OF THIS APPROVAL SHOULD THEY DETERMINE THAT A SUBSEQUENT LICENSE OR PERMIT ISSUED BY WASHOE COUNTY VIOLATES THE INTENT OF THIS APPROVAL.**

GENERAL CONDITIONS

1. As part of every special use permit application, the developer shall include a completed "statement of compliance" that demonstrates how the development will be or is consistent with the recorded final Development Agreement. The Department of Development Review shall be responsible for determining compliance with this condition.
2. Prior to ground-disturbing activity, the developer shall submit an archaeological/historical survey to the Department of Development Review. The Department of Development Review shall submit the survey to the State Historic Preservation Office of the Department of Museums, Library and Arts for review. Following that review, the State Historic Preservation Office shall submit a letter to the Department of Development Review that indicates the survey was acceptable.

3. A note shall be placed on all grading plans and construction drawings stating:

NOTE

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the State Historic Preservation Office of the Department of Museums, Library and Arts, shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.

4. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Utility Division and/or Engineering Division a complete set of reproducible 'as built' construction drawings prepared by a civil engineer registered in the State of Nevada.
5. The developer shall be required to participate in any applicable General Improvement District or Special Assessment District formed by Washoe County. The applicable division of the Department of Public Works shall be responsible for determining compliance with this condition.
6. All new utilities shall be placed underground. The County Engineer shall be responsible for determining compliance with this condition.
7. An animal waste management plan shall be prepared prior to the issuance of any building permit for a facility that might require such a plan. The plan must document how the migration of bacteria, nutrients, and other animal waste by-products to surface and ground waters will be prevented. The Department of Development Review shall be responsible for determining compliance with this condition.

STREETS AND TRAFFIC

8. All street construction shall comply, at a minimum, with the requirements for a subdivision within this project. The County Engineer shall be responsible for determining compliance with this condition.
9. The developer shall submit a detailed geotechnical analysis and report for pavement design recommendations to the County Engineer for review and approval. The report shall be based on the estimated traffic loadings for a 20-year design life and shall include assumptions concerning the distribution of trucks, to include project construction truck traffic. The resultant pavement thickness in the geotechnical analysis must be used if the report indicates a structural section that is stronger than minimum is required. The County Engineer shall be responsible for determining compliance with this condition.
10. The minimum pavement structural section shall be 5 inches of asphalt over 8 inches of aggregate base for minor arterials, 4 inches of asphalt over 6 inches of granular base for roadways (private and public) for collector streets, and 3 inches of asphalt over 6 inches of granular base for roadways for local streets. The County Engineer shall be responsible for determining compliance with this condition.

11. Prior to the issuance of the first building permit, two lanes of Whites Creek Lane shall be constructed, to two-lane minor arterial standards as a minimum, from Thomas Creek Road to the project site. The County Engineer shall be responsible for determining compliance with this condition.
12. Prior to the issuance of the first building permit, a second access shall be constructed to the project site to emergency standards. The applicable fire protection agency shall be responsible for determining compliance with this condition.
13. Construction near fault lines shall be as follows:
  - a. Buildings for human occupancy shall be set back from the centerline of fault traces. Setback distances shall be determined by a geotechnical investigation prepared by a Nevada Registered Civil Engineer experienced in geotechnical engineering. The minimum setback shall be 50 feet on each side of the fault line.
  - b. Roadway construction in fault zones and along fault traces shall be reviewed by a Nevada Registered Civil Engineer experienced in geotechnical engineering. Any recommended special construction requirements (e.g., flexible joint connections for utilities) shall be complied with.

The County Engineer shall be responsible for determining compliance with this condition.

14. Asphalt paths or gravel shoulders, located adjacent to private streets shall be privately maintained and funded. The County Engineer shall be responsible for determining compliance with this condition.
15. No at-grade golf cart crossings shall be allowed across any street with 500 ADT or greater. Where possible, crossings should be below the grade of public streets. The County Engineer shall be responsible for determining compliance with this condition.

#### GRADING AND DRAINAGE

16. After approval of the general concept-level storm drain master plan and the final Development Agreement, and prior to approval of any special use permit, a preliminary hydrology report shall be submitted to the County Engineer for approval. This preliminary hydrology report shall be prepared in accordance with county requirements for tentative maps, in conformance with the general concept-level storm drain master plan, and be applicable to the specific tentative map or special use permit being approved.

The report shall include, as a minimum, the locations, points of entry and discharge, flow rates and flood limits of all 10- and 100-year storm flows impacting both on-site and off-site areas and the methods for handling these flows as well as the proposed methods for handling storm water increases due to development. Proposed mitigation measures shall be included for any impacts on existing on-site and off-site properties and facilities. The County Engineer shall be responsible for determining compliance with this condition.

17. Prior to the submittal of any final map or issuance of any grading permit, a final detailed hydrology/hydraulic report for that phase, prepared by a Nevada Registered Engineer, shall be submitted to the County Engineer for approval. The report shall be in substantial compliance with the general concept-level storm drain master plan and contain all final storm drain pipe, ditch and retention pond sizing calculations and mitigation measures for any impacts on existing on-site and off-site properties and facilities. All drainage improvements shall be designed, constructed, and by the District Health Department and the County Engineer. The developer shall arrange for financial assurances, acceptable to the County Engineer, for all or part of these improvements.

Prior to the issuance of a grading permit, the developer shall provide a letter granting a blanket drainage and construction easement to the Southwest Pointe Subdivision that allows the subdivision to drain onto the golf course and to construct detention facilities necessary to accommodate the subdivision-generated stormwaters in mutually agreed-upon locations. The easement shall be submitted with the plans for the final golf course improvements. The County Engineer shall be responsible for determining compliance with this condition.

18. Prior to the approval of a grading permit, a detailed dust control plan shall be prepared and submitted to Air Quality Management of the District Health Department and to the Department of Development Review. The dust control plan shall address, as a minimum, "phased grading" and stabilization methods that include the revegetation, application of palliatives or other District approved methods prior to any grading of new phases, as well as effective street cleaning for any mud or soil tracking to existing paved surfaces, and dust controls on any screening methods or storage piles located on the site.
19. For all projects larger than 5 acres, the developer shall obtain a Stormwater Discharge Permit from the Nevada Division of Environmental Protection and submit a copy to the County Engineer prior to ground-disturbing activity.
20. The developer shall provide pretreatment for petrochemicals, nutrients and other chemicals used for landscaping, and silt for all storm drainage from the site. Systematic cleaning of the streets, parking lots, and catch basins, and control of salt and sanding activities shall to be delineated in the maintenance plan. The County Engineer shall be responsible for determining compliance with this condition.
21. The stormwater discharges from this development that flow to Dry Creek shall be controlled to pre-development flow conditions and will be controlled to prevent water quality degradation of Steamboat Ditch. The developer shall provide drainage structures under Steamboat Ditch that would pass the 10-year frequency storm or demonstrate that there will not be any water quality degradation in Steamboat Ditch. The County Engineer shall be responsible for determining compliance with this condition.
22. All street crossings of Thomas and Dry Creeks shall be designed to pass the 100 year flood flows without obstruction or overtopping of the roadway. Erosion protection shall be provided based upon the recommendation of the geotechnical report. The County Engineer shall be responsible for determining compliance with this condition.

23. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures and rip-rap shall be used to prevent erosion at the inlets and outlets of all pipe culverts. The District Health Department and the County Engineer shall be responsible for determining compliance with this condition.
24. Prior to issuance of a grading permit for the golf course and/or final map, a final wetlands determination must be made and approved by the Army Corps of Engineers and the approval letter provided to the Department of Development Review.
25. Prior to issuance of a grading permit for the golf course or approval of the final map, the developer shall obtain from the United States Army Corps of Engineers a 404 permit for wetland and dredge and fill for all roadway crossing of Thomas and Dry Creeks, or a letter from the COE indicating that a 404 permit is not required and a copy submitted to the County Engineer.
26. The developer shall submit to the District Health Department a letter approving the proposed methods of erosion control and soil stabilization from the Washoe-Storey Conservation District.
27. Prior to the issuance of a grading permit for the golf course, a golf course management plan shall be prepared that documents how the migration of fertilizers, pesticides, herbicides, and fungicides to surface and ground waters will be prevented. A surface and ground water sampling program shall be implemented to demonstrate that migration is not occurring and commits to modifying practices in the event that any of the above materials are detected. The Department of Development Review shall be responsible for determining compliance with this condition.

#### WATER AND WASTEWATER

28. The sanitary sewer collection system and water system facilities, with the exception of the golf course and common area irrigation systems, must be offered for dedication to Washoe County. The Utility Division shall be responsible for determining compliance with this condition.
29. The developer shall construct or provide the financial assurances for the construction of the water and sewer system facilities. The financial assurances must be in a form and amount that is satisfactory to the Utility Division.
30. Fees for plan checking and inspection shall be paid in accordance with Washoe County ordinance. The Utility Division shall be responsible for determining compliance with this condition.
31. Easements for all water and sewer utilities shall be offered for dedication to Washoe County. The Utility Division shall be responsible for determining compliance with this condition.
32. No "certificate of occupancy" shall be issued until the water and sewer facilities have been completed and accepted for operation and maintenance. The Utility Division shall be responsible for determining compliance with this condition.

33. If required and in accordance with the Washoe County Utility Division policies for the Southwest Truckee Meadows, water rights shall be dedicated to Washoe County. Prior to acceptance, the water rights must be in good standing with the State of Nevada Division of Water Resources and must reflect a point of diversion, place and manner of use acceptable to the Utility Division.
34. Responsibility for design of wells, pump structure, controls, telemetry, and appurtenances, storage tanks, and transmission lines to the edge of the subdivision, all necessary to provide water service to the project, will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.
35. Water quality results from a State of Nevada-certified laboratory for new water sources shall be submitted to the Utility Division. The water quality sampling and testing shall be in compliance with the current State of Nevada Regulations for Public Water Systems, NAC 445.
36. If the water quality of the wells does not meet the secondary or the primary standards, as defined by NAC 445, water treatment facilities must be on-line and functioning prior to issuance of any building permits. The Utility Division shall be responsible for determining compliance with this condition.
37. If a supplemental water source is required, evidence that an adequate source has been procured by the developer/water purveyor shall be submitted to the Utility Division for their review and approval.
38. Any wells on the property not in use for production or monitoring purposes, shall be properly abandoned in accordance with State Regulations governing Water Wells and Related Drilling. The Utility Division shall be responsible for determining compliance with this condition.
39. The developer shall provide access to the existing monitoring wells. In the event access is no longer available, the developer shall construct new wells. The Utility Division shall be responsible for determining compliance with this condition.
40. Responsibility for design of any pump stations and interceptors to provide sewer service to the project will rest with the Utility Division. The Utility Division may either, provide such design in-house, or select an outside consultant. When an outside consultant is to be selected, the Utility Division and the developer shall jointly select that engineer. Funding of design and infrastructure in excess of the minimum requirements or that to serve the development as determined by generally accepted engineering calculations, shall be the responsibility of Washoe County. Washoe County shall either participate monetarily at the time of design and/or shall credit an appropriate number of service hookups to the developer at the time of recordation of the final map.

41. The sewer "privilege connection fee" must be paid for each lot when required by the Washoe County Utility Division since it is not anticipated that there will be any additional major infrastructure needed to serve this development. The Utility Division shall be responsible for determining compliance with this condition.

#### FIRE PROTECTION

42. The plans submitted with a building permit application shall show evidence of compliance with the recommendations of the applicable fire protection agency. Those concerns are fire flows, fire hydrant number and location, access, sequential phasing of firebreaks during development, permanent firebreaks, minimum defensible space, use of fire resistant construction and/or roof material, sprinklering of structures, and spark arrestors in chimneys. Access and fire flows shall be addressed prior to the introduction of any combustible materials to the site. The fire protection agency shall be responsible for determining compliance with this condition.
43. The developer shall minimize grading to the maximum extent possible in the area around the critical mule deer habitat in order to preserve the existing browse shrubs. The Department of Development Review, in conjunction with the applicable fire protection agency, shall be responsible for determining compliance with this condition.

#### LANDSCAPING

44. Detailed landscaping and irrigation plans for the village commercial center, club house, golf course, golf driving range, equestrian center, or other non-residential uses requiring special use permit review shall be submitted prior to the issuance of a building permit for the particular use.
45. A buffer shall be provided between the fairways/greens and all creeks. The setback of the buffer shall comply with 100.200(e) of the Uniform Building Code Section 7011 amended. The Department of Development Review shall be responsible for determining compliance with this condition.

RE: Montréaux Fencing Plan

Dear Don:

We will be unable to send a representative to the Design Review Committee meeting on May 9th. It is our understanding that the Montréaux Subdivision's fencing plan will be one of the issues discussed at this meeting. We have met with Mr. Jeffrey Codega regarding this subject. We have had the opportunity to review the fencing plan in a map dated March 25, 1996.

To re-iterate earlier comments relative to the Montréaux project, we want all parties to understand that some deer and other wildlife will be attracted to the property. Deer and other wildlife will cause problems for the residents.

The perimeter fence has eleven locations where specifications are delineated as a 42" maximum height with regular intervals of 18" gaps between ground and bottom rail. This design is easier for mule deer to negotiate, thus facilitates ingress/egress through the Montréaux property. The ground-level gaps also allow fawns to pass through. We recommend that another 42" section be placed in the southwest corner of the "Galena Trail/West Edge" fence in the vicinity of the Gletscher Circle cul-de-sac.

Disturbed deer will run along the taller fence until they see the lower barrier. Individual lot fences would impede the deers' ability to run along the perimeter until encountering one of these breaches. We therefor recommend against lot fences around the property perimeter. Conflicts will arise as homeowners are faced with the fact that deer will eat their ornamental plants and gardens. A ban on lot fencing would eliminate one method to deal with deer depredation for these lot owners. We suggest that the developers so inform the potential buyers.

Mr. D. Sumner Young  
May 1, 1996  
Page 2

We understand that fencing codes specify that the width between pickets be no greater than four inches. There is a possibility that some fawns may become entrapped within the pickets, particularly if they are panicked.

The six foot high fence on either side of the Jones Creek Trail may present a problem to deer as well. Adult deer can clear such a fence under certain circumstances. However, should deer enter the trail corridor and encounter hikers and/or dogs, they may become frightened and injure themselves against the tall obstacle.

Deer mortalities will probably be few due to the fact that the area's population has been decimated as a result of habitat fragmentation in recent years. Consequently, individual losses will not be significant from a population management perspective. However, individual losses will create a public relations liability for our three parties.

Obviously, the best strategy for mule deer is the one our agency has consistently espoused - no development. However, economic and political realities often prevail over wildlife's best interests. Although security and demarkation are the principle purposes of Montréaux's fencing plan, the design offers some consolation by allowing free movement of deer and other wildlife.

If you have any questions, please feel free to contact supervising habitat biologist, Craig Mortimore at 423-3171.

Sincerely,

WILLIAM A. MOLINI, ADMINISTRATOR

RE: Archaeological/Historical Survey for Southwest Pointe  
(Development Agreement Case No. DA1-1-93)

Dear Mr. James:

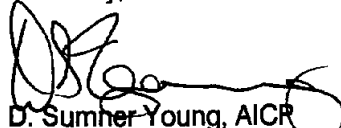

In accordance with your earlier request that Washoe County, rather than the applicant or consultant, begin forwarding requested surveys to your office, please find enclosed the Cultural Resources Inventory from Kautz Environmental Consultants, Inc. Your office had requested the referenced survey upon receiving the following case description from our agency:

Applicant/Property Owner: Dingman Investments/Redfield Land Trust

Request (as presented in 1993): To develop a residential community including 1,090 homesites with common open space, a water delivery system, two golf courses with related recreational facilities, a day care facility, an equestrian center, and a commercial village center. The total acreage of the project is  $\pm 3,171.6$  acres. The project entrance is proposed west of the intersection of Zolezzi Lane and Thomas Creek Road. The property is designated Low Density Suburban (LDS), Low Density Rural (LDR), Medium Density Rural (MDR), High Density Rural (HDR) and General Rural (GR) and situated in Sections 3, 10, 13, 14, 15, 22, 23, 24, 26, and 27, T18N, R19E, MDM, Washoe County, Nevada. (APN: 49-010-04, 49-010-10 and 41-030-12)

Please let us know within six weeks from the date of this letter whether the enclosed survey has been found to be acceptable or not. After that time, Washoe County will assume no response to be an acceptance of the survey and with the understanding that permits may be issued. If you have any question, please contact Don Young at the letterhead address or by telephone at 328-3620.

Sincerely,

TO: Don Young, Department of Development Review  
FROM: Kristine R. Klein, Engineering Division  
SUBJECT: Amendment to Southwest Pointe Development Agreement Case No. DA9-1-93

I have revised the recommendations regarding Condition 26a in my April 10, 1996, memo. Condition 26a should read as follows:

Private Common Driveways - Serving 4 or less lots, pavement width 20 feet; serving 5 or more lots, pavement width 22 feet; no parking either side. Curb returns shall have a minimum face of curb radius of 20 on local streets and 25 feet on collector streets. Private common driveway locations will be shown on all tentative maps. Private common driveways will line up with proposed street intersections where possible and will comply with street intersection offset requirements. Single lot driveway access will not be allowed onto streets on which the average daily traffic exceeds 2000.

RE: Southwest Pointe Development Agreement Amended Condition 29

Dear Bryan:

We have reviewed your proposed revision, submitted on April 17, 1996, to Condition 29 of the Southwest Pointe Development Agreement. Part a. of the condition is acceptable with the addition that the Civil Engineer be experienced in geotechnical engineering. We have rewritten part b. such that it requires input from an engineer prior to revising any fault setbacks. Acceptable wording to Condition 29 is as follows:

29. Setbacks from faultlines shall be as follows:

a. Building for human occupancy shall be setback from the centerline of fault traces. Setback distances shall be determined by a Geotechnical Investigation prepared by a Nevada Registered Civil Engineer experienced in geotechnical engineering. The minimum setback shall be 50 feet on each side of the faultline.

b. Roadway setbacks from faults for a portion of the site have been specified in reports by Harding Lawson dated August 16, 1993, and November 18, 1993. Any changes to the roadway setbacks must be substantiated by a written report from Harding Lawson or another Nevada Registered Civil Engineer experienced in geotechnical engineering and shall be approved by the County Engineer. Roadway setbacks from faults on the remaining portions of the site must be evaluated by a new Geotechnical Investigation prepared by a Nevada Registered Civil Engineer experienced in geotechnical engineering.

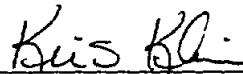

RE: Southwest Pointe Development Agreement Amended Condition 29  
April 19, 1996

RE: Southwest Pointe Development Agreement Amended Condition 29

4/30/96 - Phone msg. from  
 Bryan. Rewording is OK

Dear Bryan:

We have reviewed your proposed revision, submitted on April 17, 1996, to Condition 29 of the Southwest Pointe Development Agreement. Part a. of the condition is acceptable with the addition that the Civil Engineer be experienced in geotechnical engineering. We have rewritten part b. such that it requires input from an engineer prior to revising any fault setbacks. Acceptable wording to Condition 29 is as follows:

29. <sup>Construction near</sup> ~~Setbacks from~~ faultlines shall be as follows:

a. Building for human occupancy shall be setback from the centerline of fault traces. Setback distances shall be determined by a Geotechnical Investigation prepared by a Nevada Registered Civil Engineer experienced in geotechnical engineering. The minimum setback shall be 50 feet on each side of the faultline.

~~b. Roadway setbacks from faults for a portion of the site have been specified in reports by Harding Lawson dated August 16, 1993, and November 18, 1993. Any changes to the roadway setbacks must be substantiated by a written report from Harding Lawson or another Nevada Registered Civil Engineer experienced in geotechnical engineering and shall be approved by the County Engineer. Roadway setbacks from faults on the remaining portions of the site must be evaluated by a new Geotechnical Investigation prepared by a Nevada Registered Civil Engineer experienced in geotechnical engineering.~~

b. Roadway construction in fault zones and ~~along~~ along fault traces shall ~~comply with the recommendations~~ be reviewed by a Nevada Registered Civil Engineer experienced in geotechnical engineering. Any <sup>recommended</sup> special construction requirements (i.e. flexible joint connections for utilities) shall be complied with.

"To Protect and To Serve"

DEPARTMENT OF PUBLIC WORKS  
ENGINEERING DIVISION

April 10, 1996

1001 E. NINTH STREET  
POST OFFICE BOX 11130  
RENO, NEVADA 89520  
PHONE: (702) 328-2041  
FAX: (702) 328-3699

TO: Don Young, Department of Development Review  
FROM: Kristine R. Klein, Engineering Division  
SUBJECT: Amendment to Southwest Pointe Development Agreement Case No.  
DA9-1-93

The following comments and recommendations are based on a review of the amended General, Traffic and Drainage Conditions and the proposed reorganization of these conditions, submitted by CFA, Inc.

## AMENDED CONDITIONS

Condition 20 should be revised such that the Special Assessment District is only responsible for the roadway costs associated with a standard County street section. Any costs due to items upgraded above County standards (increased right-of-way width, landscaping, etc.) by Southwest Pointe shall be the responsibility of the Southwest Pointe developer.

The requirement in Condition 21, that all construction traffic use Whites Creek Lane from Wedge Parkway, should be tied to the 35th building permit, not the 85th building permit, in accordance with the original Conditions of Approval.

The following revisions and clarifications refer to proposed sections a, b, e, f, g and h of Condition 26.

- a. The plan of the private common driveway street section should be revised to show the appropriate face of curb return radii of 20 feet on local streets and 25 feet on collector streets. Acceleration/deceleration tapers shall be provided if the private common driveway intersects a collector with more than 2000 ADT.
- b. The reference to the original 41 foot right-of-way should be deleted.
- e. If private common driveways will access this street section, the condition should be clarified to allow access from private common driveways, but not individual residential driveways.

SUBJECT: Amendment to Southwest Pointe Development Agreement Case No.  
DA9-1-93

April 10, 1996

Page Two

- f. A 19 foot pavement width on either side of the median is required in the vicinity of the clubhouse, or special event parking management must be adequately addressed.
- g. The "24 foot roadway section" should be revised to a "24 foot pavement width". "No residential driveway access allowed" should be added to the condition.
- h. "No residential driveway access allowed" should be added to the condition. The median width and right-of-way width for this street section has been revised since the Special Use Permit for the Southwest Pointe Elementary School was approved. The developer shall provide an agreement from the School District stating that they will match the Whites Creek Lane public street section proposed by Southwest Pointe.

The sign lettering in Condition 43 ("PRIVATE STREET NOT MAINTAINED BY WASHOE COUNTY") shall be in upper case letters.

REORGANIZATION OF DEVELOPMENT AGREEMENT CONDITIONS

The final development agreement is required to address maintenance of the parking areas, lighting, landscaping, infrastructure, utilities and recreational facilities. All conditions that deal with maintenance responsibilities and maintenance programs should remain under the Development Agreement Conditions. Conditions relating to issues that will be addressed in the Development Agreement, such as final map recording time frames and street sections, should also remain under the Development Agreement Conditions. It is recommended that the following conditions stay under the Development Agreement Conditions:

Development Agreement General Conditions

X 4. CC&Rs

Development Agreement Phasing

13. Final Map Recording Time Frames

Development Agreement Traffic

X 22. Street Maintenance Program

SUBJECT: Amendment to Southwest Pointe Development Agreement Case No.  
DA9-1-93

April 10, 1996

Page Three

- 26. Street Sections
- X 27. Median Landscaping Maintenance
- X 28. Asphalt Path Maintenance
  
- Development Agreement Drainage
- X 49. Drainage Facilities Maintenance

Conditions 27, 28 and 49 above deal with maintenance and design issues. Although the maintenance portion of these conditions should remain under the Development Agreement Conditions, the design portion could be moved to the Tentative Map Conditions.

#### REORGANIZATION OF TENTATIVE MAP CONDITIONS

The original Tentative Map Condition 6, regarding the structural section for an 80 foot public right-of-way, should be included in the reorganized Tentative Map Conditions, and it should be revised to apply to all 120 foot (public or private) rights-of-way.

The second sentence of the original Final Map Drainage Condition 37 should be incorporated into Final Map Drainage Condition 38. The remainder to the original Condition 37 is already covered in Condition 38.

The second paragraph of the Development Agreement Drainage Condition 50, as retyped by CFA, Inc., under Tentative Map Conditions, is not part of the original condition and should be deleted.

#### REORGANIZATION OF SPECIAL USE PERMIT CONDITIONS

The second paragraph of the Development Agreement Drainage Condition 50, as retyped by CFA, Inc., under Special Use Permit Conditions, is not part of the original condition and should be deleted.

A condition should be added to the Special Use Permit Conditions that states: "All street construction shall be in compliance with the applicable tentative map conditions."

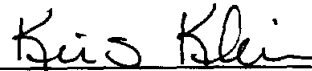

A condition should be added to the Special Use Permit Conditions that states: "For all projects larger than 5 acres, the

SUBJECT: Amendment to Southwest Pointe Development Agreement Case No.  
DA9-1-93

April 10, 1996

Page Four

developer shall obtain a Stormwater Discharge Permit from the Nevada Division of Environmental Protection, and a copy of said permit shall be submitted to the County Engineer prior to construction."

**SUBJECT: AMENDMENT TO DEVELOPMENT AGREEMENT CASE NO. DA9-1-93**

Dear Mike:

We received no materials to review regarding the subject application. Based on descriptions included in the memo to reviewing agencies, staff has the following recommendation:

RECOMMENDATION:

Due to limited capacity on Zolezzi Lane, direct access to the subject project should be provided by the future White's Creek Arterial. Access to Zolezzi should only be permitted for emergency or temporary purposes.

DISCUSSION:

Zolezzi Lane is designated a collector in the Area Plan for the Southwest Truckee Meadows (SWTM). With its current designation, Zolezzi Lane will not accommodate traffic from the subject project and function within adopted levels of services. Previous analysis has concluded that direct access from the subject project may require that Zolezzi Lane be upgraded to a four-lane arterial in the SWTM Area Plan.

Thank you for the opportunity to review the above application. Please feel free to contact Joe Sikorski of my staff at 348-0480 if you have any questions or comments.

Sincerely,

Jack Lorbeer  
Principal Planner

Don,  
Engineering did not get a copy of the amended conditions to review, and Mike B. said there wasn't a packet to distribute. Does Engineering need to comment for this month's agency review? Were the only Engineering conditions being amended the Traffic items we have already addressed?

Re: DA9-1-93 ( Southwest Pointe )

The Sierra Fire Protection District Prevention Bureau has reviewed the request to amend portions of their agreement. The changes would have to meet the intent of the fire codes and our conditions of approval for the development. Street and access changes would need to be reviewed.

Please advise if further information is received in your office on what kind of modifications are planned.

## Appendix C

### Statement of Compliance for Tentative Maps & Special Use Permits

This completed Statement of Compliance shall accompany all tentative map and special use permit applications. The compliance statement must be signed and approved by Southwest Pointe Partners prior to an application being submitted to Washoe County. It has been agreed that all tentative maps will be reviewed by the Design Review Committee.

Approval by Southwest Pointe Partners does not imply that the project is in compliance with all applicable county codes, ordinances, or other regulations. In instances where the tentative map or special use permit is not in compliance with the Final Development Agreement, the Director of Development Review shall determine if the modification is administrative or if it requires an amendment of the Final Development Agreement.

Reviewed and approved by Southwest Pointe Partners on this \_\_\_ day of \_\_\_\_\_, 19\_\_.

By: \_\_\_\_\_  
General Partner  
Southwest Pointe Partners

Mailing Address: \_\_\_\_\_

Telephone: \_\_\_\_\_ FAX: \_\_\_\_\_

# PROJECT DESCRIPTION

## 1. For Tentative Map Applications:

### a. Number of Proposed Lots:

12,000 square feet \_\_\_\_\_  
1/2 acre \_\_\_\_\_  
1 acre + \_\_\_\_\_  
Total \_\_\_\_\_

### b. Explain any difference in number and type from that identified in the Final Development Agreement.

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

### c. Acres:

Residential Lots: \_\_\_\_\_  
Streets: \_\_\_\_\_  
Common Area: \_\_\_\_\_  
Open Space: \_\_\_\_\_  
Other: \_\_\_\_\_

### d. Density:

Gross: \_\_\_\_\_ d.u./ac  
Net: \_\_\_\_\_ d.u./ac

### e. In neighborhoods with 12,000 square foot and 1/2 acre lots, have off-site parking areas been provided at a ratio of one space for every three homes and within 500 feet of homes? (Tentative Map Condition #34)

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

2. **For Special Use Permits:**

Explain the project (e.g., square footage, number of parking spaces, landscaping, architecture)

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

3. What, if any support facilities or major infrastructure components are proposed as a part of this project?

---

---

---

---

---

---

---

---

---

---

# INFRASTRUCTURE/SERVICES

## Transportation

1. Estimate the average daily traffic. On the tentative map, identify the average daily traffic on each street within the boundary of the tentative map. (Tentative Map Condition #22)

---

---

---

---

---

---

---

2. Explain any recommendations for geometric design -- e.g., left-turn storage capacity, sight distance, minimum required turning radius. (Tentative Map Condition #22)

---

---

---

---

---

---

---

3. Are the street sections consistent with the Final Development Agreement? (Tentative Map Condition #22)

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, explain the differences and justify their use.

---

---

---

4. Do the cul-de-sacs have a minimum pavement radius of 43.5 feet to front face of curb or 45 feet to the edge of pavement? (Tentative Map Condition #23)

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, explain the differences and justify their use.

---

---

---

5. Has an emergency access road been shown at the end of all cul-de-sacs that are longer than 1,500 feet? (Tentative Map Condition #28)

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, explain the differences and justify their use.

---

---

---

6. Have any at-grade crossings for golf carts been shown on streets with 500 or more ADT? (Tentative Map Condition #33)

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, explain why.

---

---

---

---

7. Has a detailed pedestrian circulation plan been submitted? (Development Agreement Condition #13)

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, explain why not.

---

---

---

---

**Water Supply**

1. What is the estimated water right requirement for this project?  
\_\_\_\_\_ acre feet/year

2. Explain how the water right requirements will be met for this project.

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**Sewer Service**

1. Explain how sewer service will be provided to this project?

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

2. How much sewage will be generated by this project?

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**Fire Protection**

1. What is being done to comply with the requirements of the Nevada Division of Forestry? (Tentative Map Condition #83 and Special Use Permit Condition #42)

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**Open Space/Recreation**

1. Will any open space be offered for dedication as part of this project?

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If yes, how many acres are being dedicated, when will the land be dedicated, and what improvements will be located in the open space (e.g., trails, emergency access roads)?

---

---

---

---

---

---

---

---

2. What, if any, private community recreation facilities are proposed? How will these facilities be maintained?

---

---

---

---

---

---

---

---

# DEVELOPMENT STANDARDS

## Community Design Guidelines

1. Are any neighborhood entries proposed?

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If yes, describe the materials, height, style, color, etc. Show the location(s) on the tentative map or site plan.

---

---

---

---

---

---

2. Is the entry(s) design consistent with the Development Standards Handbook (Chapter II)? \_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

---

3. Are any community fences and/or walls proposed? \_\_\_\_\_ Yes \_\_\_\_\_ No

If yes, describe the materials, height, style, and color. Show the location on the tentative map or site plan.

---

---

---

---

---

4. Are the fencing and/or walls consistent with the community design standards in the Development Standards Handbook (Chapter II)?

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

---

5. Is any community lighting proposed? \_\_\_\_\_ Yes \_\_\_\_\_ No

If yes, describe the location(s), materials, height, style, and lighting levels.

---

---

---

---

---

6. Is the community lighting consistent with the Development Standards Handbook (Chapter II)?

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

---

7. Are any signs proposed? \_\_\_\_\_ Yes \_\_\_\_\_ No

If yes, describe the location, size, materials, and color.

---

---

---

---

---

8. Are the signs, if any, consistent with the Development Standards Handbook (Chapter II)?

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

9. Are any private trails proposed? \_\_\_\_\_ Yes \_\_\_\_\_ No

If yes, show the location on the tentative map or the site plan for the special use permit.

---

---

---

---

---

---

10. Are the private trails, if any, consistent with the Development Standards Handbook (Chapter II)?

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

---

**Site Development Guidelines**

1. What are the proposed building setbacks?

---

---

---

---

2. For residential units, are the building setbacks consistent with the Development Standards Handbook (Chapter III)?

Yes  No  Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

---

3. Have the setbacks from any potentially active fault traces been identified on the tentative map or site plan for the special use permit?

Yes  No  Not Applicable

If no, explain why not.

---

---

---

---

---

---

4. What are the minimum lot widths?

---

---

---

---

---

5. Are the widths consistent with the Development Standards Handbook (Chapter III)?

Yes  No  Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

6. Explain the grading. (e.g., have the slopes been rounded to blend into the natural contours? Has the grading been minimized?) Explain the erosion control techniques (temporary and permanent) that will be used.

---

---

---

---

---

---

---

---

---

---

---

---

7. In areas identified as critical mule deer habitat, has the grading been minimized to the maximum extent possible? (Tentative Map Condition #83)

Yes  No  Not Applicable

If no, explain why not.

---

---

---

---

8. Explain how the drainage is being handled.

---

---

---

---

---

---

---

---

---

9. Is any lot perimeter fencing proposed?

\_\_\_\_\_ Yes \_\_\_\_\_ No

If yes, describe the materials, height, style, and color. Show the location on the tentative map.

---

---

---

---

---

10. Are the fencing and/or walls consistent with the site development standards in the Development Standards Handbook (Chapter III)?

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

---

## Landscape Design Guidelines

1. For a tentative map application, is any common area landscaping proposed? \_\_\_\_\_ Yes \_\_\_\_\_ No

For a special use permit application, is any on-site and/or common area landscaping proposed? \_\_\_\_\_ Yes \_\_\_\_\_ No

If yes, describe the landscaping (e.g., species, irrigation, drought tolerant? amount of turf). Show the locations on the tentative map or site plan for the special use permit.

---

---

---

---

---

---

---

2. What entity will maintain the landscaping identified in the previous question?

---

---

---

---

---

3. Is the landscaping described in question #1 consistent with landscape design guidelines in the Development Standards Handbook (Chapter V)?

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

---

---

---

4. Describe the revegetation techniques that will be implemented

---

---

---

---

---

---

---

---

5. What measures will be used to control fugitive dust during construction?

---

---

---

---

---

---

---

---

6. Are any fire fuel breaks required beyond the property line of the residential lots?

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If yes, show the locations on the tentative map.

7. Is the design of the fire fuel breaks consistent with the guidelines identified in Chapter V of the Development Standards Handbook?

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

---

---

---

---

8. Explain the water conservation techniques that will be used.

---

---

---

---

---

---

---

---

9. Is a 25-foot landscaped buffer shown between the lots and the collector and minor arterial streets? (Tentative Map Condition #85)

Yes  No  Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

---

---

---

---

10. Is a 50-foot buffer shown between the structure and any riparian vegetation? (Tentative Map Condition #51)

Yes  No  Not Applicable

If no, describe any changes and explain the reasons.

---

---

---

---

---

---

---

---

11. Are there any delineated wetlands or Waters of the United States shown within the boundary of the tentative map or on the site plan for the special use permit?

\_\_\_\_\_ Yes \_\_\_\_\_ No

If yes, shown the location on the tentative map or site plan and explain how these features are being avoided.

---

---

---

---

---

## Appendix D

### Statement of Compliance for Final Maps

This completed Statement of Compliance shall accompany all final maps. Conditions #1 through #85 represent a listing of the basic Conditions of Approval that are applicable to all tentative maps. This list shall be augmented with the site specific conditions of approval that are added to each tentative map.

**Statement of Compliance for Final Maps (TM Case No. \_\_\_\_\_ )**

No.	Conditions of Approval	Initial Submittal			Final Submittal			Comments/Status
		Yes	No	N/A	Yes	No	N/A	
1	Time Limitations							This condition requires no action
2	Comply with all county requirements							This condition requires no action
3	Final map in substantial conformance w/ tentative							This condition requires no action
4	Final map conformance statement							
5	CC&Rs							
6	Archaeological survey							
7	Archaeological note on plans							
8	SAD/GID							
9	"As-built" construction drawings							After construction is completed
10	Improvement/Grading Plans							
11	Soil boring logs							
12	New utilities underground							
13	Postal Service							
14	Holocene faults on final map							
15	Planning Commission certificate							

**Statement of Compliance for Final Maps (TM Case No. \_\_\_\_\_)**

No.	Conditions of Approval	Initial Submittal			Final Submittal			Comments/Status
		Yes	No	N/A	Yes	No	N/A	
16	Geotechnical report on pavement							
17	Whites Creek Road - two lanes							Compliance tied to 1st building permit
18	Construct secondary access							Compliance tied to 1st building permit
19	Whites Creek Road - remainder							Compliance tied to 35th building permit
20	Pavement structural section							
21	Street maintenance program (CC&Rs)							
22	Street sections/geometric design							
23	Roadway grades							
24	Bldg setbacks and roadway construction near faults							
25	Cul-de-sac design							
26	Design and maintenance of landscaped medians							
27	Temporary turnarounds							
28	Design of emergency access road							
29	Location of emergency access roads							
30	Asphalt paths - design and maintenance							

**Statement of Compliance for Final Maps (TM Case No. \_\_\_\_\_ )**

No.	Conditions of Approval	Initial Submittal			Final Submittal			Comments/Status
		Yes	No	N/A	Yes	No	N/A	
31	Maintenance of asphalt paths and gravel shoulders							
32	Street lights							
33	Golf cart crossings							
34	Residential on-site parking areas							
35	Street design around security gates							
36	Private street signs							
37	Street names							
38	Preliminary hydrology report							Submitted with tentative map
39	Final hydrology/hydraulic report							
40	Maintenance plan for drainage facilities							
41	100-year floodplain boundaries and elevations							
42	Stormwater discharge permit							
43	Pre-treatment for petrochemicals, etc. Maintenance plan for streets, catchbasins, etc.							
44	Final wetlands determination							
45	Corps of Engineers 404 Permit							

**Statement of Compliance for Final Maps (TM Case No. \_\_\_\_\_)**

No.	Conditions of Approval	Initial Submittal			Final Submittal			Comments/Status
		Yes	No	N/A	Yes	No	N/A	
46	Design of street crossings of Thomas & Dry Creeks							
47	Design of inlets & outlets of all drainage structures							
48	Stormwater discharge							
49	Dust control plan							
50	Erosion control and soil stabilization plan							
51	Buffer next to riparian vegetation							
52	Individual lot drainage							
53	Financial assurances for the construction of water and sewer facilities							
54	Fees for plan checking and inspection							
55	Easements for water and sewer utilities							
56	Completion and acceptance of water and sewer facilities							Compliance tied to C of O
57	Offer of dedication for sewer and water facilities							
58	Letter from NDEP							
59	Fees for water and wastewater facilities plan							
60	Water rights dedication							

**Statement of Compliance for Final Maps (TM Case No. \_\_\_\_\_)**

No.	Conditions of Approval	Initial Submittal			Final Submittal			Comments/Status

Re: Assessment District Petition

Dear Katy:

Enclosed please find the Petition for the formation of a developer assessment district regarding Southwest Pointe infrastructure. The Developer is interested in proceeding with the steps outlined in the Guidelines. Please let me know how you wish to proceed.

Sincerely,

ROBERT M. SADER

SPECIAL ASSESSMENT DISTRICT PETITION

The undersigned, constituting all of the property owners or developers proposed to be assessed in the proposed Washoe County, Nevada Southwest Pointe Special Assessment District, do hereby petition the Board of County Commissioners of Washoe County, Nevada to create a special assessment district and to assess all of the property of the undersigned within that District as described in the attached Exhibit "A", for the cost incurred in that special assessment district, which shall be a sum less than \$10,000,000.00, for the purpose of construction and installing all or a portion of the following:

1. Whites Creek Lane from Southwest Pointe (the "Project") to Wedge Parkway, including landscaping and pedestrian/bike path;
2. the County-owned nonpotable water transmission lines and pump stations necessary to serve the Project, including acquisition of creek water rights;
3. the County-owned potable water system facilities (well facilities, main transmission lines and storage tanks); and
4. County-owned landscaping and trails/paths on public right-of-ways (if any) within the Project.

The undersigned represent that they will file with the County Manager, in accordance with County's special assessment guidelines dated February, 1992, (the "Guidelines"), an application which contains sufficient information and exhibits to demonstrate that a proposed district will comply with parts A to F of the Guidelines, or will otherwise be acceptable to the County. The undersigned represent that they

will post a letter of credit, surety bond or other form of security for payment of any costs that the County may incur in connection with the District pursuant to paragraph F of the Guidelines. A general description of the proposed property to be assessed and description of the project is attached to this Petition as Exhibit "A".

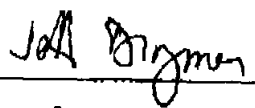

The undersigned respectfully request that the County Commissioners authorize staff to negotiate with the undersigned for a development and financing agreement with respect to the proposed Project and the proposed District. If acceptable terms are negotiated, those documents will be presented to the Board for its consideration, together with an ordinance creating the assessment district, ordinance levying assessments, and ordinance authorizing the issuance of bonds and associated resolutions.

Dated this 30 day of MAY, 1996.

**Appendix C**  
**STATEMENT OF COMPLIANCE**  
**for**  
**TENTATIVE MAPS & SPECIAL USE PERMITS**

This completed Statement of Compliance shall accompany all tentative map and special use permit applications. The compliance statement must be signed and approved by the Architectural and Landscape Control Committee (ALCC) prior to an application being submitted to Washoe County.

Approval by the ALCC does not imply that the project is in compliance with all applicable county codes, ordinances, or other regulations. In instances where the tentative map or special use permit is not in compliance with the Final Development Agreement, the Director of Development Review shall determine if the modification is administrative or if it requires an amendment of the Final Development Agreement.

Reviewed and approved by the Architectural and Landscape Control Committee on this \_\_\_ day of \_\_\_\_\_, 19\_\_.

# PROJECT DESCRIPTION

1. For Tentative Map Applications:

a. Number of Proposed Lots:

12,000 square feet \_\_\_\_\_  
1/2 acre \_\_\_\_\_  
1 acre + \_\_\_\_\_  
Total \_\_\_\_\_

b. Explain any difference in number and type from that identified in the Final Development Agreement.

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

c. Acres:

Residential Lots: \_\_\_\_\_  
Streets: \_\_\_\_\_  
Common Area: \_\_\_\_\_  
Open Space: \_\_\_\_\_  
Other: \_\_\_\_\_

d. Density:

Gross: \_\_\_\_\_ d.u./ac  
Net: \_\_\_\_\_ d.u./ac

d. In neighborhoods with 12,000 square foot and 1/2 acre lots, have off-site parking areas been provided at a ratio of one space for every three homes and within 500 feet of homes? (Tentative Map Condition #34)

\_\_\_\_\_ Yes \_\_\_\_\_ No \_\_\_\_\_ Not Applicable

2. **For Special Use Permits:**

- a. Explain the project (e.g., square footage, number of parking spaces, landscaping, architecture)

---

---

---

---

---

---

---

---

---

---

3. What, if any support facilities or major infrastructure components are proposed as a part of this project?

---

---

---

---

---

---

---
